KR4WM made the best remark when he commented that you should elmer your kids or grandkids so that someone in your family becomes a ham and knows what you have. I have a wife and two sons who are hams and are intimately familiar with the value of OUR gear. I have no need to worry about the disposition of the gear when I'm gone as it will be used long after I'm planted.

While my wife could handle the ebaying of my junk, I don't think that is something I should leave her with.
With a baby to arrive in November, I hope I have many more years left on this chunk a dirt, but I'm already putting stuff I just don't use on a shelf and selling it off.
If you are 70, and have a basement full of stuff with no plans....shame on you!!
If you are 70 and married.. shame on you, you rat bastard!
Even if someone has to plow that junk out and into a landfill...thats a job!!
Sell it all now, and get a nice hot tub or something.

What more do you need than a single 756pro and a 2 meter FM CB??

We call them E-Bay Trolls. Wanna find one real quick advertise Collins equipment on QTH.COM or the others and you will quickly be contacted for your wares.

His favorite ploy is to tell you he would like to have it but can't raise the money for a weeks or so or the end of the months. He seems like a kindly old gentleman so you think about it and the thought occurs to you this guys is retired and on social security and really has longed for the Collins line so since you really aren't parting with this for the money you send it on to him as a philanthropic gesture and are willing to wait until his social security check comes so he can get groceries and with enough scrounged he will pay you.

But alas you recieve a phone call from the kind old gent and he tells you of blemishes on it that somehow escaped your eyesight and offers you much less than what you asked for.

Not really being worth your effort to have him send it back and absorbing the 35.00 dollars each way to ship it you settle for what he offers you.

Bet you find your philanthropic trophy on E-Bay just as soon as he cleanes it up and shines it and sells it for 3 times what you asked.

Think it don't happen well I'm here to tell you it happend to me and the kindly old gent told me I was stupid for sending it to him unpaid.

How's that for a story. Sadly a true story.

The man that did this to me lives in Branson Missouri so if you recieve a call like that from Branson remeber my story.

The problem for some of you is that you told the XYL you only paid $200 for the 756pro2. How's she suppose to know what it's worth?!

Besides fending off the vultures another reason to do an inventory and take pictures is in case of a loss by theft, fire or some disaster. Keep the list off site if possible and check with your insurance company to see what your coverage is. Many folks think they are insured but are not.. I know from experience on this.

I have been thru two or three "estate" sales and it is a total pain to deal with. You know what it's like selling the stuff, in most cases no manuals, the guy smoked himself to death and the radio and equipment shows it, no idea if it works, towing it around to swapfests, etc. My feeling is if you pay 50% of what it lists for in an AES catalog used, you might break even after your all done fooling around. The Vultures you talk about earn their money.

I don't know if it has always been this way, but I have been seeing alot of sleezebags with callsigns on Ebay who advertise "estate sales".
I don't recommend having a "club" involved. As one noted, make a list of gear and fair market price and leave it with your wife, significant other or relative.
Unless the ham community as a whole gets involved in this, it will get worse and we all will have the sign of "sleezebag" when it comes to buying and selling.

Of course there are two opinions on this subject.

there are three types of ham estate sales which I have attended. First is the Estate Garage Sale where everything is sold at once and not just the Ham stuff. this is handled by the family or an estate Sale professional. There is no opportunity for the buyer to gouge the family as you can not meet them.

Then there is the Ham Estate Sale where it is run by the Club or a Friend. In this case the seller is aware of the value of the items , but in the interest of clearing out the estate will price the stuff to move.

Then the third is the family selling the stuff through an ad in the paper. This is were the shenigans can take place. It is sometimes best for the people to have some one appraise the stuff and then donate it to the Salvation Army, or the Radio Club. But this does not give them any money so they become sujbect to being cheated.

I have handled 3 estates and in each case I took the gear , sold it on Ebay , kept a 25% commission for my work and had happy widdows to whom I could give cash.

There is always a problem with people chasing the obits to get gear, and that can not be changed. But, let's face it folks, when the gear is brought to the swap meet for sale the buyers are there in force and will never pay more than the people ask for the geat. And if they do not know what it is worth the problem arises.

I have run a swap net for years and I have seen hams come (Message over 64 KB, truncated)

The following site has information on the RS-232 interface including several
alternate connector that have carried RS-232 signals.

Hope this helps.

QRP HF TRANSCEIVER IC-703

This new model is being designed as a portable HF transceiver that utilizes the design excellence and body of the very successful IC-706 series. It will be similar to an IC-706MKIIG without the VHF and UHF bands, and is a model in a new genre that has an automatic antenna tuner built-in, low consumption circuit design and large external battery for field use as a portable HF QRP unit.

This new model will appeal to HAM user?s who require a convenient portable HF unit, and will be an ideal long distance communications device for sparsely populated territories where set-up of normal communication infrastructure is expensive and impractical.

-
Relay type antenna tuner unit built-in, 1.9-30MHz coverage
(For 50ohm load antenna. Does not match to a wire antenna

-
New low current consumption circuit design to obtain longer battery life

-
Large capacity external battery pack and antenna suitable for field operation, will be set as options

-
Suitable for not only HAM radio operation, but is an excellent unit for long distance communications in remote mountainous or desert areas where effective communications are not readily available. Also, is perfect as a communications solution for specialized applications.

-
Quick power set function to make QRP operation efficient

-
DSP built-in for auto-notch and noise reduction functions
(DSP functions are equivalent to UT-106)

-
Max 10W output. Adjustable in 10/5/1/0.5/0.1W steps
(5W when using 9.6V batteries)

-
Memory keyer function built-in

-
Multi-use versatility for the home or shack, mobile DX?ing in your car and as a field unit in the outdoors

SPECIFICATIONS

GENERAL

Frequency Range

: Refer to Version List (http://www.icom.co.jp/world/info/ic-703/Version_List.html)

Mode

: USB/LSB/CW/RTTY/AM/FM

Temperature range

: -10?C to +60?C; +14?F to +140?F

Antenna Impedance

: 50 ohms(SO-239)

Frequency stability

: Less than ?0.5 ppm (0 to 50?C; +32 to +122?F)

No. of Memory Ch.

: 105(99 split, 6 scan edges)

Frequency stability

: Less than ?0.5 ppm (1 min. after powered ON/0 to 50?C; +32 to +122?F)

Power supply voltage

: 9.0 to 15.87 V DC (negative ground)

Current Drain

: Tx

Rx

10 W
5 W
Standby
Max. audio

3.0 A
2.0 A(9.6V)
0.25 A (typ.)
0.45 A (typ.)

Dimensions
(projections not included)

: 167(W) ? 58(H) ? 200(D) mm;
6 9/16(W) ? 2 9/32(H) ? 4 7/8(D) in

Weight (approx.)

: 2.0 kg; 4 13/32 lb

TRANSMITTER

Mode

USB/LSB/CW/RTTY/AM/FM

Modulation system

: USB/LSB Blanced Modulation
AM Low Level Modulation
FM Variable Reactance Frequency Modulation

Spurious emission

: 50 dB (HF bands)

Carrier suppression

: More than 40 dB

Unwanted sideband
suppression

: More than 50 dB

Spurious Emissions

: Below 30 MHz: Less than -50 dB
Above 50 MHz: Less than -60 dB

Microphone Connector

: 8-pin modular jack (600 ohms)

Output Power

:USB/LSB/CW/FM/RTTY 0.1 to 10 W (at 13.8V)
AM 0.1 to 4 W (at 13.8 V)
USB/LSB/CW/FM/RTTY 0.1 to 5 W (at 9.6V)
AM 0.1 to 2 W (at 9.6 V)

RECEIVER

Receive system

: Double conversion Superheterodyne system

Intermediate frequencies

: 1st 64.455 MHz (for all modes)
2nd 455 kHz (for all modes)

Sensitivity (typical)

:

Squelch sensitivity
(Pre-amp: ON)

: SSB, CW, RTTY
FM

Less than 5.6 ?V
Less than 0.32 ?V

Selectivity
(typical)

: SSB/ CW (BW: 2.4 kHz)

AM /FN-N (BW: 6 kHz)

FM (BW: 15 kHz)

More than 2.4 kHz/-6dB
Less than 4.5 kHz/-60 dB
More than 8.0 kHz/-6dB
Less than 30.0 kHz/-60 dB
More than 12.0 kHz/-6 dB
Less than 30.0 kHz/-60 dB

Spurious Response

: More than 70 dB

AF output power

: More than 1.0 W with an 8 ohms load

RIT variable range

: ?9.99 kHz

All stated specifications are subject to change without notice or obligation.

SUPPLIED ACCESSORIES

- Not fixed yet

OPTIONS

- AH-2b : Antenna Element

- AH-4 : Automatic Antenna Tuner

- AT-180 : Automatic Antenna Tuner

- CT-17 : CI-V Level Converter

- FL-52A : 455kHz CW/RTTY Narrow Filter-500 Hz/-6dB

- FL-53A : 455kHz CW Narrow Filter-250 Hz/-6dB

- FL-65 : 455kHz SSB Filter-2.4kHz/-6dB

- FL-222 : 455kHz SSB Narrow Filter-1.8kHz/-6dB

- FL-257 : 455kHz SSB Wide Filter-3.3kHz/-6dB

- HM-103 : Hand Microphone

- MB-62 : Mobile Mounting Bracket

- MB-63 : Mobile Mounting Bracket (For controller head)

- MB-65 : Mounting Base

- MB-72 : Carry Handle

- OPC-581 : 3.5m Separation Cable

- OPC-587 : 5m Separation Cable

- OPC-589 : Microphone Adaptor Cable (modular to regular 8-pin microphone)

- OPC-598 : 7m ACC Cable

- OPC-599 : Adaptor Cable (13pin to 7- and 8-pin ACC sockets)

- SM-20 : Stand Microphone

- SP-7 : External Speaker

- SP-10 : External Speaker

- UT-102 : Voice Synthesizer Unit

- UT-106 : AF DSP Unit

2-Way Radio Wristwatch
This watch?equipped with a built-in 22-channel walkie talkie?allows you to keep in touch easily with friends and family whether you?re at an amusement park, the beach, the park, the mall, or simply at opposite ends of the house. When you speak into the voice-activated microphone, your words will be beamed straight to the built-in speaker of any other user

within a 2-mile radius whose watch is set to the same channel. The voice-activated watch gives children freedom, flexibility, and security; and parents enjoy peace of mind while keeping in constant contact with their children. A call alert sends a distinct tone to notify another user that you are calling. Includes earbud with built-in microphone and AC charger for built-in rechargeable bat teries. Running time on a single charge is 2 hours, with 25 hours standby time. Channels 1-14 are FRS, 15-22 are GMRS (Requires FCC license, instructions included). 2 1/2? L x 2 1/2? W x 8? D.

JOTA - Do a Good Turn for Ham Radio
Rev. Randall P Winchester (WD4HVA) on October 4, 2002
View comments about this article!

It's time for the 45th annual JOTA, or Jamboree-On-The-Air. This event occurs the third weekend in October each year. It is an opportunity for hams to assist Scouts by setting up stations and allowing the Scouts to learn firsthand about Amateur Radio.

Many people who are personally acquainted with Scouts invite them to visit the shack and operate from the station there. Other groups set up a portable Field-Day type operation and invite the Scouts to visit and operate from there.

Here are some things that interest the kids:

ISS contacts - just being able to hear the shuttle or ISS is a thrill for the kids. If you're actually able to make a contact you may find yourself being the elmer to the participants.

Amateur TV - Kids like to see themselves on TV. Consider putting a camera on one of the stations and then put the receiver at a display where you have information about upcoming ham classes displayed.

PSK31 - This is one that gets a fair amount of attention since they are used to keyboard conversations. It might be a good time to pull out the warbler and demonstrate it, since parents might be concerned about their kids getting involved in another expensive hobby. If a person gets their General then they can operate PSK with a rig that costs around $50.

SSB/CW - "Traditional" contacts are also fun, especially when you get scout to scout contacts going. They will happily talk about scouting and it may be hard to get them to give up the microphone for the next person to have a chance.

RC models - If you can find a ham who is using RC models a demonstration might be a good JOTA event. Everyone likes to watch the RC planes fly.

Foxhunt - This year I'm trying to get the amateur team members so we can have several foxhunts during the day on Saturday. Each team will consist of two Scouts and an amateur radio operator.

CW trainer - surprisingly enough, a computer running one of the CW training programs is a real attraction. I'm working on having some CD's available with test study guides and CW training software on them to hand out. The kids like to learn the letters for their name, and once you've got them learning you might as well keep them at it until they learn the alphabet and numbers!

Merit Badge requirements - If you have the resources consider setting up some "activity areas" where participants can work on some of the requirements for a communications or radio merit badge.

There are many resources available on the Web for JOTA, especially at the ARRL site. http://www.arrl.org/FandES/ead/jota.html

Contact the local Scouting organizations and see what kind of event you can assemble. Remember that JOTA includes organizations such as Boy Scouts, Cub Scouts, Girl Scouts and other youth organizations. Go ahead and invite the 4H people too - they'll enjoy the attention and the more people who get a good impression of amateur radio the better!

If you set up in a temporary location, remember that JOTA can be like field day using commercial power. It's not a contest but is a time for relaxed exploration of amateur radio by a bunch of kids and their adult leaders. The idea is to have fun, so don't get overly complex.

Set up a station, put the kids on the microphone, keyboard or key and watch what happens. Even with all the technological sophistication of our kids today there's still magic when you communicate using a station that you helped put on the air!

Last year we had about 30 people come to visit and operate. This year we're hoping to get double that number. We'll be operating K4S from the Murray City Park, Murray Kentucky. I hope one of our Scouts gets to contact you on the air during JOTA 2002! 73

JOTA - Do a Good Turn for Ham Radio Reply
by K9WLF on October 4, 2002 Mail this to a friend!
I agree wholeheartedly, support JOTA- these are potential future hams, if we can make it interesting enough. Myself and some other hams here in south Florida are setting up at Camp Seminole in Broward County using K2BSA for our callsign. We are planning to have packet, SSTV, HF SSB/CW and, for myself, QRP PSK31 using a Small Wonder Labs PSK20 transceiver kit and home brewed 20 meter dipole and portable vertical antennas. I am a former Scout leader from New Jersey and am looking at JOTA as an excuse to get myself back involved in Scouting (we won't talk about the fun of getting out and camping and playing radio <grin>). These Scouts are our future, both in Amateur Radio and in real life. It behooves each and everyone of us Hams to get out and help make a difference. We had a saying in our district up north--" If you want to touch the past, touch a rock. If you want to touch the present, touch a rose. If you want to touch the future, touch the life of a child."

73, and good DXing at JOTA!!!!!
Remember Amateur Radio is not just a hobby, it's an obsession!

Tom, K9WLF/4

RE: JOTA - Do a Good Turn for Ham Radio Reply
by K2GW on October 4, 2002 Mail this to a friend!
JOTA is a fantastic way to introduce kids to Amateur Radio. I'm a Radio Merit Badge counselor and when the the kids make their on the air contact, I'm amazed how many hams tell them that they were first introduced to Amateur Radio through Scouting. So please host a JOTA event on the 19th and let your local Boy Scout and Girl Scout councils know you're doing it. You can find your local BSA Council at
http://www.scouting.org/nav/enter.jsp?c=lc

Here are some other resources to help you:

Register your JOTA activity with the ARRL at
http://www.remote.arrl.org/FandES/ead/youthskeds/

so they can refer Scouts to you if they get queries from your area. The league also has ideas for JOTA activities on their education page.

Check out the Radio Merit Badge site at http://www.qsl.net/aa6j/radiomb/ for ideas on teaching Radio Merit Badge.

If you're a ham involved in Scouting, check out the ScoutRadio discussion group on Yahoo Groups at
http://groups.yahoo.com/group/scoutradio/

Thanks again for your help in training the next generation of hams.

Yours in Scouting & 73,

Gary Wilson, K2GW
Unit Commissioner
Central New Jersey Council, BSA

JOTA - Do a Good Turn for Ham Radio Reply
by K1HC on October 4, 2002 Mail this to a friend!
I'm running a JOTA station Oct. 19-20 from Thompson Island in Boston Harbor during the Bostom Minuteman Council's Fall Camporee (1100 boy scouts and cub scouts attending!). It is posted as an event on the EHam.net calendar. Look for us on the JOTA frequencies and 146.55 MHZ simplex in the Boston, MA area.
I would encourage all hams to call their local Boy Scout district or council office to offer a demonstration of ham radio to a local boy scout troop or cub scout den or pack. You will spark interest in the hobby! Who knows where it will lead. If you have the time, you can also become a counselor for the radio merit badge, helping the boy scouts work through the eight segments to that merit badge. I have taught that badge many times, and I thought it was tougher than the Technican Class license classes I taught a few years ago.

Dick Bean, K1HC
Asst. Scoutmaster
Troop 3 Westwood, MA

JOTA - Do a Good Turn for Ham Radio Reply
by W4ABC on October 5, 2002 Mail this to a friend!
JOTA is a great two-way street. As Amateur Radio operators - introducing the Scouting family to radio often times leads a boy from avocation to vocation. In turn, the Amateur Radio community has a golden opportunity to bring some of America's best prepared Citizens into the fold!

While we're on the subject, allow me to offer each of you who hold more than just a passing interest in Scouting/Radio operations an invitation to the 'ScoutRadio' email list. Some of you may well have seen the words below show up in your mail box's, earlier this evening...

ScoutRadio at YahooGroups!

JOTA is just around the corner and the internet is all a buzz with operating schedules flying. The ScoutRadio list is active year round to help not only with scheduling for JOTA activities but for all the other 'odd' times of the year when a 'sked' with other radio Scouting groups is preferred!

ScoutRadio is the largest group of it's kind with a primary focus on delivering the Amateur Radio experience to:

Cub Scouts - These little guys have a short attention span and enjoy Amateur Radio in a less technical, faster-paced, fun atmosphere.

Boy Scouts - Their attention is driven by many different facets of the hobby, from repeater ops to satellite ops to that one in a million that likes the smell of vacuum tubes!

Exploring - Law Enforcement, Fire, Medical... in their programs they can find many utilitarian uses for keeping track of one another with a radio!

What many find to be our greatest asset is the fact that our primary focus is on Amateur Radio operations as related to BSA programs.

We are proud to have such luminaries on our list as Bob Bruninga - WB4APR (the father of APRS), ARRL and K2BSA staff - not to mention a host of Scouters that are experienced at operating full time ScoutRadio club stations.

If you're already a list member please disregard this message. If not and you're looking to do some networking with Amateur Radio operators who are delivering the Promise every day, then please visit us at:

http://groups.yahoo.com/group/scoutradio/

Yours in Scouting,

Jon Pearl W4ABC
Trustee WA4BSA

JOTA - Do a Good Turn for Ham Radio Reply
by KB9YFR on October 6, 2002 Mail this to a friend!
I want to put in my two cents about JOTA. JOTA was my first experience with HAM radio about 10 years ago. It was in Wisconsin at a council wide campout. There was a man there, can't remember his call, but he had a fantastic field day type setup. He let us talk on the radio and I had a few qso's to the virginia area. It was great. I then waited about 7 years to get my ticket but it was that first experience that I will always remember. If we want to get kids interested in our hobby this is a great way to do it. I came from a family that had no HAM's and because of JOTA I am the first HAM in my family. I plan on introducing my kids and their friends to this great hobby but we can reach so many kids through JOTA.

Pat

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

For the time being the charge of MARS library is with VU2NLF till the library is regularized.

Our society is growing very fast and in order to have efficient working of the society certain rules and regulations have to be followed. Listed below are some rules and regulations relating to our MARS Library.

LIBRARY RULES.

1. Each members will be allowed to borrow only 1 book at a time.
2. The latest 3 issues will be available for 7 days only (last 3 months)
3. The last 4th , 5th & 6th issues will be available for 15 days only.
4. All magazines, books CDs etc will be available for 1 month only.
5. A late fee of Rs.50/- will be charged for the delay.
6. All the magazines, books, CDs etc will be returned back to the society's office OR returned
during the monthly meeting OR sent to the next reader as per the schedule made by the library Manager (NLF for Now).
7. Members delaying books for more than 3 times will not be allowed to borrow books for next 1 year.
8. Books will handed over to the members only upon producing their I.D Card.
9. Books will given only to the valid members of the society.
10. Members borrowing the book must counter sign on the index card at the time of borrowing.
11. Members damaging or loosing the book will have to bear the cost of the book.
12. The society will TRY to send reminders, BUT it the members duty to return the book on time.

Members are requested to follow these rules and help to increase the effeciency of our society.

Members are also requested to donate books to our MARS Library.

==========

TITLE PERIOD

==========

QST MAGAZINE - SEPTEMBER 2002. 7 DAYS

QST MAGAZINE - OCTOBER 2002. 7 DAYS

THE ARRL SATELLITE ANTHOLOGY 1 MONTH

PACKET : SPEED, MORE SPEED AND APPLICATIONS. 1 MONTH

A.P.R.S. TRACKS, MAPS AND MOBILES. 1 MONTH

THE ARRL HAND BOOK - 1988 EDITION 1 MONTH

==========

Although the QST - June 2002 issue is listed in the name of Prashant Koli - VU2CBU, he claims to have returned it, the matter is being looked into, any member having this issue with him may please come forward and inform me. Also the QST August 2001 issue is also missing from the library, any member having the same may please inform me.

Since the library policies were drafted and approved by the Managing Committee very recently, many members at the time of borrowing the books were not aware of the policies. Hence an extention of 7 days is being given for all the due books. All the books which are overdue on 27th October 2002 onwards will have a fine of Rs.50/-

Please note this is a computer generated statement, any discrepancy you may find can be reported directly to vu2nlf@...

As a matter of fact you too have accepted the fact that the magazine was given by me to you personally to be handed over to RIO...so your claim that is not a correct statement. I am not disputing the rest of the statement.

And since you have sent this as a c.c. to the mars_classes group, I would request you to forward this one too to that group.....I have left that group immediately after the debriefing meeting of ham classes.

873. tri band handies

Yahoo group: m_a_r_s
Date: 2002-10-22 08:46:41 UTC
From: ajay solanki
Topic: 873 Message: 873

Hi
I was surfing thruogh the net for some tri band
handies
I found the following models.
I think that the dual receiving feature of kenwood
TA-F6A is cool.
Though all the prices are almost the same,
it is difficult to decide which one has more useful
features.

Maybe some of our oldtimers can analyze the 3 models
and give us their valuable suggestions.
All suggestions are welcome.

Also if there are enough people
(now that we have a new batch)
then we could try getting bulk discounts and importing
the same.

Hi all,
I am selling off my Yaesu 757 GXII with 15A Power
supply. This set is in very good working condition and
i have used it very much during last 2 years. Even
some of you might have used this rig during many club
events.
If anybody is interested in buying this rig, do drop
in a mail for details..

Thanks a lot
regards
kiran

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

Please find enclosed the latest status of our library books.

The QST - June 2002 issue is located and my apology to Prashant Koli - VU2CBU as it was lying with me with lot of other MARS stuff in my shack.

The QST August 2001 issue is still missing from the library, any member having the same may please inform me.
Once again I remined you that all the books which are overdue on 27th October 2002 onwards will have a fine of Rs.50/-

Please note that 3 CDs are also now added to our library and to begin with I have donated my ARRL Handbook to our library. Members are requested to donate book related to Ham Radio to our Society.

> avoid lengthy QSOs on 146.52 MHz. That's the generally recognized national
> simplex calling frequency and is endorsed as such by the ARRL's 2-meter
> band plan. Acknowledging, however, that some confusion exists within the
> amateur community as to whether 146.52 is a national calling channel or
> just another simplex frequency, Hollingsworth decided to simply rescind
> the five advisory notices he'd sent October 15.
>
> "We made an error in issuing that Advisory Notice, and you may disregard
> it," Hollingsworth wrote October 23 in letters to the affected amateurs.
> Commenting to ARRL, Hollingsworth was blunt yet good-natured. "I goofed,"
> he said. "If I were worried about making a fool of myself from time to
> time, I never would have become a lawyer in the first place."
>
> Amateurs commenting to the FCC and on various newsgroups reportedly were
> bewildered by the FCC advisory notices. An ARRL error apparently
> contributed to the confusion. Hollingsworth did not find 146.52 MHz
> singled out as the national simplex calling frequency in his edition of
> The ARRL's FCC Rule Book (12th edition, 1st printing). The designation
> does appear in subsequent printings of the Rule Book, however, as well as
> in recent editions of The ARRL Operating Manual and The ARRL Repeater
> Directory 2002/2003.
>
> Hollingsworth says that operation that does not comply with a generally
> accepted band plan such as ARRL's is not illegal. He points out, however,
> that band plans--to the extent that they're followed--do help to keep down
> friction among various users and make his job a lot easier.
>
> "I don't consider it a big deal. I was just trying to raise awareness," he
> said, adding that the FCC has no intention of making band plan compliance
> mandatory.

>
> Hollingsworth told ARRL this week that he had initially written four
> amateurs in Ohio and one in Michigan on the basis of complaints about
> lengthy contacts on 146.52 MHz in late September and early October. Those
> QSOs, he said, averaged 45 minutes and in some cases lasted up to an hour.
> Two of the amateurs who had received the October 15 advisories already
> have contacted Hollingsworth and agreed to cooperate with the original
> requests, now rescinded.
>
> "In an ideal world, stations making initial contact on 146.52 MHz probably
> should move off to another accepted simplex channel to continue their
> conversation," Hollingsworth said. "The main thing is, we're all in this
> together, and the goal is to make Amateur Radio last 1000 years."
>
> All ARRL band plans are available on the ARRL Web site
> <http://www.arrl.org/FandES/field/regulations/bandplan.html>.
>
> ==>PEGGY WHITSON HELPS NETHERLANDS' SCOUTS CELEBRATE JAMBOREE ON THE AIR
>
> US Astronaut Peggy Whitson, KC5ZTD, made Jamboree On The Air (JOTA) a very
> special occasion this year for Boy Scouts and Girl Scouts in The
> Netherlands. One of the International Space Station's Expedition 5 crew
> members and the only woman, Whitson on October 20 answered questions posed
> by the scouts via Amateur Radio. The direct, 2-meter contact with PA3HGQ
> was arranged as part of the Amateur Radio on the International Space
> Station (ARISS) program.
>
> "The scouts were very impressed by the quality of the radio link and
> delighted to have an astronaut joining the Jamboree On The Air right from
> the International Space Station," said ARISS Vice Chairman Gaston Bertels,
> ON4WF. On hand for the official opening of the JOTA in The Netherlands was
> Dutch astronaut Andre Kuipers, who congratulated the Ascanen scouting
> group of Lelystad for their ARISS QSO with Whitson.
>
> More than 100 scout groups from all over The Netherlands listened in on
> the downlink while Whitson answered about a dozen questions. At the
> contact site, parents and friends of the 20 youngsters selected to take
> part assisted with the space chat, and local radio and TV stations covered
> the event.
>
> Several of the questions the Dutch youngsters asked mirrored those often
> put to crew members by their American counterparts. One Scout asked about
> how the ISS crew prepared its meals. Whitson explained that meals in space
> are pre-cooked and stowed in foil packages or cans. "It's just a matter of
> warming it up or adding water," she said.
>
> Whitson told another questioner that the crew can see weather from space.
> "It's beautiful up here," she said, noting that the crew can recognize
> such systems as hurricanes. "At night, we can even see thunderstorms," she
> added. Whitson said the crew can see the aurora borealis (northern lights)

> too. "They're beautiful from here!" she declared.
>
> Bertels said the NA1SS downlink also was monitored at Flanders Expo in
> Ghent, Belgium, where a science exhibition for youth drew a big audience.
> At a booth set up by the Royal Belgian Amateur Radio Union (UBA) and
> devoted primarily to ARISS, visitors--mostly youngsters, parents and
> teachers--followed the pass of the ISS on a screen showing the world map.
>
> "The UBA also was very pleased to use this opportunity to demonstrate
> Amateur Radio at its best to the public visiting a popular scientific and
> technological event," Bertels remarked. He said many amateur stations all
> over Western Europe tuned into the downlink and reported excellent copy.
>
> ARISS is an international project with US participation by NASA, ARRL and
> AMSAT.--Gaston Bertels, ON4WF, provided information, photographs and
> audio-video for this report
>
> ==>"THE TOWER IS UP!" ANTENNA BATTLE FINALLY PAYS OFF
>
> A New York amateur who credits both the limited federal preemption PRB-1
> and the ARRL with helping him win approval for an antenna support
> structure on his property, now reports his new tower is up. Fred Fitte,
> WA2MMX, spent months trying to gain the necessary approvals from the Town
> of Kinderhook. He saw his new tower become reality in late September--more
> than a year after his zoning battle began.
>
> "I was finally able to erect my 50-foot self-supporting tower with the
> help of my local ham buddies who have supported me through the fight,"
> Fitte said recently. Some VHF and UHF antennas already are up on the
> tower, and an HF tribander is in the offing.
>
> The Town of Kinderhook would not allow a ham radio antenna support
> structure in excess of 35 feet without a variance. "PRB-1 is what saved my
> bacon," said Fitte. PRB-1, spelled out in the FCC Amateur Service rules
> under ?97.15(b), requires municipalities to "reasonably accommodate"
> amateur communication. Fitte finally got a building permit last May after
> what he called "a really ugly battle"--winning approval of his request to
> erect a 50-foot tower on a 3 to 1 vote of the town's Zoning Board of
> Appeals.
>
> Among those who had helped Fitte in his battle with the town was ARRL
> Hudson Division Director Frank Fallon, N2FF, who says WA2MMX's situation
> "was not your run-of-the-mill ham tower case." As Fallon explains it,
> Fitte ran into problems after he moved approximately 300 feet into a new
> development and filed for a building permit for a tower 10 feet shorter
> than his old one.
>
> "His first hearing, only days before the 9/11 attack on the World Trade
> Center, did not go well," Fallon said, adding that Fitte "was shocked at
> the hostile response from his new neighbors."

>
> What followed was a series of seven hearings over nine months, during
> which he confronted several hostile neighbors, aided by a local attorney
> and a medical doctor. The neighbors attacked the proposed support
> structure as a health and safety hazard and an aesthetic blight that would
> lower property values. Their attorney also wanted the town to require
> WA2MMX to move his antennas outside the development.
>
> "Fred, with a lot of help from his friends, finally prevailed," Fallon
> said. Fitte and his wife, Terry, hosted a celebratory "thank you" picnic
> over the September Labor Day weekend for friends and expert witnesses who
> had helped. Only his attorney, Al Millus, WB2EQR, was unable to attend.
>
> In addition to Fallon, among those who did turn out was ARRL Lab
> Supervisor Ed Hare, W1RFI, who voluntarily attended five of the hearings
> to present testimony. Dr George Wilner, K2ONP, the head of the Hematology
> Department at Albany Medical Center, attended one hearing session to
> debunk the issue of potential biomedical hazards. One friendly neighbor--a
> real estate appraiser--came forward to put to rest the claim that Fitte's
> antenna would lower property values.
>
> ==>TALK BY HIRAM PERCY MAXIM'S GRANDSON ENTHRALLS HAMS
>
> Hiram Percy Maxim II held members of Connecticut's Newington Amateur Radio
> League (NARL) spellbound October 7 with tales of his famous grandfather,
> Hiram Percy Maxim, 1AW, also known as HPM. As most ARRL members know,
> Hiram Percy Maxim co-founded the ARRL in 1914 with Clarence Tuska, and he
> became its first president.
>
> "HPM II"--who bears a strong resemblance to his grandfather--was around a
> year old when the elder Maxim--who often referred to himself in QST as
> "The Old Man" or simply "TOM"--passed away in 1936. "What he knows of our
> founder was gleaned from family stories and the films and writings that
> were passed down to him," said Joe Bottiglieri, AA1GW, an ARRL staffer and
> a NARL member who attended the talk.
>
> HPM was an amateur film buff, and a highlight of his grandson's
> presentation was a short 16-mm film that showed the elder Maxim and some
> of his friends working, relaxing and frolicking on the grounds of the
> family's summer home in Lyme, Connecticut, where HPM II now lives.
>
> "No evidence of radio activity appeared on that clip," Bottiglieri said,
> "but 'The Old Man' comes across as a real cutup!" The elder Maxim also
> founded another "League"--the Amateur Cinema League--in 1926.
>
> Not a ham, HPM II says he doesn't feel he shares the inventive talents of
> his grandfather and great-grandfather, who held many patents between them.
> HPM II told the club audience that his grandfather took on radio and
> filmmaking as diversions from inventing--an endeavor he considered
> extremely hard work. He also thought of Amateur Radio as a means to "bring

> together" individuals from distant locations and believed that
> communication was a key to better understanding other people and cultures.
>
> Filmmaking was an extension of that same philosophy, HPM II said. His
> grandfather's interest in astronomy--he was fascinated by the planet
> Mars--was born of similar motivations, and he died while on his way to
> visit Lowell Observatory in Arizona.
>
> ==>SOLAR UPDATE
>
> Mighty morphin' solar power ranger Tad "Ain't No Sunshine" Cook, K7VVV,
> has morphed this week into Carl Luetzelschwab, K9LA, Ft Wayne, Indiana,
> who reports: Geomagnetic field activity for the first five days of the
> reporting period, October 18-24, was quiet to unsettled. This increased to
> a major storm level at the end of the period, which was fueled by high
> speed solar wind emanating from a large coronal hole in the western solar
> hemisphere. There were no significant proton events during the period.
>
> X-ray flare activity during the period ranged from low to moderate. The
> largest flares were M1 events on Sunday and Tuesday. These flares did not
> cause any significant radio blackouts.
>
> The book Storms from the Sun by Carlowicz and Lopez--discussed in two
> previous bulletins--is reviewed in the December 2002 issue of Sky &
> Telescope.
>
> Propagation is generally expected to be very good for the CQ World Wide DX
> Phone contest the weekend of October 26-27. There is a chance of
> geomagnetic field activity at the minor storm level at the start of the
> contest, but it is expected to subside after that.
>
> There is also a chance of an X-class flare from Region 162, which could
> cause a short-term blackout on the daylight side of Earth. Remember this
> is all a roll of the dice, so be sure to jump in and have fun working lots
> of DX!
>
> Sunspot numbers for October 17 through 23 were 215, 200, 156, 179, 139,
> 132 and 116, with a mean of 162.4. The 10.7-cm flux was 178.9, 172.6,
> 179.5, 180.3, 182.5, 169.4 and 163.6, with a mean of 175.3. Estimated

Thank god Nilesh, you could find the magazine!

Well, I had 1980 and 1988 issues of ARRL handbook and few WRTHs, which, I must confess, gave away to raddiwala few years ago thinking I will never become ham!!Hi Hi...

***************
The ARRL Letter
Vol. 21, No. 43
November 1, 2002
***************

IN THIS EDITION:

* +New cosponsors step forward for CC&R bill
* +NTIA opposes SAVI Technology's RFID proposals for 70 cm
* +Philly youngsters meet astronaut via ham radio
* +Texas amateurs do tornado duty
* +ARRL resurrects Frequency Measuring Test
* +Vanity application reminders bear repeating
* IN BRIEF:
This weekend on the radio
VY1JA to be on the air for both Sweepstakes weekends
ARRL Emergency Communications course registration
+ARRL Diamond Club off to "a great start"
New on-line edition of The ARRL PIO's Handbook debuts
UK holding the line on additional 5 MHz experimenters
Indian pirates persist

+Available on ARRL Audio News

============================================================
NOTE: To accommodate vacation schedules, this week's editions of The ARRL
Letter and ARRL Audio News are being distributed October 30. The Solar
Update will be available November 1 on the ARRL Web site as well as via
W1AW/ARRL bulletin.
============================================================

==>NEW CC&R BILL COSPONSORS CONTINUE TO STEP FORWARD

Despite the fact that action on the CC&R bill, HR 4720, is highly unlikely
as the current session of Congress winds down, additional cosponsors
continue to register their support for the measure. The
latest--representatives Todd Platts (R-PA), Larry Combest (R-TX), Duke
Cunningham (R-CA), and Mary Bono (R-CA)--raise the total cosponsor count
to 34.

The recent spurt in cosponsors may have resulted from an eleventh-hour
initiative in late September, when the bill's sponsor, Rep Steve Israel
(D-NY), and the only two amateurs in the US House of Representatives--Mike
Ross, WD5DVR (D-AR) and Greg Walden, WB7OCE (R-OR)--appealed by letter to
their colleagues who had not already done so to agree to cosponsor the
measure.
```

HR 4720 is aimed at providing relief to amateurs faced with private deed covenants, conditions and restrictions--CC&Rs--in erecting antennas. No more votes will occur until a post-election "lame duck" session that begins November 12 to complete several appropriations, homeland security and other high-profile bills. Another lame duck session in December also is possible.

With further progress on the bill unlikely this year, the effort to secure a congressional solution to the CC&R issue will start all over again after the new Congress convenes in January. The current list of HR 4720 cosponsors and more information are available on the HR 4720, The Amateur Radio Emergency Communications Consistency Act of 2002 page of the ARRL Web site <http://www.arrl.org/govrelations/hr4720>.

==>NTIA STUDY IS BAD NEWS FOR SAVI 425-435 MHz PROPOSALS

A National Telecommunications and Information Administration (NTIA) study supports the ARRL's position that the FCC would be making a mistake to permit SAVI Technology to deploy RF identification (RFID) tag devices at 433 MHz at much greater duty cycles than current Part 15 rules permit for such devices. RFID tags are used for tracking shipments and packages, among other applications.

"NTIA has grave concerns about the Commission's proposal to amend its Part 15 rules to permit the operation of RFID tags in the band 425-435 MHz at increased power levels and increased duty factor (or activity factor) and data transmission by remote control devices," wrote Fredrick R. Wentland, the NTIA's acting associate administrator in the Office of Spectrum Management. "Given the likelihood of interference to critical government radars, NTIA is unable to support the Commission's proposal."

The NTIA filed initial comments in the proceeding, ET Docket 01-278, last March but requested additional time to document an NTIA staff study with respect to field strength limits for RFID tags in the band.

ARRL Chief Executive Officer David Sumner, K1ZZ, said the NTIA staff study bears out what the League has been saying all along. "RFID tags represent a significant source of potential interference to sensitive receivers," Sumner said, adding that use of the 425-435 MHz band would be incompatible with ongoing requirements of incumbent services--military and amateur. "We trust that the FCC will now terminate this portion of the proceeding and that the RFID proponents will focus their attention on other, more appropriate parts of the radio spectrum."

That's exactly what the NTIA advised. It recommended that the FCC "explore other bands that might be able to accommodate the technology without causing unacceptable interference to critical incumbent users." Among the suggestions was 450 to 470 MHz, which provides nearly the same propagation characteristics as the band SAVI picked. The NTIA also noted that 902 to 928 MHz--an amateur allocation--or 2400 to 2483.5 MHz--which includes part of an amateur microwave allocation--might accommodate the proposed RFID tags as spread spectrum devices.

Accompanying Wentland's letter was a six-page NTIA technical analysis. The study asserts that the FCC's proposal to permit increased duty cycles and field strengths for the 425-435 MHz RFID emitters "would result in received power levels in excess of the required interference-to-noise ratio" that could adversely affect "critical government radar systems."

SAVI this week filed its own detailed study that rebuts the NTIA's position. SAVI suggested it would be willing to have the FCC limit the available band for "advanced RFID" products to 433 to 435 MHz, lower the peak-to-average ratio to 14 dB, strengthen the definition of RFID products to add language forbidding voice transmissions and limit use of RFIDs to "commercial or industrial locations."

More than 130 amateurs filed comments in opposition to SAVI Technology's RFID tags proposal, and most supported the ARRL's position that the proposed rules are flawed and should not be adopted. A copy of the NTIA letter and study and SAVI's rebuttal study in ET Docket 01-278 are available via the FCC Electronic Comment Filing System page <http://www.fcc.gov/e-file/ecfs.html>. Click on "Search for Filed Comments" and enter "01-278" in the "Proceeding" field.

==>PHILLY YOUNGSTERS MEET ASTRONAUT PEGGY WHITSON VIA HAM RADIO

US Astronaut Peggy Whitson, KC5ZTD, told students in Philadelphia that she thinks it's possible there's life on other planets somewhere in the universe. Using NA1SS aboard the International Space Station October 22, Whitson answered several questions from youngsters attending Spruce Hill Christian School. The contact was arranged via the Amateur Radio on the International Space Station (ARISS) project.

"Actually, I think with the thousands and thousands of universes that we can see," Whitson said, "and knowing that there are even thousands and thousand more that we can't, I think that on all those planets somewhere there probably is going to be life somewhere else--maybe not exactly like ours, but I imagine there's going to be some kind of life."

Whitson said one of the most "fun" things she does aboard the ISS is look out the window. "Seeing the earth from this vantage point of over 200 miles above the earth is really impressive. It's really a beautiful place that we live on, and I think we take it for granted sometimes, when we live there." She said she also enjoys exercise--a necessity for long-term spaceflight. "We obviously aren't exposed to the effects of gravity, so we have to work very hard to maintain our physical fitness," she said.

Life in microgravity leads to demineralization of bones, Whitson explained. When the Expedition 5 crew returns to Earth next month, she said, it will take months before their bones return to normal. The crew likely will recover much more quickly from the other aftereffects of several months in space, she added, such as the dizziness or lightheadedness experienced by some returning astronauts.

The ARISS QSO got off to an uncertain start when Whitson and ground control operator Nancy Rocheleau, WH6PN, in Hawaii, apparently got on

different frequencies. Initially, Rocheleau was able to copy NA1SS, but Whitson did not hear WH6PN. Once things got under way for real, the contact lasted a little more than seven minutes.

Remote audio between the school and the ISS via WH6PN in Hawaii was handled through a WorldCom teleconferencing circuit. Whitson, who is related to the wife of the school's principal, Seth Cohen, asked ARISS to arrange the Spruce Hill contact as a "crew pick." ARISS is an international project with US participation by NASA, ARRL and AMSAT.

==>TEXAS AMATEURS VOLUNTEER AS TORNADO STRIKES CORPUS CHRISTI

Amateur Radio Emergency Service (ARES) volunteers activated October 24 as a tornado struck Corpus Christi, Texas. One person died after a wall at the library of Del Mar College collapsed. The twister also caused perhaps two dozen other injuries as well as considerable property damage. ARRL South Texas Section Manager Ray Taylor, N5NAV, said the Texas Department of Public Safety was unable to get helicopters in to rescue stranded people due to the storm's turbulence. Gov Rick Perry declared a state of disaster for Corpus Christi and Nueces County.

The American Red Cross, The Salvation Army and the Texas Men's Baptist Kitchen were among the responding organizations. According to the Texas Division of Emergency Management, feeding and shelter operations continue in the impacted areas.

SKYWARN volunteers and South Texas Amateur Repeater Club weather station N5CCW were activated in advance of the severe weather that hit Corpus Christi. ARRL South Texas District Emergency Coordinator Robert Lobaugh, W5JYJ, said rainwater runoff depth ranged from 18 inches to several feet, depending upon the location. He reported downed power lines and roads blocked by debris and water. ARES teams and individual amateurs assisted as needed, Taylor said.

The tornado swept through about three miles from the shop of Mark Mireles, AD5CA. "It was impressive," Mireles said of the tornado damage. "People here are not used to that type of thing." Mireles said the Corpus Christi emergency operations center was activated, and amateurs staffed the radio room from noon until 10 PM October 25 and from 8 AM until shortly before noon October 26. Anticipated severe weather from Hurricane Kenna failed to materialize, so emergency volunteers were able to stand down.

"We have been well-received by all the city officials, from the city manager to the police chief," Mireles said, "and I almost have the EMS director talked into becoming a ham." Amateurs made use of a networked repeater system to facilitate communication.

The Corpus Christi tornado was the most severe weather problem for the Lone Star State in a week that had included heavy rains and flooding elsewhere. According to Lobaugh, San Patricio County, some 30 miles north of Corpus Christi, suffered storm damage October 23. Roads were closed due to high water, and utility poles were downed. Power has since been

restored, he said. Taylor said wet weather earlier in the week caused some residents in Seguin and Gonzales near the Guadalupe River to be evacuated. "The people in New Braunfels along the same river had to leave while they were in process of rebuilding from storm damage earlier this year," he added.

By the end of the week, the remnants of Hurricane Kenna exacerbated the situation in some areas after the storm dumped additional precipitation that led to more flooding in Pearland and possibly elsewhere. Weather problems continued this week as tornado and thunderstorm watches were in effect for more than a dozen Texas counties. Taylor reports that another tornado October 29 in the Beaumont area caused one death by drowning and did some damage.

The Hurricane Watch Net conducted an abbreviated session October 25 to disseminate Hurricane Kenna advisories. The eastern Pacific storm, once a treacherous Category 5 hurricane, moved across Mexico toward southern Texas. Well-known Cuban amateur and International Amateur Radio Union Region 2 Area C Emergency Coordinator Arnie Coro, CO2KK, said Cuban amateurs monitored the Mexican emergency net on 7065 kHz during the storm.

==>ARRL RESURRECTS FREQUENCY MEASURING TEST

The Frequency Measuring Test (FMT)--an ARRL staple for nearly 50 years--will return in early November. A FMT transmission will replace the W1AW SSB bulletin on November 7, 0245 UTC (Wednesday, November 6, in US time zones). The resurrected FMT will kick off a series of measuring tests.

"These tests will exercise the capabilities of hams to measure important operating parameters, improve their understanding of complex radios and give them a better mental picture of their transmitted signals," Contributing Editor Ward Silver, N0AX, said in an October 2002 QST article describing the art and science of frequency measurement. "The goal is a more technically aware amateur confident of compliance with FCC regulations." Silver's article, "The ARRL Frequency Measuring Tests," appears on page 51 of the October issue.

Today's amateurs tend to take for granted the accuracy of their transceiver's frequency readout. But, as Silver notes in his article, relying simply on a transceiver's digital readouts could mean part of your signal is outside the band edge--in violation of FCC Part 97 rules. Transceiver or receiver readout accuracy "depends entirely on the quality of the receiver's master oscillator," he points out in QST.

Increasing technical quality of amateur gear was one of the primary reasons for the decline and fall of FMTs in 1980. In prior decades, however, thousands of amateurs took part in the FMTs, and participation was required of ARRL Official Observer and Official Relay System stations. The first FMT, held in October 1931, employed three transmitting stations--W1XP at Massachusetts Institute of Technology, W9XAN at Elgin Observatory in Illinois and W6XK at Don Lee Broadcasting System in Los

Angeles--and drew more than 200 measurement reports.

"Winners demonstrated better than 99.99% accuracy, and more than half received certificates for better than 99.90% accuracy," Silver reported--not too shabby for the state of the art back then.

The 2002 FMT will begin at the appointed time--0245 UTC November 7 (9:45 PM EST November 6)--with a general Morse code "QST" from W1AW on four amateur frequencies. The test itself will consist of 20 seconds of carrier followed by a series of CW dits followed by a station ID. The test will last about five minutes and will conclude with a series of Vs and another station ID. The approximate frequencies are 3580, 7047, 14,048 and 21,068 kHz.

FMT 2002 participants should include time of reception, measured frequency and signal report, as well as their name, call sign and location. Participants are encouraged to submit reports on more than one of the frequencies. A Certificate of Participation will be available to all who send in reports. Those who come closest to the measured frequency will be listed in the test report and will receive special recognition.

Send FMT 2002 entries postmarked by December 6, 2002, to W1AW/FMT, 225 Main St, Newington, CT 06111. More information and background on the 2002 FMT is available on the ARRL Frequency Measuring Tests - Supplement page <http://www.arrl.org/w1aw/fmt/>.

==>VANITY APPLICATION REMINDERS BEAR REPEATING

When applying for a vanity call sign, the application purpose on FCC Form 605 should always be "Modification" (MD). ARRL VEC Manager Bart Jahnke, W9JJ, advises that vanity applicants within their 90-day license renewal window should not attempt to do a "Renewal/Modification" (RM) when applying for a vanity call sign.

"I would recommend that you renew first," Jahnke said. "If vanity processing is delayed for some reason--as happened last fall and spring--your license could expire while awaiting processing, and your application would be dismissed."

The fee for a vanity call sign increased to $14.50 in September. Jahnke says it is possible for vanity applicants to register a name, address or contact information (eg, e-mail or telephone number) change with the FCC while also applying for a vanity call sign, since both actions can be dealt with as a Modification. Note, however, that if you're only changing such data as name, address or contact information and not applying for a new call sign, you should check "Administrative Update" (AU) as the application purpose--and, yes, this is confusing.

By the way, unlike a vanity application, which requires a fee and goes to the FCC's fiscal agent in Pittsburgh, an Administrative Update application requires no fee and goes directly to the FCC in Gettysburg.

Amateur applications may be filed electronically via the FCC's ULS Web site <http://wireless.fcc.gov/uls/> or on paper (using FCC Form 605). The FCC says that anyone filing any application with the FCC--whether for a vanity, license renewal, upgrade or modification--first must be registered with the Commission Registration System (CORES) and have obtained an FCC Registration Number (FRN).

For more information on vanity filing, visit the Amateur Radio Vanity Call Signs page <http://www.arrl.org/arrlvec/vanity.html> on the ARRL Web site.

==>IN BRIEF:

* This weekend on the radio: The ARRL November Sweepstakes (CW), the IPA Contest (CW/SSB), the Ukrainian DX Contest, the North American Collegiate ARC Championship (CW), the ARCI Running of the QRP Bulls, the High Speed Club CW Contest and the DARC 10-Meter Digital Contest are the weekend of November 2-3. JUST AHEAD: The Japan International DX Contest (SSB), the WAE DX Contest (RTTY), the OK/OM DX Contest (CW) and the Anatolian ATA PSK31 Contest are the weekend of November 9-10. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* VY1JA to be on the air from Yukon Territory for both Sweepstakes weekends: J Allen, VY1JA, in Whitehorse, Yukon Territory, is in his new house and will be active for both November ARRL Sweepstakes weekends (CW and SSB) as his schedule permits to hand out that rare SS multiplier (Yukon Territory counts for the NWT multiplier). "I plan to put in a serious effort on each, but I take time for Tae Kwon Do and for church, so I miss some of the best time of the contest," he said. For the lower bands, he'll be running 500 W to a "V-beam" dipole (450 feet per leg); for the higher bands, he hopes to have a tribander up on his tower by contest time, if the weather cooperates. QRP ops take note: VY1JA does listen for SS participants in the QRP (5 W or less output) category every hour on the half hour. Other times, VY1JA has been active on 6 meters running low power. CW SS is November 2-4; SSB SS is November 16-18 (UTC). For more information on ARRL November Sweepstakes, visit the 2002 ARRL November Sweepstakes Rules page <http://www.arrl.org/contests/rules/2002/nov-sweeps-rules.html>.

* ARRL Emergency Communications course registration: Registration opens Tuesday, November 5, at 4 PM Eastern Time (2100 UTC) for the Level I Emergency Communications course (EC-001). Registration remains open through the November 9-10 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, November 19. Thanks to the federal homeland security grant from the Corporation for National and Community Service, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the course. During this registration period, approximately 200 seats are being offered to ARRL members on a first-come, first-served basis. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Emergency

Communications Course Manager Dan Miller, K3UFG, dmiller@...;
860-594-0340.

* ARRL Diamond Club off to "a great start": Following announcement of the ARRL Diamond Club membership a month ago, 126 charter members have enrolled, including three at the top Director level. "Contributions total $28,131," reports ARRL Chief Development Officer Mary Hobart, K1MMH. "This is a great start, and we look forward to growing these numbers daily." Joining the Diamond Club is very easy. Membership is a one-year commitment and is renewable annually. Each year you select the contribution level that fits your budget and circumstances, and ARRL does the rest. Before your Diamond Club membership expires, we will notify you so that you can tell us what level of commitment you want to make for the coming year. Benefits include an extension of your ARRL membership (including QST, of course) for one calendar year as well as additional benefits at each Diamond Club contribution level. A Diamond Club membership is a great gift idea for someone who shares your commitment to the League. Diamond Club contributions are tax deductible to the extent permitted by law--as are all contributions to ARRL above and beyond basic membership. Those who become Diamond Club charter members before year's end will receive an extra thank-you gift. Diamond Club details <https://www.arrl.org/diamondclub/> are on the ARRL Web site. Members also can call (860-594-0397) or e-mail <mhobart@...> the ARRL Development Office for more information.

* New on-line edition of The ARRL Public Information Officer's Handbook debuts: The latest edition of The ARRL Public Information Officer's Handbook <www.arrl.org/pio/handbook> now is available the ARRL Web site. Formerly a hard-copy publication and then an Adobe PDF scan, the new PIO Handbook is now an updateable electronic document. It contains 12 chapters packed with helpful advice for anyone interested in promoting Amateur Radio. Over the past few months, the League's Public Relations Committee has been developing the new Web-based manual, based in part on a previous publication by Gene Pressler, W3ZXV. The PIO Handbook is perfect for ARRL Public Information Coordinators, Public Information Officers, club PIOs and anyone with the desire to help raise public awareness--predominantly via the media--about Amateur Radio in their communities. The PIO Handbook covers many of the basics, such as how to identify what is news and how to write a press release. Other topics include how to write for magazines, how to deal with major breaking stories, the how-tos of media interviews, getting ham radio into the public spotlight and much more. "Because this is a Web document, we'll easily be able to add information and keep the PIO Handbook timely," said ARRL Media Relations Manager Jennifer Hagy, N1TDY. "I hope our PR volunteers find this to be a useful tool in their efforts to provide a very important service for the League and also for Amateur Radio on the local level." ARRL thanks the members of the PR Committee who contributed to the PIO Handbook and also to Gene Pressler, who had the vision to create the original manual that served PR volunteers for a number of years.

* UK holding the line on additional 5 MHz experimenters: The Radio Society of Great Britain (RSGB) reports that the Radiocommunications Agency (RA) in the UK on October 31 put a temporary moratorium on applications from full Class A amateurs who wish to experiment in the 5 MHz band. Eligible amateurs in the UK have had to apply for a Notice of Variation (NoV) to experiment in the band using five spot frequencies. The RA says applications for 5 MHz NoVs exceeded its expectations; it now worries that the risk of congestion may be detrimental to the overall success of the experiment. The RA says it will monitor occupancy of the five channels and review its position. "It is likely that an announcement will be made later this year for action early in the new year," the RSGB said.--RSGB

* Indian pirates persist: Sahruddin, VU2SDN, the president of the Amateur Radio Society of India, reports a spate of pirate operations using call signs VU4A, VU7A and similar other call signs continues. These have all been pirates, he says. A blanket ban exists on operations from Andaman, Nicobar and Lakshadweep islands, so VU4 and VU7-prefix call signs have not being assigned for 10 years, although the brief 1993 VU2JPS from the Andaman Islands was valid. Sahruddin reported last April that India's QSL Bureau was receiving many QSL requests for contacts apparently made by bootleggers using VU call signs. Sahruddin has explained that call signs that begin with VU2 followed by two or three letters or with VU3 followed by three letters are the only valid call signs for India.--The Daily DX

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; http://www.arrl.org. Jim Haynie, W5JBP, President

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb at http://www.arrl.org for the latest news, updated as it happens. The ARRLWeb Extra at http://www.arrl.org/members-only/extra offers ARRL members access to informative features and columns.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ.

To subscribe, unsubscribe or change your address for e-mail delivery: ARRL members first must register on the Members Only Web Site, http://www.arrl.org/members/. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes, and click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb, http://www.arrl.org/arrlletter/. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit http://mailman.qth.net/mailman/listinfo/letter-list. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

890. Annual Membership Fees

Yahoo group: m_a_r_s
Date: 2002-10-31 15:16:10 UTC
From: Mehul Chovatia
Topic: 890 Message: 890

Dear Members,

Some members have not yet paid their fees for the year 2002-03. All such members are requested to pay their annual membership fees or convert to life membership by 15th November 2002, failing which their membership shall be discontinued.

Fees can be paid to the undersigned by cash or cheque. You may also courier your cheque to MARS registered office address.

Members who have already paid their fees should ignore this message.

Note: To become members again repayment of admission fees would be required.

Thnks,

Mehul Chovatia.
Treasurer - MARS.
9820444991.

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The Monthly meeting for September will be held on Sunday 10th November 2002.

QTH : Bengalle Girls High School, Opp. USIS library, Churchgate, Mumbai at 10 am

The Agenda for the meeting is as under :-

Prospects for future Ham Radio Classes.
Scrammble Team Field Exercise in December
Fox Hunt in January 2003.

It has been noted that many of our members are not attending the Monthly Meeting, In fact only 5 licenced Hams attended the last meeting rest were all SWLs.

Monthly meetings are wonderful oppourtunites for having eyeball with rest of our Ham friends, members are therefore requested to attend the meeting and show some interest and participate in the Society's activities, after all we all are part of it.

All Scrammble Team members are requested to attend the meeting without fail.

Please also note that MARS maintains a good library with all the latest QST Magazine(including Oct 2002). kindly take the advantage and keep yourselves updated with the latest news and information. The magazines will be available at the monthly meeting.

Members are also requested to donate some books related to Ham Radio to the society library.

looking forward to having an eyeball with you

From: vu2nlf
Topic: 906 Message: 906
Attachments: 1 described; binary payloads are missing from this source WARC

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The Monthly meeting for September was be held on Sunday 10th November 2002 at 10:00 am.

9 Hams & 13 SWLs attended the meeting. (22 Members).

VU2NLF reported the members about Ham Radio Presentations and demonstrations conducted at Atharva College of Engineering, Malad (Conducted by VU2NLF, VU2UGO and Jigar - SWL). on 22/10/2002. and at I.I.T, Powai (Conducted by VU3MBF, VU2NLF and VU2UGO) on 9/11/2002.

The next Ham Radio Classes was also discussed during the meeting but no fixed date or location was decided for the time being. MARS will be conducting a Ham Radio Presentations and demonstration at Hiranandani College, Powai very shortly, maybe then the Hiranandani College and I.I.T, Powai can be merged as one Batch.

Scrammble Team exercise (Field trip) to be conduct 7th / 8th December 2002. VU2NLF explained and discussed with the members and almost all present at the meeting will be participating in the exercise.

Fox Hunt to be conducted on 19th January 2003. VU2ZRS explained the fox hunt to all the members and took the head count of the members wanting to participate. Once again almost all present at the meeting will be participating for this event.

Library books were circulated after the meeting. Tea & Snacks were served as usual.

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

MARS will be conducting a field exercise on 7th/8th December 2002. As usual many stations will be setup at various locations in Maharashtra. Teams will be lead by a permenant Scrammble Team Members.

It would be a wonderful oppourtunity for all the SWLs to get a first hand experience of Ham Radio during this exercise.

All licenced members are requested to take initative and participate in this exercise and help to train all the budding Hams (SWLs).

All SWLs are requested to take part in this exercise as you are likely to learn a lot about real time operations of Ham Radio.

Many of the members have already confirmed their participation with me, but those haven;t may confirm with me at the earliest because a lot of planning on my side will be required in order to make this a succesful exercise.

Please confirm directly to me vu2nlf@... or call 98205-47074 ASAP.

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

With much regret I inform you that our founder members Udayan Desai - VU2AUU died on 11th November 2002 of a Cardiac Arrest. He was on his way from Junagadh to Mumbai and passed away in the train.

He practically wrote our MARS Constitution and had put a lot of effort in launching our Society. We shall always feel his absence and he will stay alive in our memories.

May His Soul Rest in Peace.

============================================================
NOTE: Because of the Thanksgiving holiday, ARRL Headquarters will be
closed Friday, November 29. There will be no editions of The ARRL Letter
and ARRL Audio News next week, and W1AW will suspend its normal
transmission schedule Friday, November 29. The K7VVV Solar Update will be
posted early. ARRL Headquarters will reopen Monday, December 2. The ARRL
Letter and ARRL Audio News will resume Friday, December 6. We wish
everyone a safe and enjoyable holiday!--Rick Lindquist, N1RL
============================================================

==>WRC-03 CONFERENCE PREPARATORY MEETING UNDER WAY

The Conference Preparatory Meeting (CPM) for next year's World
Radiocommunication Conference (WRC-03) opened in Geneva, Switzerland
November 18. Some 1000 delegates are attending the worldwide gathering.

"The objective of the CPM is to approve a 500-page CPM Report to WRC-03
that will provide a technical basis for consideration of administrations'
proposals for changes in the international Radio Regulations," explained
ARRL Chief Executive Officer David Sumner, K1ZZ. Sumner is attending in
```

his role as International Amateur Radio Union (IARU) secretary. He says 174 "input documents" to the CPM offer comments on the existing draft CPM Report text and propose additions, deletions, and changes.

Chairing the CPM is Germany's Eberhard George, DL7IH. At the day-long opening plenary, George and the chairpersons of the various working groups provided an overview of the meeting's structure and the major issues facing WRC-03.

"Several of the working group chairs were quite candid in their remarks," Sumner said. "Music to many ears including amateurs' was the assessment by New Zealand's Alan Jamieson regarding so-called little LEOs--mobile satellites operating below 1 GHz." According to Sumner, Jamieson said there was no congestion in their existing bands, and sharing studies had been unfavorable. Sumner predicted that the likely outcome at WRC-03 would be the suppression of an existing Resolution that invites sharing studies on the basis of an "urgent need" that no longer exists.

A thornier issue is 7-MHz "harmonization." The IARU backs a 300-kHz worldwide allocation in the vicinity of 7 MHz. "At this stage, we have six methods to address the agenda item," Sumner said--including no change in the status quo. The item is in Working Group 5 (WG5) "We can't say for sure that the six methods will be in the CPM Report until WG5 takes another pass at the revised draft text and it's approved in plenary." That's not supposed to happen until next week.

Substantive work of the CPM will be wrapped up November 28--Thanksgiving in the US, but just another work day in Geneva.

In addition to Sumner, those representing the IARU at the CPM include President Larry Price, W4RA, and Region 1 Executive Committee member Wojciech Nietyksza, SP5FM. IARU Vice President David Wardlaw, VK3ADW, is on the Australian delegation and ARRL Technical Relations Manager Paul Rinaldo, W4RI, is on the US delegation.

Several other amateurs are on their national delegations, either to represent the amateur services or in professional capacities.

==>A SQUEAKER IN WEST CENTRAL FLORIDA AS SECTION MANAGER BALLOTS ARE TALLIED

ARRL West Central Florida Section Manager Dave Armbrust, AE4MR, narrowly won re-election as ballots were counted in three contested races. Armbrust--the first and only person to serve as WCF SM--edged out Gerald Dee Turner, N2MNC, by just two votes--490 to 488. An ARRL Life Member, Armbrust was first appointed to the job in November 1999, when the new section was created. He was elected for a two-year term the following year.

Just last year in Tennessee, Terry Cox, KB4KA, eked out a victory over David Bower, K4PZT, 540 to 538, for the honor of succeeding outgoing SM O.D. Keaton, WA4GLS, who decided not to run for another term.

Results in two other ARRL sections were not nearly as close. In South Carolina, incumbent SM Patricia Hensley, N4ROS, lost out to James Boehner, N2ZZ, of Aiken, in her bid for a new term. Boehner, an ARRL Life Member and a physician, outpolled Hensley 431 to 239. He has said he wants to enhance Amateur Radio growth in his section and "guide the path of Amateur Radio in South Carolina into the 21st century."

In Western Pennsylvania, incumbent John Rodgers, N3MSE, won re-election 485 to 410 over David Leiser, K3NPX. Rodgers, a ham since 1992, was appointed SM in 2000, replacing Bill Edgar, N3LLR, who had acceded to Vice Director. He was elected to a full term later that same year.

ARRL Field and Educational Services staff members counted and verified all ballots November 19 at ARRL Headquarters.

Incumbent ARRL SMs in six other ARRL sections did not face opposition and have been declared elected for new two-year terms. They are Phil Temples, K9HI, Eastern Massachusetts; Dale Bagley, K0KY, Missouri; Bill McCollum, KE0XQ, Nebraska; George Tranos, N2GA, New York City-Long Island; Thomas Dick, KF2GC, Northern New York; and Jean Priestley, KA2YKN, Southern New Jersey.

Terms of office for all successful candidates begin January 1, 2003.

Kansas also will get a new SM on January 1. Orlan Cook, W0OYH, has announced his retirement from the Kansas Section Manager's position as of end of this year after serving for five years. ARRL Field and Educational Services Manager Rosalie White, K1STO, has appointed Ron Cowan, KB0DTI, of La Cygne to complete the year remaining in the present term of office.

Cowan has been an Assistant Section Manager since April, 2002, and has been the Kansas Section Traffic Manager for about two years.

==>JONATHAN ADELSTEIN SWORN IN AS FCC COMMISSIONER

FCC nominee Jonathan Adelstein was sworn in this week to fill the Commission's remaining open slot. The nomination of Adelstein, a Democrat and a protégé of South Dakota Sen Tom Daschle, had been held hostage for most of this year because of political wrangling over several judicial nominations. Adelstein will finish out the term of former Commissioner Gloria Tristani, which ends in June.

The only other Democrat on the FCC, Michael J. Copps, called it "a happy day" for himself and the FCC. Copps said Adelstein will make "an exceptionally fine new colleague" whose addition will bring the FCC up and running at full complement.

Okayed last summer by the Senate Commerce, Science and Transportation Committee, Adelstein was confirmed by the Senate November 14 in a procedural floor vote.

Earlier this year, Adelstein's FCC nomination appeared dead for the year as Senate Republicans and Democrats squabbled over judicial nominations, and some Republicans, placed anonymous holds on Adelstein's nomination.

The election and the change in Senate control obviated the issues involved, however.

The White House nominated Adelstein last February.

==>NEW OWNER, CALL SIGN, BUT LA-AREA REPEATER PROBLEMS PERSIST

The former W6NUT repeater in the Los Angeles area has a new owner and a new call sign, N6SAP. Nonetheless, complaints of the same sort of on-the-air behavior that inspired an FCC inquiry of the previous trustee more than a year ago have occurred under the new regime. The new owner says he's in the process of changing things for the better, however. A November 5 letter from FCC Special Counsel for Enforcement Riley Hollingsworth publicly put the machine's new trustee, Scott A. Press, N6SAP, on the spot because of allegations that some users had interfered with attempts to pass emergency traffic. Two users identified as having caused the interference also received inquiries from Hollingsworth.

"We view these allegations as extremely serious," Hollingsworth told Press--the repeater trustee--and those said to have been involved in the October 2 incident. He also cautioned those accused of perpetrating the problem against retaliating in any matter toward the complainants.

A League member, Press told ARRL this week that he's been working hard to turn around the repeater's past reputation but change will not happen overnight. "I knew what I was getting into when I bought the system and have made some strong progress with the exception of a few bad apples who have not seen the light yet," he said. "They are being shaken from the tree one by one."

Press purchased the former W6NUT repeater, once owned by Kathryn Tucker, AA6TK. According to FCC records, the trusteeship formally transferred September 3. At one point in 2001, the FCC terminated authority to operate the repeater under automatic control. An earlier FCC review into the repeater's operation followed allegations that the licensee or control operator failed to address incessant jamming, broadcasting, the playing of music and other potential violations.

An N6SAP repeater user, Anthony Cardenas, WA6IGJ, complained to the FCC that he was jammed October 2 after attempting to use the repeater to report a motorist stranded in the midst of freeway traffic. Cardenas alleged that Ledge Musselman, KC6NCN, and Anton Johnson, N6OAY, blocked his efforts to alert the California Highway Patrol to the potentially hazardous situation via ham radio. Hollingsworth included the allegations in essentially identical letters to Musselman and Johnson, also sent November 5.

Information from Press and others who monitored the incident indicated that Press did just that. He shut down the N6SAP repeater for 20 minutes after other operators were unsuccessful in efforts to convince the interfering stations to let Cardenas pass his traffic. Transcripts of the recordings indicate that the interference consisted mostly of disparaging

remarks, unmodulated carriers and singing. Cardenas says he was able to contact the police via another repeater.

Press has told the FCC that Cardenas' account of the incident was "accurate and true." He told ARRL that he'd been promptly in touch with the complainant and with an ARRL Official Observer who forwarded the complaint to the League.

According to the FCC, Press has told Johnson and Musselman to stay off the N6SAP repeater at least until the current dispute is resolved. "We expect that request to be honored," Hollingsworth said, "and if it is not, we will immediately institute license revocation proceedings," he wrote. Press has since also banned Cardenas from the N6SAP repeater.

Press said he's been working closely with the FCC to "clear up many things that are just out of my reach." Hollingsworth this week commended Press for "trying very hard to change what was a disgrace to Amateur Radio into a viable Amateur repeater" and said the FCC supports his efforts.

==>AMATEURS AID IN WAKE OF CONNECTICUT ICE STORM

Amateur Radio Emergency Service (ARES) members got to work quickly the morning of Sunday, November 17, as an ice storm knocked out power to almost 130,000 Connecticut homes and businesses, mostly in the northwestern part of the state. The statewide alert--and the resulting ARES activation--lasted 48 hours. Connecticut Gov John Rowland toured the region and visited the ham station set up at the Torrington Emergency Operations Center.

Connecticut Section Emergency Coordinator Allen Pitts, W1AGP, said about 30 hams from all over The Nutmeg State headed into the affected area, mostly in northwestern Connecticut. He characterized ARES members' efforts as "wonderful." Pitts said Connecticut ARES had been drilling informally in conjunction with ARES teams in Eastern New York and New Hampshire, and the effort paid off. "The drills covered a very similar situation," he said. "The level of coordination and cooperation was incredible."

ARRL staffer Brennan Price, N4QX, was among those taking a turn as net control of the Connecticut Phone Net on 3965 kHz. "The good thing about this particular situation was with such a small part of the state hit, there were a lot of others in the state able to help out," he said. "It all came together quickly and was nicely pulled off."

West Hartford-Area EC Harry Abery, AB1ER, said most of the work hams did was in Torrington area shelters. That Litchfield County community was among the hardest hit.

Connecticut ARES linked 10 VHF and UHF repeaters in Torrington, Vernon, Naugatuck, Meriden, New Milford and Washington. Separate resource and tactical nets were run on other 2 meter repeaters.

Dutchess County, New York, EC Adam Nowik Jr, KC2DAA, said amateurs in Eastern New York activated their own net, and more than a half dozen New

Yorkers arrived in the Torrington area within three hours of the activation. "Our net was kept active in the event the Connecticut section had need for additional communications or had a complete communications breakdown," Nowik said. Frank Stone, KB2YUR, served as a liaison between Abery and the hams in Eastern New York for the duration of the incident.

After 27 hours, the Connecticut Phone Net's Emergency session on HF was able to stand down the afternoon of November 18, as temperatures rose into the 40s. But 20 minutes later, the net was back up after a trunk line from New York went down and more people lost power, Pitts said. Relief efforts by area radio amateurs continued into the evening of November 18, when the statewide ARES alert was terminated. "We did not shut down statewide until we were sure everyone was off the roads, home safe and checked in," Pitts said.

Pitts credited greater professionalism and proficiency over the past several months to the ARRL Amateur Radio Emergency Communications courses <http://www.arrl.org/cce/> offered on-line. "We're seeing a real difference, and the quality of operations is definitely up," he said. Thanks to a $33,000 grant from Hartford-based United Technologies Corporation, up to 250 Connecticut amateurs will be able to take the ARRL Level I Amateur Radio Emergency Communications course (EC-001) free of charge.

==>DXCC LEGEND BOB WHITE, W1CW, SK

Former ARRL Headquarters staff member Bob White, W1CW, died November 22 in Florida from complications arising from pneumonia. He was 83. White was an ARRL Life Member and had belonged to the League for 62 years.

Known to many as "Mr DXCC," White was the manager of the ARRL's DX Century Club program from 1952 until 1976, establishing the award--and its stringent standards--as Amateur Radio's premier DX achievement. White codified the rules for the DXCC program and oversaw the checking of some 250,000 QSL cards submitted yearly, often working as many as 90 hours a week to ensure that the job got done right. White also oversaw the ARRL QSL Service from 1976 until 1978.

"Dad was the guy who made DXCC what it was," said White's son, Jim White, K4OJ, in a posting to the CQ Contest reflector. "He didn't cut any corners--everyone was held to the same high standard--and this is what made holding DXCC meaningful."

Introduced to Amateur Radio in his youth by his stepfather, Gordon Brown, W6APG, White was first licensed in 1938. He served as a radio operator in the US Navy during World War II.

White was an avid DXer, contester and CW enthusiast whose fist was familiar to thousands of hams. Active in the First-Class CW Operators' Club, White was inducted into the CQ DX Hall of Fame in 1998. He also was a member of the A1 Operator Club.

Survivors include his wife Ellen, W1YL, and his son Jim, K4OJ, both former ARRL staff members.

Friends may send condolence messages via e-mail <w1cw@...m> or to 6607 Flicker Ct, Seffner, FL 33584. The family invites memorial donations to the W1CW Memorial Fund-Florida Contest Group, c/o Frederick M Perkins Jr, 3437 Lake Josephine Dr, Lake Placid FL 33852 USA. Per White's request, there will be no public service.

==>ANNUAL SKYWARN RECOGNITION DAY IS DECEMBER 7

The fourth annual SKYWARN Recognition Day (SRD) <http://hamradio.noaa.gov/>is December 7 (UTC). That's when Amateur Radio operators set up stations at National Weather Service (NWS) offices and contact other operators around the world. The event is sponsored by the ARRL and the National Weather Service.

"The purpose of the event is to recognize the vital public service contribution that Amateur Radio operators make during National Weather Service severe weather warning operations," said David Floyd, N5DBZ, warning coordination meteorologist, at the NWS Goodland, Kansas, office. "It also strengthens the bond between Amateur Radio operators and the local National Weather Service office."

For several decades now, hams have assisted the NWS by providing real-time reports of severe weather and storm evolution. The information radio operators locate near a storm can provide plays a key role in aiding forecasters. SKYWARN operators in several states activated to spot and track an outbreak of severe thunderstorms and tornadoes November 10.

Scott Mentzer, N0QE--the meteorologist-in-charge of the NWS office in Goodland, Kansas, and the creator and annual organizer of SRD--says more than 90 stations are registered to participate, up from 80 last year. Most participating NWS stations will operate on 80, 40, 20, 15, 10, and 2 meters using SSB and FM. Mentzer says a number of NWS offices will be equipped to support Internet Radio Linking Project (IRLP) stations.

All contacts will be made utilizing the General or Novice portion of the bands. Stations will exchange signal report, location and a one-word description of the current weather at their respective locations ("sunny," "partly cloudy," "windy," etc). This is not a contest, so no scoring will be computed.

SKYWARN Recognition Day will take place December 7 from 0000 UTC to 2400 UTC. Since SRD is being held on Pearl Harbor Day, each NWS office will transmit a special message from approximately 1800 to 1900 UTC--approximately the time of the Pearl Harbor, Hawaii, attack on December 7, 1941--to honor the World War II veterans.

The deadline to register an NWS site is December 1. Contact Mentzer to register: scott.mentzer@.... Complete information is available on the 2002 SKYWARN Recognition Day Web site <http://hamradio.noaa.gov/>.

==>USTTI CLASS OF 2002 LEARNS ABOUT AMATEUR RADIO

Six students from around the world recently attended the United States Telecommunications Training Institute (USTTI)/International Amateur Radio Union (IARU) course on Amateur Radio administration at ARRL Headquarters. The course was held November 4-8.

Coordinated by USTTI and presented jointly by IARU and ARRL staffers, the program covers--among other topics--the International Telecommunication Union and ITU regulations, the IARU, spectrum management, emergency communication, digital communication, satellites, electromagnetic interference, international licensing, and Amateur Radio testing and licensing in the US.

The trainees also constructed a simple 40-meter receiver in the ARRL Lab.

Attending this year's session were Ivannia Marcela Blanco of Costa Rica, Mabel Doku of Ghana, Antonio Edward Eba Padre of the Philippines, Nicolae Ghibu of Romania, Sung-Chul Chae of South Korea, and O'Connor Malambo of Zambia. All of the students are in occupations in their home countries that involve the use of telecommunications.

Teaching the majority of the Amateur Radio Administration Course were ARRL Technical Relations Specialists Jon Siverling, WB3ERA, and Walt Ireland, WB7CSL--both of the ARRL's Washington, DC, office. The staff of the ARRL Laboratory was on hand to help with the construction of the receiver.

ARRL staff member Lisa Kustosik, KA1UFZ, served as USTTI coordinator this year.

For more information on USTTI, visit the USTTI Web site <http://ustti.org/>.

==>SOLAR UPDATE

Solar sage Tad "I'll Follow the Sun" Cook, K7VVV, Seattle, Washington, reports: Conditions very quiet, with mid-latitude A index for Friday through Sunday at a placid 8, 3 and 5, and the planetary A index at 11, 8 and 8. Mid-latitude K indices were zero over several periods on Saturday and Sunday.

Average daily sunspot numbers were down more than 62 points this week over last, and average solar flux was down nearly 5 points.

Sunspot 198, squarely aimed at Earth on November 21, has a potential for solar flares. The planetary K index rose to a very high value of 7, and planetary A index was 50.

For the CW weekend of the CQ Worldwide DX Contest <http://www.cq-amateur-radio.com/WW%20Rules%202002%20815.pdf> the predicted planetary A index is 35, 20 and 15. Solar flux is predicted to rise very gradually over the next few weeks to just below 200 before mid-December.

Sunspot numbers for November 14 through 20 were 185, 185, 162, 139, 119, 105 and 108, with a mean of 143.3. The-10.7 cm flux was 184.1, 197.5,

199.2, 184.7, 178.9, 168.2 and 159.1, with a mean of 181.7. Estimated planetary A indices were 9, 11, 8, 8, 12, 14 and 17, with a mean of 11.3.

==>IN BRIEF:

* This weekend on the radio: The CQ Worldwide DX Contest (CW) and the ARRL International EME Contest are the weekend of November 23-24 (NOTE: The CQ WW CW event typically takes place the weekend after Thanksgiving, but Thanksgiving is late this year.) JUST AHEAD: The QRP ARCI Holiday Spirits Sprint is December 1; the QRP ARCI Topband Sprint is December 4-5. The ARRL 160-Meter Contest, the PSK31 Death Match, the TARA RTTY Sprint, the TOPS Activity 80-Meter Contest are the weekend of December 7-8. The ARRL 10-Meter Contest and the Great Colorado Snowshoe Run are the weekend of December 14-15. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the ARRL Satellite Communications course (EC-007) opens Monday, November 25, 4 PM EST (2100 UTC). Registration remains open through Sunday, December 1. Classes begin Monday, December 2. Registration for the Level III Amateur Radio Emergency Communications (EC-003) and the HF Digital Communications (EC-005) courses remains open through Sunday, November 24. A new service now allows those considering taking an ARRL Certification and Continuing Education (C-CE) course in the future to be advised via e-mail in advance of registration opportunities. Send an e-mail to prereg@..., and include the course name or number (eg, EC-003) on the subject line as well as your name, call sign and month you wish to start the course in the body. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* Congress adjourns; HR 4720 expires without action: The US House of Representatives officially adjourned for the year November 22 at 2:33 PM. The US Senate wrapped up its business earlier this week, so the 107th Congress is officially in the books. With adjournment go any hopes of passage of HR 4720, the CC&R bill introduced by New York Democrat Steve Israel earlier in the year. ARRL members are requested to wait until a new CC&R bill--with a new bill number--is introduced in the next session of Congress before seeking cosponsorship support from members of Congress.

* Daughter of ARRL co-founder dies: Percy Maxim Lee, the daughter of ARRL co-founder Hiram Percy Maxim, W1AW, died November 9. She was 96. "She was a remarkable woman, one more in a line of remarkable people," said ARRL Pacific Division Director Jim Maxwell, W6CF. Born July 4, 1906, Percy Maxim Lee led an active political and civic life, serving as president of the Connecticut League of Women Voters from 1941 to 1950 and four terms as president of the League of Women Voters of the United States from 1950 to

1958. She received national appointments to various councils and commissions from four presidents and was active in water and land-use issues in Connecticut. She also founded the Junior School (now Renbrook School) in West Hartford, Connecticut, served on the boards of several New England schools and was vice chairman of the board of trustees for Connecticut College. The family invites memorial contributions to Lawrence and Memorial Hospital, 365 Montauk Ave, New London, CT 06320 or to or the League of Women Voters of the United States, 1730 M St NW, Ste 1000, Washington, DC, 20036-4508.--some information from The Day of New London

* Transatlantic VHF contact a no-go: Groups of amateurs from Germany, Canada and Ireland had no luck in their attempt to make the first two-way transatlantic VHF contact in conjunction with this week's Leonid meteor shower. The effort was, in part, a quest for the Brendan Trophies <http://www.irts.ie/brendan.htm> offered by the Irish Radio Transmitters Society <http://www.irts.ie/>. One group was on the Irish coast, while the other operated from Society of Newfoundland Radio Amateurs (SONRA) <http://www.sonra.ca/> club station VO1AA, located at Signal Hill National Historic Site of Canada. That's the spot where Marconi received the first transatlantic signal almost 101 years ago. "It's been quite an adventure," said Paul Piercey, VO1HE, who was at the Newfoundland end. "We never made the contact because the meteor shower didn't seem as big as predicted, he said." The Brendan Trophies will go to each of the operators of the two Amateur Radio stations that first establish two-way communication between Europe and North or South America on 2 meters. The teams in Ireland and Newfoundland attempted to use the ionized meteor trails to reflect FSK441 signals across the Atlantic. A 1999 effort to complete a transatlantic 2-meter contact between Newfoundland and Scotland on CW also was unsuccessful. The group conceded that bridging the more than 1920-mile gap between Newfoundland and Ireland via meteor scatter probably would require "an unusual kind of propagation."--Paul Piercey, VO1HE

* The ARRL Letter delivery problems: A few e-mail recipients of The ARRL Letter have reported that some recent editions never arrived in their e-mail in boxes. If this occurs, members who have signed up for direct delivery via their ARRL Web site Member Data Page <http://www.arrl.org/members-only/memdata.html> first should be certain that their ARRL membership has not expired. If their membership is current, they should send an e-mail to letter-dlvy@.... Some recipients also have reported that certain anti-SPAM filters will sequester editions of The ARRL Letter or prevent delivery altogether. Especially if you receive The ARRL Letter at a business address, consider checking with your system administrator to see if anti-SPAM software could be the problem. Current and back issues of The ARRL Letter, typically distributed Fridays, remain available to all via the ARRL Web site <http://www.arrl.org/arrlletter>. The ARRL Letter goes out 50 times a year to some 65,000 ARRL members.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main

St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259;
http://www.arrl.org. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb at http://www.arrl.org for the latest news, updated as it happens. The ARRLWeb Extra at http://www.arrl.org/members-only/extra offers ARRL members access to informative features and columns.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ.

To subscribe, unsubscribe or change your address for e-mail delivery: ARRL members first must register on the Members Only Web Site, http://www.arrl.org/members/. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes, and click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb, http://www.arrl.org/arrlletter/. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit http://mailman.qth.net/mailman/listinfo/letter-list. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

==>WRC-03 CONFERENCE PREPARATORY MEETING EXPANDS 40-METER OPTIONS

Paul Simon sang of 50 ways to leave your lover, but participants at the
just-ended Conference Preparatory Meeting (CPM) for World
Radiocommunication Conference 2003 heard just five ways to fix 40 meters,
plus a sixth that would just leave things as they are.

"The five options for change all represent improvements in the amateur
band, although two fall short of fulfilling the 300-kHz worldwide
requirement," said ARRL Chief Executive Officer David Sumner, K1ZZ. He
attended the Geneva gathering in his role as International Amateur Radio
Union (IARU) secretary. "All six options maintain the existing 300-kHz
exclusive amateur allocation in Region 2."

The objective of the CPM was to complete work on a 700-plus page extensive
technical CPM Report, which outlines methods to address the more than
three dozen items that are on the WRC-03 agenda. As for amateur issues,
```

Sumner says 7-MHz realignment or harmonization "is one of the most difficult issues facing WRC-03." As he explains the situation, three major interests--amateurs, shortwave broadcasters, and users, mainly military, of the fixed and mobile services--have a stake in the outcome.

The IARU is on record as supporting a 300-kHz worldwide amateur allocation in the vicinity of 7 MHz. Sumner said achieving this would require the fixed and mobile services to make room for broadcasters and for the broadcasters to change their operating frequencies. The five methods for change the CPM Report describes include a variety of transition schedules to ease the impact on these other services.

* Method A would shift Region 1 and 3 broadcasters up by 200 kHz to 7300-7550 kHz in two stages and would provide the same band for broadcasting in Region 2.

* Method B is similar but would have amateurs in Regions 1 and 3 sharing the upper 100 kHz of their newly expanded band with fixed and mobile.

* Method C would provide just 200 kHz for amateurs in Regions 1 and 3. Amateurs in Region 2 would continue to contend with broadcasting interference from Regions 1 and 3 in the 7200-7300 kHz segment.

* Method D, proposed by Canada at the CPM, would provide 300 kHz worldwide for amateurs by shifting broadcasters in Regions 1 and 3 up by 200 kHz but would not expand the Region 2 broadcasting allocation. This plan would minimize the impact on fixed and mobile services in Region 2.

* Method E, proposed by the Republic of Korea at the CPM, would provide amateurs in Regions 1 and 3 with an additional 100 kHz shared with fixed and mobile (7100-7200 kHz). As with Method C, however, Region 2 amateurs would continue to face broadcasting interference from Regions 1 and 3 in the 7200-7300 kHz segment.

* Method F, proposed by Australia at the CPM, would simply maintain the status quo. This plan reflects concerns about the impact of realignment on military and national security communications capabilities.

"There is no guarantee that proposals will be limited to the six methods described in the CPM Report," Sumner said.

Amateur Radio was well represented at the CPM. Chairing the CPM was Eberhard George, DL7IH, of Germany. A three-member IARU team was headed by President Larry Price, W4RA, and included Sumner and Wojciech Nietyksza, SP5FM. ARRL Technical Relations Manager Paul Rinaldo, W4RI, served as a member of the US delegation. He also was named to chair the ad hoc group that dealt with the substance of the 7-MHz text. Several other amateurs were on their national delegations, some of them specifically to represent Amateur Radio and others in professional capacities. IARU Vice President David Wardlaw, VK3ADW, was on the Australian delegation.

Sponsored by the International Telecommunication Union (ITU), the CPM drew more than 1000 participants to Geneva during the last two weeks of

November. Over the next three months, regional telecommunications organizations and groups (CEPT, CITEL, and Asia-Pacific Telecommunity, the African Telecommunications Union, and Iran and the Arab States) as well as individual administrations will be developing their proposals for WRC-03, which takes place in Geneva next summer.

==>FIRST AMATEUR TRANSATLANTIC HF DIGITAL VOICE QSO REPORTED

Radio communication pioneers Ten-Tec and Thales have announced that they've used an Amateur Radio linkup to span the Atlantic on HF digital voice for the first time. Ten-Tec's Doug Smith, KF6DX, and Thales' Didier Chulot, F5MJN, successfully transmitted and received HF digital speech signals November 22 between Paris, France, and Ten-Tec's Sevierville, Tennessee, headquarters.

"We view this as a significant accomplishment," said Smith. "Amateur Radio has long been at the forefront of technological development. It's nice to be able to show that our legacy is alive and well." Tests are being conducted under the auspices of ARRL's Digital Voice Working Group, which Smith chairs. A written report on the tests is due in January.

Calling it "a major breakthrough," a Ten-Tec news release said the two amateur stations "demonstrated the advantages of digital audio during the conversation, including noise-free, FM-like reception and the potential for simultaneous voice and data." The feat was accomplished on 15 meters using Ten-Tec transceivers and Thales Communications Skywave 2000 digital audio software. Operating as F8KGG, Chulot spoke with Smith for several minutes over the HF digital link, operating within a 3-kHz bandwidth.

Smith said he and F5MJN used unmodified Ten-Tec transceivers in upper-sideband mode, although AM or FM mode also would work. No additional hardware was required beyond the cables connecting the transceiver and the microphone to the PC sound card. Smith said audio quality was roughly the same as a conventional telephone circuit. An Amateur Radio version of the Thales system is expected to appear on the market early next year. "At this stage, the system is experimental-only for ham radio, but it looks like it's going to take off," Smith predicted.

In terms of Amateur Radio, Alinco was the first manufacturer to come out with a digital voice option for some of its transceivers. ICOM debuted its D-Star digital "concept radio" system last May at the Dayton Hamvention--where Smith chaired the Digital Voice Forum--and demonstrated it at the ARRL-TAPR Digital Communications Conference in September. The unit, which operates on 1.2 GHz, was scheduled to hit the ham radio market this fall.

Technical details of the Thales system will appear in an article "International Digital Audio Broadcasting Standards: Voice Coding and Amateur Radio Applications" in the January/February issue of QEX, which he edits. The article is available on the ARRL Web site <http://www.arrl.org/tis/info/pdf/x0301049.pdf>. He also has authored two articles on digital voice in QST: "Digital Voice: The Next New Mode?"

<http://www.arrl.org/tis/info/pdf/0201028.pdf> in the January 2002 issue, and "Digital Voice: An Update and Forecast" <http://www.arrl.org/tis/info/pdf/0202038.pdf> in the February 2002 issue.

Additional images and background are available on the TAPR Web site <http://www.tapr.org>. Look for the Digital Voice Forum page and the presentation by Cédric Demeure.--Ten-Tec news release; Doug Smith, KF6DX

==>ALL-HAM, ALL-MALE CREW SETTLES IN ONBOARD INTERNATIONAL SPACE STATION

With this week's departure of the space shuttle Endeavour from the International Space Station, one all-ham crew has replaced another onboard the ISS. This time around, however, no female voices will grace the amateur airwaves between the space outpost and Earth. The new crew is entirely male. The crew change also marks the first time since Expedition 3 that a US astronaut will serve as crew commander.

The Expedition 6 crew--Commander Ken Bowersox, KD5JBP; Flight Engineer Nikolai Budarin, RV3FB, and NASA ISS Science Officer Don Pettit, KD5MDT--lifted off November 23 on its four-month scientific mission. The team replaces the all-amateur Expedition 5 crew of Commander Valery Korzun, RK3FZ; Sergei Treschev, RK3FU, and Peggy Whitson, KC5ZTD. The Expedition 6 team is the third all-ham crew to serve aboard the ISS.

In space since June 5, Whitson, Korzun and Treschev ended up staying in space a bit longer than they'd expected. The launch of the Endeavour and the new ISS crew was delayed--first by an onboard oxygen leak and later by weather problems in possible emergency landing zones. Subsequently, inclement weather on Earth frustrated the Endeavour's efforts to return home. By week's end it appeared they might not be back home until December 6 or 7. The shuttle launch was the last one for the year 2002. In addition to the replacement crew, it also carried a truss segment for the ISS.

The next scheduled Amateur Radio on the International Space Station (ARISS) school contact is December 16 with students at Adler Planetarium and Astronomy Museum in Chicago. A light ARISS school contact schedule is planned over the next three weeks or so, however, as the crew settles in and takes care of initial duties, including a spacewalk this month by Bowersox and Budarin.

ARISS <http://ariss.gsfc.nasa.gov/> is an international project with US participation by NASA, ARRL and AMSAT.

==>NORTH KOREA ASKS P5/4L4FN TO QRT

The only Amateur Radio station active from North Korea has been ordered off the air. Ed Giorgadze, 4L4FN, had been operating for the past year as P5/4L4FN from Pyongyang. The ARRL subsequently accredited SSB and RTTY operation of P5/4L4FN for DXCC.

"This really hits the ham community hard," QSL manager Bruce Paige, KK5DO, said in a news release. "I, for one, was looking forward to a satellite contact on AO-40. I know that many of you were still awaiting your first

QSO."

Paige said that on Friday, November 22, Giorgadze was called into a meeting with the "Radio Regulation Board" without any explanation, and he was politely asked to quit all transmissions and pack all his radio equipment. "Saturday, he spent all day on the roof disassembling his antennas and packing boxes." Paige said North Korean government officials later came by and sealed all of the boxes. When Giorgadze leaves North Korea on December 10 for two weeks of vacation, "he is to take everything with him out of the country," Paige indicated.

Giorgadze had tried for more than two years to obtain permission to operate Amateur Radio in North Korea and finally was given the okay in 2001 to bring an ICOM IC-706MkIIG into the country. In the intervening months, he's been slowly upgrading his antenna system. He's made more than 16,000 contacts during his stint in North Korea, and earlier this year attained the first DXCC ever from that country.

Paige said the P5/4L4FN logs should be 100% complete on his Web site < http://www.amsatnet.com/ > (click on "P5 North Korea").

Giorgadze, who's from of the Republic of Georgia, had been operating on the basis of oral permission from North Korean authorities, but ARRL Membership Services Manager Wayne Mills, N7NG, said the League was satisfied on the basis of written information submitted that the P5/4L4FN operation conformed with DXCC rules and cards would continue be accepted for credit.

==>HERB SCHOENBOHM RETURNS TO HAM RADIO

After nearly two years off the air, Herb Schoenbohm, ex-KV4FZ, of Kingshill, Virgin Islands, has made good on his promise to one day return to the Amateur Radio ranks. The FCC on December 4 issued Schoenbohm a new call sign, NP2MJ, as a General-class licensee, and it acted December 5 on his subsequently filed Amateur Extra-class application.

In 1994, the FCC put Schoenbohm's renewal application for KV4FZ up for hearing following his 1992 felony conviction on federal fraud charges. The Commission finally turned down his renewal application in 1998, the US Appeals Court upheld the FCC's decision in 2000, and the US Supreme Court declined to hear the case later that same year. After losing his renewal bid, Schoenbohm applied for a new license in 2001, first passing the General and then the Extra exams. The FCC subsequently designated Schoenbohm's General application for hearing on the basis of character issues stemming from his 1992 conviction as well as his alleged lack of candor during subsequent FCC hearings on the matter.

Following a hearing last spring, Administrative Law Judge Arthur I. Steinberg in October cleared the way for Schoenbohm's return to ham radio by declaring that Schoenbohm appeared rehabilitated and qualified to again become a Commission licensee. Schoenbohm plans to apply for KV4FZ as a vanity call sign.

Schoenbohm was dubious about getting on the air for the ARRL 160-Meter Contest December 7-8. "I will try to get on, but the station is still dismantled," he told ARRL. "I don't have any antennas up either except for the 70-foot tower, which needs the beam on top to work properly on 160." His amp also is on the fritz, so if he does manage some Top Band operation during the contest, it will be at the 100-W level. "Since my license has been granted, I have not even made one contact on 2 meters!" Schoenbohm added.

==>NEW TECHNICIAN CLASS QUESTION POOL RELEASED

The Question Pool Committee (QPC) of the National Conference of Volunteer Examiner Coordinators has released a revised and expanded Amateur Technician class (Element 2) question pool into the public domain. The new question pool becomes effective July 1, 2003, and must be used to generate all Technician written examinations administered on or after that date.

"The newly revised pool released this week by the QPC includes significant efforts to present the pool in a more friendly and understandable fashion for beginners while maintaining appropriate emphasis on safety, rules and operating procedures," said ARRL VEC Manager Bart Jahnke, W9JJ. "The Technician syllabus was completely revised during 2002 to allow for the revamping of the new question pool."

The new Element 2 question pool contains 511 questions--up from 385 in the April 2000 release that occurred around the time of Amateur Radio restructuring.

The new question pool, available on the Amateur Exam Question Pools Web page <http://www.arrl.org/arrlvec/pools.html>, includes all questions and answers as well as graphics related to the questions for Element 2.

The FCC rules (§97.523) require each question pool to contain at least 10 times the number of questions required to appear on any examination drawn from that pool. QPC Chairman Scotty Neustadter, W4WW, says the QPC has attempted to apply that same "10 times" principle to each subelement.

Neustadter said "insignificant changes" to the Element 2 syllabus were made as they became obvious, although they were not specifically highlighted in this week's release.

VECs have a certain amount of flexibility with the format of their examinations. Outside of the fact that questions, answers, distracters and related graphics must appear as they do in the question pool itself, "the manner of presentation is not interpreted to be of impact to Amateur Radio as long as clarity of presentation is preserved," Neustadter said.

On behalf of the QPC, he also thanked all amateurs who assisted in the effort to revise Element 2. In addition to Neustadter and Jahnke, members of the Question Pool Committee are Fred Maia, W5YI, and John Johnston, W3BE.

The Question Pool Committee now will turn its attention to developing an outline for the General class (Element 3) question pool, which will be

revised during the fall of 2003. The QPC has put out a call for input by January 31, 2003, to the Element 3 syllabus and question pool. Commenters may address specific Element 2 questions as well as inputs to the Element 3 syllabus and question pool to the Question Pool Committee via e-mail <qpc@...>.

==>ARRL INTERNATIONAL HUMANITARIAN AWARD NOMINATIONS CLOSE DECEMBER 31

Nominations close December 31 for the 2002 ARRL International Humanitarian Award. The award is dedicated to an amateurs or amateur group devoted to promoting human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

The ARRL International Humanitarian Award recognizes the hobby's international communication role and that hams regularly help people in need throughout the world. Amateur Radio is one of the few telecommunication services that allow people throughout the world to meet and talk with each other and spread goodwill across political boundaries.

A committee appointed by the League's President recommends an award recipient to the ARRL Board of Directors, which makes the final decision. The committee now is accepting nominations from Amateur Radio, governmental or other organizations that have benefited from extraordinary service rendered by an Amateur Radio operator or group.

Nominations must include a summary of the nominee's actions that qualify the individual or group for this award plus verifying statements from at least two individuals having first-hand knowledge of the events warranting the nomination. These statements may be from an official of a group (eg, the American Red Cross, The Salvation Army, a local or state emergency management official) that benefited from the nominee's particular Amateur Radio contribution. Nominations should include names and addresses of all references.

All nominations and supporting materials for the 2002 award must be submitted in writing in English to ARRL International Humanitarian Award, 225 Main St, Newington, CT 06111 USA. The award winner receives an engraved plaque, and is profiled in QST and other ARRL venues.

The 2001 ARRL Humanitarian Award winner was Dr Jim C. Hirschman, K4TCV, of Miami, Florida.--Jean Wolfgang, WB3IOS

==>SOLAR UPDATE

Sun King Tad "The Sunny Side of the Street" Cook, K7VVV, Seattle, Washington, reports: Average sunspot numbers were up a bit this week, and average daily solar flux barely changed. Geomagnetic indices were quieter.

Now that December is here, let's review average daily solar flux and sunspot numbers for November, and compare them with previous months. Here are monthly averages for solar flux and sunspot numbers for this year.

>From January through November, 2002 the average daily sunspot number for each month was 189, 194.5, 154.3, 144.4, 146, 183.5, 191, 206.4, 153.9 and 159.8. Average daily solar flux for the same months was 227.3, 205, 179.2, 141.4, 148.7, 174.4, 183.9, 175.8, 167 and 168.7.

This weekend is the ARRL 160-Meter Contest. It would be good to have low geomagnetic activity for this contest. Right now the predicted planetary A index for Friday through Monday is 12, 15, 20 and 15. This indicates unsettled to active conditions on Saturday and Sunday due to coronal hole effects. There is a chance of moderate solar flare activity over the next few days. Solar activity is likely to be low. Predicted solar flux for the next few days is 160-175.

Sunspot numbers for November 28 through December 4 were 124, 107, 150, 97, 155, 135, and 144, with a mean of 130.3. The 10.7-cm flux was 139.7, 141.3, 146.2, 149.6, 146.1, 145.9 and 148.7, with a mean of 145.4. Estimated planetary A indices were 15, 14, 16, 16, 11, 11 and 12, with a mean of 13.6.

==>IN BRIEF:

* This weekend on the radio: The ARRL 160-Meter Contest, the PSK31 Death Match, the TARA RTTY Sprint, the TOPS Activity 80-Meter Contest are the weekend of December 7-8. JUST AHEAD: The ARRL 10-Meter Contest and the Great Colorado Snowshoe Run are the weekend of December 14-15. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the ARRL Level II Amateur Radio Emergency Communications (EC-002) and Antenna Modeling (EC-004) courses opens Monday, December 9, 4 PM EST (2100 UTC). Registration will remain open through Sunday, December 15. Classes begin Monday, December 16. Registration for the CNCS grant-funded ARRL Level I Amateur Radio Emergency Communications (EC-001) remains open through Sunday, December 15, or until all seats are taken. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to receive notification via e-mail in advance of registration opportunities. Send an e-mail to prereg@..., and include the course name or number (eg, EC-004) on the subject line. Include your name, call sign, and the month you want to start the course in the message body. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* Correction: A report "Great Lakes Members Chose New Director; Incumbents Re-Elected Elsewhere" in The ARRL Letter, Vol 21, No 45 (Nov 15, 2002), failed to note that ARRL Atlantic Division Vice Director Bill Edgar,

N3LLR, was elected without opposition to a full, three-year term.

* Radio Club of America makes donation to "The Big Project": The Radio Club of America <http://www.radio-club-of-america.org/> has announced that it will give at least $6500 this year to the ARRL Education and Technology Program--"The Big Project." The club said it hopes to give even more next year. ARRL Chief Development Officer Mary Hobart, K1MMH, who attended the club's 93rd annual banquet November 22 in New York City, said she was thrilled with the gift. "This means that we'll be able to add three more schools to the project, serving up to 100 more children," she said. The Radio Club of America, officially founded in 1909 in New York City as "the world's first radio communications society," was involved with some of the earliest defenses of Amateur Radio before Congress. One of its early members, Paul Godley, was involved with the ARRL's 1921 Transatlantic Tests. The RCA's most famous member may have been Edwin H. Armstrong, the father of the regenerative circuit and frequency modulation. The ARRL Education and Technology Program is aimed at putting Amateur Radio in classrooms, enrichment programs and after-school activities. More information on "The Big Project" is available on the ARRL Web site <http://www.arrl.org/FandES/tbp/>.

* Dave Hassler, K7CCC, joins ARRL Headquarters staff: Dave Hassler, K7CCC, has joined the ARRL Headquarters staff as an assistant news editor. Hassler, 36, came aboard November 18. A native of Portland, Oregon, Hassler will edit a new QST column, "ARRL in Action" as well as handle routine news and feature stories for the ARRL Web site and The ARRL Letter. Hassler has been licensed for two years and holds a General ticket. He has a long interest in all things scientific. "Both of my grandfathers were engineers (one was W7GER, SK), and they encouraged me to explore and helped me build things," he said. Sidetracked by high school activities, educational pursuits and careers as a guitar player, volleyball coach and sportswriter, Hassler took advantage of his recuperation from knee surgery a couple of years ago to study for his Amateur Radio license. Hassler holds a bachelor's in English and an associate's degree in journalism. He also has completed some graduate courses. Most recently, he served as editor-in-chief of The Chronicle in St Helens, Oregon. Hassler enjoys AM and SSB ragchewing and building simple radios and station accessories. He's also getting his feet wet with digital modes. Welcome aboard, Dave!

* 2003 Spectrum Defense Fund well under way: ARRL Chief Development Officer Mary Hobart, K1MMH, says the ARRL Spectrum Defense Fund has generated $190,000 in contributions from more than 4100 ARRL members. "If you have already sent your contribution, thank you," Hobart said. "But if you've not yet contributed to this vital ARRL program, please consider a generous contribution before December 31." The goal is to raise $500,000 to support ARRL's work to protect the frequencies amateurs use every day. Financial support from the amateur community funds representation in Washington and the work of the ARRL Lab to support advocacy efforts as well as representation for Amateur Radio at World Radiocommunication Conference 2003 next summer. Contributions can be mailed to ARRL

Headquarters or made via the secure ARRL 2003 Spectrum Defense Fund Web site <http://www.arrl.org/defense>.

* FCC seeks public comments on Spectrum Policy Task Force report: Public comments are due January 9, 2003, on the recently released report of the Spectrum Policy Task Force (ET Docket 02-135) <see http://www.arrl.org/news/stories/2002/11/07/103/>. Reply comments are due February 10. The Task Force released its report to the FCC on November 15. The FCC notes that the Spectrum Policy Task Force Report was drafted by FCC staff and was neither voted upon nor approved by the Commission. "Accordingly, neither the Report nor any of the recommendations contained therein necessarily reflect the views of the Commission," the FCC added. The text of the Report and other Task Force documents are available on the Task Force Web site <http://www.fcc.gov/sptf/>. Parties are encouraged to file comments using the FCC's Electronic Comment Filing System (ECFS) <http://www.fcc.gov/e-file/ecfs.html>. Commenters should include full name, US Postal Service mailing address, and the docket number, ET Docket 02-135.

* RS-20 is newest Russian Amateur Radio satellite payload: On November 28, the Russian Space Agency launched the Algerian AlSat-1 satellite along with a new Russian bird known as Mozhayets--a navigational and scientific satellite. One of its experimental payloads is an Amateur Radio telemetry beacon that has been christened RS-20. Mozhayets orbits at an altitude of 720 km, completing a turn around Earth every 99 minutes. The Keplerian elements for RS-20 are: 1 27560U 02054B 02332.86497891 -.00019965 00000-0 -47472-2 0 37; 2 27560 98.2411 217.5728 0044302 75.5447 285.0613 14.53325574 86. RS-20 is transmitting CW telemetry on 145.818 and 435.319 MHz. According to information provided by Alexander Zaitzev, RW3DZ, each telemetry frame begins and ends with the beacon call sign, RS-20. E-mail reports are welcomed at plis@....

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRLWeb Extra <http://www.arrl.org/members-only/extra> offers access to informative features and columns.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ.

To subscribe, unsubscribe or change your address for e-mail delivery: ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes, and click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

920. Simulated Field Exercise

Yahoo group: m_a_r_s
Date: 2002-12-09 08:32:32 UTC
From: Sandip Adiwarekar
Topic: 920 Message: 920

Hi VU2NLF - Nilesh,

Congratulations to you !!!

And thank you very much for conducting such a fantastic exercise!!!
and giving us an opportunity for :
- working on batteries (for VHF/HF rigs, Laptop, 12v bulb in night)
- Decoding CW (which really tested my CW speed)
- 80m QSO (which i saw for the first time!!)
- Digital Communication like PSK31 and SSTV (which the SWLs enjoyed a lot!!)
- QSO without the tuned dipole, centre piece & coax (which was thrilling!)
- DXing (specially 40M on which i made my first 2 QSOs)
- Mouse Hunt (congratulations to VU2KIZ)

My location was at pune and with me there were 7 SWLs.
I would also like to thank my team members (SWLs) for their excellent
support.
We all learnt so... many... things from this exercise.
We all appreciate the efforts and time dedicated by you.

In this exercise there were 6 teams operated from the field, with only 10
HAMs
and approx. 25+ SWLs. I would suggest to other MARS members to take part
in future filed exercise in a big way and make the Exercise more successful
which will prepare them for Disaster situations as well as for their own
portable operations in voice as well as digital modes.

73s,
VU2UGO - Sandip

921. I.Card

Yahoo group: m_a_r_s
Date: 2002-12-09 13:13:07 UTC
From: admanek
Topic: 921 Message: 921

Dear VU2 NLF,
I sent you completed Meembership Application Form along with two passport size
photographs and Cheque of Rs.2750/- towards Entrance Fees and Life Membership Fees on July 3rd, 2002 by Maruti Courier. It is more than FIVE months since then
I am waiting for I.Card and Receipt for the payments made.
It is very much surprising to experience such delay in the world of Ham Radio.
I have sent you 5 reminder e mails to look into the matter.
You replied my first e mail, confirming the receipt of application and the payment,
and wrote that you will receive I.Card and Receipt shortly. After that there is no
replies to my remaining 4 e mails !
I understand you as a individual may be busy, but as a MARS you should allow
such delay !
I am interested to participate in the activities of MARS and avail facility of Library,
but I do not have my Membership I.Card !!!
You are requested to expedite the matter and issue I.Card and Receipt immediately
on receipt of this e mail.
Happy Landings.
73s,
VU2 ADW

dear sandip,

Congratulations to you and all the participants. it is all the members when they come together and participate in these exercises that makes it possible for success.

A detailed report of the scrammble Team exercise will soon be prepared and posted by me and we also shall conduct the debriefing meeting soon.

Thank you once again for participating and making the exercise a great success.

- Digital Communication like PSK31 and SSTV (which the SWLs enjoyed a lot!!)
- QSO without the tuned dipole, centre piece & coax (which was thrilling!)
- DXing (specially 40M on which i made my first 2 QSOs)
- Mouse Hunt (congratulations to VU2KIZ)

My location was at pune and with me there were 7 SWLs.
I would also like to thank my team members (SWLs) for their excellent
support.
We all learnt so... many... things from this exercise.
We all appreciate the efforts and time dedicated by you.

In this exercise there were 6 teams operated from the field, with only 10
HAMs
and approx. 25+ SWLs. I would suggest to other MARS members to take part
in future filed exercise in a big way and make the Exercise more successful
which will prepare them for Disaster situations as well as for their own
portable operations in voice as well as digital modes.

73s,
VU2UGO - Sandip

Dear VU2 NLF,
I sent you completed Meembership Application Form along with two
passport size
photographs and Cheque of Rs.2750/- towards Entrance Fees and Life
Membership Fees on July 3rd, 2002 by Maruti Courier. It is more than
FIVE months since then
I am waiting for I.Card and Receipt for the payments made.
It is very much surprising to experience such delay in the world of Ham
Radio.
I have sent you 5 reminder e mails to look into the matter.
You replied my first e mail, confirming the receipt of application and
the payment,
and wrote that you will receive I.Card and Receipt shortly. After that
there is no
replies to my remaining 4 e mails !
I understand you as a individual may be busy, but as a MARS you should
allow
such delay !
I am interested to participate in the activities of MARS and avail
facility of Library,
but I do not have my Membership I.Card !!!
You are requested to expedite the matter and issue I.Card and Receipt
immediately
on receipt of this e mail.
Happy Landings.
73s,
VU2 ADW

Topic: 925 Message: 925

Subject : Fw: NEW VIRUS

To all my email adresses -
I found the following virus in my computer, I followed the procedure and removed it. Do it at once before you email any more.
A virus was passed on to my computer through e-mail. As your contact address is in my address book (which unfortunately was set to collect addresses from anyone who contacted me), you may have received this virus as well. Please note the instructions below to delete this virus and to notify your address book contacts.
The virus is called jdbgmgr.exe and is not detected by Norton, McAfee nor VET anti-virus systems. The virus sits quietly for 14 days before damaging the system. It's sent automatically by messenger and by the address book whether you send e-mails to them or not.
1. Go to "Start", find the search option (or "find").
2. In the "files/folders" option, type the name jdbgmgr.exe
3. Be sure to search your C:\ Drive and any other drives you have.
4. Click "find now".
5. The virus has a teddy bear icon with the name jdbgmgr.exe
DO NOT OPEN IT!
6. While still in the find box, Go to "Edit": choose "select all" which will highlight the file without opening it.
7. Next, go to "File" and select "delete". It will go to your recycle bin.
8. Close the find file then go to your recycle bin and delete it there as well.
IF YOU FIND THE VIRUS, YOU MUST CONTACT ALL THE PEOPLE IN YOUR ADDRESS BOOK SO THEY CAN ERADICATE IT IN THEIR OWN ADDRESS BOOK. If you have the virus, it is virtually certain that your entire address list will have it also.

Hi Guys,

Just a advice. Pls visit Symantec and check if this type of a mail is a virus or just a hoax (rumour), before taking any action on any of the files. You might end up deleting an important file. Also remember that Norton/McAfee will have a solution for each and every virus. Hence having an updated antivirus is the best way to be clean.

FYI, Parin, this is just a hoax. Everyone has this file in their PC and this "Microsoft Debugger Registrar for Java". You can find more info about this hoax at http://securityresponse.symantec.com/avcenter/venc/data/jdbgmgr.exe.file.hoax.html

Hence please dont delete this file from your comp.

Thnks,

Mehul - VU3 MBF.

Oms/Yls,
I have searced all drives and locations. No sign of the
jdbgmgr.exe. All the same u may check to be doubly sure. I have
configured my system throgh Norton Internet Security so that every
program, protocol, executable modules, if any attemp is made
inboundor outbound,it will be detected and reported and a log
maintained for reference. U may also do the same. - VU2 KQS

The ARRL Letter
Vol. 21, No. 48
December 13, 2002
***************

IN THIS EDITION:

* +ARRL Executive Committee meets by telephone
* +Rock star invests in ham radio's future
* +"The Big Project" adds 14 schools, tackles curriculum review
* +Hams help neighbors after Carolina iceout
* +FCC closes out exam session inquiries
* +New Jersey ham antenna bill introduced
* Solar Update
* IN BRIEF:
This weekend on the radio
ARRL Certification and Continuing Education course registration
+FCC grants deadline extension on Spectrum Policy Task Force comments
Nevada getting new Section Manager
Vote on QST Cover Plaque Award
Hamvention 2003 to celebrate "Year of the Young"
Howard W. Wolfe, W2AGW, SK

+Available on ARRL Audio News

============================================================

==>ARRL EXECUTIVE COMMITTEE MEETS IN TELECONFERENCE

The ARRL Executive Committee met December 5 in a rare telephone session to
discuss items of League business needing attention before the next Board
of Directors meeting in January. ARRL Chief Executive Officer David
Sumner, K1ZZ, said that, among other things, holding the meeting by
telephone helped to hold down expenses at a time when the Committee was
dealing with issues that did not warrant an in-person meeting. The
Executive Committee is required to meet twice yearly.

During the approximately 90-minute session, the EC reviewed suggestions
regarding possible changes to the League's standing committee structure
and responsibilities. The EC agreed to share its suggestions with the rest
of the Board for comment. The EC also authorized the ARRL to support an
AMSAT-NA petition to the FCC that seeks to eliminate a 27-month pre-launch
information filing requirement for the Amateur-Satellite service. The
requirement already is routinely waived.
```

The committee also directed ARRL General Counsel Chris Imlay, W3KD, to provide a "white paper" and to draft formal comments in response to the FCC's request for comments on the Spectrum Policy Task Force report in ET Docket 02-135. Comments are due at the FCC January 27. The committee also reviewed a recent FCC Notice of Proposed Rulemaking concerning the implementation of digital broadcasting and concluded that the proceeding revealed no implications for Amateur Radio. The EC also briefly discussed concerning the implications for the Amateur Radio Service of the Homeland Security Act of 2002.

Imlay also offered a status report on a comprehensive Board-ordered study of allocation and utilization policy for the amateur bands between 902 MHz and 24 GHz. Imlay, the ARRL Technical Relations Office and First VP Harrison are collaborating on the study, which has been delayed by other pressing obligations as well as by developments in the regulatory environment. The EC targeted the July ARRL Board meeting as a completion date for the study. Sumner also briefed the members on the recent Conference Preparatory Meeting for WRC-03 and the status of 7-MHz worldwide "harmonization" efforts.

On-line for the telephone conference in addition to Sumner--who serves as the EC's Secretary--and Imlay were committee members President Jim Haynie, W5JBP, who chaired the session; First Vice President Joel Harrison, W5ZN; and Directors Frank Butler, W4RH, of the Southeastern Division; Frank Fallon, N2FF, of the Hudson Division; Tom Frenaye, K1KI, of the New England Division; and Rick Roderick, K5UR, of the Delta Division. Minutes of the December 5 EC meeting are available on the ARRL Web site <http://www.arrl.org/announce/ec_minutes_470.html>.

==>ROCK STAR GIVES MAJOR DONATION TO "THE BIG PROJECT"

Hoping that his donation will spur others to contribute to "The Big Project," veteran rock star and well-known amateur Joe Walsh, WB6ACU, has given in a major way to ARRL's Education and Technology Fund. ARRL Chief Development Officer Mary Hobart, K1MMH, says the "significant gift" through the Joseph F. Walsh Foundation will fund an additional eight pilot schools in the ARRL Education and Technology Program.

ARRL President Jim Haynie, W5JBP, expressed his gratitude for Walsh's dedication and support to The Big Project's goals and aims. "I am particularly pleased with Joe's donation, as it emphasizes his belief in our school project and more importantly, investing in the future of Amateur Radio," Haynie said. "The additional schools that will be brought into the program as a result of this donation represent a big step in increasing the number of students participating in the ARRL Science and Technology program."

Walsh, best-known as a guitarist, vocalist and songwriter with The Eagles and The James Gang, has been an active Amateur Radio operator for more than 37 years. He's also an avid collector of Collins Radio gear. The amount of his donation was not made public.

The Big Project--as the program is popularly known--highlights Amateur Radio as a significant resource for teachers in classrooms as well as for enrichment and after-school programs. The 40 pilot schools now in the program receive a complete Amateur Radio station, technical library and a curriculum that makes technology fun and relevant for the participating students.

Walsh's contribution was one of 3500 made by ARRL members, who--together--have raised more $225,000 to fund the Education & Technology Program in 2003.

==>CURRICULUM REVIEW IS NEXT ON "THE BIG PROJECT" AGENDA

With the addition of 14 new schools--13 pilot schools and one progress grant school--in December, the ARRL Education and Technology Program--"The Big Project"--is up to a total of 41 participating schools. That's more than double the number of schools involved since the program's launch in February.

Early in 2003, the 13 pilot schools will be receiving complete Amateur Radio station equipment, a curriculum and a technical library, said ARRL Education and Technology Program coordinator Jerry Hill, KH6HU. The 14th school, which already uses Amateur Radio in the classroom, will receive a $500 progress grant.

More than new schools is being added to the Education and Technology Program. Hill said that as the program nears its first full year in existence, an evaluation of the curriculum is now under way.

"We have a new draft of the curriculum, and we'll be testing it in all of the schools, asking them to add their lessons and activities and report back in June," Hill said. "Then we'll get a new one out for September and post it on the Web. The new curriculum will be out there for anyone to use." Hill says he does not expect Web posting until late next year, however.

Hill said that The Big Project will update the curriculum yearly, so the program can offer teachers and students a continually improved program. One of the first major efforts will be to split the text of the curriculum into two parts--elementary and secondary. That way, Hill said, the program can offer developmentally appropriate levels of instruction while still teaching similar concepts to all participants.

The program's first pilot school was DeGolyer Elementary School in Dallas, Texas. DeGolyer, which tested the program beginning in 2001, got major-market media exposure December 9 when its activities were featured in a Dallas Morning News article. Under the direction of teacher Sanlyn Kent, KD5LXO--who was not a ham when she began working with the youngsters at DeGolyer--the program has turned out 30 new young hams in fewer than two years.

==>AMATEURS RESPOND TO CAROLINA ICE STORM

Accompanied by the worst power outages since Hurricane Hugo in 1989, a severe snow-turned-ice storm swept along through the Carolinas early on December 5, prompting area Amateur Radio operators into action to aid their neighbors during the emergency.

"Sleet and snow began falling across the state the afternoon and evening of December 4, but overnight it turned to freezing rain," said ARRL North Carolina Section Public Information Coordinator Gary Pearce, KN4AQ. "SKYWARN nets operated overnight across the state, providing the National Weather Service with updated information on changing ground conditions."

More than 1.5 million customers in the Carolinas were left without power for much of the rest of the week and weekend. Power was not expected to be restored to many residents until after the this week. North Carolina Gov Mike Easley declared a state of emergency in the Tar Heel State. Four deaths in North Carolina were blamed on the storm; eight others died in Arkansas and Kentucky.

With a half-inch of ice coating practically everything, widespread power outages, tree-blocked roads and temperatures uncharacteristically in the 20s, a number of North Carolina ARES groups activated, and hams provided support at numerous shelters across the state. ARES in Guilford County supported four shelters, the Red Cross and the county's Emergency Operations Center (EOC). Alamance County hams provided damage assessments to county emergency management teams, Wake County ARES supported four shelters, ARES in Gaston County was at two shelters and the county EOC, Harnett County hams helped at five shelters and amateurs in Nash County provided almost all communications from the town of Rocky Mount, according to Pearce.

While a statewide ARES net was not activated December 5, the North Carolina state EOC in Raleigh was staffed with hams helping to pass traffic between there, county EOCs and the state's 25 open shelters.

The Tarheel Net--the statewide ARES Net--operated throughout the day December 7, while operators from many of the affected counties maintained watch, but no requests were received for ham radio assistance. ARES EC Liaison for North Carolina Emergency Management John Guerriero, KG4HDT, demonstrated the HF and VHF Amateur Radio operation to the National Guard coordinator at the EOC.

Over the weekend, Alamance County ARES operators also assisted with communications among the state EOC, the Red Cross and shelters. During a visit to the Alamance County EOC, Gov Easley thanked the volunteers and workers for their exceptional effort.

Hams also were able to help in other ways, Pearce pointed out. "In the Raleigh-Durham area, there were long lines at the few grocery stores and gas stations that were able to open," he said. "Many repeaters remained on the air with emergency power, and hams passed tips on where to find open stores, gas, batteries and other supplies." All ARES activity secured December 10.

==>FCC FOLLOWS UP ON ARRL VEC EXAM SESSION INQUIRIES

The FCC has completed its review of ARRL VEC Amateur Radio examination sessions held in 1999 and 2000 in Cookeville, Tennessee, and in Trumbull, Connecticut in 2001.

The Cookeville case involved exam sessions on December 14, 1999, and on March 11, 2000. In a November 18 letter to ARRL VEC Manager Bart Jahnke, W9JJ, FCC Special Counsel Riley Hollingsworth recommended that the ARRL VEC no longer accept the volunteer examiner services of five amateurs involved with the sessions. He named James N. Keaton, W4SOH; Maria C. Droke, KC4FLW; George S. Droke, W5SD; Bobby A. Raymer, N2BR; and Steven G. Hunter, KF4FAV.

Hollingsworth said the FCC's decision was based on the fact that members of the VE team participated in the examination of applicants they knew--or should have known--to be related to certain VEs, contrary to §97.509(d) of the FCC rules. He further noted that the actual examination location and date of one of the tests--for a disabled person--were concealed and represented to be at a different location and date.

"Please emphasize to your VEs that every participating or administering VE shares responsibility for the administration, oversight and integrity of the test session," Hollingsworth told Jahnke, whom he also thanked for his cooperation in the matter. The FCC launched its probe after the ARRL VEC called apparent discrepancies at the Cookeville sessions to the Commission's attention.

In a separate letter November 20 to Gary E. Hunter, KG4FRN, the brother of former VE Stephen G. Hunter, KF4FAV, the FCC downgraded Gary Hunter's license from Amateur Extra to Technician--his previous license class prior to the Cookeville session administered in part by his brother. The wife of Bobby Raymer, Kathy J. Raymer, ex-KG4FWO, also had been credited with having passed exam elements at the session. Kathy Raymer agreed earlier this year to forfeit her Technician license.

FCC rule §97.509(d) prohibits a VE from administering an examination to a close relative. The list includes spouses, children, grandchildren, stepchildren, parents, grandparents, stepparents, siblings and stepsiblings, aunts, uncles, nieces, nephews and in-laws.

Regarding the Trumbull, Connecticut, review, Hollingsworth wrote Jahnke on November 14 that 9 of the 10 VEs administering the May 10, 2001, session "followed proper testing procedures" and that the FCC has no objection to their being reinstated as VEs. All 10 volunteer examiners had been suspended from the ARRL VEC program in 2001 for the duration of the FCC probe--standard procedure in such instances.

Jahnke says the nine VEs Hollingsworth named in his letter have been returned to the active list. Those reinstated were ARRL VEC VEs Kevin W. Cellini, N1GKM; Glenn J. Krieger, N1HAW; Allen H. Silberstein, N1RWE; Andres A. Rosado, KB1FKJ; Robert E. Moreland, KA1ZMF; Peter J. Keyes, N1GOJ; Donald W. Stowe, N1VNM; Arthur L. Cartier, III, N1VGT; and Kenneth

A. Frissora, N1JKA.

A 10th VE, Freddy Martin, W1BIQ (ex-KB1FKI), continues to be suspended from the roster of active ARRL VEC VEs, per his June 28, 2001, letter initiating the inquiry. Hollingsworth said he anticipates no further action in the case.

Hollingsworth initially cited Trumbull session documents that he'd said "reflect several alarming discrepancies in testing procedures." The ARRL VEC had referred the test documents to the FCC. The probe had focused on discrepancies in documents submitted on behalf of one applicant--Elvis Mendez, KB1GPY--who had attempted to upgrade to Extra at the May 10 session. It was believed that the candidate may have had access to the answer key used by VEs for grading Morse code examinations or that his answer sheet may have been completed prior to the examination. Mendez' Extra exam was invalidated as a result of the discrepancies.

==>NEW JERSEY LAWMAKER INTRODUCES PRB-1 BILL

New Jersey State Assemblyman Matt Ahearn (D-Fair Lawn) has introduced an Amateur Radio antenna bill, Assembly Bill 3065. Ahearn is KB2PNN and an ARRL member, If approved by New Jersey lawmakers, the measure, put into the legislative hopper December 9, essentially would codify the limited federal preemption known as PRB-1 into the Garden State's statutes. The measure also would preclude regulation via any ordinance or regulation that effectively prohibits an antenna support structure of 70 feet or less above ground level--exclusive of any antenna upon the structure.

"This policy enhances the state's available pool of emergency communications volunteer operators and stations that can provide reliable emergency communications at no cost to the State or municipal governments," said Ahearn.

ARRL Hudson Division Director Frank Fallon, N2FF, said he was thrilled that there are now PRB-1 bills in both New Jersey and New York. "Our New Jersey PRB-1 Task force met over a number of months earlier this year to write a bill, and we thought we had a good one," he said. As it turned out. Ahearn put together his own bill, which he submitted. "His bill is actually better in some respects than what we came up with in that it gets the height of 70 feet into the bill in a less confrontational fashion," Fallon said.

Ahearn said his bill also would help to keep municipalities out of court. "By codifying PRB-1, the bill protects municipalities that might otherwise prohibit or unreasonably regulate such structures from the litigation that would occur because of the preemptive effect of PRB-1," he said in a statement.

Ahearn's bill would prohibit governing bodies from adopting a zoning ordinance or regulation that "prohibits or has the effect of prohibiting" the construction, maintenance or use of an Amateur Radio antenna and support structure. The measure would require municipal zoning ordinances

and regulations to "reasonably regulate the location and height of those antenna structures for the purposes of health, safety or aesthetics" provided that those ordinances and regulations "permit sufficient height of those antennas and support structures so as to reasonably accommodate Amateur Radio communications."

Restrictions on antennas and support structures "shall constitute the minimum practicable regulation necessary to accomplish the legitimate purposes of the governing body enacting that ordinance or regulation," the bill states.

So far, 16 states have incorporated the essence of PRB-1 into their statutes. Laws in four states--Alaska, Orgeon, Virginia and Wyoming--specify minimum regulatory heights for antenna structures, below which local governments in those states may not regulate.

The bill, A3065, has been referred to the Housing and Local Government Committee for further consideration. The text of the proposed legislation is available on the New Jersey Legislature Web site <http://www.njleg.state.nj.us/>. Search on "A3065" in the "Bill Search" engine. Interested New Jersey amateurs may contact Ahearn via e-mail <asmahearn@...>.

More information on PRB-1 is available on the ARRL Web site <http://www.arrl.org/FandES/field/regulations/PRB-1_Pkg/index.html>.

==>SOLAR UPDATE

Sun seeker Tad "I'll Follow the Sun" Cook, K7VVV, Seattle, Washington, reports: This week conditions improved for HF, with slightly lower geomagnetic indices (daily average planetary A index down from 13.6 to 9.7) with solar flux and sunspot numbers up. Average daily sunspot numbers were up nearly 16 points, and average solar flux was up by nearly 8 points.

Conditions look good for the ARRL 10-Meter Contest this weekend with moderate geomagnetic conditions and a rising solar flux. Predicted solar flux values for Friday through Monday are 155, 160, 165 and 170.

Right now the days are very short, and they will keep getting shorter for the next week. Long nights are good for 40-meter propagation, but the higher frequencies close early. The winter solstice will come to North America on December 21, and after that we can watch the slow progression toward springtime propagation.

Sunspot numbers for December 5 through 11 were 153, 112, 106, 150, 189, 142, and 171, with a mean of 146.1. 10.7 cm flux was 148.7, 148.2, 151.1, 154.4, 156.3, 161.4, and 152.3, with a mean of 153.2. Estimated planetary A indices were 9, 10, 16, 12, 8, 7, and 6, with a mean of 9.7.

==>IN BRIEF:

* This weekend on the radio: The ARRL 10-Meter Contest, the Great Colorado Snowshoe Run, and the Digital Prefix Contest are the weekend of December 14-15. JUST AHEAD: The AGB Party Contest, the OK DX RTTY Contest and the Croatian CW Contest are the weekend of December 21-22. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the ARRL Level III Amateur Radio Emergency Communications (EC-003) and HF Digital Communications (EC-005) courses opens Monday, December 16, 4 PM EST (2100 UTC). Registration will remain open through Sunday, December 22. Classes begin Monday, December 23. Registration for the ARRL Level II Amateur Radio Emergency Communications (EC-002) and Antenna Modeling (EC-004) courses remains open through Sunday, December 15. A new service now allows those who may be interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to be advised via e-mail in advance of registration opportunities. Send an e-mail to prereg@..., and include the course name or number (eg, EC-00#) on the subject line as well as your name, call sign, and the month you want to start the course in the body. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@.... [C-CE logo]

* FCC grants deadline extension on Spectrum Policy Task Force comments: Acting on two requests December 10, the FCC extended the deadline to receive comments on the recently released Spectrum Policy Task Force Report (ET Docket 02-135) <http://www.arrl.org/news/stories/2002/11/07/103/>. The FCC extended comment deadlines by 18 days in response to two petitions for a time extension. The new comment deadline is January 27, 2003, and the new reply comment deadline is February 28, 2003. The FCC noted that, because the Spectrum Policy Task Force Report was drafted by FCC staff and neither voted upon nor approved by the Commission, the Report nor any of its recommendations "necessarily reflect the views of the Commission." The text of the Report and other Task Force documents are available on the Task Force Web site <<http://www.fcc.gov/sptf/>>. Parties are encouraged to file comments using the FCC's Electronic Comment Filing System (ECFS) <<http://www.fcc.gov/e-file/ecfs.html>>. Commenters should include full name, US Postal Service mailing address, and the applicable docket or rulemaking number--ET Docket 02-135.--FCC

* Nevada getting new Section Manager: The ARRL Nevada Section will get a new Section Manager on January 1, 2003. Jan Welsh, NK7N, is stepping down at the end of the year for personal reasons. She has served as SM since March 2000. Filling out the remaining six months of her term will be Dick Flanagan, W6OLD, of Minden. An Amateur Extra class operator and ARRL Life Member with 40 years of continuous membership, Flanagan was the recipient of the ARRL 2000 Excellence in Recruiting Award and was active in the successful effort to secure an Amateur Radio antenna (PRB-1) bill in Nevada. He has been serving as an assistant SM. He also holds field

appointments as an ARRL Official Observer, Official Emergency Station and ARRL VEC volunteer examiner. He also serves as an ARRL Certification and Continuing Education Program mentor, instructor and examiner. Nevada members may contact Flanagan via e-mail at w6old@....

* Vote on QST Cover Plaque Award: The winners of the QST Cover Plaque Award for November were Stan Schretter, W4MQ; Brad Wyatt, K6WR, and Keith Lamonica, W7DXX, for their collaboration on the article "A Ham Radio Public Utility HF Station." Congratulations, Stan, Brad and Keith! The winner of the QST Cover Plaque award--given to the author--or authors--of the best article in each issue--is determined by a vote of ARRL members. Voting takes place each month on the Cover Plaque Poll Web page <http://www.arrl.org/members-only/qstvote.html>. There's still time to cast a ballot for your favorite article in the December 2002 issue of QST. Voting ends December 31.

* Hamvention 2003 to celebrate "Year of the Young": Dayton Hamvention--the world's largest Amateur Radio gathering and trade show--celebrates its 51st year and its 52nd show, Friday, May 16, through Sunday, May 18, 2003. The focus in 2003 will be on the younger hams and attracting 12-to-18 year olds to Amateur Radio. Held at the Dayton, Ohio, Hara Arena complex, Hamvention includes forums; 500 inside exhibit spaces; and a 2500-plus space outdoor vendor area (a-k-a "the flea market"). Dayton Hamvention has become an Amateur Radio tradition for the 25,000 or so amateurs and visitors who attend each spring. More information is available on the Hamvention Web site <http://www.hamvention.org>.

* Howard W. Wolfe, W2AGW, SK: DXCC top Honor Roller Howard W. "Howie" Wolfe, W2AGW, of Harrington Park, New Jersey, died December 7. He was 95. "Howie was one of the 'true blue DXers!'" said QST "How's DX?" Editor Bernie McClenny, W3UR. Wolfe had worked every possible DXCC entity except Damao Diu (CR8)--which was deleted (he worked French Indo China, FI8, also now on the deleted list, but never got a QSL card). First licensed as 2AGW in Brooklyn, New York in 1926, Wolfe was a member of the ARRL and the North Jersey DX Association. A couple of years ago in QST, McClenny noted that Wolfe was "always the last man standing in the DXCC count up" at the Dayton DX dinner. CW was his favorite mode. Friends may post tributes to the NJDXA's W2AGW memorial page <http://njdxa.org/w2agw.shtml>.--information provided by Bernie McClenny, W3UR, The Daily DX, and Urb LeJeune, W2DEC

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ.

To subscribe, unsubscribe or change your address for e-mail delivery: ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes, and click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

935. Debriefing for Scramble Team Exercise held on 6th/7th Dec 2002

Yahoo group: m_a_r_s

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

MARS successfully conducted a Simulated Exercise for Disaster Communication cum training camp for the SWLs.

I am sure it must have been a good experience for all the paticipants and they would have learned some new things about our wonderful hobby.

A debriefing will be conducted on 22nd December 2002 at 10:00 am at B.S.Bengelle Girls School, Churchgate to evaluate the performances of all the teams leaders and the participants.

Participants can share their experiences and give their valued suggestions during the meeting which will help in me improvising the exercise in the future.

All the teams will be ranked as per their performances and their reports submitted to me. The winning team and its members will be awarded a prize.

I therefore request all the participants to attend the debriefing without fail. Your future participations will greatly depend on your attendence during the debriefing and sharing your views.

All the team leaders are requested to call all your team members and ensure that they are present at the debriefing. There will be points on the attendance of your team which please remember.

Team leaders are also required to bring the copy of their report and are required to come with their "Amateur Radio Emergency Service" cap to the meeting. Team Leaders who do not have the Cap will be awarded the cap if they deserve. Ranking stars will also be awarded in this meeting.

All members who have not participated in the exercise are not permitted to attend this meeting which please note.

Looking forwarded to having an eyeball with you participants.

73
Nilesh Rathod - VU2NLF
Scramble Team Leader. - (COC)

Hi Madhu,

Hearing from you after a long period! Howdy?

BTW, the file is around 900kb...and hence not sent as attachment.Infact there are three pdf files related to the new radio...Yaesu FT-857. I am also posting this on the mars group for benefit of other members...

The files are available on FCC web site. You will find 3 of the PDF documents downloaded from the FCC web site (owner's manual, test report, and external photos) placed on another web page if some of you are having problems with the FCC site:

http://www.cirs.org/patrick/ft857/ (http://207.68.162.250/cgi-bin/linkrd?_lang=EN&lah=ec6849207830ee984a07f0e952f290bf&lat=1040087661&hm___action=http%3a%2f%2fwww%2ecirs%2eorg%2fpatrick%2fft857%2f)

Neat little radio. HF plus 6m, 2m, and 70cm just like the FT-817
and FT-897, 100W output on HF/6m, 50W on 2m, 20W on 70cm when
supplied with external 13.8V (20W when on a single FNB-78 NiMH pack,
except for 70cm where it's at 10W). The radio comes with the same
hand mic as the FT-817 and FT-897, a DC power cord, the owner's
manual, and a warranty card (no VHF/UHF antenna this time). There
are 2 SO239 connectors on the back of the radio for antennas, no
antenna connector on the front, uses the same filters and TCXO as
the 817 and 897, and of course a long list of options similar to
those for the other two radios (including the FC-30 antenna tuner
available for the FT-897, an ATBK-100 VHF/UHF antenna base and
counterpoise kit, among others - see page 4 of the owner's manual
PDF for the complete list).

The size of the radio - from the manual specs - is 200mm (7 7/8") x
80mm (3 1/8") x 262mm (10 5/16"), weighing in at 3.9kg (about 8 1/2
lbs) without battery, antenna, or microphone. Current consumption
is around 600mA when the receiver is squelched, 1A when not
squelched, and 22A on 100W transmit. The manual warns about using
the radio with a battery that has a sufficient charge, as the FT-857
apparently has a minimum operating voltage of 11.73V.

(Courtsey: Patrick WD9EWK/VA7EWK)

Hope it to be of some interest to members.

73' Prashant

Subject: [m_a_r_s] Debriefing for Scramble Team Exercise held on 6th/7th Dec 2002

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

MARS successfully conducted a Simulated Exercise for Disaster Communication cum training camp for the SWLs.

I am sure it must have been a good experience for all the paticipants and they would have learned some new things about our wonderful hobby.

A debriefing will be conducted on 22nd December 2002 at 10:00 am at B.S.Bengelle Girls School, Churchgate to evaluate the performances of all the teams leaders and the participants.

Participants can share their experiences and give their valued suggestions during the meeting which will help in me improvising the exercise in the future.

All the teams will be ranked as per their performances and their reports submitted to me. The winning team and its members will be awarded a prize.

I therefore request all the participants to attend the debriefing without fail. Your future participations will greatly depend on your attendence during the debriefing and sharing your views.

All the team leaders are requested to call all your team members and ensure that they are present at the debriefing. There will be points on the attendance of your team which please remember.

Team leaders are also required to bring the copy of their report and are required to come with their "Amateur Radio Emergency Service" cap to the meeting. Team Leaders who do not

have the Cap will be awarded the cap if they deserve. Ranking stars will also be awarded in this meeting.

All members who have not participated in the exercise are not permitted to attend this meeting which please note.

Looking forwarded to having an eyeball with you participants.

Dear Nilesh,

Thanks to you, MARS, all the participants of the Scramble Team Exercise and particularly my team members of B team, its leader and the hosts. I thoroughly enjoyed the exercise and learned a lot. I may kindly be granted leave of absence from attending the Debriefing session as I came for the exercise from Jaipur and am back at Jaipur (without deducting any marks). Kindly send me the "AMATEUR RADIO EMERGENCY SERVICE" cap, my ID card, 1st Annual Report of MARS, constitution of MARS, Disaster Management Plan of Mumbai and other documents at below address asap.

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

A debriefing will be conducted on 22nd December 2002 at 10:00 am at B.S.Bengelle Girls School, Churchgate to evaluate the performances of all the teams leaders and the participants.

Please note Disaster Communications requires very strict discipline hence time is of great importance. Participants are required to be in the Class Room latest by 10:10 am, after which the door will be closed and nobody will be allowed to enter or exit till the meeting is over. If you think you cannot make it by 10:10 am please do not bother coming for the meeting.

I therefore request all the participants to attend the debriefing without fail. Your future participations will greatly depend on your attendence during the debriefing and sharing your views.

All the team leaders are requested to call all your team members and ensure that they are present at the debriefing. There will be points on the attendance of your team which please remember.

Team leaders are also required to bring the copy of their report and are required to come with their "Amateur Radio Emergency Service" cap to the meeting. Team Leaders who do not have the Cap will be awarded the cap if they deserve. Ranking stars will also be awarded in this meeting.

Looking forwarded to having an eyeball with you participants.

Subject: [CQ_VU] Diamond Antenna now available in India.

My Dear Friends,

Wishing you all a Merry Christmas and Happy New Year 2003! I would like to offer very good news to you all ham in India. I have taken up dealership of Diamond Antenna in India so that you don't have to spend hard money ($) or face irritating customs people. You can now buy Original Diamond Antenna Inc, Japan in India itself.

You can by Hand Held / Mobile / Whip Antenna (VHF/UHF/SHF) for as low as Rs 880.00 /- depending upon the model and the specification. You can buy Fixed / Base Station Antenna for HF / 50 MHz / 144 / 430 and even 1200 MHz for as low as Rs 7100.00

An all mode HF Mobile Antenna Bearing Model # HM6 (7/14/18/21/24/28 MHz) can handle 220W SSB weight up to 710g is available for 7100.00 Rs only.

For people connected to wireless LAN on 2.4GHz band we have antenna ranging from Rs 6000.00 onwards.

We also have SWR Meter / Wide Band Receiving Antenna other products which Diamond Antenna People Make. All the above prices are inclusive of Duty and Tax as applicable and are FOB Delhi.

For more details on the products available please mail me at manjusum@... I will glad to provide you my help.

With Warm Regards

Sumit Chouhan

============================================================

==>PARTNERSHIP PAYS OFF IN HUNDREDS OF HAM RADIO EMERGENCY TRAINEES

The $33,000 grant from Hartford, Connecticut-based United Technologies
Corporation (UTC) announced last spring has fueled a more than 20-fold
increase in the number of trained Amateur Radio emergency communicators in
Connecticut. In just six months, 258 Connecticut hams have completed the
ARRL Level-I Amateur Radio Emergency Communications course tuition-free,
thanks to the grant.

"UTC has helped us lay the groundwork for taking this training
nationwide," said ARRL Emergency Communications Course Manager Dan Miller,
K3UFG. "The grant from UTC was worth far more than a dollar amount."

Before UTC offered its support last June, just a dozen Connecticut hams
had become certified via the Level I emergency communications course. The
number certified now stands at 270. "We've learned from the experience in
Connecticut and will be able to move ahead quickly and effectively to roll
```

out the national program," Miller said.

Some of the Nutmeg State's newest trained ham radio communicators found themselves put to the test November 17, when an early ice storm clamped down on northwestern Connecticut. The ice storm cut off power to more than 130,000 residences and businesses. For Jim Ritterbusch, KD1YV, an ARRL emergency coordinator, the way hams handled themselves in their roles as emergency communicators during the storm was a direct result of the ARRL Amateur Radio emergency communications training subsidized by the UTC grant.

"The value of the training was apparent in many of the operators who had taken Level I," he said. "The nets ran more accurately and efficiently than we have seen in the past." As an example, he pointed out that during the ice storm, several specific-purpose nets were in operation rather than the single multi-purpose--and sometimes chaotic--nets of the past.

The partnership between UTC and ARRL has served as a model for dramatically expanding Amateur Radio emergency communications courses. So far, nearly 1700 amateurs nationwide have gone through at least one of the three emergency communications course levels since the program's inception in December 2000. ARRL offers three emergency communications courses--introductory, intermediate and advanced.

ARRL Chief Development Officer Mary Hobart, K1MMH, said the League hopes UTC now will approve a three-year grant to help fund further expansion of the Amateur Radio emergency communications course program to the national level. "A second grant from UTC for a national scale program will enable ARRL to certify 5000 radio amateurs in Level I, II or III of the emergency communications course, and have an even greater impact on homeland security and disaster relief efforts," she said.

More information on the ARRL Certification and Continuing Education Program is available on the ARRL Web site <http://www.arrl.org/cce/courses.html>.

==>MISSISSIPPI ARES TEAMS RESPOND IN TORNADO-STRICKEN COMMUNITY

Amateur Radio Emergency Service (ARES) teams from Jackson and Meridian, Mississippi, have converged on the tiny community of Newton to provide emergency communication support following a devastating tornado December 19. ARRL Mississippi Section Manager Malcolm Keown, W5XX, said about a dozen amateurs from the Metro Jackson ARES and the Lauderdale County ARES groups were taking turns supporting relief agencies in Newton, which has no ARES organization of its own.

The mid-day twister struck a Wal-Mart filled with holiday shoppers, blowing out the front windows and collapsing part of the roof. The tornado also damaged a furniture factory. Newton is located roughly halfway between Jackson and Meridian in the Interstate 20 corridor. According to news accounts, some 70 people were hurt, but no one was killed. Property damage in the town was said to have been widespread, and Gov Ronnie

Musgrove has declared a state of emergency in Newton.

Keown said the ARES teams were helping the Red Cross with damage assessment and with shelter communication. In the tornado's immediate aftermath, telephone service and electrical power were out in much of the town of nearly 4000 and in surrounding Newton County, he said. The hams also have been assisting The Salvation Army and the Southern Baptist Men's Kitchen canteen operations as well as making themselves available to local emergency management officials.

Although some reports indicated the tornado hit without warning, Keown said SKYWARN teams had activated all along the I-20 corridor in anticipation of the severe weather, and the National Weather Service had issued tornado warnings.

"We were up all day long," he said of the SKYWARN activity. "The first damage estimates to the National Weather Service came from ham radio SKYWARN reports."

==>HAM RADIO HAS ROLE IN GUAM RELIEF, RECOVERY

After a supertyphoon struck the Pacific Territory of Guam earlier this month, an opportunity for hams to step in and provide emergency communications never materialized, mostly due to a lack of fuel on the stricken island. Nonetheless, ham radio is playing a role as Guam residents get back on their feet.

"Most of the guys are trying to get themselves back together," said Dick Manns, KH2G, "but one of the main problems immediately after the typhoon was fuel for generators, as the tank farm was burning and no fuel could be brought out and what little was available was being reserved for emergency vehicles." The Marianas Amateur Radio Club has discussed setting up emergency communications systems, he said, but insufficient funding has hampered the effort.

Supertyphoon Pongsona hammered Guam December 8. Manns says FEMA, the US military and the nongovernmental relief organizations have been helping a lot in the typhoon's aftermath. But, it would have been nice, he suggested, if local hams had been able to reciprocate with some communications help using portable repeaters and packet radio. Another problem: The storm pretty much devastated amateur antenna systems, he said.

Duncan Campbell, KF6ILA/KH2, was one of the few hams able to get on the air in the first few days after the storm hit, felling the island's lone 2-meter repeater tower in the process. Island hams used 2-meter FM simplex as a major means of communication, Campbell said. The repeater reportedly is back up. He was able to make several stateside HF to relay needs, but fuel to run emergency generators for radio use became scarce, and he had to shut down after December 10.

Manns said electrical power remains out for most residents and that only about a third of the electrically powered water wells on Guam were functional. Telephone service remains out "pretty much island-wide for varying amounts of time" due to the power outages, he said. It's expected to be several months until electrical power is fully restored on Guam.

At one point, despite an active listening campaign, Amateur Radio operators on the air from Guam were simply not to be found. "We have six amateurs engaged in this, almost our entire complement of HF operators," said ARRL District Emergency Coordinator for the Commonwealth of the Northern Mariana Islands (CNMI) Tim Hayes, NH0H, December 15. Amateurs on Saipan monitored the agreed-upon emergency frequency of 7085 kHz almost continuously for a week without hearing a single Guam signal, he said. The Pacific Inter-Island Net on 14,320 kHz also made a special effort to listen for Guam stations.

Meanwhile, the American Red Cross, The Salvation Army and 28 US Government agencies have combined to provide relief and recovery services. Reports say 1750 homes were destroyed or left uninhabitable by the typhoon.

The Salvation Army is operating 12 temporary shelters and housing an estimated 3000 residents left homeless. Salvation Army Team Emergency Radio Network (SATERN) Coordinator Pat McPherson, WW9E, said SATERN this week established contact between Guam and the SATERN national office in Chicago via an EchoLink connection--a marriage of Amateur Radio and the Internet. McPherson credited Al Paja, WH2Z, on Guam with helping to set up the EchoLink connection.

Campbell, Manns and others have been able to maintain communication to the outside world via the Internet after December 11. The fiber optic line between Guam and the Commonwealth of the Northern Mariana Islands survived the storm, and local Internet Service Providers were able to reconnect to the backbone. With semi-reliable cellular telephone service available, Campbell was able to post updates on local conditions to several Internet bulletin boards.

The Guam Pacific Daily News Web site <http://www.guampdn.com/> also has remained active and current. It continues to provide a major conduit for those outside the island to leave messages for friends and relatives on Guam.

Amateurs affiliated with the US Department of Health and Human Services' Office of Emergency Response flew to Guam. "We're very active here with disaster relief and have two sites operational on HF," said Steve "Sid" Caesar, NH7C, the team's communications officer. Others on that team include Satoshi Manabe, WH6CTO, and Jayson Kohama, WH6BXK. Caesar has been in regular contact with amateurs in Hawaii over the past week.

==>ARISS TEAM TALKS ABOUT FUTURE HAM-RADIO-IN-SPACE PROJECTS

Members of the Amateur Radio on the International Space Station (ARISS) International Team met December 5-8 at the NASA Goddard Space Flight Center in Greenbelt, Maryland. Delegates represented partner countries,

International Amateur Radio Union (IARU) member-societies and AMSAT organizations in Europe, Japan, Canada, Russia and the US.

"I was extremely impressed with the quality of the discussions at our meeting and the camaraderie of the international team," said ARISS International Chairman Frank Bauer, KA3HDO. "The ARISS Team really has come together to be a cohesive international team since we first met in 1996." Bauer also represented AMSAT-NA during the session, which was moderated by Roy Neal, K6DUE, a long-time advocate of Amateur Radio in space. ARRL Field and Educational Services Manager Rosalie White, K1STO, attended on behalf of the ARRL. AMSAT-NA President Robin Haighton, VE3FRH, was on hand as a delegate for Canada.

The delegates heard progress reports on various ARISS equipment proposals, including timing for certification and future delivery. The ARISS Team will begin a review of new project proposals to determine their feasibility as well as their benefits to NASA and to ham radio operators. The ARISS Team must evaluate the work involved in bringing a particular project proposal to fruition and, perhaps equally important, determine if the developers have the required funding.

Among the more unusual Amateur Radio experiments the team plans to consider further are a plasma cloud experiment and another that would compare the performance of different solar arrays. Details were unavailable. ARISS Team members also expressed concerns about hardware proposals that had been initiated without ARISS knowledge or support, since NASA requires coordination of all ham radio activity via the ARISS Team.

Previously approved hardware projects are now being completed to make the most of the four Amateur Radio antennas now installed outside of the ISS Zvezda Service Module--the crew's living quarters. Operations on 70 cm could commence as early as next spring, and SSTV (SpaceCam) hardware could be launched later in 2003. Once it's in place, students will be able to see the astronauts via SSTV while in QSO with them. Future add-ons under consideration include enhanced digital 10-meter crossband operation using PSK-31 or full-duplex voice repeater operation.

Delegates re-elected Bauer as ARISS chairman, White as ARISS secretary-treasurer, and Gaston Bertels, ON4WF, as ARISS vice chairman. All will serve two-year terms.

ARISS is an international project, with US participation by ARRL, AMSAT and NASA.

==>FCC INITIATES REVIEW OF GEORGIA ARRL VEC EXAM SESSION

The FCC has initiated a review of a June 2000 ARRL VEC examination session in Pelham, Georgia. At that session, an examinee who had unsuccessfully attempted to pass Element 2 (Technician) seven times at other exam sessions got a perfect score on Element 2 and also passed the Element 3 (General) exam.

The applicant in question, Arthur Lee Clark, of Oxford, Georgia, subsequently was granted a General ticket as KG4IJV. It's not clear when or how Clark obtained credit for the Element 1 (Morse code) examination. The FCC called Clark in for retesting last spring and cancelled his license after he failed to appear.

FCC Special Counsel for Enforcement Riley Hollingsworth wrote volunteer examiners William K. Ferguson, W9UNH, Alice Childs, AF4HB, and Walter J. Childs, KQ4SF, on November 12 asking them to provide further information on the examination session at which Clark had qualified for General. In a separate letter November 12 to ARRL VEC Manager Bart Jahnke, W9JJ, Hollingsworth requested that the ARRL VEC not accept the services of the three VEs involved in the Pelham session at least until the FCC concludes its investigation. Suspension of volunteer examiners is standard procedure during such inquiries.

Among other things, Hollingsworth asked Ferguson and the Childses to describe any conversations they might have had with Clark as well as any documents or materials Clark may have had before, during or after the examination session. Hollingsworth also wanted the three VEs to tell where and how the test session was administered, "including the location of VEs during the examination and the names and addresses of anyone else present before and during the examination."

Records indicate that from January 1999 until March 2000, Clark took the Technician exam seven times under another VEC and never answered more than approximately half the questions correctly. At the ARRL VEC session on June 20, 2000, however, he was credited with obtaining a perfect score, then passing his General with only one wrong answer.

==>HAMS AID MARITIME RESCUE

Amateur Radio operators on a 40-meter net that's aimed at helping stations obtain the Worked All States award are getting at least partial credit for helping to save a ham-sailor and two companions whose boat was caught up in rough weather off the West Coast December 14. Steve Letendre, KE6FQ, said that during a late 40-meter session of the 3905 Century Club Net <http://www.3905ccn.com> on 7.233.5 MHz, an emergency break came on frequency.

"The man's boat was in high seas and taking water approximately 350 miles south of San Diego near Cedros Island," Letendre said. "High winds and waves mostly kept him from spending too much time giving us info." Letendre says he later learned from the Coast Guard that the boat was being exposed to 12-15 foot waves and 60 MPH winds.

Net Control Station John Milner, W6BUM, requested a hold on the net while Letendre and Joe Seibert, AL1F, in Alaska attempted to communicate with the vessel's skipper--whom Letendre identified as Walter Jorgenson, W6ULT. "I was on the phone with San Diego Coast Guard, while Joe copied info as the questions came from them," Letendre said. "We were unable to get too much other info due to the boat getting slapped around pretty good. I'm sure the skipper had his hands full holding the wheel and a mic at the

same time."

Somewhere in the excitement, Letendre said, the skipper fired a flare and a Mexican Naval vessel appeared and launched a raft. The passengers were taken aboard the naval vessel and the boat towed to safety. Letendre is modest about his net's role in the effort. "By the time we had good relays set up, he was rescued," he said.

The incident did provide an opportunity for Letendre to acquaint the US Coast Guard in his area with the net's existence. "The Coast Guard officer also thanked us and requested info on our group, so I gave him the home page," he explained.

==>SOLAR UPDATE

Solar Maven Tad "Hey, Mister Sun" Cook, K7VVV, Seattle, Washington, reports: Once again geomagnetic indices were lower than the previous week's. November 28 through December 4 the average planetary A index was 13.6, the next week it was 9.7, and this week it was 7.7. This was good for HF conditions, along with a rising solar flux. Average solar flux for the same three weeks was 145.4, 153.2 and 188.7, and average daily sunspot numbers were 130.3, 146.1 and 206.1.

Quiet conditions came to an end December 19, when the planetary A index jumped to 21. This is due to a solar wind stream flowing from a coronal hole. Geomagnetic activity is expected to decline, and in a few days solar flux values should slip below 190.

The winter solstice arrives this weekend, so the long nights soon will turn gradually shorter. Currently the darkness favors the lower HF bands, but as the days lengthen in the Northern Hemisphere, higher frequency propagation will improve.

Sunspot numbers for December 12 through 18 were 129, 176, 214, 217, 194, 252 and 261, with a mean of 206.1. The 10.7 cm flux was 153.1, 166.9, 185.9, 203, 202.9, 212.5 and 196.9, with a mean of 188.7. Estimated planetary A indices were 7, 7, 11, 9, 8, 6 and 6, with a mean of 7.7.

==>IN BRIEF:

* This weekend on the radio: The AGB Party Contest, the OK DX RTTY Contest and the Croatian CW Contest are the weekend of December 21-22. JUST AHEAD: The DARC Christmas Contest, the RAC Winter Contest, the Stew Perry Topband Challenge and the Original QRP Contest (CW) are the weekend of December 28-29. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the ARRL Satellite Communications course (EC-007) opens Monday, December 23, at 4 PM EST (2100 UTC). Registration will remain open

through Sunday, December 29. Classes begin Monday, December 30. Registration for the Level III Amateur Radio Emergency Communications (EC-003) and HF Digital Communications (EC-005) courses remains open through Sunday, December 22. A new service now allows those who may be interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to be advised via e-mail in advance of registration opportunities. Send an e-mail to prereg@..., and include the course name or number (eg, EC-00#) on the subject line as well as your name, call sign, and the month you want to start the course in the body. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* League keeps eye on emerging RFI issues: ARRL Lab Supervisor Ed Hare, W1RFI, attended a November 12-14 meeting of the IEEE C63 "RFI" committee in Baltimore. Hare's visit was in response to a committee invitation for a presentation on the possible impact of Power Line Communications (PLC) on Amateur Radio. Hare also attended a very high bit-rate digital subscriber line (VDSL) standards meeting in Atlanta November 18-19. Hare says that both technologies present a potential to radiate signals that could raise the noise floor on nearby HF receivers by tens of dB. "What ham hasn't looked up at a power line and thought, 'Now there's a heck of a longwire antenna!'" Hare quipped. "The problem with PLC is that if a company wants to supply Internet service via PLC, it's going to happen at HF, and it will radiate." Following the presentation, the IEEE named Hare chairs its ad hoc working group on PLC. VDSL presents somewhat less of a challenge than PLC, Hare said, but for overhead telephone wiring, it's important that the industry include protections for Amateur Radio. Hare said the ARRL will continue to work these and other industry groups and build on the successes Amateur Radio has had recently with the HomePlug group and Home Phoneline Network Alliance in reducing interference to amateur HF bands.

* ARRL VEC praises retiring veteran FCC employee: On behalf of the League, ARRL VEC Manager Bart Jahnke, W9JJ, has lauded the work of a veteran FCC Wireless Telecommunications Bureau employee involved in Amateur Radio licensing. Darlene Reeder, who retired this month after some 40 years of service, was an industry analyst in WTB's Public Safety and Private Wireless Division, Technical Analysis Section. "Seldom have I ever come across someone with the dedication and caring that Darlene has shown in serving the needs of the hundreds of thousands of Amateur Radio licensees in the Amateur Service," Jahnke said in remarks prepared for Reeder's retirement luncheon December 10. "My staff and I will deeply miss working with Darlene. We wish her the very best in her retirement." More than 150 attended Reeder's retirement fete in Gettysburg. Representatives of the National Conference of Volunteer Examiner Coordinators presented Reeder with a gift certificate in appreciation for her years of service.

* Reginald Hoskin Sr, W7ROL, SK: Reggie Hoskin, W7ROL, of Four Lakes, Washington, died December 11. Hoskin's family says he turned 101 a couple

of days before his death. He enjoyed a nearly lifelong interest in radio and had been licensed for at least 75 years. Dennis Coykendall, AC7KA, called Hoskin "the grand old man of radio in the Northwest, maybe the country." Said Charlene Davis, KC7RQF, of the Kamiak Butte Amateur Repeater Association, "Reggie checked into our nets regularly and helped folks on the air right up until the last week he was here." Both said Hoskin would be missed. Born in England, Hoskin got into radio fairly early after coming to the US. He received instruction from his high school principal in Ironwood, Michigan--a World War I Navy radio operator--and built his first station, a spark gap transmitter and crystal receiver, in 1919. It appears from early call books that Hoskin was first licensed in 1927 or 1928 as 9EML. He became W7ROL in 1946 after moving to Washington, where he served as the first president of the Cascade Radio Club. His late wife, Ruby, was W7QME. Over the years, he worked as a miner, fireman and electrician. Hoskin was among the very oldest members of the ARRL and of the amateur fraternity. He also belonged to the Old Old Timers Club member and the Quarter Century Wireless Association.

* Former ARRL staffer Arline Bender, WA1VMC, SK: Former ARRL staff member Arline Bender, WA1VMC, died December 11. She was 84. The Hartford, Connecticut, native was a staff member at ARRL Headquarters in the 1970s and 1980s, first in the Communications Department, and later in the Field Services Department, from which she retired in 1986. While on staff she met and married former W1AW Station Manager Charles R. "Chuck" Bender, W1WPR, who survives her. "She was a very nice lady, very kind to everyone," said ARRL Field Organization/Public Service Team Leader Steve Ewald, WV1X, who worked with Bender. Prior to her tenure at ARRL HQ, she was employed by Travelers Insurance. She also was an avid bowler and a 50-year member of Elmwood Community Church in West Hartford. A daughter and a son also survive.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRLWeb Extra <http://www.arrl.org/members-only/extra> offers access to informative features and columns.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:

ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

947. Globalization....

Yahoo group: m_a_r_s
Date: 2002-12-24 18:30:10 UTC
From: vijay motwane
Topic: 947 Message: 947

Here is an interesting way to look at globalization:

Question: What is the height of globalization?

Answer: Princess Diana's death

Question: How come?

Answer: An English princess with an Egyptian boyfriend Crashes in a French tunnel, driving a German car with a Dutch engine, driven by a Belgian who was high on Scottish whiskey, followed closely by Italian Paparazzi, on Japanese motorcycles, treated by an American doctor, using Brazilian medicines!

And this is sent to you by an Indian, using Bill Gates' technology which he stole from the Japanese. And you are probably reading this on one of the IBM clones that use Taiwanese-made chips, and Korean made monitors, assembled by Bangladeshi workers in a Singapore plant, transported by lorries driven by Pakistanis, hijacked by Indonesians and finally sold to you by Chinese!

948. BE AMONG THE FIRST ONES TO GET THE RELIANCE INDIA MOBILE PHO

Yahoo group: m_a_r_s
Date: 2002-12-30 05:59:55 UTC
From: Kunal Mashru
Topic: 948 Message: 948

Hi,
I have just been appointed as an agent for Reliance Infocomm, hereunder are the details for the services provided. Kindly contanct me for your requirements of Reliance India Mobiles at the earliest inorder to book on priority. Please note this special scheme is avilable for the first 10,00,000 users only.

Regards,
Kunal

Reliance India Mobile
Has been Launched Today

Dear Valued Customer,This offer of Reliance India Mobile is for selected few customers for priority applications.
PLAN A FOR FINANCE SCHEME 3 YEARS:-
UPFRONT PAYMENT Rs.3000/- DOWN PAYMENT
400 MINUTES Rs. 600/- PER MONTH
* PAYABLE QTLY. IN 12 POST DATED CHEQUES (Rs.1800/- x 12) starting from 15th May 2003.

PLAN B
UPFRONT PAYMENT SCHEME FOR 3 YEARS
400 MINUTES Rs. 21000/- ONE TIME PAYMENT
EXTRA REFUNDABLE DEPOSIT FOR BOTH PLAN A & PLAN B. 1. Rs. 1000/- FOR LOCAL CALLS
2. Rs. 2000/- FOR STD CALLS
3. Rs. 3000/- FOR ISD CALLS

THE ABOVE SCHEME ALSO INCLUDES FOLLOWING FEATURES:-
1 SAMSUNG N620 JAVA ENABLED HANDSET WORTH RS.10500/- ABSOLUTELY FREE
2 INCOMING CALLS FREE FOR 3 YEARS
3 PER MONTH 400 MINUTES FREE IN OUTGOING CALLS
4 UNUSED BALANCE AIRTIME CARRY FORWARD TILL QUARTER.
5 STD CHARGES APPLICABLE AS PER DOT REGULATIONS.
6 NO STD CHARGES WITHIN THE RELIANCE NETWORK IN INDIA. ALL OTHER STD CALLS AT 40% DISCOUNT.
7 AFTER EXCEEDING 400 MIN 1.20/3 MIN WILL BE CHARGED AS PER DOT.
8 ROAMING CHARGES MAX. Rs. 20/- PER CITY
9 SMS/INTERNET WAP/MMS FREE FOR 1 YEAR.
10 VOICE MAIL/ CALLER-ID/ITEMISED BILLING FREE FOR 3 YEARS.

Special Exclusive Offer :
For Priority Application kindly forward your Cheque/Demand Draft of Rs.4000/-(or Rs.5000/- for STD Facility) wherein Rs.1000/- and Rs.2000/- respectively are refundable deposit in the name of "Reliance Billing Services" with your Name and Telphone Nos. on the back to:-

==========
NOTE: ARRL Headquarters will be closed and there will be no W1AW transmissions New Year's Day, January 1, 2003. ARRL Headquarters will reopen Thursday, January 2, 2003, at 8 AM. We wish everyone a safe and enjoyable holiday and all the best in 2003!
==========

==>VIGILANCE, VOLUNTARY GIVING ARE YEAR 'ROUND NECESSITIES, ARRL PRESIDENT SAYS

With several important issues facing Amateur Radio, ARRL President Jim Haynie, W5JBP, says now is not the time to get complacent about ham radio's future. On the World Radiocommunication Conference 2003 agenda next summer, for example, are items that could change the face of 40 meters worldwide and compel amateurs to compete with interference from mapping satellites on 70 cm and from radio local area networks on microwave bands. Domestically, ham radio faces an array of threats from unlicensed Part 15 devices and the spectrum demands of new technologies (see <http://www.arrl.org/news/bandthreat/>).

"Amateur Radio is not safe," said Haynie, who's completing his third year as the League's top--and unpaid--official. "If we relax our energies--even for a day or a week--we can lose valuable ground."

Haynie has not let down his guard. He personally has devoted months of work on the road during 2002 on Amateur Radio's behalf. That includes time in Washington talking up ham radio with those who hold its future most directly in their hands.

Preserving the future of Amateur Radio is not cheap either. "When we talk about defense of frequencies and advocacy, what we really mean is the $1.2 million that the ARRL spent in staff costs, travel, laboratory work, legal filings and other professional assistance," he said.

ARRL membership dues cover just some of the costs associated with advocacy. So does income from investments and other revenue sources. But approximately 40 percent of the cost of the ARRL's efforts to preserve ham radio's future--the 2003 goal is $500,000--comes from voluntary donations from within the Amateur Radio community. ARRL Chief Development Officer Mary Hobart, K1MMH, says donations have dipped below expectations even as the ARRL has been successful in raising ham radio's visibility.

Hobart blames the slack in giving in part as a result of the economic downturn, but she also believes this year's campaign may be languishing due to apathy. "The enhanced visibility we now enjoy due to the efforts of our president and other volunteers may have led many of our members to erroneously conclude that Amateur Radio has arrived," Hobart speculates. "I hope that the average ARRL member understands what it means to represent Amateur Radio in Washington." She also says some hams may think there's not much going on because progress often must be measured in inches rather than miles.

Haynie believes 2002 has seen some notable successes, however. It included the introduction of HR 4720, a measure that for the first time asked congress to lead the way in eliminating the burden of private deed covenants, conditions and restrictions--CC&Rs--as they affect the ability of amateurs to erect outdoor antenna structures. The year also saw the FCC propose--at the behest of the ARRL--two new Amateur Radio bands and a status upgrade for the 2400-2402 MHz amateur allocation.

Hobart says that as the year draws to a close, every contribution counts as the ARRL works toward meeting its $500,000 goal. "We are hearing that some folks are really feeling the pinch of the current economic and stock market situation," she said, "but if every ARRL member would contribute $8 a year, we could fund our advocacy efforts for 2003 in total."

"During 2003, the ARRL Board, staff and I will be working hard for you and for the future of Amateur Radio," Haynie said. "Please support us."

The ARRL is an IRS 501(c)(3) organization, and contributions to the Spectrum Defense Fund are deductible to the extent permitted by law. Visit the secure FCC Web site <http://www.arrl.org/defense> for more information and to make a contribution.

==>SKYWARN, ARES ACTIVATE FOR ARKANSAS, MISSOURI STORMS

The same front that produced tornado activity in Mississippi on December 19 earlier touched Arkansas and Missouri with devastating and deadly effect. After nearly a year without any significant tornado activity, Arkansas was again at the heart of severe weather December 18. Tornadoes hit several counties in Missouri December 17 and 18. One person died in each state a direct result of the severe weather.

The National Weather Service (NWS) activated SKYWARN at approximately 2 PM in Arkansas, and participants remained active until after 11 PM. Little Rock Emergency Coordinator Dale Temple, W5RXU, reports that the NWS issued 48 warnings during the nine-hour net. Temple also is president of Arkansas SKYWARN.

Temple said NWS Warning Coordination Meteorologist John Robinson and Meteorologist-In-Charge Renee Fair praised the accuracy and dedication of the Arkansas SKYWARN volunteers.

In Arkansas, hail up to two inches in diameter, heavy rain up to six inches, damaging straight-line winds and tornadoes developed in Desha, Faulkner, Lincoln, Prairie, Saline, Woodruff, Jackson, Lonoke, White and Cross counties.

At the request of American Red Cross Arkansas State Disaster Director Roger Elliot, Richard Thompson, W5SUB, fired up the Amateur Radio station at Red Cross Headquarters to help coordinate the organization's efforts to provide needed services to about 85 families whose homes had been damaged or destroyed by the severe weather. "Mr Elliot credited ham radio operators in assisting the Red Cross to mobilize more quickly and accurately to needy victims," Temple said.

Arkansas SKYWARN, the Central Arkansas Radio Emergency Net, Pulaski County, Little Rock and North Little Rock ARES/RACES actively supported state and local emergency management agencies as well as the Red Cross, The Salvation Army and area hospitals.

In central and southern Missouri, several Amateur Radio Emergency Service (ARES) teams activated the night of December 17 when severe weather struck. There were multiple instances of rainfall greater than one inch per hour, and hail was reported in several counties. Missouri SEC Don Moore, KM0R, said that in a couple of instances, the NWS issued severe thunderstorm warnings shortly after ARES reports came in.

Reports filed with the St Louis NWS Office included heavy rain, hail and damaging wind speeds. "There was a tornado reported in Laclede County that moved into Pulaski County, along with damaging wind speeds in excess of 75 MPH in another area during the early morning hours of December 18," Moore said. Tornado activity was also reported in Springfield and the surrounding area. Hams also worked with the Springfield NWS Office.

Linked repeater systems were used to pass information to the respective NWS offices and among local nets. Some five dozen hams involved in the

response in three ARES districts logged double-digit work hours. Several county emergency coordinators said they monitored the statewide HF frequency for the Missouri Emergency Services Net in case there was traffic to pass. They also kept in contact with local governments and other served agencies in case Amateur Radio volunteers were needed.

==>FCC SEEKS COMMENTS ON AMATEUR RADIO-RELATED PETITIONS

The FCC is inviting comments on two Amateur Radio-related petitions for rule making. Both have been put on public notice and are available for public review and comment. In his petition, designated RM-10620, Dale Reich, K8AD, has asked the Commission to automatically upgrade Novice and Advanced license holders to the "next" license class if the licensee has 20 or more years of operating experience. Reich has said such test-free upgrades would compensate for "the previous tougher exam that was past administered" and give credit for violation-free service records.

Among other proposed changes in his "merit and service upgrade" schedule, Reich asks that Novice phone privileges in the 2-meter band--rescinded in the 1970s--be reinstated for those still holding that license. In his petition, Reich asserts that Amateur Radio the proposed changes could augment public service abilities on the part of the affected licensees.

In another amateur-related petition, designated RM-10621, AMSAT-NA has asked the FCC to drop its presently required 27-month pre-space notification to the FCC's international branch for Amateur Satellite launches and substitute a pre-space notification within 30 days of a launch commitment.

The comment deadline for both petitions is January 17, 2003. Interested parties may view the Reich and AMSAT petitions and file comments via the FCC's Electronic Comment Filing System (ECFS) <http://www.fcc.gov/e-file/ecfs.html>. Commenters should include full name, US Postal Service mailing address and the applicable rulemaking number--RM-10620 or RM-10621.

==>K7IJ REPEATER SYSTEM ATTRACTS RENEWED FCC ATTENTION

The FCC has sent a Warning Notice to the owner of the K7IJ Grizzly Peak repeater system in California's San Francisco Bay area citing "numerous rule violations" on the machine since last April. In a November 26 letter, FCC Special Counsel Riley Hollingsworth reminded repeater owner Bruce Wachtell, K7IJ, of his responsibility to ensure proper control of his repeater. Almost four years ago, the FCC shut down the Grizzly Peak repeater after it determined the system was out of control of the licensee and his designated control operator.

"Since the repeater bears your call sign, it is important for you to understand that you are responsible for its proper operation," Hollingsworth told Wachtell, whose residence is in Carson City, Nevada. "The decision to operate a repeater is a totally voluntary one. Repeaters are a convenience in the Amateur Radio Service, not a necessity."

Hollingsworth said repeater control operators "must ensure immediate proper operation" of the system, regardless of the type of station control. If Wachtell cannot regain control of his repeater, then he must shut it down, Hollingsworth concluded.

Violations cited included failure of users to identify--or to identify correctly, intentional interference from "certain users," use of the repeater by unlicensed operators and "lengthy carriers and key-ups."

Hollingsworth told Wachtell that it's his responsibility to prevent recurring and deliberate violations. "If you are unwilling or unable to prevent violations on your K7IJ repeater, then your operator and station licenses will be subject to enforcement action by the Commission," warned Hollingsworth, who raised the specter of fines, suspension and license revocation.

In an unrelated repeater case, Hollingsworth sent a Warning Notice December 4 to Wayne Curley, WA6NRB, who operates a repeater in the Los Angeles area. Hollingsworth cited monitoring information that the repeater has been used by an unlicensed individual, Richard Burton, ex-WB6JAC. Burton spent three months in a federal jail last year after being convicted of unlicensed operation. Hollingsworth also reminded Curley that a repeater licensee is responsible for recurring violations and that enforcement action--fines, suspension or revocation--could result if he is unable to prevent violations on his repeater.

==>SPECIAL EVENT, SPACE CONTACT TO MARK MARCONI TRANSMISSION CENTENNIAL

Special event station KM1CC will be on the air January 11-19, 2003, to mark the 100th anniversary of Guglielmo Marconi's inaugural wireless transmission between the US and Great Britain January 18, 1903 (January 19 UTC). On that date, from the sandy Cape Cod cliffs overlooking the Atlantic, Marconi--using a powerful (35 kW) rotary spark transmitter coupled to a massive antenna system-- transmitted a 54-word greeting from President Theodore Roosevelt to England's King Edward VII. The monarch promptly acknowledged receipt of the message via land line and cable, literally igniting the spark of global communication.

The Marconi Radio Club, W1AA, and the Marconi Cape Cod Memorial Radio Club, KM1CC, are working in partnership with the National Park Service at Cape Cod National Seashore to organize the celebration. The special event will take place at the former Coast Guard station at Coast Guard Beach in Eastham, Massachusetts, which is near the original Marconi site. Operation will include several amateur modes, including SSB, CW, FM, digital and satellite.

Marconi Radio Club President Robert J. "Whitey" Doherty, K1VV, says operators will be on the air 24 hours a day from January 11 through January 19. "We have a half dozen operators who will live at the station for the full period," he said. The special event station will open to the public from 9 AM until 5 PM EST (1400-2200 UTC).

An Amateur Radio on the International Space Station (ARISS) school contact--the first of the new year with US students--is to be scheduled during the weeklong celebration. Doherty says that selected students from three Cape Cod high schools will speak via KM1CC with a member of the new Expedition 6 ISS crew. l.

Marconi's daughter, Princess Elettra Marconi, is scheduled to attend the a reenactment of the groundbreaking wireless transmission on January 18, when KM1CC will transmit the text of Roosevelt's original message to King Edward VII.

KM1CC QSL card requests from US amateurs (include a self-addressed, stamped envelope) go via Barbara Dougan, KB1GSO, Cape Cod National Seashore, 99 Marconi Site Rd, Wellfleet, MA 02667. DX stations are invited to QSL via the W1 QSL Bureau.

Additional details are on the Marconi Radio Club Web site <http://personal.tmlp.com/k1vv/w1aa/>.

==>KID'S DAY IS JANUARY 4!

The next Kid's Day is Saturday, January 4, 2003, from 1800-2400 UTC. The twice-annual event, held in January and June, is a chance for amateurs to invest in the future of Amateur Radio by participating in a simple, but rewarding, Amateur Radio event. Now entering its ninth year, Kid's Day typically attracts more than 1000 participants for each running.

Kid's Day is intended to encourage young people--licensed or not--to enjoy Amateur Radio. It gives youngsters on-the-air experience so they might develop an interest in pursuing a license in the future. It's also intended to give hams a chance to share their station with their children.

Activity for Kid's Day <http://www.arrl.org/FandES/ead/kd-rules.html> takes place on 20, 15 and 10 meters--and perhaps on local 2-meter repeaters. It's an opportunity to introduce youngsters to the magic of ham radio and perhaps spark a lifelong love for the hobby.

The suggested exchange for Kid's Day is first name, age, location and favorite color. You are encouraged to work the same station again if an operator has changed. Call "CQ Kid's Day." Suggested frequencies are 14,270 to 14,300, 21,380 to 21,400 and 28,350 to 28,400 kHz, and 2-meter repeater frequencies with permission from your area repeater sponsor.

All participants are eligible to receive a colorful certificate. Visit the ARRL Kid's Day Survey page <http://www.arrl.org/FandES/ead/kids-day-survey.html> to complete a short survey and post your comments. You will then have access to download the certificate page or send a 9x12 SASE to Boring Amateur Radio Club, PO Box 1357, Boring, OR 97009.

Originated by the Boring Amateur Radio Club, Kid's Day now is sponsored an d administered by the ARRL with the cooperation and assistance of the BARC.

==>RADIO ASTRONOMY PIONEER GROTE REBER, EX-W9GFZ, SK

Grote Reber, ex-W9GFZ, one of the earliest pioneers of radio astronomy, died December 20 in Tasmania, where he had been living since 1954. He was 90. Reber was the first person to build a radio telescope dedicated to astronomy, and his self-financed experiments laid the foundation for today's advanced radio astronomy facilities.

"All radio astronomers who have followed him owe Grote Reber a deep debt for his pioneering work," said National Radio Astronomy Observatory (NRAO) Director Fred Lo. Reber was the first to systematically study the sky by observing something other than visible light. "This gave astronomy a whole new view of the universe," Lo said.

As a radio engineer and avid Amateur Radio operator in Wheaton, Illinois, in the 1930s, Reber was inspired by Karl Jansky's 1932 discovery of natural radio emissions from outer space. The concept of viewing space via radio signals presented Reber--who had worked his share of terrestrial DX--with a whole new challenge that he attacked with vigor.

Reber concluded that what he needed was a parabolic dish antenna, and in 1937, using his own funds, he constructed a nine-meter (31.4 feet) dish antenna in his backyard. The strange contraption attracted the attention of curious neighbors and became somewhat of a minor tourist attraction, he later recalled.

Using electronics he designed and built that pushed the technical capabilities of the era, Reber succeeded in detecting "cosmic static" in 1939. In 1941, Reber produced the first radio map of the sky, based on a series of systematic observations.

Reber's research results were published in a number of prestigious technical journals. He also received numerous honors normally reserved for scientists professionally trained in astronomy. Ohio State University conferred an honorary doctorate on Reber on 1962.

In a 1977 paper, "Endless, Boundless, Stable Universe" <http://personal.nbnet.nb.ca/galaxy/G_Reber.html>, Reber concluded: "Time is merely a sequence of events. There is no beginning nor ending. The material universe extends beyond the greatest distances we can observe optically or by radio means. It is boundless."

Reber's amateur call sign, W9GFZ, now is held by the NRAO Amateur Radio Club in Socorro, New Mexico.--NRAO news release by Dave Finley, N1IRZ; Tom Crowley, KT4XN

==>SOLAR UPDATE

Solar wonk Tad "I Wear My Sunglasses At Night" Cook, K7VVV, in Seattle, Washington, reports: Geomagnetic activity was up quite a bit this week, but solar flux and sunspot numbers were down. Average daily planetary A index, an indicator of geomagnetic activity, was over double last week's average.

Average daily sunspot numbers were down by over 20 percent and average daily solar flux was down by over 10 percent, a drop of 41.7 and 19.6 points respectively. The most active days were Thursday, December 19, when the planetary A index was 21 and Monday, December 23 when it was 26. The mid-latitude numbers were more moderate, but Alaska's College A index was 39 and 40 on those two days.

Sunspot numbers dropped dramatically in the past few days. On Christmas Day the sunspot number was only 77, the lowest value in nearly a year and a half, when the sunspot numbers were 59 and 64 at the end of July, 2001. The day after Christmas the sunspot number dropped even lower, to 62.

Brian, W2BRI, writes about poor conditions on 80 meters recently. He checks a D-region absorption map (perhaps the one at http://www.sel.noaa.gov/rt_plots/dregion.html) when he notices poor conditions, and it always seems to correlate with an elevated X-ray level. He notices lots of fading and high angle attenuation with close-in stations inaudible but stations further away heard okay.

Over the next few days we should see continued geomagnetic activity. A coronal hole is spewing a solar wind stream that is expected to yield a Friday through Sunday planetary A index of 20, 25 and 20. Solar flux over those same days should drop to around 125, 120 and 115.

Next week's bulletin will have some end of year numbers. It won't be final until next week, but the average daily sunspot number for the calendar year so far is 178.3. This contrasts with 170.3 for 2001, 173 for 2000 and 136.3 for 1999, which is surprising, since the peak of the cycle was expected to be a couple of years ago.

Sunspot numbers for December 19 through 25 were 225, 203, 199, 168, 160, 119, and 77, with a mean of 164.4. 10.7 cm flux was 192.9, 196.6, 183.9, 172, 158.9, 147.3, and 131.9, with a mean of 169.1. Estimated planetary A indices were 21, 16, 18, 12, 26, 18, and 14, with a mean of 17.9.

==>IN BRIEF:

* This weekend on the radio: The DARC Christmas Contest, the RAC Winter Contest, the Stew Perry Topband Challenge and the Original QRP Contest (CW) are the weekend of December 28-29. JUST AHEAD: ARRL Straight Key Night, the AGB NYSB Contest, the SARTG New Year RTTY Contest, and the AGCW Happy New Year Contest are January 1. The AGCW QRP Winter Contest, the ARRL RTTY Roundup and the EUCW 160-Meter Contest are the weekend of January 4-5. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* Spanish-language NCVEC question pools now available on the Web: For the first time, a National Committee of Volunteer Examiner Coordinators (NCVEC) question pool has been translated into Spanish and published on the Web to benefit of non-English speaking candidates in Puerto Rico. The

Puerto Rico Amateur Radio League (PRARL), which has prepared Spanish-language question pool translations for the last eight years, has agreed to make available its Element 2 (Technician) Spanish-language question pool and corresponding graphics to other VECs. "It is a very accurate translation of the original version using Puerto Rican Spanish with insertions of English words when translated words are confusing or non existing," said PRARL Secretary Victor Madera, KP4PQ--who also happens to be ARRL Puerto Rico Section Manager. The ARRL VEC Puerto Rico volunteer examiner team has offered Spanish-language tests at the Technician and General-class levels since 1994 and will now allow other VECs serving the Commonwealth to use its pool to generate their examinations. Exam-generating software is in the works and will be available on the Web as soon as it's ready, Madera said. The PRARL also has produced study guides in Spanish, and these are available through local clubs to all interested persons. Visit the PRARL exam Web site <http://prarl.org/servicios.html#Examen> for more information.

* German Amateur Radio payload reaches orbit: Oliver Amend, DG6BCE, and the German Amateur Radio Association report that the RUBIN-2 scientific satellite carrying the SAFIR-M Amateur Radio payload was successfully launched December 20 (1700 UTC) from Russia's Baikonur Cosmodrome. As of December 22, he had not yet established contact with the satellite. The call sign, DP0AIS, stands for "Amateur Radio in Schools." Designed as a store-and-forward system for APRS-based messages, SAFIR-M is a project of the Working Group for Amateur Radio and Telecommunications in Schools <http://www.aatis.de> and developed in cooperation with the University of Applied Sciences in Pforzheim, Germany. "The main purpose of the satellite is to give students easy access to space communications," Amend says. He notes the satellite will be operational only when RUBIN-2 is in sunlight, so usable passes over Europe will be during the early morning hours and only for up to about five minutes with very low antenna elevations. Now in an approximately 650-km orbit at 65 degree inclination, SAFIR-M has a 1200-baud packet uplink at 437.275 MHz and a 9600-baud packet downlink on 145.825 MHz. There's also an optional voice message beacon on 2 meters. Amend welcomes reports with date and time (UTC) and position (WGS-84 or grid square) via e-mail <dg6bce@...>. The correct NORAD identifier for two-line Keplerian elements appears to be 27607. More information is available in German on the SAFIR-M Web site <http://amend.gmxhome.de>.

* Ham Radio University 2003 set: Ham Radio University 2003 will take place Sunday, January 19, as part of the ARRL New York City-Long Island Section Convention in Oyster Bay, New York (East Woods School, 31 Yellow Cote Road). Billed as a day of education about Amateur Radio, this year's event will feature new forums--including sessions for nonhams as well as for experienced operators. The focus will be hands-on, with special event station W2V on the air and day-long demonstrations of digital communications, satellite communications, low-power operating, emergency communications and other modes and activities. Featured guest speaker and forum leader will be Gordon West, WB6NOA. HRU 2003 will include an Amateur Radio examination session. HRU 2003 is sponsored by the Long Island Mobile Amateur Radio Club and is a cooperative effort among more than 20 clubs

and organizations in the New York City-Long Island area. Admission is open to all ($2 donation), and refreshments will be available. Talk-in is on the W2VL 146.85 and 147.210 repeaters. For more information contact ARRL NYC-LI SM George Tranos, N2GA, n2ga@..., or visit the ARRL New York City-Long Island Web site <http://www.hudson.arrl.org/nli>.

* Nine-year-old makes Extra: Elizabeth Harper of Vinemont, Alabama, became one of the nation's youngest Amateur Extra-class licensees during the Montgomery Amateur Radio Club hamfest examination session November 9. Accompanying the nine-year-old on her upgrade journey were her parents, Anthony, NO2M, and Sondra Harper, KA4EIC. There was a lot of excitement as the volunteer examiners from the Montgomery CAVEC group graded her Element 4 answer sheet, then rechecked it twice more. A General licensee at the time of the session, Elizabeth also might hold the distinction of being the only youngster her age now working on her third ham radio call sign. When she sat for the Extra, she was KG4NAU. The FCC issued her a new sequential call sign, AG4WP, which she held for about three weeks until the FCC granted her vanity application. Elizabeth now is AK3H.--Steve Padgett, K4NM

* World Scout Jamboree to include Amateur Radio activity: The 20th World Scout Jamboree <http://www.worldscoutjamboree20.org> in Thailand from December 28, 2002, to January 7, 2003, will include Amateur Radio operation from E20AJ at the Jamboree site. E20AJ will use World Scout frequencies <http://www.home.zonnet.nl/worldscout/Jota/frequencies.htm>. The station will be operational for the duration of the Jamboree, 24 hours a day, on SSB, CW, SSTV and packet on 160, 80, 40, 20, 15, 10 and 2 meters. Three HF stations will be in operation. QSL E20AJ via HB9AOF or via the Thailand QSL bureau. GB2COS will be a special Scout station on the air from Chester, England, January 4-5. Activity will be on most HF bands, and GB2COS operators will attempt to contact E20AJ at the World Jamboree in Thailand. QSL GB2COS via G7BQY.--some info from The Daily DX

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from
ARRL HQ.
To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site
<http://www.arrl.org/members/>. You'll have an opportunity during
registration to sign up for e-mail delivery of The ARRL Letter, W1AW
bulletins, and other material. To change these selections--including
delivery of The ARRL Letter--registered members should click on the
"Member Data Page" link (in the Members Only box). Click on "Modify
membership data," check or uncheck the appropriate boxes and/or change
your e-mail address if necessary. Then, click on "Submit modification" to
make selections effective. (NOTE: HQ staff members cannot change your
e-mail delivery address. You must do this yourself via the Members Only
Web Site.)

The ARRL Letter also is available to all, free of charge, from these
sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will
be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur
Radio Club: Visit Mailing Lists@...
<http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL
cannot assist subscribers who receive The ARRL Letter via this
listserver.)

953. MARS GOES COMMERCIAL

Yahoo group: m_a_r_s
Date: 2002-12-30 12:31:07 UTC
From: Nirav Sanghavi
Topic: 953 Message: 953

I would love to advertise my products here because I think it is the best place (a MARS yahoogroup) to advertise sign films, specialised tapes etc.

If I am not allowed, can we infer that the group co-ordinator is one who has vested interest in the mobile phones being advertised here. Or is it something else...

So ladies and gentlemen, how many of you like HUUUUUUUUGE power point presentations on PVC products?

Nirav
(itching to bomb all your mailboxes with business proposals
and thoroughly dissenting the misuse of the send button as recently demonstrated)

Date: 2002-12-31 11:04:54 UTC
From: Kunal Mashru
Topic: 957 Message: 957

Dear Group Members,

This has reference to my announcement for Reliance Mobiles availability. Obviously from the response it seems that a few members have taken it offensively to my placing the announcement through the yahoogroup. I would however like to put forth that
I was not aware that one is not allowed to put up any commercial announcements through the yahoogroup, so kindly accept my apologies alongwith an assurance that no similar incidents would be repeated in the future.

Regards,
Kunal Mashru

Sarlaji,

In reply to your mail dated 01.01.2003.

Yes, I do get your drift. But regret that you fail to understand that 'I didnt know', what was done was so unintentional and comparing that to Dxing on armed force frequencies is rather a not very good example. Please note that there is hardly a monetary gain by selling the Reliance Mobiles. My intentions were rather to let avail the facilities to my freinds and family which I guess we all(in general) are so excited about and probably in benfit to all people in India. Meaning which my mail was in interest of all our group members leaving alone my vested interest in selling them. Nontheless, I was always under the impression that the MARS Group ID was a way to reach all freinds/group members conveniently if it was to their benefit in any way and not a frequency to the armed forces.

Should the MARS code be so firm such as the armed forces and feel that an apology is not enough you may as well feel free to unsubscribe me from the MARS Yahoogroup, with no regrets.

I had expected all descripencies to have ended with my email of apology, however, it didnt happen that way. Nontheless, this I do expect to be my last word on this topic and expect no further communication, therefore please do not reply. Non receipt of MARS emails would be a clear indication by itself.

With due respect...

All in all I take the opportunity to wish the MARS Group Members and their families a Very Happy and a Prosperous New Year.

Best Regards,
Kunal Mashru

Dear Kunal,
I have received 2 mails from you. One on the Mars e group and one on my own add. I am sorry kunal, I cannot strike you off this group as I am not the moderator!!!! Yes there are water tight compartments and I am afraid one cannot cross the line. I appreciate your doing the WLL business without monetary considerations. May your tribe increase.
In your private mail to me you have called me a senior member. Please kunalji,dont add any prefixes to my name. I am a member, period. I would also appreciate if you dont send any mail to my private add.
Thanks,
Sarla

970. Fox Hunt details

Yahoo group: m_a_r_s
Date: 2003-01-04 06:02:22 UTC
From: ZYROS ZEND
Topic: 970 Message: 970

Dear hams and swl?s,

Please note the F.B.I of United States of America and the SCOTLAND YARD of England has approached ?MUMBAI AMATEUR RADO SOCIETY? for assistance.

The same countries that were able to successfully seek and hunt out all bad elements from Iraq and Afghanistan in a matter of days have come to us for help.

I personally had a talk with GEORGE .B and TONY B on the phone after they called my residence ; they both have failed in hunting down with their ?crack commando? teams and their ?green berets? a bad element agent who is roaming in mumbai city since the last few months creating a havoc.they want us to hunt down this agent who goes by the name of ??.
?Cunning SLY FOX?

I gave both of them total assurance that ?MUMBAI AMATEUR RADO SOCIETYIES team of expert ?FOX HUNTERS? who have gone through rigorous training programmes will find it a Cake Walk in hunting this ?Cunning SLY FOX? in our home town.

Before signing off GEORGE .B and TONY B both of them advised me that this ?Cunning SLY FOX? is no ordinary fox,as compared to the last one he seems to be very very cunning compared to the other foxes you may come across. They did also mention a reward for the head of this ?Cunning SLY FOX?. I thanked them for giving us this opportunity to serve them when their all means have failed.

Well dear hams and swl?s lets get to to serious talk.

Please read on carefully.(no jokes)

There is a Fox Hunt cum treasure hunt in mumbai city on the 19th of jan 2003 organised by MARS.

Before the fox hunt there will be a treasure hunt also.

The event will begin at 8.00 am sharp and will go on till late afternoon

There will be limited entries taken for this event on first come first bases due to limited foxhunt equipment

Preference will be given to entries accordingly

1) Hams with handy and vehicle (car /motorbike/scooters. no bicycles please)

2) hams with vehicle only (car /motorbike/scooters. no bicycles please)

3) swl with vehicle (car /motorbike/scooters. no bicycles please)

4) hams / swl in person only

There will be prize money and prizes given for the treasure hunt as well as the foxhunts

There will be breakfast and lunch given to all the participants by M.A.R.S.

There will be a participation fee of Rs. 100/- only per person
Hams and swls that bring their vehicles will not have to pay participation fees

Confirm your entry by email of by phone 22875741 or at the earliest
Please remember first cum first basis will apply
Payment of participation fee during foxhunt briefing will confirm entry of person.
Please note this is an initial mail on the event. Further updates, information and any changes will follow by email .

thank you

4) hams / swl in person only

There will be prize money and prizes given for the treasure hunt as well as the foxhunts

There will be breakfast and lunch given to all the participants by M.A.R.S.

There will be a participation fee of Rs. 100/- only per person
Hams and swls that bring their vehicles will not have to pay participation fees

Confirm your entry by email of by phone 22875741 or at the earliest
Please remember first cum first basis will apply
Payment of participation fee during foxhunt briefing will confirm entry of person.
Please note this is an initial mail on the event. Further updates, information and any changes will follow by email .

thank you

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

Further to the mail from VU2ZRS - Zyros Zend (Event Manager).

All the members are requested to make it a point to participate in this King of all the Events organized by MARS.

FOX HUNT is probably the most enjoyed event conducted in MARS and the participants of the last years Fox Hunt can confirm this. This event total FUN and no tension, especially the way Zyros organises it. First ofcourse there will be Treasure Hunt and then atleast 2 Fox Hunts. I am sure ZRS will provide you with all the details very soon.

Please do not miss out on this event at any cost because we conduct this event only once every year. This year it will be more exiting than the last year I can assure you because we are working on it to improvise.

I personally request all the founder Members to atleast participate this one event as many are not active at all in the other matters and activities of the society. Come on guys you have started the society atleast show some interest. Please don't go in the HISTORY BOOK while you are still alive.

I would also request all the other members to also take interest and join us in this Mega Mega FUN event, especially the SWLs. (you guys will really really freak out)

Please note that in any fox hunt around the world no society gives you the DFE (Direction Finding Equipment) for fox hunt, all the participants have to homebrew and get their own equipment. BUT here at MARS we are giving you the DFE simply to promote this wonderful sport so take advantage and make the most of it.

Since there is limited amount of DFE with us, They will be issued on first come first serve basis (meaning people who register early for the event - early bird gets the worm).

People willing to participate with their own DFE would also be highly appreciated. (I seriously hope some of you guys really try and do that).

REGISTER WITH VU2ZRS NOW WITHOUT ANY DELAY.

GOOD HUNTING....!!!

The ARRL Letter
Vol. 22, No. 01
January 3, 2003
****

IN THIS EDITION:

* +ARRL's 5-MHz experimental operation ends
* +New crew resumes ARISS school contacts
* +FCC poised to renew Kevin Mitnick's ham ticket
* +Hams fill communication gap during telephone emergency
* +McGan Award nominations open
* ARRL offering license renewal, other application services to nonmembers
* Solar Update
* IN BRIEF:
This weekend on the radio
ARRL Emergency Communications course registration
ARRL to sponsor emergency communications course seminar in
Mississippi
Correction
Packet users requested to not send e-mail messages to ISS crew
+ARRL QSL Service ends 2002 just shy of 2 million cards shipped
+League volunteers help at public TV pledge drive
IARU presents Amateur Radio Administration Course in Kenya

+Available on ARRL Audio News

==========

==>ARRL CONCLUDES 5-MHz EXPERIMENTS, AWAITS FCC DECISION ON NEW BAND

Without fanfare, the ARRL allowed its WA2XSY 5-MHz experimental license to lapse January 1 rather than request renewal for another year. Last May, the FCC proposed going along with the ARRL's 2001 request for a new domestic (US-only), secondary HF allocation at 5.25 to 5.4 MHz. Discussions with various governmental agencies--including the Interdepartment Radio Advisory Committee (IRAC) and the National Telecommunications and Information Administration (NTIA)--continue on how to accommodate amateur operation in the band, which is primary for several governmental agencies including the military. The NTIA regulates radio spectrum allocated to the federal government.

"At this point, we have every reason to believe the FCC will act on its proposal early this year," said ARRL Chief Executive Officer David Sumner, K1ZZ. "As to what the outcome will be as far as 5 MHz is concerned, we cannot predict."

In a December 24 letter, Sumner thanked the 15 Amateur Radio clubs and individual amateurs who took part in the 5-MHz experimental operation that began in January 1999 and largely concluded in 2002. "You assisted in providing an important part of the groundwork for our petition for a domestic allocation to the Amateur Radio Service in this frequency range by demonstrating the desirability and feasibility of a shared allocation," he wrote. "We hope it will not be long before amateurs throughout the country are able to enjoy the fruits of your efforts."

Sumner said the ARRL chose not to request another renewal of the WA2XSY license because it already had obtained sufficient information to justify its petition for the band.

Until surprise opposition surfaced last fall from the NTIA, the FCC had the League's request for a new 60-meter band on the proverbial fast track. In a letter filed with the FCC last August--after the comment deadline had passed--the NTIA recommended that the Commission not go forward with the 5-MHz proposal. The NTIA said several government agencies with allocations in the proposed spectrum had expressed reservations about allowing amateurs to use the band, even on a non-interference basis.

The ARRL has been working with the federal agencies involved to resolve the impasse the NTIA letter raised. The NTIA said critical federal agencies, including the Department of Justice, the US Coast Guard and the Department of Defense, were making extensive use of 5 MHz frequencies. The FCC's May 2002 Notice of Proposed Rule Making (NPRM) fails to adequately protect these "critical government operations" from harmful interference, the NTIA asserted.

The ARRL has called the 5 MHz allocation "an urgent priority of the Amateur Service." In its July 2001 petition, the League told the FCC that a new band at 5 MHz would aid emergency communication activities by filling a "propagation gap" between 80 and 40 meters.

Experimental operations on 5 MHz continue on a very limited basis in the United Kingdom and in Canada. In Newfoundland, the Marconi Radio Club's VO1MRC has been operating under experimental authority from Industry Canada and an endorsement from Radio Amateurs of Canada to conduct experiments on 5 MHz. On December 21, VO1MRC completed a cross-band (5 MHz/7 MHz) CW contact with VK7RO in Tasmania.

==>CHICAGO YOUNGSTERS ENJOY END-OF-YEAR ARISS QSO

Amateur Radio on the International Space Station (ARISS) school and educational contacts resumed in late December after a hiatus to change crews. Expedition 6 Crew Commander Ken Bowersox, KD5JBP, spoke December 29 via NA1SS with a dozen youngsters visiting Adler Planetarium and Astronomy Museum <http://www.adlerplanetarium.org/index.html> in Chicago. It marked the 81st ARISS contact and the first contact for Bowersox' crew with youngsters in the US. Expedition 6 crew members also conducted successful ARISS contacts on New Year's Eve with participants at the World Scout Jamboree in Thailand and with students in France.

"I'd say the most important thing that I have learned in space is that people are very, very strong and flexible, and we can adapt to all types of different environments," Bowersox told a youngster who had asked the space veteran to describe the most interesting or important thing he'd learned in space.

Other youngsters were curious about food and eating in space. Bowersox said he missed pizza most of all aboard the ISS. His favorite space food, he said, was bread pudding. "And I can just open a packet and eat straight out of the packet with a spoon," he said. Bowersox also explained that the human body still digests food very well in zero gravity. He also noted that the crew was trying to grow some tomatoes and herbs in space. "We're not sure how they'll turn out," he said, "but we're hoping they'll be very tasty."

An audience of some 200 people, including TV and newspaper reporters, were on hand to watch the youngsters interview Bowersox via Amateur Radio. Participating youngsters ranged between five and ten years old. Organizing the ARISS event were ARISS mentor Charlie Sufana, AJ9N, and the planetarium's Geri Smith.

Audio and video (Quicktime) clips of the Adler Planetarium ARISS contact are available via the Adler Planetarium Web site <http://www.adlerplanetarium.org/education/events/iss/>.

On December 31, 15 Scouts at the 20th World Scout Jamboree <http://www.worldscout.pacific.net.th/> in Thailand spoke with Expedition 6 crew member Don Pettit, KD5MDT, via special event station E20AJ. Among other questions, the Scouts asked Pettit if he wanted his own kids to grow up to become astronauts, how the crew members bathe in space, and how the lack of gravity affects the human body.

Also on December 31, Pettit spoke with students at the Rene Mure school in Commelle-Vernay, France. ARISS International Vice Chairman Gaston Bertels, ON4WF, said some 60 schoolchildren and their parents assisted in the contact. The French youngsters wanted to know if Pettit believed in extraterrestrial life, whether the crew could feel the speed of the ISS through space, and if microgravity made it difficult for crew members to find their way in the space station.

==>FCC POISED TO RENEW COMPUTER HACKER'S HAM TICKET

An FCC Administrative Law Judge has recommended that the FCC grant the Amateur Radio license renewal application of convicted computer hacker Kevin D. Mitnick, N6NHG. The Initial Decision <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-02D-02A1.pdf> by Chief Administrative Law Judge Richard L. Sippel released December 23 comes approximately one year after the FCC designated Mitnick's license renewal application for hearing.

"Right now, my goal in life is to live a productive life and to earn a living and try to make up for all the time that I lost and try to be a productive citizen," Mitnick told an FCC hearing last June 18. The

Commission had cited character issues stemming from Mitnick's history of illegal computer-related activity--which included several convictions and prison sentences and two years on the run.

Mitnick testified that he's decided to turn his life around and dedicate himself to a career in broadcast radio, public speaking, and writing to help government, businesses, and individuals minimize the risks associated with computer intrusions. Following his release from prison, Mitnick said, he has been law-abiding and has no desire to return to his former life.

In his Initial Decision, Sippel wrote, "There is reliable evidence that Mr. Mitnick has focused on becoming an honest, productive citizen and that he has the means to continue to do so." Sippel said that Mitnick has been on the amateur bands since his release from prison and there have been no complaints regarding his on-the-air behavior. "The evidence in its totality shows Mr. Mitnick to have an overall record of compliance with Commission rules," Sippel concluded.

Unless exceptions are raised within 30 days or the FCC reviews the ruling on its own motion, Sippel's decision becomes effective 50 days after its release.

First licensed in 1976, Mitnick, 39, filed with the FCC through his attorney to renew his General ticket not long after his US District Court conviction in August 1999. His ham license was due to expire in December 1999, but the FCC extended his operating authority while his renewal application was pending. Mitnick reportedly spent some $16,000 in legal fees to retain his ham ticket.

Following a similar hearing earlier this year on character issues, the FCC recently granted the Amateur Radio license application of Herbert Schoenbohm. Last month, Schoenbohm regained his previously held KV4FZ call sign via the vanity call sign system. Upon his return to ham radio after a nearly two-year absence, he initially was issued NP2MJ as a sequential call sign.

==>HAMS HELP OUT DURING OKLAHOMA TELEPHONE EMERGENCY

Hams responded to fill a communication gap December 23 after the town of Broken Arrow, Oklahoma, experienced a city-wide telephone outage that left telephone customers unable to call outside their local exchange. Broken Arrow implemented its Telecommunications Failure Plan as a result. A request went out for amateurs to assist at the local emergency operations center (EOC) and at three area hospitals.

Several hams in and around the town of 75,000 residents responded to the call. Four Broken Arrow Amateur Radio Club members staffed positions at the Broken Arrow EOC and at three hospital emergency rooms. Tulsa Amateur Radio Emergency Service member Joe Iverson, KD5KKZ, reported to the City of Tulsa EOC.

"All in all, things went smoothly," said Broken Arrow ARC president Steve Bradley, KB5ZSD. "The city officials were again very impressed and appreciative with the amateur community's commitment to service and response to the emergency. It is times like these that such partnerships between local government and the local hams become invaluable."

The operation lasted about five hours. In addition to passing traffic between the EOC and the hospitals, lines of communication also were opened with the Oklahoma State Department of Civil Emergency Management in Oklahoma City via the EOC's HF amateur station.

The telephone system troubles were traced to the loss of a digital protocol needed for call routing.

==>NOMINATIONS OPEN FOR THE 2003 PHILIP J. MCGAN MEMORIAL SILVER ANTENNA AWARD

Nominations are open for the ARRL 2003 Philip J. McGan Memorial Silver Antenna Award. Throughout the year, ARRL PICs, PIOs and other PR volunteers in the ARRL field organization strive to keep Amateur Radio visible in their communities. Among other valuable activities, they publicize special events, write press releases, and maintain solid working relationships with their local media--radio, TV, newspapers.

"If you know someone who has achieved public relations success on behalf of Amateur Radio, nominating him or her for the McGan Award is the perfect way to bestow much deserved recognition," said ARRL Public Relations Manager Jennifer Hagy, N1TDY. "The 2003 McGan Award will go to a ham who has demonstrated success in Amateur Radio public relations and best exemplifies the volunteer spirit of Phil McGan, the award's namesake."

A journalist, Philip J. McGan, WA2MBQ (SK), served as the first chairman of the ARRL's Public Relations Committee, which helped reinvigorate the League's commitment to public relations. Hagy notes the award honors contributions in public relations, not in public service.

"Public relations activities for which the McGan Award is given include efforts specifically directed at bringing Amateur Radio to the public's attention--and most often the media's--in a positive light," she explained.

A committee of volunteers knowledgeable about Amateur Radio public relations will pick the winner, subject to approval by the ARRL Board of Directors. Information on nominating someone for this award is available on the ARRL Web site <http://www.arrl.org/news/stories/2002/12/30/1/call-for-nominations.html>. To obtain an entry form, call ARRL HQ at (860) 594-0328 or e-mail Jennifer Hagy, N1TDY, jhagy@....

==>ARRL PROVIDING FCC LICENSE RENEWAL, ADDRESS CHANGES, MODS TO NONMEMBERS

The ARRL has announced that it's now providing FCC Amateur Radio license renewals, address changes and other license modification services to nonmembers. For a $12 fee, the League will renew a nonmember's Amateur

Radio ticket (the license must be within 90 days of expiration), file an application to change address or name or request issuance of a new sequential call sign. The ARRL Volunteer Examiner Coordinator is processing these applications.

"The $12 is in line with our calendar year 2003 exam application fee," said ARRL VEC Manager Bart Jahnke, W9JJ. For several years, the ARRL has been handling renewals, address and name changes and modifications free of charge for members and has directed nonmembers to the FCC's free Internet or hard-copy application options or to other providers of such services.

Jahnke suggests that nonmembers who now choose to employ the League's application handling service also consider adding $27 (based on the current under-65 full term member rate of $39) for a full ARRL membership that includes free application handling and other services--not to mention QST.

Members or nonmembers taking advantage of this service should submit NCVEC Form 605 <http://www.arrl.org/fcc/forms.html> to ARRL VEC, 225 Main St, Newington CT 06111 USA for processing. Nonmembers should make the $12 fee payable to "ARRL." For more information, contact ARRL VEC, vec@....

==>SOLAR UPDATE

Wave bender Tad "Who can make the sun shine, on a cloudy day?" Cook, K7VVV, Seattle, Washington, reports: Last week we reported sunspot numbers dropping dramatically. This week it became a trend. Average daily sunspot numbers for the past three weeks were 206.1, 164.4 and 55.3. Average solar flux was 188.7, 169.1 and 117.1. The real shocker though was Monday, with a sunspot number of only 44! I thought it possible that the sunspot number had not been that low since the other side of the solar cycle (before the peak), but we actually saw lower values of 27 and 38 on September 11 and September 12, 2000. On September 26, 1999, it was also 44--and that was probably on the other side of the peak of the current cycle.

Last year was surprisingly good in terms of high sunspot activity. The average daily sunspot number for Calendar Year 2002 was actually slightly higher than any of the three previous years. Average daily sunspot numbers for the years 1997 through 2002 were 30.7, 88.7, 136.3, 173, 170.3 and 176.6. Note the 176.6 value is lower than the 178.3 reported in last week's bulletin as the average sunspot number for the first 359 days of the year. The drop in sunspot numbers over the past week was so dramatic that it actually dropped the yearly average by nearly two points! Average daily solar flux for the same six years was 81, 117.9, 153.7, 179.6, 181.6 and 179.5.

What is the trend? Let's look at quarterly averages.

Average daily sunspot numbers for the past eight quarters were 147.3, 164.8, 170.4, 198.1, 178.3, 165.3, 193.5 and 152.7. Average daily solar flux for those same quarters was 164.4, 166.7, 175.5, 219.1, 203.9, 156.4, 178.1 and 164.2. As you can see, there is quite a bit of variability in

the values. Solar cycles only appear smooth when looking backward and doing a moving average of the data.

Currently Earth is entering a solar wind from a small coronal hole on the sun. Conditions could be unsettled on Friday and Saturday. The projected planetary A index for Friday through Monday is 15, 15, 10 and 8. The projected solar flux for those same days is 120, 125, 125 and 130.

Sunspot numbers for December 26 through January 1 were 62, 63, 70, 51, 44, 50 and 47, with a mean of 55.3. The 10.7-cm flux was 127.4, 116.5, 116.9, 114.8, 113.8, 115.1 and 115, with a mean of 117.1. Estimated planetary A indices were 15, 37, 19, 13, 15, 11 and 10, with a mean of 17.1.

==>IN BRIEF:

* This weekend on the radio: Kid's Day, the AGCW QRP Winter Contest, the ARRL RTTY Roundup and the EUCW 160-Meter Contest are the weekend of January 4-5. JUST AHEAD: The North American QSO Party (CW), Hunting Lions in the Air, the East Asia 160/80 DX Contest, the Midwinter Contest (CW), the NRAU-Baltic Contest (CW and SSB are separate events), the Midwinter Contest (SSB) and the DARC 10-Meter Contest are the weekend of January 11-12. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration opens Monday, January 6, at 12:01 AM Eastern Time (0500 UTC) for the on-line Level I Emergency Communications course (EC-001). Registration remains open through the January 11-12 weekend or until all available seats have been filled--whichever comes first. The class begins Tuesday, January 21. Thanks to the federal homeland security grant from the Corporation for National and Community Service, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the course. During this registration period, approximately 200 seats are being offered to ARRL members on a first-come, first-served basis. To learn more, visit the ARRL Certification and Continuing Education Web page and the C-CE Links found there. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@...; 860-594-0340.

* ARRL to sponsor emergency communications course seminar in Mississippi: The ARRL will offer a free Amateur Radio Emergency Communications course (ARECC) seminar January 31, in conjunction with the 2003 Capital City Hamfest in Jackson, Mississippi. The seminar will not include the Level I course itself. This program is designed to explain in greater detail the duties of volunteer certification mentors, instructors and examiners of the Amateur Radio Emergency Communications courses and provide additional information for those considering these volunteer positions. "With Level I emergency communications training being offered nationwide under the homeland security grant from the Corporation for National and Community Service, we hope to have all ARECC team players reading from the same page

to ensure success under the federal grant guidelines," said ARRL Emergency Communications Course Manager Dan Miller, K3UFG. The seminar will be held Friday, January 31, 1 until 5 PM, at the Trade Mart Building, located on the Mississippi State Fairgrounds northeast of the coliseum. Seating may be limited. If you plan to attend or need more information, contact Dan Miller, K3UFG, k3ufg@...; 860-594-0340; fax 860-594-0259. For registered CMs, CIs and CEs who attend, mileage may be reimburseable up to a total of $35. Seminar attendance does not include admission to the hamfest, which is January 31-February 1. For more information on the 2003 Capital City Hamfest, visit the sponsoring Jackson Amateur Radio Club Web site <http://www.jxnarc.org/>.

* Correction: In the report "FCC Seeks Comments on Amateur Radio-Related Petitions" in The ARRL Letter, Vol 21, No 50 (Dec 27, 2002), we erred in attempting to synopsize the rule making petition designated RM-10620 offered by Dale Reich, K8AD. Reich notes that his proposal would require current veteran, rule-abiding Novice and Advanced ticket holders to apply for an upgrade in license class through a Volunteer Examiner Coordinator.

* Packet users requested to not send e-mail messages to ISS crew: Amateur Radio on the International Space Station (ARISS) International Chairman Frank Bauer, KA3HDO, has requested that amateurs refrain from sending e-mail to the ISS crew via the onboard RS0ISS Personal Message System (PMS). "The crew is not answering the e-mail, and we really don't expect them to." he said. "If things change, we'll let you know." Reports have indicated that the ISS packet mailbox is filling up with unread messages, many of them greetings to the crew or holiday greetings. The all-ham Expedition 6 ISS crew consists of Crew Commander Ken Bowersox, KD5JBP, cosmonaut Nikolai Budarin, RV3FB, and astronaut Don Pettit, KD5MDT.

* ARRL QSL Service ends 2002 just shy of 2 million cards shipped: With sunspot numbers slowly starting to decline, it may be a while before the ARRL QSL Service <http://www.arrl.org/qsl/qslout.html> again sees the sort of activity it dealt with in 2002. During the past year, the service mailed out 1,963,165 cards from ARRL members to DX stations. That's up by 30,850 over 2001--or approximately 1.6 percent. The final day's QSL card shipment to exotic and rare entities--done every 90 days--was 148,050 cards alone. "Overall, it's been a pretty good year for the bureau," said ARRL QSL Service Manager Martin Cook, N1FOC. "We got the cards sorted on time with no backlog this year." Cook said most members have been sorting their cards properly before sending them to the ARRL QSL Service for shipping. "Unsorted cards really slow things down," he said.

* League volunteers help at public TV pledge drive: Amateur Radio got a bit of TV exposure December 30 as several ARRL Headquarters staffers represented the League during a Connecticut Public Television (CPTV) fund drive. ARRL Chief Development Officer Mary Hobart, K1MMH, who organized the group of HQ volunteers, said that with more than 300 public radio and television stations in the country, volunteering a ham radio club for a pledge drive phone bank is a tidy way to gain some visibility. "Just call the station's volunteer coordinator," Hobart suggested. "Several people

called in and said they were hams, or that their father was a ham, and donated because they saw our banner in the background." ARRL Electronic Publications Manager Jon Bloom, KE3Z, even helped a caller with an "out-of-sync" audio problem on her TV (the SAP channel was engaged)--something most volunteers probably could not do. The 17 HQ staffers and family members helped raise more than $45,000 for CPTV during a University of Connecticut women's basketball game and received high praise from the station's volunteer coordinator for their professionalism and above-average results during their segment.

* IARU presents Amateur Radio Administration Course in Kenya: The International Amateur Radio Union (IARU) has announced the successful presentation of the Amateur Radio Administration Course (ARAC) in Nairobi, Kenya. The course, conducted jointly by IARU and the African Advanced Level Telecommunications Institute (AFRALTI), was taught December 9-13, 2002, to a class of 22 telecommunications officials from English-speaking African countries. Support for the course was provided by the International Telecommunication Union Telecommunication Development Bureau (ITU-D), the African Telecommunications Union (ATU) and the Communications Commission of Kenya (CCK). Students were from administrations and telecommunications operators from Ghana, Kenya, Sudan and Zambia. Presenters were Paul Rinaldo, W4RI, for IARU; Mohamed K. Noorani of AFRALTI; and Gideon Mwakatobe of ATU. AFRALTI Director Edward Mallango participated in the opening ceremony and ATU Secretary-General Jan Mutai officiated at the closing ceremony. Amateur Radio Society of Kenya (ARSK) Chairman E H M (Ted) Alleyne, 5Z4NU, set up an HF station at the training site. "The presentation of the course in Nairobi was made possible by a strong sense of partnership that exists between ITU, ATU, and IARU," said IARU Secretary David Sumner, K1ZZ. "IARU President Larry Price, W4RA, has assigned a high priority to the development of Amateur Radio in Africa. We are most gratified that ITU-D Director Hamadoun Touré as well as ATU Secretary General Mutai and his colleagues in Nairobi share our conviction that Amateur Radio can contribute to human resource development for the improvement of telecommunications in Africa." The course included instruction in subjects such as the ITU, Radio Regulations, spectrum management, the IARU, domestic and international regulations, Amateur Radio operations and technology, disaster communications and the Amateur-Satellite Service.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ.
To subscribe, unsubscribe or change your address for e-mail delivery: ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

979. Confirmation for Fox

Yahoo group: m_a_r_s
Date: 2003-01-05 08:12:51 UTC
From: parin gangar
Topic: 979 Message: 979

Hello Zyros,
Plz count me in for the FoxHunt.
Also let me know when is the briefing for Fox.
73
Parin

Plz.. Note :-
Don't send the same mail 10 TIMES, I REPEAT 10 Times.
Its enough if you send it only twice, coz sending the same mail 10 times
makes no sense.

Hope you understand.

Dear hams and swl?s,

Please note the F.B.I of United States of America and the SCOTLAND YARD of England has approached ?MUMBAI AMATEUR RADO SOCIETY? for assistance.

The same countries that were able to successfully seek and hunt out all bad elements from Iraq and Afghanistan in a matter of days have come to us for help.

I personally had a talk with GEORGE .B and TONY B on the phone after they called my residence ; they both have failed in hunting down with their ?crack commando? teams and their ?green berets? a bad element agent who is roaming in mumbai city since the last few months creating a havoc.they want us to hunt down this agent who goes by the name of ??.
?Cunning SLY FOX?

I gave both of them total assurance that ?MUMBAI AMATEUR RADO SOCIETYIES team of expert ?FOX HUNTERS? who have gone through rigorous training programmes will find it a Cake Walk in hunting this ?Cunning SLY FOX? in our home town.

Before signing off GEORGE .B and TONY B both of them advised me that this ?Cunning SLY FOX? is no ordinary fox,as compared to the last one he seems to be very very cunning compared to the other foxes you may come across. They did also mention a reward for the head of this ?Cunning SLY FOX?. I thanked them for giving us this opportunity to serve them when their all means have failed.

Well dear hams and swl?s lets get to to serious talk.

Please read on carefully.(no jokes)

There is a Fox Hunt cum treasure hunt in mumbai city on the 19th of jan 2003 organised by MARS.

Before the fox hunt there will be a treasure hunt also.

The event will begin at 8.00 am sharp and will go on till late afternoon

There will be limited entries taken for this event on first come first bases due to limited foxhunt equipment

Preference will be given to entries accordingly

1) Hams with handy and vehicle (car /motorbike/scooters. no bicycles please)

2) hams with vehicle only (car /motorbike/scooters. no bicycles please)

3) swl with vehicle (car /motorbike/scooters. no bicycles please)

4) hams / swl in person only

There will be prize money and prizes given for the treasure hunt as well as the foxhunts

There will be breakfast and lunch given to all the participants by M.A.R.S.

There will be a participation fee of Rs. 100/- only per person
Hams and swls that bring their vehicles will not have to pay participation fees

Confirm your entry by email of by phone 22875741 or at the earliest
Please remember first cum first basis will apply
Payment of participation fee during foxhunt briefing will confirm entry of

person.
Please note this is an initial mail on the event. Further updates,
information and any changes will follow by email .

thank you

Hi Nilesh,

Thanks for reminding me. As it may happen, I am carrying my photographs with me and so if you could provide me the snail mail address to which I need to despatch it, I will arrange to courier the same today. This will hopefully !! do away with the last of the problems that you face with me.

Hi Madhu,

Glad to see that 'out of sight out of mind' is not the case. ESP still exists - alive and kicking - however I need to clear the cobwebs from both my rigs.

Looking forward to seeing you at the event.

Hi ZRS,
This is further to my verbal confirmation earlier today on my participation
for the FOX HUNT. My XYL and 2nd Harmonic would be joining me for the Hunt.
I have my own Handy and am mobile with a Four Wheeler.
Looking forward to the hunt.

Clear Day
MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The monthly meeting of January will be conducted on 12th January 2003 at 10:00 am at B.S.Bengelle Girls High School.

The Agenda for the meeting is as under :-

1. Mars Classes Results.
2. Briefing for Fox Hunt.
3. Planning for Ham Radio Awareness Drive (Demo & Power point Presentation)
4. Planning for Next ham Radio Classes.

All members wishing to participate for the FOX HUNT "MUST" attend the briefing meeting without fail.

Looking forward to having an eyeball with you.

Dear Zyros
For some reason (due to my outlook settings) my earlier attempt bounced.
I hope now you receive it OK.

Further to our telecon, I confirm my participation for the Treasure / Fox Hunt.
I have a Handy + 4 wheeler.
My wife ~ VU2EVE + my 2 Kids will accompany.
Can accommodate 1 more HAM / SWL in the car.

==========================================================

==>ARRL BOARD TO TAKE STRATEGIC TACK AT JANUARY MEETING

The ARRL Board of Directors will mull options for the next cycle of League
activities and deal with fiscal issues when it gathers January 17-18 in
Windsor, Connecticut. With ARRL and International Amateur Radio Union
(IARU) positions established for most pending FCC and legislative issues
and for the upcoming 2003 World Radiocommunication Conference (WRC-03),
the Board is poised to tackle strategic planning for the next three to
five years as one of its top agenda topics.

"We need to look at our basic assumptions," said ARRL Chief Executive
Officer David Sumner, K1ZZ. "We will do what we have to do to ensure that
Amateur Radio and the ARRL will be healthy 20 years from now." At the
January meeting, the Board will consider recommendations regarding how
strategic planning should be conducted later this year.

Sumner said ARRL Board members also are interested in how the ARRL can
stimulate the entry of prospective amateurs from among the adult
```

population. Board members also want to explore ways to entice previously licensed individuals who have left the hobby to return to Amateur Radio. "There are a lot of new things out there, like PSK-31 and Internet linking that didn't exist a few years ago," he said. "We want to find a way to effectively get the word out to those who don't know that there are 28 flavors of Amateur Radio now, not just vanilla, chocolate and strawberry."

He pointed out that the ARRL Education and Technology Program--"The Big Project"--and the Amateur Radio on the International Space Station (ARISS) program emphasize radio and science instruction for schoolchildren. Both activities are designed to yield long-term benefits for Amateur Radio from within the younger generation.

The Board also will be asked to ratify the ARRL budget for 2003, which is expected to be the last year in a three-year period of planned deficit spending. With the League's Development Office firmly established and tapping into nontraditional revenue sources, the plan for 2003 is to greatly reduce the deficit compared to 2002 and to look toward again presenting a balanced budget in 2004, Sumner said.

The Board also will hear from invited guests, including IARU President Larry Price, W4RA, and Radio Amateurs of Canada President Bill Gillis, VE1WG. In addition to reports from ARRL President Jim Haynie, W5JBP, other ARRL officers and standing committees, the Board is expected to hear from technical, ad hoc and advisory committees.

Prior to the Board meeting, newly elected Great Lakes Division Director Jim Weaver, K8JE, and Vice Director Dick Mondro, W8FQT, will be at ARRL Headquarters January 14-15 for an orientation program.

==>FCC THREATENS NEW YORK AMATEUR WITH HEARING

The FCC has told a Technician-class operator from New York to stay off 20 meters or risk having to defend his license at a hearing. FCC Special Counsel Riley Hollingsworth wrote Alexander Sandbrand, N2NNU, of Yonkers December 12 notifying him that the FCC plans to designate his ham ticket for revocation and suspension proceedings if it learns of additional incidents of out-of-band operation.

"This serves as notice that if you engage in any additional incident of out-of band operation, the Enforcement Bureau intends to designate your Amateur station license N2NNU for a revocation hearing before an Administrative Law Judge," Hollingsworth wrote, "and, further, that we intend to designate your Technician-class operator license for suspension for the remainder of the license term, August 26, 2011."

An initial Warning Notice regarding alleged operation on the 20-meter phone band went out to Sandbrand in August 2001, but the FCC has reports that Sandbrand has operated on HF phone since then.

"Information before the Commission indicates that on at least nine occasions subsequent to receipt of that warning letter, you operated out

of band," Hollingsworth wrote. He cited reports that N2NNU had operated at various times on 20, 17, 15 and 10 meters between September 2001 and June 2002.

Hollingsworth told ARRL that after the first Warning Notice, Sandbrand called him to complain that it wasn't fair that he had to pass additional examination elements to operate on HF phone. "I told him if he wants to operate on HF, he has to take the test like everybody else," Hollingsworth said.

In the latest Warning Notice, Hollingsworth informed Sandbrand that the FCC's Wireless Telecommunications Bureau will not process any upgrade applications from him until the matter is resolved. He said this week that he has not heard anything further from Sandbrand.

==>FRENCH STUDENTS RENDEZVOUS WITH ASTRONAUT VIA HAM RADIO

Students at the Immaculate Conception Elementary School in Brest, France, spoke January 8 via Amateur Radio with US astronaut Don Pettit, KD5MDT. A member of the Expedition 6 crew, Pettit is the chief science officer on board the International Space Station. The contact was arranged by the Amateur Radio on the International Space Station (ARISS) program.

Some 30 schoolchildren, their teachers and parents gathered in the room where the local Amateur Radio club had set up the satellite station. Once contact was established between NA1SS and ground station F6KPF and season's greetings exchanged, Pettit began answering questions, which included one asking if the crew celebrated Christmas in space. Other youngsters wanted to know about how the ISS was supplied with food and where the crew's drinking water came from. Pettit and his fellow crew members commander Ken Bowersox, KD5JBP, and Nikolai Budarin, RV3FB, will remain in space until March.

"The signal was strong, and Don's voice sounded as if he was addressing the audience from the floor," said ARISS Vice Chairman Gaston Bertels, ON4WF. By the end of the pass, 18 questions had been asked and answered. Those on hand for the early-morning contact included the mayor of Brest. The event received radio, TV and print media coverage.

Bertels reports that the 10 and 11-year-old pupils--students of Anne Jaouen--have been studying radio telecommunications throughout the school year with support from the Brest Amateur Radio Club. "Hands-on experience consisted of building a crystal radio set, and the children also have communicated from their classroom with French Amateur Radio stations," Bertels said.

The youngsters also were actively involved in preparing the questions for the ARISS contact. "They studied some basics of astronomy, made models of the solar system, showing lunar phases, the sky, the sun and the earth," Bertels explained. "They also saw pictures taken on board the ISS and transmitted on television."

In addition to the scientific side of space study, the children wrote poems on the theme and illustrated these with paintings--now decorating the walls of the school--that represent the adventure of space exploration and the planets, Bertels said.

ARISS is an international program with support from ARRL, NASA and AMSAT.

==>NEW JERSEY LEGISLATURE HONORS AMATEUR RADIO'S 9/11 ROLE

The New Jersey Legislature has honored the role of Amateur Radio operators in the aftermath of the September 11, 2001, terrorist attacks. On hand in Trenton to witness a joint proclamation December 12 were ARRL Hudson Division Director Frank Fallon, N2FF, Hudson Division Vice Director Steve Mendelsohn, W2ML, Northern New Jersey Section Manager Bill Hudzik, W2UDT, and Bergen County District Emergency Coordinator Mike Adams, WA2MWT, who's also a member of the New Jersey PRB-1 Task Force.

"I would like to take this opportunity to commend you for your hard work and efforts," said Assembly Speaker Albio Sires. "During times of disaster, your group has displayed superior service and dedication to the safety of our citizens. I applaud the efforts of the independent radio operators and thank you for your selfless actions on September 11, 2001. Allow me to express my sincere gratitude for your participation with the New Jersey General Assembly on this day, December 12, 2002."

On behalf of the amateur contingent, Hudzik thanked the 80 members of the Assembly. Among the cosponsors of the resolution was Assemblyman Matthew Ahearn, KB2PNN, a Democrat from Fair Lawn and sponsor of an Amateur Radio antenna bill, Assembly Bill 3065, in the Garden State.

While in the state capital, the ham radio delegation took the opportunity to promote A3065, "The Amateur Radio Antenna Bill." The measure would codify the limited preemption known as PRB-1 into New Jersey's statutes. In addition, it would preclude local ordinances or regulations that effectively prohibit an antenna support structure of 70 feet or less above ground level exclusive of any antenna upon the structure. The measure has been assigned to the Housing and Local Government Committee chaired by Assemblyman Jerry Green (D-Plainfield). The text of the proposed legislation <http://www.njleg.state.nj.us/> is available on the New Jersey Legislature Web site. Search on "A3065" in the "Bill Search" engine.

Ahearn will be seeking cosponsors in the New Jersey General Assembly and Senate. Interested New Jersey amateurs may contact him via e-mail <asmahearn@...>. Amateurs may contact their state lawmakers to express their opinions on the bill or to urge their cosponsorship. Visit the New Jersey Legislature page <http://www.njleg.state.nj.us/> and look under "Members--Find Your Legislator."--Michael Adams, WA2MWT

==>PETTIT TO SUB FOR BUDARIN DURING SPACEWALK

International Space Station astronaut and Science Officer Don Pettit, KD5MDT, will fill in for Russian cosmonaut and Flight Engineer Nikolai Budarin, RV3FB, on a January 15 spacewalk or extra-vehicular

activity--EVA. Pettit and Expedition 6 mission commander Ken Bowersox, KD5JBP, will spend more than six hours in space working on the ISS.

"Pettit replaced Budarin because on-orbit medical data raised concerns among US flight surgeons responsible for medical certification of spacewalk activity," NASA said this week in a statement. "This decision does not affect Budarin's other on-orbit duties. Both NASA and the Russian Aviation and Space Agency have agreed to the personnel change for the EVA." NASA said that because of privacy concerns, no further information would be made public. Associated Press has quoted Russian space officials as saying that Budarin failed to meet US standards in tests on a stationary bicycle. Budarin, 49, is a veteran of eight spacewalks.

AP quoted Russian officials as saying that they were aware of the "peculiarities" of Budarin's cardiovascular system and that he is healthy enough to do the spacewalk. Until US flight surgeons delayed it, the EVA was scheduled to take place last month.

Pettit, 47, himself was a last-minute fill-in for Don Thomas, KC5FVF, who was pulled from the Expedition 6 crew because flight surgeons worried about his exposure to radiation in space. During the EVA, Bowersox and Pettit will continue outfitting the newly delivered Port One truss segment. Expedition 6 was launched aboard space shuttle Endeavour last November 23. The crew will remain aboard the ISS until March.

The Expedition 6 crew also will be the first to not host any guests--either from Soyuz taxi missions or the space shuttle. Pettit has been filling some of his free time conducting casual QSOs from NA1SS on 2 meters.

==>NEW SAUDISAT GETS OSCAR DESIGNATION

A third satellite in the SaudiSat series has earned an OSCAR designation from AMSAT. SaudiSat-1C now will be known as SO-50. The Amateur Radio payload was successfully placed into orbit December 20 from Russia's Baikonur Cosmodrome by a modified Soviet-era ICBM. The German-made SAFIR-M Amateur Radio payload <http://www.arrl.org/news/stories/2002/12/24/3/#German> went into orbit during the same launch, as part of the RUBIN-2 scientific satellite. SAFIR-M has been designated as AO-49. SaudiSat-1C is a project of the Space Research Institute of the King Abdulaziz City for Science and Technology (KACST) <http://saudisat.kacst.edu.sa/>, an independent scientific organization of the Saudi Arabian government.

"On behalf of AMSAT-NA I wish to congratulate you and your associates at Space Research Institute of KACST on the successful culmination of this project and hope that amateurs all over the world will have an opportunity to use SO-50," said AMSAT-NA Board Chairman Bill Tynan, W3XO, in making the announcement this week.

SaudiSat-1C follows by a little more than two years the launch of SaudiSats 1A and 1B. Now in a 650-km (400 miles) orbit, SaudiSat-1C

carries several experiments, including a new Mode J FM amateur repeater. The downlink frequency is 436.775 MHz. The uplink frequency is 145.850 MHz. A 67.0-Hz CTCSS tone is required for on-demand access to the satellite, which shares the same frequencies as AO-27 and SaudiSat-1A.

Space Research Institute Director Turki Al Saud reports that the SaudiSat-1C repeater was activated and tested this past week. Its receiving antenna is a quarter-wave whip atop the spacecraft. The 250-mW UHF transmitter is coupled to a quarter-wave antenna on the bottom of the spacecraft. He said the repeater will be available to amateurs worldwide as power permits.

AMSAT-NA President Robin Haighton, VE3FRH, has pointed out that SaudiSat-1C will require activation on each pass by a designated control operator. "A worldwide network of designated control operators is now being developed so that radio amateurs may begin using the satellite immediately," he said.

For tracking, the NORAD identifier for two-line Keplerian elements is 27607.

According to a report in Arab News <http://www.arabnews.com/Article.asp?ID=21335>, the new satellite is equipped with capabilities to provide "vital data" concerning weather conditions and oil exploration as well as to monitor the movement of vehicles in remote regions of Saudi Arabia.

Turki Al Saud told AMSAT-NA that SaudiSat-1A (SO-41) recently has been used to conduct some tests and will return to service soon. SO-41 has been configured for FM voice repeater operation. SaudiSat-1B (SO-42) still is being used to conduct some experiments but could be made available for amateur use in the future.--AMSAT News Service; King Abdulaziz City for Science and Technology

==>SOLAR UPDATE

Heliophile Tad "You Might As Well Be Walkin' on the Sun" Cook, K7VVV, Seattle, Washington, reports: After last week's big drop in activity, sunspots are back. The average sunspot number for this week was more than twice what it was last week, and average daily solar flux was up by more than 32 points. Solar flux is expected to rise over the next few days to 190 on Saturday and 195 on Sunday, peaking on Monday around 200. But helioseismic images show no major spots on the sun's far side.

Right now we are inside a weak solar wind, and geomagnetic indices have been quiet since last Friday and Saturday. The planetary A index has been in the single digits, but is expected to rise slightly to 15 on Friday, and then drop back again.

The recent variation in solar activity shows that there is still life in this sunspot cycle, although over time we should expect a downward trend. We have passed the longest night of the year, and this is a good season

for lowband work on 160 and 80 meters, particularly when K and A index values are low. As the days get longer, the higher bands will improve as we head toward the spring equinox.

Sunspot numbers for January 2 through 8 were 74, 108, 117, 128, 141, 199 and 198, with a mean of 137.9. The 10.7-cm flux was 118.3, 137.6, 143, 148.1, 162.1, 163.2 and 173.7, with a mean of 149.4. Estimated planetary A indices were 8, 13, 13, 9, 7, 9 and 7, with a mean of 9.4.

==>IN BRIEF:

* This weekend on the radio: The North American QSO Party (CW), Hunting Lions in the Air, the East Asia 160/80 DX Contest, the Midwinter Contest (CW), the NRAU-Baltic Contest (CW and SSB are separate events), the Midwinter Contest (SSB) and the DARC 10-Meter Contest are the weekend of January 11-12. JUST AHEAD: The North American QSO Party (SSB), the ARRL January VHF Sweepstakes, the LZ Open Contest (CW), the Michigan QRP January CW Contest, and the Hungarian DX Contest are the weekend of January 18-19. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the ARRL Level II Amateur Radio Emergency Communications (EC-002) and Antenna Modeling (EC-004) courses opens Monday, January 13, 12:01 AM Eastern Standard Time (0501 UTC). Registration will remain open through Sunday, January 19. Classes begin Monday, January 20. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to be advised via e-mail in advance of registration opportunities. To be included, send an e-mail to prereg@.... On the subject line, include the course name or number (eg, EC-00#) you'd like to take. In the message body, provide your name and call sign and the month you want to start the course. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@.... [C-CE logo]

* ARRL seeks Repeater Directory listings from coordinators: The deadline for repeater coordinating entities to submit repeater listing information for the 2003 edition of The ARRL Repeater Directory is Friday, February 7. According to League policy, the ARRL only accepts repeater listings from recognized frequency-coordinating bodies. "All information on repeaters intended for The ARRL Repeater Directory must come through a recognized repeater coordinating body," said Brennan Price, N4QX, who compiles and edits the annual publication for the League. "With the exception of the Pacific Insular Territories, the Canadian Territories, and Nunavut, there is currently a coordinator serving all parts of the US and Canada." Price urges repeater owners to provide their coordinators with updated information as soon as possible for inclusion in the 2003 edition. For

more information, contact Brennan Price, N4QX, n4qx@....

* Special event from former WCC to celebrate Marconi centennial: Special event station WA1WCC will be on the air during "Marconi Week," January 11-19, from the former WCC Marconi-RCA-MCI shore station operations center in Chatham, Massachusetts, on Cape Cod. Look for WA1WCC on or about 7.040 and 14.040 MHz on CW and 7.260 and 14.285 MHz SSB. The event, sponsored by the WCC Amateur Radio Association, marks the 100th anniversary of Guglielmo Marconi's first successful wireless transmission between the US and Europe. A message was sent by the Marconi station in Wellfleet, Massachusetts, on January 18, 1903. By 1914, Marconi had built a new safer and more up to date station in nearby Chatham. The former WCC facility will be open to the public from 9 AM until 5 PM Eastern Time. Plans are under way for Marconi's daughter, Princess Elettra Marconi, to visit Chatham January 16. She is scheduled to visit another special event, KM1CC, at the former Eastham Coast Guard station on January 18. At one time, WCC was described as the busiest ship-to-shore station on the US eastern seaboard. The Chatham Marconi Maritime Center is sponsoring a series of educational events for the public during Marconi Week.--Chatham Marconi Maritime Center Inc newsletter

* FCC to hold open commission meeting: The FCC will hold an open meeting Wednesday, January 15, at 9:30 AM in Washington, DC. The Meeting will focus on presentations by senior agency officials regarding implementations of the agency's strategic plan and a comprehensive review of FCC policies and procedures. Presentations will be made in four panels: Panel One consisting of the managing director. Panel Two consisting of the chiefs of the Enforcement and Consumer and Governmental Affairs bureaus. Panel Three consisting of the chiefs of the Office of Engineering and Technology, the Wireless Telecommunications Bureau and the International Bureau. Panel Four consisting of the chiefs of the Wireline Competition and the Media bureaus. The audio portion of the meeting will be broadcast live on the Internet via the FCC's Internet audio broadcast page at <http://www.fcc.gov/realaudio/>.--FCC

* California RACES team responds to gas leak: The Huntington Beach, California, Fire Department called upon the Huntington Beach Radio Amateur Civil Emergency Service (RACES) group <http://www.hbraces.org> December 11 after a natural gas leak occurred. Nine fire companies responded to the alarm. The Huntington Beach RACES team established a controlled net and initiated the RACES incident command system. Twenty RACES members responded to the incident command center at the scene of the leak, to the Huntington Beach emergency operations center and to a care and reception center for displaced residents. Tim Sawyer, WD6AWP, served as net control operator. Huntington Beach RACES Chief Radio Officer Steven Graboff, W6GOS--a physician--responded to the care and reception center and provided cellular, Amateur Radio, American Red Cross and fire department radio communication. RACES communications were utilized exclusively throughout the event, since as the city's cell phone system was not functioning. "Between the RACES communicators and the CERT [Community Emergency Response Team] shelter team, no additional city or Red Cross

personnel were needed, and the incident was handled very well," said Huntington Beach Fire Department Emergency Services Coordinator Glorria Morrison, KE6ATG. "This is an example of how volunteers can be utilized to provide emergency services to the City of Huntington Beach at no cost and no drain to city resources." Other RACES members maintained radio watch on the net and prepared for a 12-hour deployment. Within 90 minutes, the fire department advised RACES that the problem was under control and the emergency was over, and residents were allowed to return to their homes. No injuries were reported. The Huntington Beach Fire Department Emergency Services Office administers the RACES team.

* Maritime Mobile Service Network celebrates 35th anniversary: The Maritime Mobile Serice Network (MMSN) marked its 35th anniversary on January 3. The net now operates on 14.300 MHz. According to Bobby Graves, KB5HAV, the net's original purpose was to assist those serving in the US military during the Vietnam War. In its early years, the MMSN saw a lot of phone patch traffic. "Our primary purpose now is that of handling legal third-party traffic from maritime mobiles, both pleasure and commercial, and overseas deployed military personnel," said Graves, who serves as the nets schedule coordinator and Webmaster. He said the net also helps missionaries in foreign countries. The MMSN has grown from its original nine founding members to nearly 60 net control stations and relief operators. It's recognized by the US Coast Guard and has been instrumental in handling hundreds of incidents involving vessels in distress. During severe weather, the net also acts as a weather beacon for ships and relays weather warnings and bulletins from the National Weather Service and the National Hurricane Center. "The Maritime Mobile Service Network has a legacy of serving people and will continue to do so," Graves said.

* K6ZT elected president of engineering honor society: ARRL Life Member Tom Rothwell, K6ZT, of Los Alamitos, California, has been elected president of Eta Kappa Nu <http://www.hkn.org/>, the national honor society for electrical and computer engineering. Rothwell was elected to membership in 1953 while attending the University of Southern California. He is a retired Hughes Aircraft Company group vice president and division manager. First licensed in early 1947, he spent three years in the US Air Force, much of it in postwar Japan, where he held the call signs J5AAL, J2AAL and JA3AA. (He won the CQ World Wide DX CW contest for Japan in 1948 and the ARRL International DX Contest--Phone and CW--for Japan in 1949.) An Extra class licensee, Rothwell still enjoys chasing DX on CW. Founded in 1904, Eta Kappa Nu has some 100,000 members and chapters at more than 200 colleges with accredited curricula in electrical or computer engineering.

998. Result Distribution Ceremony

Yahoo group: m_a_r_s
Date: 2003-01-13 13:46:38 UTC
From: Mehul Chovatia
Topic: 998 Message: 998

Hi All hard worked comrades,

To felicitate and celebrate the results of the classes, MARS has organised Result Distribution Ceremony for the students.

MARS invites all the students to be present at the event and collect your results along with your ID Cards, Caps and so on.

Where and When

S.S.Hall. Garware Club House.
Wankhede Stadium, 'D' Road,
Churchgate, Mumbai - 20
Time: 4 to 7 pm.

More information will be posted on the mail soon.... and make it a point to attend the ceremony.

Please courier your latest photograph to the following address to be affixed on your ID Cards. All the students irrespective of passing grade will be issued ID Cards. Failed students also need to send their photographs.

Mehul Chovatia
Karnataka House, 2nd Floor,
Dadi Santuk Lane, Chira Bazar,
Mumbai - 400002. Ph: 22065383

Guidelines and next-steps shall also be in the air for people who have failed or have passed in Grade II or restricted category.

All the best.

73s,

Mehul Chovatia.
Event Manager - MARS.

dear hunters and team leaders here are the telephone numbers of all the students and participants.
please do call all your team members and coordinate with them for the transport arrangements

please note all team leaders who do not have vhf radios direction finding antennas and attenuators and vhf rubber ducky antennas for the fox hunt . we MARS are arranging in giving you the vhf radios direction finding antennas and attenuators and vhf rubber ducky antennas for use during the fox hunt event only.

read carefully you as a team leader are totally and fully responsible for it through out the day (19th jan 2003).
any loss or damage of the vhf handies and vhf antenna you will have to pay for it .

please note all hunters are suppose to carry :-

= amateur radio license (valid)
= W.P.C permission for conducting fox hunt
= letter from the society for the event
= driving license
= car documents and all vehicle papers required
= insurance in case of death by been shot by another hunter
= caps and ample drinking water
= MARS id cards
= appitite to digest at breakfast - bun butter , cream roll , xmas plum cake and frooti , and lunch veg biryani and raita with fortune cookies
= please all those who have not paid participation fees come forward and pay me with out me asking .for rs 100/-
= please avoid mobile phones
=

please\\\\\\ open mail once again in the day for any more info on the event

please call me on 9821025289 or nilesh 9820547074 for any inquiry on the event

thank you zyros

The ARRL Letter
Vol. 22, No. 03
January 17, 2003
***************

IN THIS EDITION:

* +High-speed hamming via the "Hinternet" could be next big thing
* +2002 a banner year for ARRL contests
* +Astronaut brightens kids' day at Montana school
* +New ARRL brochure targets youngsters
* +Nominations invited for ARRL awards
* +Amateur Radio emergency communications training on target
* +Comments sought on draft WRC-03 proposals
* FCC launches "express" comment-filing system
* Solar Update
* IN BRIEF:
This weekend on the radio
ARRL Certification and Continuing Education course registration
ARRL Foundation scholarship deadline looms
Second Ducie DXpedition set for March
Poptronics ceases publication

+Available on ARRL Audio News

============================================================

==>HIGH SPEED MULTIMEDIA HAMMING COULD BE THE NEXT BIG THING

High-speed multimedia hamming via the "Hinternet" could be the next big
thing for Amateur Radio. That's the hope of the ARRL High Speed Multimedia
(HSMM) Working Group, which is adapting the highly popular IEEE 802.11b
Part 15 wireless Internet protocol to Part 97 amateur operating.

"We expect it to be nothing less than revolutionary!" says John Champa,
K8OCL, who chairs the ARRL HSMM Working Group--a subset of the League's
Technology Task Force. The Working Group's new "High-Speed Digital
Networks and Multimedia" page <http://www.arrl.org/hsmm/> recently
premiered on the ARRL Web site.

Champa's team is calling the specific techniques, software and hardware
involved "the ARRL 802.11b protocol" to distinguish it from the
unlicensed, commercial protocol. Systems employ direct-sequence spread
spectrum techniques and operate in the 2.4 GHz range. The term "Hinternet"
(ham + Internet), Champa says, is a user-friendly way to refer to the
development of high-speed Radio Local Area Networks (RLANs) capable of
```

simultaneously carrying audio, video and data signals.

"The development of the ARRL 802.11b protocol will significantly enhance Amateur Radio, especially with respect to emergency communication and support of public service activities," Champa predicted. He and his HSMM Working Group colleagues also expect that it will attract many technically oriented users of the Internet and wireless LANs to get their amateur tickets.

In addition to emergency communication, Hinternet applications could include two-way streaming video, full-duplex streaming audio, Voice over Internet Protocol (VoIP) applications such as eQSO, EchoLink, iLink and IRLP, and digital voice. As on the wired Internet, communication can be point-to-point, point-to-multipoint and multicast at high bandwidth.

"An emergency volunteer equipped with a laptop or a wireless PDA (personal digital assistant) with a microphone and a small video camera now has the tools to be a mobile set of eyes and ears in the midst of a communications emergency," says Working Group member Kris Mraz, N5KM.

In Michigan, the Livingston County HSMM Experimenters Team already has three HSMM access points--called "APs" in the commercial world--and about a dozen stations on the air centered on 2437 MHz. Another group of Amateur Radio 802.11b enthusiasts has recently organized in the San Antonio, Texas, area.

Although other amateur allocations also would be appropriate for Hinternet operation, the use of 2.4 GHz was an easy choice, since Part 15 WiFi (wireless fidelity) devices already operate in that part of the spectrum, and inexpensive commercial equipment is widely available. Acting on an ARRL petition, the FCC has proposed elevating amateurs to primary at 2400 to 2402 MHz.

The ARRL publications catalog now includes the book 802.11 Wireless Networks: The Definitive Guide <http://www.arrl.org/catalog/?category=&words=802.11> by Matthew S. Gast. The book covers the topics of creating and administering wireless networks.

Champa says that taken in a nationwide context, the meaning of the term Hinternet goes deeper than just an amalgamation of words. "In nautical terms the word hinterland is 'the land beyond the coast,'" he said. "And so it is with us. 'The Hinternet' is the radio net beyond the Internet."

==>2002 A GROWTH YEAR FOR ARRL CONTESTS

The year 2002 was a banner year for ARRL's Contesting Branch. Manager Dan Henderson, N1ND, reports a record number of total entries for ARRL-sponsored operating events.

"The total of 18,817 beats 2001's 18,505, a nearly 1.7 percent increase!" Henderson said. Despite the downward slope of Cycle 23, the 2002 ARRL 10-Meter Contest saw a more than 18 percent jump in log submissions over

the previous year, he added, even as logs continued to arrive.

"Activity is up across the board for almost all contests, and I think we would have seen more than 19,000 logs returned," Henderson said, "but the World Radiosport Team Championships (WRTC 2002) in Finland last July affected numbers for the IARU HF World Championships, as several hundred of the world's top contest operators were there." Henderson notes that since WRTC 2002 used slightly different rules, the logs from those operators could not be entered in the IARU event, which ARRL administers.

The 2002 ARRL 10-Meter Contest, proved to be record-setter in several ways. According to Henderson, not only was the December 14-15, 2002, operating event the most active 10-meter contest on record, it had the single highest number of participants returning logs of any single contest in League history. As of January 16, the Contest Branch had logged 3051 entries and was still counting. "That's the very first time a single-weekend ARRL contest has topped the 3000 mark in entries," Henderson said.

Other ARRL operating events that also saw increased numbers of logs over 2001 were Straight Key Night, up 22 percent; the ARRL 160-Meter Contest--a CW event--up 19 percent; the ARRL 10 GHz and Up Contest, up 11 percent; and ARRL Field Day, up by one-half of one percent. For the first time ever, the 160-meter event topped 900 entries.

ARRL November Sweepstakes entries jumped between two and three percent for the CW and SSB weekends in 2002, Henderson said. Entries received for the ARRL international DX Contest remained approximately level for each mode last year as did submissions for the ARRL's four major VHF-UHF-SHF events in 2002.

Henderson said the move to require Cabrillo-format electronic logs has proved a major boon to the Contest Branch. The elimination of most manual log entry has moved up the posting of contest results by about a month, he said. He said he expected the Contest Branch would be fine tuning electronic log-processing during 2003.

Rules for all ARRL-sponsored operating events are available on the ARRL Web site <http://www.arrl.org/contests/calendar.html>.

==>MONTANA ARISS CONTACT "A GRAND SUCCESS"

Youngsters at Sacajawea Middle School in Bozeman, Montana, conversed via ham radio on January 8 with International Space Station resident Don Pettit, KD5MDT. The contact between NA1SS and the school club station's K7BZN was the first Amateur Radio on the International Space Station (ARISS) QSO this year with a US school.

"I am happy to say that it was a grand success," said Vivian Linden, K7CUB, a retired science teacher who continues to serve as advisor to the school's Amateur Radio club. "The contact was crystal clear, the kids did a great job with their questions, and the adult ham club--the Gallatin Ham

Radio Club--put it all together."

Some young radio amateurs were among the student questioners. Arianna Haines, KD7RHA, wanted to know if Pettit had any radio experience before becoming an astronaut and if it influenced his decision to become one. Pettit explained that he became a ham only after joining the astronaut corps.

Jeff Nickelson, KD7TQL, asked Pettit how he was chosen to be an ISS crew member. "You get chosen for the ISS program partly based on interest and partly based on who they happen to need for the mission involved," Pettit replied. "So they look at background, and they look at interest."

Nickelson later expressed a desire to become an astronaut and asked Pettit's advice on what he should do now. "What you need to do is to follow what you want to do in your heart," Pettit responded. He also advised the youngsters to do their best in school and to keep up their grades.

Food is never far from the minds of most youngsters, and so it was with the kids at Sacajawea Middle School. One student wanted to know how the crew ate and how the food was cooked. Pettit explained that it's not that much different from pre-packaged food on Earth. "We eat with spoons, just like you eat with spoons on Earth," said Pettit. Most of the crew's food is freeze-dried. You add hot water and mix, then "just dig in with your spoon," Pettit said.

Pettit also told the youngsters that the crew doesn't have too much time for "fun" activities. "There's really not much spare time up here," he said. "We're always working." But, he added, the crew does get enjoyment out of the work it does, which sometimes includes just observing Earth through one of the ISS portholes.

Some 50 youngsters, teachers and a handful of reporters were on hand for the contact. Linden said audio was piped throughout the school. "I was told later that the school was in a buzz the rest of the day," she said. Students from Morning Star Elementary School also attended.

ARISS is an international project with support from ARRL, NASA and AMSAT. For more information, visit the ARISS Web site <http://ariss.gsfc.nasa.gov>.

==>NEW LEAGUE BROCHURE TARGETS KIDS

A colorful, new, kid-tested ham radio brochure is available from ARRL Headquarters. "Leap into Amateur Radio" aims at an elementary school audience and introduces youngsters to the hobby.

"Amateur Radio is an exciting hobby that lets you meet new people of all ages--and have a great time!" the full-color, tri-fold flier emphasizes. "Getting started is easy!"

Field and Educational Support Team Leader Mary Lau, N1VH, headed the team that produced the flier. She cited two objectives in its design. "There was a desire to specifically target 8 to 11 year olds," she said, "as well as the need to supply a youth-oriented handout to replace the Archie's Ham Radio Adventure comic book that is no longer published."

The brochure is comprised of colorful graphics, photos of kids operating and several boxes of basic text explaining what Amateur Radio is and does. There's also space on the back for local clubs or organizations to affix their contact information, so that children and their families can get more information about the hobby. The back panel also includes a blurb about ARRL and gives its e-mail address.

On the "What is Amateur Radio" page right inside the tri-fold brochure is a brief explanation of what Amateur Radio is. "Anyone can be a ham--no matter what age, sex or physical ability," the flier points out. Accompanying the text are photos of youngsters--a boy and a girl--on the air. Fully open, the flier presents four capsules of information about Amateur Radio:

* How ham radio and wireless technologies fit into lives that include cell phones and the Internet.

* The several modes hams use to communicate with each other--including voice, computer, and even telegraph key.

* The various types of operating activities available--including public service and the Amateur Radio on the International Space Station (ARISS) program.

* How simple it is to get started in Amateur Radio and whom to contact.

Assisting the in the project were ARRL Educational Program Coordinator Jean Wolfgang, WB3IOS; Educational Correspondent Marjorie Bourgoin, KB1DCO, and Field and Educational Services Assistant Linda Mullally, KB1HSV.

After assembling the material for the flier and putting together a prototype, Lau and her staff got the brochure into the hands of a number of area youngsters for some product testing. The children offered a few ideas to make the handout even more appealing, she said. Arizona-based graphic artist Cameo Hill did the final layout and design.

"Leap into Amateur Radio" will become available in mid-February--free of charge and in limited quantities of up to 25 fliers--to any Amateur Radio operator or amateur club. Lau said the only cost will be for shipping. The brochure is now available as an Acrobat PDF file via the ARRL Web site <http://www.arrl.org/FandES/ead/materials/Leap-into-AR.pdf>.

To order copies of the brochure, interested clubs or individuals should contact Linda Mullally, KB1HSV, lmullally@...; 860-594-0292.

==>ARRL INSTRUCTOR, EDUCATOR, RECRUITING AWARD NOMINATION DEADLINE LOOMS

Nominations close Friday, January 31, for ARRL awards that recognize excellence in teaching Amateur Radio classes, using Amateur Radio in the classroom, and recruiting others to Amateur Radio. Completed nominations forms must be sent to your ARRL Section Manager <http://www.arrl.org/FandES/field/org/smlist.html> in time for the SM to meet the nomination deadline.

The ARRL Herb S. Brier Instructor of the Year Award goes each year to a volunteer Amateur Radio instructor. The ARRL Professional Educator of the Year Award goes to a professional teacher who has incorporated Amateur Radio into his or her class curriculum. The ARRL Professional Instructor of the Year Award is presented to a paid, non state-certified ham radio instructor--such as those teaching classes offered through adult education programs. The ARRL Excellence in Recruiting Award goes to a ham who exemplifies outstanding recruiting enthusiasm and technique and has gone the extra mile to introduce others to Amateur Radio.

All winners receive engraved plaques and $100 gift certificates redeemable for ARRL publications. Full information and nomination forms are available on the ARRL Educational Awards page <http://www.arrl.org/FandES/ead/award/>. For more information, contact Jean Wolfgang, WB3IOS, jwolfgang@arrl.org.

==>AMATEUR RADIO EMERGENCY COMMUNICATIONS TRAINING ON TARGET

The ARRL's Amateur Radio Emergency Communications training effort is right on target. Emergency Communications Course Manager Dan Miller, K3UFG, says that as of January 17, 661 students had completed the Level I emergency communications on-line course (EC-001) under the Corporation for National and Community Service (CNCS) federal grant. Enrollment for the grant-funded classes stands at 1277.

"We're pleased with the success of the program to date and with how far we've come," Miller said. "We're right where we should be under the federal grant guidelines."

The nearly $182,000 federal grant, announced last July, will subsidize online training for up to 1700 amateur licensees during its first year. The CNCS grant permits students successfully completing the Level I program to be reimbursed for the cost of tuition.

Miller says another 200 students registered this month and will begin classes January 21. "Interest in the on-line classes remains high," Miller said. "Registration for this month's classes filled within the first few hours, leaving many potential students frustrated."

The good news, Miller says, is that there's still plenty of room in future classes to allow interested amateurs to take advantage of the program. Senior hams are encouraged to enroll in these classes.

The ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> has additional information.

==>FCC SEEKS COMMENTS ON WRC-03 DRAFT PROPOSALS

The FCC is seeking comments on draft recommendations that the World Radiocommunication Conference Advisory Committee (WRC-03 Advisory Committee) adopted January 8. The FCC established the WRC-03 Advisory Committee in January 2001 to assist the agency in developing WRC-03 proposals.

"Based upon our initial review of the recommendations forwarded to the Commission," the FCC said this week in a Public Notice, "the International Bureau, in coordination with other Commission Bureaus and Offices, tentatively concludes that we can generally support the proposals recommended by the WRC-03 Advisory Committee."

The FCC said the National Telecommunications and Information Administration (NTIA) has submitted letters to the FCC containing draft proposals developed by Executive Branch agencies, and the FCC requests comment on those draft proposals as well. The FCC will consider the draft proposals and comments during upcoming consultations with the US Department of State and NTIA in the development of US proposals to WRC-03. Once agreed to by these agencies, proposals will be used by US delegations at bilateral, regional and international meetings.

"The draft proposals attached to this Public Notice may evolve as we approach WRC-03 and during the course of interagency discussions," the FCC said. "Therefore, they do not constitute the final national position on these issues."

The Public Notice includes proposals concerning WRC-03 agenda items 1.35, 7.1, 7.2, 2.16, 1.8.2, 1.13, 1.20, 1.22 and 1.36. Agenda item 1.20 concerns the so-called "Little LEOs." Item 1.36 involves examining the adequacy of the frequency allocations for HF broadcasting in the vicinity of 4-10 MHz. Complete texts of draft proposals are available via the FCC's WRC-03 Web site <http://www.fcc.gov/wrc-03>.

Interested parties may file comments via e-mail to wrc03@.... Commenters also may submit an original and one copy of comments to the Office of the Secretary, Federal Communications Commission, 445 12th Street, SW, Washington, DC 20554. Provide a courtesy copy to FCC WRC-03 Director Alex Roytblat, Room 6-A738. Comments should refer to specific proposals by document number. The deadline for comments on draft proposals and NTIA letters is January 31, 2003. WRC-03 takes place in Geneva, Switzerland, from June 9 until July 4, 2003.

==>FCC LAUNCHES "CONSUMER-FRIENDLY" ELECTRONIC COMMENT FILING SYSTEM

The FCC has launched "ECFS Express," an updated electronic system that the Commission says will make it easier for at least some members of the public to file comments on FCC proceedings. ECFS Express is a simplified version of the popular Electronic Comment Filing System (ECFS), but it is not available for all FCC proceedings.

ECFS Express is accessible from the FCC home page <http://www.fcc.gov>. Users just click on the "File Comments" logo--which is on the left-hand side of the page about one-third of the way down under the words "Filing

Public Comments." To comment, users click on a topic, fill in their personal information, write their comments and hit "SEND."

"ECFS Express will highlight the proceedings most likely to generate consumer interest," the FCC said this week in a Public Notice. "The topics will change periodically as new issues emerge."

The downside is that if the particular issue you want to comment upon is not listed among the ECFS Express topics, you'll have to use the "expert version" of ECFS to comment, the FCC said. At the moment, the EFCS Express list includes no Amateur Radio-related petitions. The FCC says the original Electronic Comment Filing System--which includes all docketed FCC proceedings--will remain accessible on its Web site <http://www.fcc.gov/e-file/ecfs.html>.

==>SOLAR UPDATE

Solar-powered Tad "You Are the Sunshine of My Life" Cook, K7VVV, Seattle, Washington, reports: Solar flux and sunspot numbers peaked early in the week and are headed downward again. Average daily solar flux rose to 173.6 this week from 149.4 last, and sunspot number averages went from 137.9 to 200.9. Activity should continue declining, with Friday through Monday values of 140, 135, 135 and 125, reaching a minimum around 115 from January 25-28. Geomagnetic activity for the near term is predicted to be quiet to unsettled.

You can see the general downward trend in activity in the charts on the Web site of Mark Downing, WM7D <http://www.wm7d.net/hamradio/solar/past_cycle.shtml>. There is tremendous variability, but the overall trend is pretty clear. Over the next few years we'll see a dramatic drop. Current projections from NOAA show the minimum solar flux between September 2006 and April, 2007, and sunspot minimum around December 2006 to January 2007.

Sunspot numbers for January 9 through 15 were 206, 199, 238, 232, 182, 176 and 173, with a mean of 200.9. The 10.7-cm flux was 182.9, 184.7, 188.8, 173.4, 171.8, 164 and 149.9, with a mean of 173.6. Estimated planetary A indices were 7, 10, 10, 11, 8, 10 and 8, with a mean of 9.1.

==>IN BRIEF:

* This weekend on the radio: The North American QSO Party (SSB), the ARRL January VHF Sweepstakes, the LZ Open Contest (CW), the Michigan QRP January CW Contest, and the Hungarian DX Contest are the weekend of January 18-19. JUST AHEAD: The CQ 160-Meter Contest (CW), the REF Contest (CW), the BARTG RTTY Sprint and the UBA DX Contest (SSB) are the weekend of January 25-26. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the ARRL Level III Amateur Radio Emergency Communications (EC-003) and HF Digital Communications (EC-005) courses opens Monday, January 20, 12:01 AM Eastern Standard Time (0501 UTC). Registration will remain open through Sunday, January 26. Classes begin Monday, January 27. No seats remain in the January registration period for the ARRL Level II Amateur Radio Emergency Communications (EC-002). Registration for the Antenna Modeling (EC-004) course remains open through Sunday, January 19. A new service now allows those who may be interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to be advised via e-mail in advance of registration opportunities. Send an e-mail to prereg@..., and include the course name or number (eg, EC-00#) on the subject line as well as your name, call sign, email address, and the month you want to start the course in the body. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* ARRL Foundation scholarship deadline looms: The deadline is fast approaching to apply for ARRL Foundation-sponsored scholarships. Individual awards range from $500 to $5000. Don't delay! Send scholarship applications with academic transcripts to The ARRL Foundation, 225 Main St, Newington CT 06111. The February 1, 2003, postmark deadline is firm--there are no exceptions! The annual application window opens October 1 and closes the following February 1. For an application and additional information, visit the ARRL Foundation Scholarship Programs Web site <http://www.arrl.org/arrlf/scholgen.html>.

* Second Ducie DXpedition set for March: The second DXpedition to the newest DXCC entity, Ducie Island, is expected to take place in March, according to an announcement this week. Ducie Island DXpedition leader Yuichi Yoshida, JR2KDN, reports he will depart from Narita, Japan, on March 3 heading for Tahiti, French Polynesia, and then on to Gambier Island. Presumably this is where the vessel Braveheart will meet up with the DXpedition team members. They expect to arrive at Pitcairn Island to pick up the remaining team members on March 5 and then head for Ducie Island. Plans are to begin operations March 8 from VP6DI2 (yes, that's a "2" at the end of that call sign) and continue about a week. The operator list includes Dieter, DJ9ON; Hans, DK9KX; Philippe, FO3BM; Hiro, JA1SLS; Yuichi, JR2KDN; Doug, N6TQS; Dave, VP6DB; Mike, VP6AZ; and Meralda, VP6MW. Activity is being planned for 6 through 160 meters on CW, SSB, RTTY and AO-40. QSL via JR2KDN (bureau or direct). Pilot stations for this DXpedition are JE2EHP, DJ8NK and WA2MOE. The initial Ducie Island DXpedition in March of 2002 racked up some 50,000 contacts. A 2.5-square-mile Pacific atoll, Ducie was approved for DXCC credit in November 2001.--The Daily DX <http://www.dailydx.com>

* Poptronics ceases publication: Poptronics magazine--which evolved from the former Popular Electronics and Electronics Now magazines--ceased publication with the January 2003 edition (Vol 4, No 1). "After 94 years of publishing electronics magazines Gernsback Publications is no longer in

operation," said Larry Steckler, Poptronics' editor in chief and publisher. "Negotiations are under way to provide an alternative publication to Poptronics subscribers." Steckler says a new on-line edition of Poptronics will soon be available. Poptronics Interactive, a separate on-line, paid subscription site announced in the October issue of Poptronics, also is scheduled to return soon, Steckler said. The company plans to post the latest information on its Web site <http://www.Poptronics.com>. The site has been undergoing "remodeling," but Steckler said it should be back in operation by the end of January. Many veteran amateurs may recall the "Carl and Jerry" stories by John T. Frye, W9EGV (SK), which appeared in Popular Electronics in the 1950s and 1960s. The tales involved the ham radio-related exploits of a couple of teenaged hams.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRLWeb Extra <http://www.arrl.org/members-only/extra> offers access to informative features and columns.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ.
To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your

e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

1007. QST - December' 2002

Yahoo group: m_a_r_s
Date: 2003-01-19 16:09:41 UTC
From: Sandip Adiwarekar
Topic: 1007 Message: 1007

Now in the MARS Library!!!

QST - Dec'2002 Contents :-
a.. Build the 'No Excuses' QRP Transceiver - With this simple 40M transmitter-receiver combo, your dream of operating a "build-it-yourself" ham station will finally become a reality. No exotic parts are required - so warm up your soldering iron! - By Dan Metzger, K8JWR......

b.. Digital Dimension - Will D-STAR be the Next Big Star in the Digital Dimension?

ICOM introduced the system at the Dayton Hamvention in May and showed it again at the Digital Communications Conference in September.

D-STAR is a 1.2GHz system for the transmission and reception of digitally modulated voice/data and access to high speed via the Amateur Radio airwaves. ICOM developed the system in collaboration with JARL (Japan Amateur Radio League) and is field-testing the system no. For example, a pair of D-STAR transceivers are with TAPR (Tuscon Amateur Packet Radio) now for on-the-air trials (see www.tapr.org for news about the trials).

ICOM's D-STAR ID-1 digital transceiver digitally modulates voice at 8 kbit/s and data at 128 kbit/s using GMSK (Gaussian Minimum Shift Keying). The ID-1 also supports analog voice using FM. USB and Ethernet connections to a computer permit full operation from the computer's keyboard. In addition to the transceiver, ICOM also designed a 10-GHz 10-Mbit/s digital repeater as an integral part of the D-STAR system (the repeaters handle both digital and analog voice).

D-STAR is off-the-shelf, plug-and-play, high-speed digital mode operation - a combination that has been unavailable to the radio amateur until now. ICOM proffers that "the resulting system seamlessly transmits high-speed IP (Internet Protocol) compliant data and digital voice. Amateur Radio operators now have a system that will allow them to explore he benefits of wireless high-speed integrated digital connections. Potential applications are only limited by your imagination, but certainly emergency services and amateur digital TV quickly come to mind".

That is a lot to absorb, but once you realize that D-STAR just may be the next big thing in the ham digital dimension. How big depends on what applications we develop to take best advantage of the system.

c.. Amateur Radio - A Powerful Voice in Education - Nearly 3500 ARRL members have contributed more than $205,000 to fund the Amateur Radio Education & Technology Program to inspire a new generation of radio amateurs. The goal is to have 300 schools participating in the program by 2006. This is a $1,000,000 multiphase program based on partnership between educators and radio amateurs......

d.. OSCAR 40 on 24 GHz - Most satellite enthusiasts are using OSCAR 40 on Mode U/S - 435 MHz up and 2.4 GHz down. There are a few, however, who are already taking the next step to Mode U/K - 435MHz up and 24 GHz down!......

AO-40 Status - Solar angles were worsening for big bird, so the orientation has been adjusted to provide good illumination for the solar panels and to protect the cameras from being exposed to direct sunlight. For Oscar40 operators this translates to relatively poor squint angles for much of the orbit and reduced passband availability. The good news is that this situation is temporary. We should be back to good conditions by late November.

The next big step for Oscar-40 is to test 3-axis stabilization. At the moment the satellite is stabilized by spinning, which will eliminate spin fading on downlink signals, among other things. The trick is to run the test in such a way that the satellite can return to spin stabilization if the test fails. Only when the command team is certain that the 3-axis system is working properly will they open Oscar-40's wing-like solar panels.

e.. Linked Repeater Systems : The Missing Links - The extensive reach and utility of state and region-wide linked repeater systems is just beginning to be exploited.......

Partial List of Open Linked Repeater System -
Alabama InterCity Network, Alabama
Zia Connection, Arizona
Condor Connection, California
Colorado Connection, Colorado
SouthEast Iowa Technical Society, Iowa
Tall Pine Intertie, Georgia
Independent Repeater Assn, Michigan
MegaLink, New Mexico
SuperLink, North Dakota
South Dakota Linked System, South Dakota
Intermountain Intertie, Utah
Ham Talk, West Virginia
Saskatchewan Link Network
HERC, Wyoming

f.. The Gamma Match - An Overview - The gamma match is used to transform a Yagi Antenna's feedpoint impedance to match that of coaxial cable. How does it do that?.......

g.. The EQ5+ Microphone Equalizer - If you's like to enhance the quality of your transmitted audio without spending a lot for commercial gear, the EQ5+ is designed for you. The project reflects the traditional ham radio approach - build it yourself and don't spend a ton of money!.......

h.. Try Copper for 2 Meter - The Cu Loop - Want a rugged antenna with decent bandwidth for 2 meters? Try this "plumber's delight". This antenna has facilitated operations through many distant FM repeaters with gratifying results, while it was supported on a 20 foot test stand. It has also been used to make both CW and SSB contacts. The radiation pattern possesses a sharp null along a line drawn through the antenna's two sides. This characteristics, together with its small size and robust structure, makes it attractive for direction finding activities, in addition to general station use........

i.. Panel Layout with Microsoft PowerPoint - Labelling headache? Cure it with a common software program........

j.. Public Service - Amateur Radio and Hayman Fire.......

k.. Product Review - Yaesu FT-8900R Quadband FM Transceiver ($449.95),
RadioShack HTX-420 Dual-Band Handheld Transceiver ($269.99)
MFJ-890 DX Beacon Monitor ($99.95)

l.. Software - VHF Propagation Software - BeamFinder for MAC......

m.. Regular Features - Correspondence, Workbench, Hints & Kinks, Technical Correspondence, How's DX?, The World above 50MHz, Old Radio, Amateur Satellites, QRP Power, OP-ED, 75-50 & 25 Years Ago, Special Events, Contest Corral, Strays, Hamfest Calendar, Coming Conventions, ARRL Buyer's Guide.

n.. New Advertisements -
ALINCO - DR-620T - First Amateur Twin Band Mobile to support optional Digital Voice Communication

SCAN-A-MIX BX1 Audio Combiner from B&D

RIGBLASTER PRO - The complete computer interface for your radio - Everything you can possibly do with a computer and a radio.

DSP-4100/2K HF DSP Modem - From HAL Communications Corp. - With its Clover-2000 voice-bandwidth (2KHz) adaptive waveform, delivers high-speed HF radio data communications performance in the worst of signal conditions.

The ARRL Image Communications Handbook ($25.95) - by Dr.Ralph E.Taggart - WB8DQT

The ARRL Handbook - 2003 (80th Edition - Softcover $34.95 - Hardcover $49.95)

1008. Fw: [m_a_r_s] Result Distribution Ceremony

Yahoo group: m_a_r_s
Date: 2003-01-22 13:23:02 UTC
From: Mehul Chovatia
Topic: 1008 Message: 1008

Hi All,

Firstly, let me apologize for missing the date of the ceremony. It is 1st Feb, 2003 - Saturday evening, which makes it very much possible for all of you to attend. For party timers and pubbers south mumbai is THE PLACE.... So you guys can proceed for the same and can get some handy tips from Zyros, Mukesh, myself, etc on the party venues. We have some SWLs who also are serious party timers. They can be of help too...

Coming to business, I have recd photographs from few of SWLs only. Let me repeat that we are going to issue Id Cards for all of you irrespective of pass grade or fail and hence please send your photographs to me on the below mentioned address.

Tips will be given for Grade II/restricted SWLs aspiring to upgrade themselves and also to people who could not pass. Of course the tips for pubs and happening places will also be in the air.... After all its a matter of celebration !!

Detailed agenda of the ceremony will be out soon. But the trailor says that we will be having a highly influential chief guest, brief presentation and some games too.

More information will continue to be mailed and suggestions if any are welcome.

Thnks N Regds,

73s,

Mehul Chovatia.
Event Manager - MARS.

Subject: [m_a_r_s] Result Distribution Ceremony

Hi All hard worked comrades,

To felicitate and celebrate the results of the classes, MARS has organised Result Distribution Ceremony for the students.

MARS invites all the students to be present at the event and collect your results along with your ID Cards, Caps and so on.

Where and When

S.S.Hall. Garware Club House.
Wankhede Stadium, 'D' Road,
Churchgate, Mumbai - 20

Time: 4 to 7 pm.

More information will be posted on the mail soon.... and make it a point to attend the ceremony.

Please courier your latest photograph to the following address to be affixed on your ID Cards. All the students irrespective of passing grade will be issued ID Cards. Failed students also need to send their photographs.

Mehul Chovatia
Karnataka House, 2nd Floor,
Dadi Santuk Lane, Chira Bazar,
Mumbai - 400002. Ph: 22065383

Guidelines and next-steps shall also be in the air for people who have failed or have passed in Grade II or restricted category.

All the best.

73s,

Mehul Chovatia.
Event Manager - MARS.

==========================================================

==>ARRL BOARD DISCUSSES STRATEGIC PLANNING, WRC-03

Establishing a timeline for future strategic planning, increasing ARRL
membership and raising the level of awareness of Amateur Radio issues at
World Radiocommunication Conference 2003 (WRC-03) were the primary topics
as the ARRL Board of Directors met January 17-18 in Connecticut. Chief
Executive Officer David Sumner, K1ZZ, cited a cooperative spirit and said
the session's overall mood was upbeat. As a result of action taken at the
meeting, the Board plans to convene a leadership seminar in July and a
two-day strategic planning retreat in September.

ARRL President Jim Haynie, W5JBP, said strategic planning--especially
aimed at embracing new technologies--is vital for the League's health.
"We're interested in planning for the League on a long-term basis to
ensure that we're on the right track 5 to 10 years from now," he said. "We
have to keep up with emerging technology." Haynie said he's excited with
what the High-Speed Multimedia Working Group <http://www.arrl.org/hsmm/>
and the Digital and Software Defined Radio committees have come up so far.
```

The Board also created a new ad hoc committee, chaired by ARRL International Affairs Vice President Rod Stafford, W6ROD, to focus on recruiting and retaining members. "This committee is for the near term to explore ways to entice people to join the organization," Haynie said. The panel also will look at what the League can do to make the ARRL more attractive to potential members.

The Board also discussed strategy for protecting Amateur Radio's interests at WRC-03 <www.fcc.gov/wrc-03/>, to be held in Geneva from June 9 to July 4. The hottest ham radio topic is 7 MHz and the objective of a worldwide 300 kHz harmonized amateur allocation. Sumner said the immediate need is to get the US Government to support a realignment of allocations for amateurs and broadcasters in ITU Regions 1 and 3. "The National Telecommunications and Information Administration (NTIA, which oversees the federal government's use of radio spectrum) thinks that Region 1 and 3 administrators should take the leadership role on this issue and that we in Region 2 should make no proposal," Sumner said. "We're trying to change that view."

Sumner says the US has a responsibility to represent the interests of amateur licensees whose 40-meter operation is severely impacted by high-power broadcasting stations elsewhere in the world. "The US did so in 1979 and 1992 and should do so again in 2003," he said.

The Board also updated the League's legislative positions for the 108th Congress. ARRL will work for a re-introduction of The Amateur Radio Emergency Communications Consistency Act <http://www.arrl.org/govrelations/hr4720/>. Known last session as HR 4720, the bill deals with deed covenants, conditions and restrictions. Also set to be reintroduced is the Spectrum Protection Act.

In other business, the Board adopted a 2003 budget; resolved to honor the Hospital Disaster Support Communications System <members.aol.com/emcom4hosp/> (HDSCS) of Orange County, California, with the ARRL National Certificate of Merit; and elected Tod Olson, K0TO, and John Kanode, N4MM, as honorary vice presidents.

==>ARRL ANNOUNCES "AMATEUR RADIO TODAY" CD-ROM PRESENTATION

The ARRL soon will make available a new video presentation, Amateur Radio Today, that tells Amateur Radio's public service story to nonhams. Directed by Dave Bell, W6AQ, and narrated by former CBS news anchorman Walter Cronkite, KB2GSD, the presentation runs approximately six minutes.

"We wanted to have something for people to take to nonhams and civic clubs," said ARRL President Jim Haynie, W5JBP. Haynie also anticipates that the CD-ROM production will come in handy during his visits to Capitol Hill. Haynie recently wowed those attending the January ARRL Board meeting by playing--and distributing--draft copies of the disk. A slightly revised, final version is expected to be ready for distribution in early February.

The presentation focuses on Amateur Radio's role in emergency communications. Copyrighted by ARRL, the presentation is intended for personal, noncommercial use as a tool to showcase Amateur Radio in a manner that nonhams can relate to.

"Dozens of radio amateurs helped the police and fire departments and other emergency services maintain communications in New York, Pennsylvania and Washington, DC," narrator Cronkite intones in reference to ham radio's response on September 11, 2001. "Their country asked, and they responded without reservation." Amateur Radio Today also highlights ham radio's part in helping various agencies respond to wildfires in the Western US during 2002 and mentions ham radio in space.

Haynie said he and Bell discussed the project, and Bell agreed to take it on. Alan Kaul, W6RCL, authored the script, and Keith Glispie, WA6TFD, edited the production. Haynie said Bell, Kaul and Glispie donated a lot of their own time and effort in making the the video presentation a reality.

Amateur Radio "really is the best back-up communications system in the world," Cronkite says in his concluding remarks, adding, "and that's the way it is." That phrase was the one Cronkite always used to close out his nightly newscasts during his tenure with CBS.

Individuals may order a copy of the Amateur Radio Today CD-ROM (approximately 70 MB) from the ARRL on-line catalog <https://www.arrl.org/catalog/?item=8861>. Plans are under way to also make Amateur Radio Today available in other video formats if there is sufficient demand. ARRL will make the presentation available for downloading from its Web site as soon as the final version is available. All that's needed to show the presentation to a group is a laptop computer with a CD drive plus a large monitor or a video projector and screen.

Bell, a Hollywood TV producer, is a past chairman of the ARRL Public Relations Committee. Kaul is an NBC Television producer. Bill Pasternak, WA6ITF, of Amateur Radio Newsline also assisted in the presentation's production.

Because of copyright restrictions, Amateur Radio Today may not be broadcast, multicast or cablecast in any manner. Those seeking to distribute copies of Amateur Radio Today must contact ARRL for permission. To request permission, send your name and contact information and a brief description of the intended use to ARRL Editorial and Production Manager, 225 Main St, Newington, CT 06111; permission@....

==>AMATEUR RADIO BOOSTS MARCONI CENTENNIAL COMMEMORATION INTO ORBIT

The magic touch of a princess helped to put Amateur Radio center stage January 18 on Cape Cod, Massachusetts, during events marking the 100th anniversary of the first transatlantic wireless message transmitted by Guglielmo Marconi. For the occasion, Marconi's youngest daughter--Princess Elettra Marconi--launched greetings into space via an Amateur Radio on the International Space Station (ARISS) hookup to ISS crew commander Ken Bowersox, KD5JBP.

"One hundred years ago today, my father, Guglielmo Marconi, sent the first wireless message across the Atlantic Ocean from Cape Cod," Princess Elettra said from a packed auditorium at the Cape Cod National Seashore Salt Pond Visitor Center in Eastham. "In this same spirit of his achievement and also from Cape Cod I send this wireless greeting to you in space. Cordial greetings, good wishes and God bless you"

Replied Bowersox from NA1SS, "It's wonderful to hear your voice across the radio waves. It's amazing how far our societies and radio communication have come in the past 100 years."

On January 18, 1903, Marconi sent wireless greetings on behalf of President Theodore Roosevelt to Great Britain's King Edward VII. Events throughout the week leading up to the ARISS contact included two Amateur Radio special event stations. KM1CC operated from a National Seashore site not far from Marconi's original Cape Cod radio station, transmitting a commemorative message from President George W. Bush and retransmitting Marconi's original 1903 text. Another special event station, WA1WCC, was on the air from the former WCC shore station in Chatham, where Marconi had relocated operations after the ocean threatened to claim the antenna support towers of his original station. Princess Elettra also visited the WA1WCC special event site.

Following Princess Elettra's introductory remarks, eight students from three Cape Cod high schools took turns firing a total of 18 questions at Bowersox as hundreds of visitors and some two dozen news media representatives looked on. Serving as mentor for the noontime Cape Cod contact was ARISS International Chair Frank Bauer, KA3HDO. The students' curiosity ranged from research goals to whether Bowersox had any desire to undertake a trip deeper into space--perhaps to Mars.

Bowersox said his wife has forbidden him to go to Mars--a comment that drew a chuckle from the audience--but said he'd volunteer for a deep-space mission if he could bring his family along.

"I think someday we're going to leave Earth," Bowersox predicted in response to one of the students' questions. "We're going to move on out of our solar system out to the stars, and we're just taking the baby steps now. Your generation will take us a lot farther, I hope."

Handling earth-station duties for the ARISS contact was Nancy Rocheleau, WH6PN, in Honolulu. A WorldCom teleconferencing arrangement made two-way audio available on Cape Cod. Students selected were from Provincetown High School, Cape Cod Technical and Vocational School and Nauset Regional High School.

"The ARISS contact at the Marconi centennial event was a tremendous success," said Bauer. "I must say that this contact was one of the more impressive and awe-inspiring ARISS contacts we have accomplished." ARISS <http://ariss.gsfc.nasa.gov> is an international effort with support from ARRL, NASA and AMSAT.

==>LIMITED "LOGBOOK OF THE WORLD" TESTING IS A HIT

The long-anticipated "Logbook of the World" (LoTW)--the ARRL's secure electronic contact-confirmation system--took a major leap toward public release this month with several weeks of limited--or "alpha"--testing. Dozens of Amateur Radio operators checked out a preliminary version of the LoTW software, which is still under development. Once it's ready, LoTW will provide a means for participants to qualify for awards such as DXCC or WAS without having to first collect hard-copy QSL cards.

"This is cool!" exclaimed one alpha tester. "Slick!" declared another tester. "It's pretty neat so far. This looks like a good start."

ARRL staffer Dave Patton, NT1N, said the limited test run was extremely helpful. "One of the main things that will come out of this phase of testing is a good package that will be ready to give to logging program developers to incorporate into their software," he said.

ARRL Web and Software Development Manager Jon Bloom, KE3Z, explained that the League hopes that logging software vendors will choose to add value to their products by integrating LoTW client-side functions. "But the software we provide to individual amateurs will be sufficient for basic use of LoTW," he added. ARRL will not be releasing the LoTW server code, however.

Linked via e-mail, the LoTW testers spent two weeks registering their call signs, uploading logs and attempting to push the system to extremes. One tester was amazed at its robust nature after he uploaded a complete station log of about 320,000 QSOs. "I sent this blob expecting it to croak the server, but it didn't!" he said.

Logbook of the World Project Leader Wayne Mills, N7NG, says LoTW won't spell the end of QSL cards. Instead, he says, it will provide an avenue for increased speed and accuracy for hams chasing awards, as well as remove some chances for human error that can occur in the traditional process.

"This is really a system to offer credits for awards," said Mills, who is also ARRL's Membership Services manager. Mills said LoTW will minimize opportunities to "game the system" or otherwise cheat--something that's not always possible to detect even with paper QSLs. He emphasized that the League has no plans to do away with accepting traditional QSL cards as it's been doing all along. "We're not replacing the whole paper QSL scheme with Logbook of the World," he said.

Unlike electronic QSLing systems now in use, LoTW is not set up to exchange QSL "cards" via the Internet. The main idea is that ARRL will maintain a secure log database that will be constantly updated by DXers, contesters, DXpeditions and thousands of individual amateurs. Registering and uploading electronic logs cost nothing; the only time a user will incur a charge is when applying accumulated contact credits toward an award.

LoTW beta testing for the general Amateur Radio public is expected to begin soon. The ARRL has not announced a specific inauguration date for

Logbook of the World.

==>G3YWX WINS 2002 BILL ORR, W6SAI, TECHNICAL WRITING AWARD

Ian Poole, G3YWX, is the winner of the 2002 Bill Orr, W6SAI, Technical Writing Award, which is sponsored and administered by the ARRL Foundation. Poole was chosen as the award's first recipient on the basis of his article "Understanding Solar Indices," which appeared in September 2002 QST. The award's namesake, Bill Orr was an engineer, educator and communicator of extraordinary ability and a frequent contributor to QST and other ham radio magazines from the 1940s through the 1980s.

"I was extremely delighted to be told I had won the award, and I feel that it is a great honor, especially as the award is named after such a great name in Amateur Radio," Poole said. "I also feel really privileged to have articles accepted by QST, because the magazine has a tremendous reputation." He will receive an engraved plaque and a check for $250, thanks to a fund established by Steve Cornell, K4AHA.

"Understanding Solar Indices" looks at the three main solar indexes--10.7-cm solar flux, Ap and Kp--and shows how all hams interested in DX can use these numbers to their advantage. Poole's winning article is available on the ARRL Web site <http://www.arrl.org/tis/info/pdf/0209038.pdf>.

QST Editor Steve Ford, WB8IMY, pointed out that the award criteria mandate that the winning article must exemplify the writing philosophy of Orr, who died two years ago. "The article should tell a technical story that appeals to a broad audience extending beyond those individuals who have a particular interest in the topic," Ford said. "In the opinion of the QST editorial department, 'Understanding Solar Indices' was a top choice."

An engineer, Poole has been a ham for more than 30 years and spends much of his time on HF SSB and CW. In addition to having written several books on propagation, VHF antennas and other topics, he has published more than 400 radio and electronics magazine articles. He's a long-time Radio Society of Great Britain (RSGB) member.

==>VIRGINIA AMATEUR GROUP SETS NEW 145 GHz DX RECORD

Four amateurs from the Lynchburg, Virginia, area celebrated the new year January 12 by breaking their own distance record on 145 GHz and by confirming a fifth grid for VUCC <http://www.arrl.org/awards/vucc/> on yet another microwave band. Brian Justin, WA1ZMS; Pete Lascell, W4WWQ; Hal DeVuyst, KA4YNO; and G. P. "Geep" Howell, WA4RTS, spanned a nearly 80-km path to set a new North American and world DX record.

"This claim should be the very first VUCC for that band, and it took two years of hard work to make it happen," said Justin. Both stations exchanged contact information using FSK-CW. All participants are members of the Lynchburg Amateur Radio Club (K4CQ), of which Justin is president. The group already has earned the first-issued VUCC awards on the 47 and 76

GHz bands.

Justin, who designed and built all of the equipment, set up his station in grid square EM96wx in Southwest Virginia. On the other end of the circuit was the W2SZ/4 station, with Howell, Lascell and De Vuyst. W2SZ/4 was at approximately 4000 feet above sea level in Virginia's Bedford County in grid square FM07fm. Lascell said while the team was setting up, he was able to snag a 20-meter contact with KM1CC, the Marconi special event station on Cape Cod. "A neat way to tie the bottom of the spectrum and the beginning of radio to a new frontier 100 years later," he said.

Weather conditions were just right for the QSO to take place with little wind and an extremely low dew point and no haze. Both stations ran about 4 mW of power and used one-foot dish antennas, which must be precisely aimed.

Additional information is available on the Mt Greylock Expeditionary Force Web site <http://www.mgef.org>.

==>BILL LEONARD, W2SKE, PROFESSIONAL MEDIA AWARD WINNERS NAMED

The ARRL 2002 Bill Leonard, W2SKE, Professional Media Award honors a group project. The winners are Assistant News Director Jill Valley and News Director Greg Schieferstein of KPAX-TV in Missoula, Montana. The Leonard award is given annually to a professional journalist (or group) for outstanding coverage of Amateur Radio in TV, radio, print or multimedia. The winners will receive an engraved plaque and a check for $500.

KPAX-TV's winning submission was a news segment featuring Jenna Rettenmayer, KD7MAD, a Missoula high school senior on the air making a moonbounce (EME) contact. Rettenmayer decided to get her Amateur Radio license as her senior project.

Members of the ARRL's Public Relations Committee, who judge the nominations each year, said they were especially impressed with the KPAX-TV piece. Not only did it feature a young woman who is interested in Amateur Radio, it captured a moonbounce contact--a communication mode that's outside the mainstream of typical hamming. The ARRL Board of Directors ratified the PR Committee's decision this week.

In Amateur Radio circles, Bill Leonard is perhaps best remembered for his 1958 contribution to Sports Illustrated, "The Battle of the Hams," which describes the "sport of DXing." In November of 1996, Leonard was inducted into the Broadcasting and Cable Hall of Fame. Leonard died in 1994.

Nominations are now being accepted for the 2003 Professional Media Award. For more information, including rules for entry and nomination forms, contact ARRL Media Relations Manager Jennifer Hagy, jhagy@arrl.org; 860-594-0328.

==>SOLAR UPDATE

Solar seer Tad "That Lucky Ol' Sun" Cook, K7VVV, Seattle, Washington, reports: Daily sunspot numbers and solar flux were down again this week. Average daily sunspot numbers for the week were down by more than 43 points, and average daily solar flux dropped by more than 37 points. Current geomagnetic conditions are unsettled to active, with planetary A index for the past four days of the reporting period (through January 22) at 16, 17, 17 and 17. On Thursday it rose to 19, and it should stay unsettled for a few more days. Planetary A index for Friday through Monday is predicted at 20, 15, 20 and 15.

Solar flux should decline for a few more days. Flux values predicted for Friday through Monday are 135, 130, 125 and 125. Sunday and Monday should have the minimum solar flux, and sunspot numbers for the near term then are expected to rise to a short-term peak around February 6 or 7.

Sunspot numbers for January 16 through 22 were 135, 150, 148, 168, 184, 167 and 152, with a mean of 157.7. The 10.7-cm flux was 144.6, 141.7, 137.4, 130.2, 138, 133.6 and 129.5, with a mean of 136.4. Estimated planetary A indices were 7, 8, 12, 16, 17, 17 and 17, with a mean of 13.4.

==>IN BRIEF:

* This weekend on the radio: The CQ 160-Meter Contest (CW), the REF Contest (CW), the BARTG RTTY Sprint and the UBA DX Contest (SSB) are the weekend of January 25-26. JUST AHEAD: The North American Sprint (SSB), the 10-10 International Winter Contest (SSB), the Delaware and Minnesota QSO parties, the FYBO Winter QRP Field Day and the Mexico RTTY International Contest are the weekend of February 1-2. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the first class in Radio Frequency Interference (EC-006) <http://www.arrl.org/news/stories/2002/11/26/2/> and for the Satellite Communications (EC-007) course opens Monday, January 27, 12:01 AM Eastern Standard Time (0501 UTC). Registration will remain open through Sunday, February 2. Classes begin Monday, February 3. Registration for the ARRL Level III Amateur Radio Emergency Communications (EC-003) and HF Digital Communications (EC-005) courses remains open through Sunday, January 26. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course to be advised via e-mail in advance of registration opportunities. Send an e-mail to prereg@arrl.org. On the subject line of your message, include the course name or number (eg, EC-00#) in which you're interested. In the message body, include your name, call sign, e-mail address and the month you want to start the course. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* FCC says power line communications technology shows promise: According to an Associated Press report, the FCC's Office of Engineering and Technology has found that power line communications (PLC), which can enable high-speed Internet access over electric power lines, shows promise. The OET has said that PLC is "beginning to look like a viable alternative to cable and DSL connections to the Internet," AP reported. At present, no regulations prevent the use of electric power lines to provide Internet connections. The FCC wants to ensure that the technology does not cause interference problems with other services, however. Some PLC devices use digital signals that occupy spectrum into the upper HF range. These signals can be radiated efficiently by some electrical wiring, so there can be a significant potential impact on Amateur Radio. ARRL Lab Supervisor Ed Hare, W1RFI, chairs an IEEE C63 "RFI" ad hoc working group on the topic. "The problem with PLC is that if a company wants to supply Internet service via PLC, it's going to happen at HF, and it will radiate," Hare said. Last fall, the International Amateur Radio Union (IARU) Administrative Council noted the growing use of PLC for high-speed data and expressed concerns that PLC radiation could interfere with Amateur Radio reception. As a result of strong opposition from the Japan Amateur Radio League (JARL), Japan's government said last summer that it was too soon to allow PLC devices in that country between 2 MHz and 30 MHz, due to its interference potential to other HF users. AP says two utilities, PPL of Allentown, Pennsylvania, and Ameren of St Louis, Missouri, are working with consumers to test Internet access over power lines. PLC devices use overhead power lines and/or residential electrical wiring to communicate digital signals--for networking within a home or to provide Internet services to entire neighborhoods.

* President Haynie to visit Tropical Hamboree: ARRL President Jim Haynie, W5JBP, will head the contingent of ARRL officers and staffers heading south to sunny Florida February 1-2 for the 43rd annual Tropical Hamboree in Miami. Haynie will hold an Amateur Radio forum at the event, held in conjunction with the ARRL Florida State Convention. ARRL International Affairs Vice President Rod Stafford, W6ROD, will be on hand to discuss ham radio on the international level--including this summer's World Radiocommunication Conference (WRC-03). RFI will be a hot topic as well. ARRL Lab staffer Mike Gruber, W1MG, will talk to Hamboree attendees about the causes and cures of RFI. ARRL DXCC Manager Bill Moore, NC1L, will attend the South Florida DX Association forum and be available for questions. Sponsored by the Dade Radio Club of Miami, the Hamboree is one of the largest regional Amateur Radio gatherings in North America. It kicks off Saturday, February 1 at 9 AM at the Fair-Expo Center in Miami and continues through the next day. Complete information is available on the Hamboree Web site <http://www.hamboree.org>, which also has contact information for Spanish-speaking attendees.

* Contributing editor needed: The ARRL seeks a contributing editor with a strong interest in and dedication to Amateur Radio and youth to produce a monthly Web-based column on that topic consisting of text and photographs. The individual selected will be compensated on a per-column basis. Candidates should hold an Amateur Radio license, be active on the air and be familiar with ham radio activities, programs and projects that appeal

to youthful amateurs or prospective amateurs. The preferred individual is a younger amateur who possesses PC word processing skills, demonstrates a flair for written expression, understands grammar and style requirements and can regularly meet monthly deadlines. Contact Rick Lindquist, N1RL, n1rl@...; 860-594-0222, for additional information.

* Official WRTC 2002 video now available: The official video of World Radiosport Team Championship 2002 (WRTC 2002) held in Finland now is available in DVD and VHS formats. Three camera crews covered as many teams and events as they could during the actual 24 hour competition. An ESPN announcer narrates the video, which is said to have been produced from "a sports perspective." Running time is 60 minutes. Information on how to obtain a copy is available on the DX & Contest Videos by 9V1YC Web site <http://home1.pacific.net.sg/~jamesb/>.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRLWeb Extra <http://www.arrl.org/members-only/extra> offers access to informative features and columns.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ.
To subscribe, unsubscribe or change your address for e-mail delivery: ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your

e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

1014. Fw: [m_a_r_s] Result Distribution Ceremony - No charges/damages

Yahoo group: m_a_r_s
Date: 2003-01-26 09:18:13 UTC
From: Mehul Chovatia
Topic: 1014 Message: 1014

Hi All,

Further to our earlier communication, please note that there are no damages/charges for this event. But please confirm your presence by mail or phone to enable us to do the logistics smoothly. In case you can not make it then please let us know.

Also note that since we have a upper limit on the capacity of the Hall, only members and SWLs are invited. Please bear with us for not being able to include non-member spouses and children.

This formal function will have to be well-timed and to be attended with punctuality as we need to hand over the hall back by 7.15 pm latest.

Once again requesting all the SWLs to send their photos. All SWLs who have sent their photos, can ignore this line.

Thnks,

Mehul Chovatia.
Event Manager - MARS.

Subject: Fw: [m_a_r_s] Result Distribution Ceremony

Hi All,

Firstly, let me apologize for missing the date of the ceremony. It is 1st Feb, 2003 - Saturday evening, which makes it very much possible for all of you to attend. For party timers and pubbers south mumbai is THE PLACE.... So you guys can proceed for the same and can get some handy tips from Zyros, Mukesh, myself, etc on the party venues. We have some SWLs who also are serious party timers. They can be of help too...

Coming to business, I have recd photographs from few of SWLs only. Let me repeat that we are going to issue Id Cards for all of you irrespective of pass grade or fail and hence please send your photographs to me on the below mentioned address.

Tips will be given for Grade II/restricted SWLs aspiring to upgrade themselves and also to people who could not pass. Of course the tips for pubs and happening places will also be in the air.... After all its a matter of celebration !!

Detailed agenda of the ceremony will be out soon. But the trailor says that we will be having a highly influential chief guest, brief presentation and some games too.

More information will continue to be mailed and suggestions if any are welcome.

Thnks N Regds,

73s,

Mehul Chovatia.
Event Manager - MARS.

Subject: [m_a_r_s] Result Distribution Ceremony

Hi All hard worked comrades,

To felicitate and celebrate the results of the classes, MARS has organised Result Distribution Ceremony for the students.

MARS invites all the students to be present at the event and collect your results along with your ID Cards, Caps and so on.

Where and When

S.S.Hall. Garware Club House.
Wankhede Stadium, 'D' Road,
Churchgate, Mumbai - 20
Time: 4 to 7 pm.

More information will be posted on the mail soon.... and make it a point to attend the ceremony.

Please courier your latest photograph to the following address to be affixed on your ID Cards. All the students irrespective of passing grade will be issued ID Cards. Failed students also need to send their photographs.

Mehul Chovatia
Karnataka House, 2nd Floor,
Dadi Santuk Lane, Chira Bazar,
Mumbai - 400002. Ph: 22065383

Guidelines and next-steps shall also be in the air for people who have failed or have passed in Grade II or restricted category.

All the best.

73s,

Mehul Chovatia.

==>ARRL EXPRESSES MIXED FEELINGS ON SPECTRUM POLICY TASK FORCE REPORT

The ARRL has registered some mixed feelings about the FCC's Spectrum
Policy Task Force Report issued late last November. In comments to the FCC
this week, the League called the report "a positive first step" in
developing a comprehensive national spectrum management approach. At the
same time, the ARRL said, the SPTF Report "fails to address the needs and
goals" of the Amateur Service and urged the FCC to not abandon
longstanding allocation policies based on engineering.

"Overall, ARRL asks that the Commission not adopt the SPTF Report in toto,
but rather use it as a basis for future planning on an ongoing basis," the
League said January 27 in its comments in ET Docket 02-135. "Spectrum
policy reform should be viewed as an ongoing process, not as a wholesale
paradigm shift to be accomplished in half a year." The ARRL said the
report's orientation toward commercial services makes it not wholly
applicable to the Amateur Service. Among other factors, the League said,
```

services such as public safety and Amateur Radio cannot pay for spectrum access.

Cautioning the FCC to not continue an apparent "rush to judgment," the ARRL said there's not been enough time to study the report's recommendations thoroughly, much less deploy them immediately. The League also warned against basing allocation policy on anticipated advances in technology.

The ARRL again called on the FCC to consider greater use of "negotiated rulemaking" to expedite allocation decisions. "Instead of acting as the judge and jury, the Commission could act as more of a facilitator among competitors for spectrum," the League said.

In terms of sharing schemes, the ARRL said it supports "to a limited extent" the concept of "interference temperature" calculations and measurements. But, it pointed to the 2400-2450 MHz band as "an example of a failing attempt at inter-service sharing" that some predictive calculations might have alleviated. The ARRL said the explosion of Part 15 devices coupled with relaxed rules on power, antenna gain and duty cycles of high-powered unlicensed devices "has rendered the band unusable in some areas."

Once again asserting that the FCC "has pushed the Part 15 concept beyond the point that it works," the ARRL took advantage of the comment opportunity to again express its view that unlicensed devices "cannot be authorized by the Commission under current statutes" without first determining that they do not pose a significant interference potential to licensed radio services.

The ARRL's comments on the FCC's Spectrum Policy Task Force Report in ET Docket 02-135 are available on the ARRL Web site <http://www.arrl.org/announce/regulatory/et02-135/arrl-comments.html>. The report itself is available from the FCC Web site <http://www.fcc.gov/Daily_Releases/Daily_Business/2002/db1115/DOC-228542A1.doc>

==>$1 MILLION GIFT FUNDS NEW SCHOLARSHIP

The ARRL Foundation <http://www.arrl.org/arrlf/> has announced the Goldfarb Memorial Scholarship, a full, four-year undergraduate scholarship that will go to a meritorious young Amateur Radio operator about to graduate from high school. The new award is the result of a generous endowment from the late William Goldfarb, N2ITP.

ARRL Foundation Secretary Mary Lau, N1VH, said the Goldfarb scholarship marks the first Foundation scholarship that funds a complete undergraduate education. Before his death in 1997, Goldfarb set up a scholarship endowment of close to $1 million in memory of his parents, Albert and Dorothy Goldfarb, Lau explained.

Each year, to the extent of the funds available, the Foundation will select a deserving young Amateur Radio operator to receive a "full ride" for his or her undergraduate studies at an accredited baccalaureate degree-granting institution. The successful applicant must major in computers, engineering, the sciences, medical/nursing or a business-related area. Also, financial need must be demonstrated via submission of a copy of the applicant's Free Application for Federal Student Aid (FAFSA) <http://www.fafsa.ed.gov/>. The grant will cover all conventional educational expenses--including tuition, room and board and textbooks.

A close friend of Goldfarb's--Richard Goldstein--characterized Goldfarb as "a wonderful person" who was genuinely interested in other people. "He placed a high value on education, and he saw this scholarship as a way to perpetuate the memory of his parents," he said. Goldfarb grew up in Brooklyn, and his parents died while he was a teenager. After a stint in the US Air Force, he worked for the New York City Department of Finance.

An on-line application for the Goldfarb Memorial Scholarship is available on the ARRL Web site <http://www.arrl.org/arrlf/Goldappl.html>. The application deadline for the 2003 Goldfarb Scholarship is March 15. For additional information, contact Mary Lau, N1VH, n1vh@....

==>"HYBRID" AMATEUR RADIO EMERGENCY COMMUNICATIONS CLASSES BEST OF ALL WORLDS

You've heard of hybrid tomatoes and hybrid ham radios. Now, some "hybrid" ARRL Level I Amateur Radio emergency communications (EC-001) classes offer a mix of on-line and on-campus instruction.

"This marriage of teaching has been absolutely perfect," said ARRL Emergency Communications Course Manager Dan Miller, K3UFG. "Previously, these classes were either all on-line or anything but on-line. The implementation of hybrid classes offers the best of all available worlds."

Miller says each Level I hybrid course is a little different, as instructors take advantage of their particular strengths, access to varying materials and local interests.

Since the Corporation for National and Community Service (CNCS) grant-sponsored Amateur Radio emergency communications classes began last September, 1277 students have signed up for the Level I course. To date, 723 have graduated and been reimbursed for their tuition. Miller hopes the hybrid classes will help to boost graduation rates.

Under the first year of the nearly $182,000 CNCS grant, students can be reimbursed for the $45 registration fee after they successfully complete the course. "When each student has a financial stake in completing the course, each dollar of the grant will have maximum impact," Miller explained.

The ARRL is strongly encouraging older amateurs to take advantage of the emergency communications training since they're a target of the CNCS

grant. "Senior hams bring a wide variety of experience and knowledge to the program," Miller said. "When they become active participants, they add more insight which then yields a better learning experience."

Miller said successful implementation of the grant-funded training program already has had some positive effects, including an increased awareness of Amateur Radio as a resource by government; the formation of new ARES/RACES groups; stronger ties between existing amateur emergency communication groups and local emergency operations centers; and an influx of new hams to emergency communication teams.

To learn more about the Amateur Radio emergency communications courses and other ARRL Certification and Continuing Education classes, visit the C-CE Course Listing Web page <http://www.arrl.org/cce/courses.html>.

==>WISCONSIN UTILITY MAKES AWARD TO ARES/RACES GROUPS

We Energies, a Wisconsin gas and electric utility, has given ARES/RACES organizations <http://wi-aresraces.org> in 17 Wisconsin counties a total of $39,000 to enhance their emergency communication capabilities. A ceremonial check presentation was held January 21.

"We are excited about this timely award, which will bring needed equipment to several of our counties," said Wisconsin Section Emergency Coordinator Dr Stan Kaplan, WB9RQR, who also serves as RACES Chief Radio Officer in the Badger State. "We thank We Energies for their forethought and generosity."

Kaplan said the grant would help to build an effective statewide packet network for use during emergencies. He also said he hopes the idea will "snowball" and inspire other companies to follow suit.

Last November, PA Consulting Group--the energy industry's largest management consulting firm--honored We Energies by presenting the ReliabilityOne Award for superior electric system reliability in the Midwest during 2001.

"In planning how we wanted to celebrate this award, including what we could give to our employees as recognition, we decided that we could put these dollars to better use," said Charles Cole, We senior vice president of distribution operations. "We are proud that we were able to take this award, take it one step further, and share it with a worthwhile organization such as ARES."

EC Resources, a 501(c)3 group established 10 years to fund Outagamie County ARES, will accept the donation from We, solicit written requests from each county's EC for equipment and disburse the funds to buy the needed gear.

Counties picked to receive funds were those with at least 5000 We customers, and funds were apportioned according to the number of customers it serves in county. The top grant of $9000 went to Milwaukee County, while Waukesha County got $6000 and Racine County $3000. ARES/RACES

organizations in 14 other Wisconsin counties plus one We-served county in Michigan got $1500 each.

==>FCC WARNS UNLICENSED OPS, RESCINDS REPEATER'S AUTOMATIC CONTROL AUTHORITY

The FCC has sent warning notices to 10 individuals--eight of them Amateur Radio licensees--for operating without a license in the 11-meter band. All but one of the operators live in the Greater New York City area.

"Such operation will subject you to fine or imprisonment, as well as an in rem seizure of radio transmitting equipment, in cooperation with the United States Attorney for your jurisdiction," FCC Special Counsel Riley Hollingsworth wrote January 15. He cited "monitoring information before the Commission" indicating that the individuals were transmitting on 26.540 and/or 26.555 MHz, frequencies allocated for government use. Fines for unlicensed operation can run as high as $10,000.

In other enforcement actions, the FCC rescinded the automatic control authority of a repeater operated by Daniel Granda, KA6VHC, of Whittier, California. The action means a control operator must be present at all times at the control point of the KA6VHC repeater. FCC Los Angeles District Director Catherine Deaton wrote Granda January 13 to say the action was being taken because Granda's repeater was under review by the Enforcement Bureau for apparent violations of the FCC's rules. Alleged violations include obscene and indecent communications, inadequate station control and deliberate interference.

Deaton told Granda that--under threat of fines and revocation proceedings--he may not operate his repeater under automatic control until the enforcement allegations are cleared up.

Last October, the FCC dismissed Granda's complaint against the KD6ZLZ and WA6NJJ repeaters on 223.82 and 223.84 MHz. The FCC told Granda that his 16-year-old coordination document "was insufficient to establish coordination" and that he bears primary responsibility for preventing interference to the two repeaters because he cannot show current coordination. Granda has told the FCC that he's been using the two frequencies "continuously for over 25 years." Hollingsworth told Granda, however, that, even if he were properly coordinated 16 years ago, "coordination is not a lifetime grant" nor a de facto frequency assignment.

The FCC said it continues to receive complaints about deliberate interference from Granda's station to the two repeaters as well as allegations of obscene and/or indecent speech. It's asked Granda to respond to the complainants. In addition, the Commission wants Granda to provide "a detailed plan" to prevent interference to the KD6ZLZ and WA6NJJ repeaters or risk enforcement action. Noting that Granda's license expires next November 9, Hollingsworth said the FCC would not act upon a renewal application until the enforcement issues were resolved.

The FCC also wrote a Florida amateur, John S. Gregory, W3ATE, letting him know that the Wireless Telecommunications Bureau had set aside his General-class upgrade on December 4. As a result, Gregory reverts to a Tech Plus licensee. The action, the FCC said, was based on complaints that Gregory--on more than one occasion in 2002--had operated his station on 20 meters while still licensed as a Technician. The FCC issued Warning Notices to Gregory last May and June but said both were returned as "unclaimed."

The FCC gave Gregory 20 days to explain the alleged operation. "Failure to respond will result in the dismissal of your application," Hollingsworth concluded.

==>FCC INVITES COMMENTS ON AMATEUR-RELATED PETITION

Comments are due February 28 on another Petition for Rulemaking filed by Dale Reich, K8AD, of Seville, Ohio.

Reich has petitioned the FCC to require sellers of two-way voice or data equipment to keep on file a buyer's name, address, telephone number and "any future information when selling a radio that required licensing under the current FCC rules." Information collected would remain private, available only to the FCC or law enforcement. Reich said in his petition that, under his proposal, any retail vendor would be able to ask local police to investigate if the retailer suspected that the radios were not going to be used in compliance with the law.

A separate petition would require "ownership and license tagging" for gear operating under Parts 5, 15, 18, 74, 80, 90, 95 and 97, including call sign, owner's name and address and any FCC file number. It would include CB, Family Radio Service, Multi-Use Radio Service and General Mobile Radio Service gear. In his petition, Reich said such tagging used to be an FCC requirement and that his proposed change was long overdue as a needed tool for local law enforcement.

The FCC has lumped both petitions into one, designated as RM-10641. The full text of Reich's petitions is available on the FCC Web site <http://gullfoss2.fcc.gov/prod/ecfs/retrieve.cgi?native_or_pdf=pdf&id_document=6513398853>.

In an earlier petition, designated RM-10620, Reich had asked the Commission to upgrade Novice and Advanced license holders to the "next" license class if the licensee has 20 or more years of operating experience. Reich said such test-free upgrades would compensate for "the previous tougher exam that was past administered" and give credit for violation-free service records. Before the comment window for Reich's earlier petition closed January 17, it attracted more than 150 comments from the amateur community.

==>UTAH AMATEUR RADIO ANTENNA BILL PASSES HOUSE

Utah's Amateur Radio antenna bill appears to be on the fast track. Just 11 days after its introduction, the bill made it through the Utah House of

Representatives. The vote January 31 was 65 to 8 (with two members not voting). ARRL Utah Section Manager Mel Parkes, AC7CP, has been encouraging Utah amateurs to get behind the new measure, House Bill 79, which was introduced January 20.

Sponsored by Rep Neal B. Hendrickson, HB 79, "Regulation of Amateur Radio Antennas," received a favorable recommendation from the House standing committee on political subdivisions earlier this month. HB 79 would prohibit municipalities and counties in Utah from enacting ordinances that fail to comply with the limited federal preemption known as PRB-1.

The measure would require that local ordinances involving placement, screening or height of an Amateur Radio antenna that are based on health, safety or aesthetics "reasonably accommodate amateur radio communications" and "represent the minimal practicable regulation to accomplish the municipality's purpose."

The bill now moves to the Utah Senate. A copy of the proposed legislation is available on the Utah State Legislature Web site <http://www.le.state.ut.us/~2003/bills/hbillint/hb0079.htm>.

So far, 16 states have incorporated the essence of PRB-1 into their statutes. Bills are pending in several other states.

==>SOLAR UPDATE

Solar guru Tad "Sunshine Superman" Cook, K7VVV, Seattle, Washington, reports: Again this week the solar numbers were lower, with average daily solar flux down more than 9 points and average daily sunspot numbers down more than 25. Solar flux has probably reached a minimum for the short term at about 125, and it should slowly rise over the next 10 days. There aren't any large clusters of sunspots visible, but a holographic image of the sun's far side shows a complex of spots which eventually will rotate into view.

Over the past week the quietest geomagnetic day was January 27, when K and A indices at all latitudes were quiet low. Other than January 27, conditions have generally been unsettled to active, indicating higher absorption on higher latitude paths. The latest prediction is for unsettled to active conditions on Friday, with a planetary A index around 20, then a drop back to quieter conditions on Saturday, followed by active geomagnetic conditions on Sunday and Monday.

For more information about propagation and an explanation of the numbers used in this bulletin, see the ARRL Web site Propagation page <http://www.arrl.org/tis/info/propagation.html>.

Sunspot numbers for January 23 through 29 were 123, 129, 103, 133, 134, 133 and 173, with a mean of 132.6. The 10.7-cm flux was 135.9, 129.8, 128.9, 125, 121.3, 125.6 and 124.4, with a mean of 127.3. Estimated planetary A indices were 19, 15, 28, 17, 8, 12 and 14, with a mean of 16.1.

==>IN BRIEF:

* This weekend on the radio: The North American Sprint (SSB), the 10-10 International Winter Contest (SSB), the Delaware and Minnesota QSO parties, the FYBO Winter QRP Field Day and the Mexico RTTY International Contest are the weekend of February 1-2. JUST AHEAD: The North American Sprint (CW), the Six Club Winter Contest, the CQ/RJ WW RTTY WPX Contest, the Asia-Pacific Sprint (CW), the Dutch PACC Contest, the YL-OM Contest (CW), the FISTS Winter Sprint, the OMISS QSO Party, the RSGB 1.8 MHz Contest (CW) and the QRP ARCI Winter Fireside SSB Sprint are the weekend of February 8-9. The ARRL School Club Roundup is February 10-15. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration opens Monday, February 3, at 12:01 AM Eastern Time (0500 UTC) for the on-line Level I Emergency Communications course (EC-001). Registration remains open through the February 8-9 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, February 18. Thanks to the federal homeland security grant from the Corporation for National and Community Service, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the course. During this registration period, approximately 200 seats are being offered to ARRL members on a first-come, first-served basis. Senior amateurs are strongly encouraged to take advantage of this opportunity. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@...; 860-594-0340.

* Kathy Capodicasa named ARRL Customer Service Manager: Kathy Capodicasa, N1GZO, has been promoted to ARRL Customer Service/Circulation Manager, overseeing the distribution of QST, QEX and NCJ. She takes over the reins from Debra Jahnke, who was named ARRL Sales Manager several months ago but has continued to oversee the Circulation Department. "As manager, I want to maintain the high standards of the department and the excellent record of customer service the staff has had over the years," Capodicasa said. "I want to continue that tradition." The Circulation Department is integrating a new computer system to help manage distribution of the three publications. She's also getting acquainted with the large number of forms and tracking statistics it takes to make sure members get their periodicals in the most efficient and timely manner. An ARRL HQ employee since 1987, Capodicasa most recently served as Senior Fulfillment Supervisor and Circulation Supervisor. A Connecticut native, she holds a bachelor's degree in management from Central Connecticut State University.

* Position opening at ARRL Headquarters: ARRL seeks a state-certified teacher with classroom experience--preferably several years at the middle-school level--to coordinate ARRL's Amateur Radio Education and

Technology Project, "The Big Project," and handle other duties as needed. The candidate should be an Amateur Radio operator, preferably with experience in a wide range of ham activities. The position is at ARRL Headquarters in Connecticut. For information on skills required and job responsibilities, contact ARRL Field and Educational Services Manager Rosalie White, K1STO, rwhite@..., ARRL, 225 Main St, Newington, CT 06111. Please, no telephone calls. The ARRL is an Equal Opportunity Employer.

* ARRL supports AMSAT-NA petition: The ARRL has commented in favor of an AMSAT-NA Petition for Rulemaking that seeks to change an FCC rule regarding pre-space notifications for Amateur Satellite Service stations. AMSAT-NA wants the rule changed to require a single, written pre-space notification (or information document) within 30 days after receiving a launch commitment. The current rule, §97.207(g), requires two pre-space notifications--the first at 27 months before initiating space station transmissions and the second at five months prior, even if no information has changed. The ARRL said that because finding affordable launch opportunities can be difficult and often involves last-minute decisions, "the 27-month notice requirement imposes an unreasonable and practically impossible compliance burden." AMSAT must seek a waiver of the requirement for essentially every launch, and the FCC has routinely granted such waivers, the ARRL noted. The change to a 30-day requirement (with updates also required if any information changes) "reflects the realities of the Amateur Satellite Service, which is a model of the type of scientific accomplishment, educational opportunity and self-regulation that is a hallmark of the Amateur Radio Service," the League commented. AMSAT-NA President Robin Haighton, VE3FRH, expressed his appreciation to ARRL for its support of its petition.

* Hams provide assistance following plane crash: After two small planes collided and crashed January 24 over Denver's West Highland neighborhood, Amateur Radio operators were among those on hand to assist. Five persons onboard the two aircraft were killed, and seven on the ground were treated for minor injuries. One plane came down near an apartment complex occupied mostly by retired older adults. The other landed in a backyard. The Salvation Army's Emergency Disaster Services (EDS) Metro Denver team was called in to provide canteen services. Metro Denver EDS Supervisor Mike Gelski, KB0PVD, contacted team volunteers to prepare two canteens. Gelski reports that during the response, nine members of the Denver Radio Club provided Amateur Radio communication between two feeding stations as well as with the Denver command post and the Salvation Army command post. Canteen services were concluded the following evening after aircraft debris was removed from both crash locations.

* Prompt action by Amateur Radio operators helps save lives: As ARRL member Joe Giraudo, N7JEH, was on his long, daily commute to his office at a mining corporation outside Elko, Nevada, he came upon a car that had skidded on "black ice" and rolled over a number of times in isolated valley north of Carlin. A bus carrying emergency medical technicians to the mine had already arrived, and the EMTs were mobilizing to treat the

three accident victims. Giraudo immediately called up the autopatch on the W7LKO 146.85 repeater to notify the Nevada Highway Patrol and the Carlin police and fire departments. He again used the autopatch so EMTs could relay situation reports to the responding emergency units. When the emergency units started arriving, they found they were unable to communicate using their own radios because of the local terrain. Again, the autopatch under Giraudo's control allowed them to communicate with their central dispatcher to coordinate other responding units, warn them of the black ice and request helicopter support. At one point the W7LKO autopatch went down, but Gene D'Asto, WA7BWF, immediately came up on the repeater and began relaying information via landline. After a 30 minute extraction effort, all three victims were taken by ambulance to the Elko Regional Medical Center.--Dick Flanagan W6OLD/Carson Valley Radio Club Carson Currents.

* AA6JR appointed to head PR Committee: ARRL President Jim Haynie, W5JBP, has appointed Jeff Reinhardt, AA6JR, of Agoura Hills, California, as the 2003 chairman of the League's Public Relations Committee. A veteran committee member, Reinhardt, is also Public Information Coordinator for the ARRL Santa Barbara Section and Public Information Officer for his local club. He said his first order of business would be to schedule a committee conference call to discuss the group's priorities for 2003. Committee members provide advice and counsel to the League's media relations manager and handle other tasks as determined by the media relations manager or the ARRL Board. Reinhardt is a partner in Reinhardt & Reinhardt Advertising. In addition to a long list of accomplishments and community activities, he serves on the Agoura Hills City Council and was recently elected as mayor.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ.
To subscribe, unsubscribe or change your address for e-mail delivery: ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Dear Zyros

A little late is better than never! Wish you a very happy birthday!

Some Birthday bread for the birthday boy....

Birthday Beer Bread

by Kara Gardner

Ingredients

- 1 twelve-oz. can of beer
- 2 cups of self-rising flour
- 3 tablespoons of sugar

Mix ingredients together, pour into a bread pan and bake at 375 for half an hour.

Cheers!

Madhu

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The Monthly meeting of February 2003 will be held on 9th Feb 2003 at 10:00 hours at B.S.Bengelle Girls High School.

The Agenda for the meeting is as follows:-

1. Debriefing of Fox Hunt.
2. Distribution of pending results sheets.
3. Distribution of new licences.
4. Finalizing the list of bulk import of Radio sets (HF & VHF)
5. Proposal for the starting of next batch of Ham Radio classes.
6. Announcements of special schemes for life memberships for families and handicaps.

All members are requested to kindly attend the meeting on time.

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The Monthly meeting of February 2003 will be held on 9th Feb 2003 at 10:00 hours at B.S.Bengelle Girls High School.

The Agenda for the meeting is as follows:-

1. Debriefing of Fox Hunt.
2. Distribution of pending results sheets.
3. Distribution of new licences.
4. Finalizing the list of bulk import of Radio sets (HF & VHF)
5. Proposal for the starting of next batch of Ham Radio classes.
6. Announcements of special schemes for life memberships for families and handicaps.

All members are requested to kindly attend the meeting on time.

1028. 2M News!!

Yahoo group: m_a_r_s
Date: 2003-02-08 03:37:55 UTC
From: Sandip Adiwarekar
Topic: 1028 Message: 1028

Hi!!

The propagation conditions were very good on 2M this morning. I had a contact with CPV(GandhiNagar) and EHY(Ahmedabad) at 8.15am.

Another news is that the repeater is up in Gandhinagar having 145.70 MHz -600 shift (it is there on one of the Govt Building in Gandhinagar)(it was down today because of the QRM but will be up again from evening/tomorrow). If the propagation conditions are favourable, there are chances of triggering the repeater from Mumbai and to have many more contacts with Gujarat Hams.

See you on 2M!!

73s,
Sandip - VU2UGO

Hi OMs / YLs!!!

Last week I tried to track the satellites with my basic VHF setup (IC-2100 transceiver & Stacked 5/8 antenna and WXtrack Software). The HAM Satellites which have downlink in 2M (144-146 MHz) are ISS (145.800) & NO-44 (144.390 & 145.827). I was able to hear packet burst when they passed over Mumbai.

The next thing i'm trying is to decode the ISS packet signals with the help of MixW2 software.
(refer - http://www.ne.jp/asahi/hamradio/je9pel/mix2-iss.htm) and will also try UISS Program.

By the way MixW supports: SSB, AM, FM, CW, BPSK31, QPSK31, FSK31, RTTY, Packet (HF/VHF), Pactor (RX only), AMTOR (FEC), MFSK, Hellschreiber, Throb, Fax (RX only), SSTV, MT63. MixW does not require a TNC. The only requirement is that you must have a computer running Windows 9x, ME, NT4, 2000 or XP operating system, and a compatible soundcard.
(For Amateur Radio Soundblaster Software Collection visit - http://www.muenster.de/~welp/sb.htm)

Members having VHF/UHF gear can try FM repeater Satellites like AO-27 or UO-14 in the beginning.

Another interesting thing while tracking the HAM SATs was tracking the Wx SATs like NOAA-12, 15 & 17 which has downlink of 137.50 & 137.62 (thankfully my IC-2100 supports these frequencies). One can easily decode the APT (Automatic Picture Transmission) on these frequencies with the help of programs like Satsignal & WXtoming using PC's soundcard.
The another requirement is RHCP (right hand circular polarisation) antenna and receiver with 50KHz bandwidth. Unfortunately the bandwidth of my IC-2100 is 30KHz. I am searching internet for radio MOD on this or for any other alternative like RigSAT RX-2. About the antenna there are many simple to make designs available on the internet e.g. QFH Antenna.

Those who are interested in Weather Satellite Imaging and how to receive them, with home made equipment, pls visit - http://ozon.homepage.dk/engelsk.htm and Remote Imaging Group.

Expecting more info, feedback, discussions, your experiences,
about the 'BIRDS' on the egroup.

Please see more interesting URLs at the end of this message.

(http://www.universal-radio.com/index.html)
Yaesu FT-857
160-6M +2M +440 MHz
Order #0857
List Price: $1055.00
Your Price: $849.95
(http://secure.universal-radio.com/checkout/add2cart.asp?id=0857)
(http://www.universal-radio.com/catalog/hamhf.html)

Amateur HF Transceivers

Features (http://www.universal-radio.com/catalog/hamhf/0857.html#feature) | Specifications (http://www.universal-radio.com/catalog/hamhf/0857spec.html) | Options (http://www.universal-radio.com/catalog/hamhf/0857.html#options) | Options With Photos (http://www.universal-radio.com/catalog/hamhf/0857ops.html) | Larger Image (http://www.universal-radio.com/catalog/hamhf/0857lrg.jpg)
Front Panel (http://www.universal-radio.com/catalog/hamhf/0857frt.html) | Front Panel Removed (http://www.universal-radio.com/catalog/hamhf/0857frtr.html) | Rear Panel (http://www.universal-radio.com/catalog/hamhf/0857rear.html)

The Yaesu FT-857 is the worlds's smallest HF/VHF/UHF multimode amateur transceiver. But don't let the diminutive size fool you. The FT-857 is loaded with features, high power output and a receiver that blends the renowned performance of the FT-897 and FT-1000 Mark V. It provides coverage of the 160 to 6 meter bands plus the 144 MHz and 430 MHz bands! And look at the receive coverage: 0.1-76, 108-174 and 420-512 MHz. The front panel (http://www.universal-radio.com/catalog/hamhf/0857frt.html) is removable and it is remotable with the optional YSK-857 separation kit. Refinements include: spectrum display, 32 color display, beacon mode, keyer, 200 alphanumeric memories and CTCSS.
The FT-857 rear panel (http://www.universal-radio.com/catalog/hamhf/0857rear.html) features an SO239 input for your HF/6M antenna, and an SO-239 input for your 2M/440 MHz antenna. Includes MH31A8J hand mic, mounting bracket, DC power cord, spare ATC fuses.
The FT-857 came into stock on February 10, 2003.

Features

- 160-2 meters +440
- Electronic Keyer
- 200 Alpha Memories
- DSP Option

- 100 Watts HF Output
- 50 Watts 2 Meter Output
- 20 Watts 440 MHz Output
- Spectrum Display

Topic: 1035 Message: 1035

Hi All,

As discussed earlier Family & Physically Impaired Life Membership Fees are revised as follows:

Family Life Membership
==========
First Member - Rs.2500
Spouse - Rs.2000
Harmonics - Rs.1500

Life Membership for Physically Impaired Members - Rs.1000
==========

Kindly take the opportunity to become life members. Please forward all the chqs or cash to registered office address or my residence by courier.

Thnks,

Mehul Chovatia

==>UTC EMERGENCY COMMUNICATIONS NATIONAL TRAINING GRANT TO COVER ALL
LEVELS

A generous grant from ARRL corporate partner United Technologies
Corporation (UTC) <http://www.utc.com> will expand reimbursed Amateur
Radio Emergency Communications Course (ARECC) training to all three
training levels and put the UTC grant program on a national level. The
three-year, $150,000 grant will reimburse the cost of tuition to students
anywhere in the US who successfully complete ARRL's Level I, II and III
Amateur Radio emergency communication courses. An earlier UTC grant
covered Level I and II ARECC training for more than 280 Connecticut
amateurs.

"This grant plays perfectly into the overall plan and scope of emergency
communication for local communities and our nation as a whole," said ARRL
```

Emergency Communications Course Manager Dan Miller, K3UFG. "This will allow us to increase the number of seats offered each month for reimbursable courses." Miller praised UTC's foresight and proactive approach to community involvement.

ARRL Chief Development Officer Mary Hobart, K1MMH, said UTC clearly recognizes the importance of emergency communication. "With this new grant, UTC has taken a giant step and renewed its commitment to Amateur Radio, emergency communication and homeland security," she said.

Including the earlier UTC grant and a three-year federal Corporation for National and Community Service (CNCS) award of some $543,000, the ARRL now has secured $726,000 for emergency communication training. That training, Hobart predicted, "will have an impact on every state in the union."

Students successfully completing any level of the on-line Amateur Radio Emergency Communications classes under the new UTC grant will be eligible for reimbursement of their $45 registration fee.

==>ISS CREW COMMENTS PUBLICLY ON COLUMBIA, DIGS IN FOR POSSIBLE LONG STAY

The members of the all-ham crew onboard the International Space Station said this week that while they grieve the loss of the shuttle Columbia crew, human space exploration must continue and they're ready to spend up to a year in space if necessary. The ISS crew made its first public comments since the February 1 shuttle disaster in two news conferences this week.

"My first reaction was pure shock," Expedition 6 crew commander Ken Bowersox, KD5JBP, told reporters February 11, when asked about how he felt when he heard the news that Columbia and her crew were lost. "I was numb and could not believe that it was happening." During serial briefings February 12 with CNN, ABC, CBS and NBC, Bowersox and his crew reiterated their resolve to stay the course, remaining in space for up to a year if necessary.

Bowersox said that once it became unlikely that there were any survivors from the Columbia catastrophe, "we discussed all of the different options for how it would affect us." He said he was confident that the crew would have a way to get home. "We've got a Soyuz vehicle parked right outside," he said.

Pettit--who had played chess via radio and e-mail with Columbia pilot Willie McCool during the Columbia STS-107 science mission--said he's hoped the crew somehow had made it safely to the ground. He said the magnitude of the tragedy hit him when the ISS crew realized that there were no survivors. "I'm the type that likes to grieve quietly and in private," he said February 12.

Budarin said he's comfortable with staying in orbit as long as necessary, now that NASA has indefinitely grounded the shuttle fleet. The Russian cosmonaut told a CBS reporter that he has experienced seven months in

orbit before aboard Mir, and that he's hoping for a good landing back on Earth--whether via the US space shuttle or the Russian Soyuz escape vehicle that's attached to the space station.

Bowersox said the crew was happy to stay aboard the ISS. "We like it aboard space station," he said. "We're going to enjoy however many months we have to stay on orbit." Bowersox said February 12 the crew did not feel isolated and had plenty of contact with family and friends and that, while not operating at peak efficiency, the crew members would continue to move forward with the "serious tasks" ahead of them. "We'll be working through that grieving process for the rest of the time we're here, I think."

Pettit, the Expedition 6 science officer, said the crew's work schedule has suffered from the effects of the Columbia tragedy. "But now, it looks like we'll have plenty of time to finish all that we have remaining on our task list." he added.

Pettit said that cutting the crew size would hurt scientific research because the crew would spend a lot more of its time just maintaining the ISS. But, he pointed out, research into how humans cope physiologically in space would continue and would make the risk of human spaceflight worthwhile. "This is a matter where you can decide as a society can decide to lead the way, step aside or follow," Pettit told NBC News anchorman Tom Brokaw. Space exploration is "an investment in your future, and, as such, you can't let a setback stop your exploration activities."

The Expedition 6 crew has been aboard the ISS since November and was scheduled to return to Earth aboard the shuttle Atlantis in March. Unmanned Progress cargo rockets, including one that docked February 4, are providing fuel and supplies. On February 11, the crew used the Progress to boost the stations' orbit by about six miles (the ISS is approximately 250 miles above Earth). The crew reportedly has sufficient provisions to last at least until June. A Soyuz taxi crew is scheduled to visit the ISS in April to drop off a new Soyuz capsule and return the one now attached to the ISS.

The crew has not used the NA1SS onboard ham station since the last Amateur Radio on the International Space Station (ARISS) school contact in January. The next scheduled ARISS contact is set for February 21, with students at Oregon State University.

==>TEXAS AMATEURS STAND DOWN IN COLUMBIA DEBRIS SEARCH

Ham radio support for the shuttle Columbia debris search and recovery effort in Nacogdoches and San Augustine counties in Texas wrapped up February 12. US Forest Service personnel were scheduled to assume the support role hams had filled in East Texas for nearly two weeks.

"I must say the amateurs were very professional and very dedicated to assist in any manner," said South Texas Section Emergency Coordinator Bob Ehrhardt, W5ZX. "Even after a day in the bush, they would come back in to the ops center and say they were ready for another day."

Ehrhardt said the weather often was rainy and cold with some sleet. "The brambles and briars in the forest did not help," he added. "The agencies that they worked with were very surprised and pleased with Amateur Radio. I know that we changed several minds that we could get the job done."

Jim Lawyer, AA5QX, a Dallas-area amateur who'd helped to organize Amateur Radio search-and-recovery support in Nacogdoches County also expressed his appreciation. "To all who offered to assist and for those who were able to serve, thank you for being part of the solution!" he said. In addition to communication support, hams used GPS and computer mapping software to pin down and report the locations of debris items as they were sighted.

Nacogdoches County ARES Emergency Coordinator Kenneth Hughes, KK5BE, said he was "very proud" of the local ARES members who responded to the call for volunteers. "Twelve days of operation is hard to keep all things going well," he said.

Kevin Anderson, KD5CCH, of Nacogdoches he was proud of the support East Texas amateurs were able to provide. "This has been a rather large team effort," he said. "Under the extremely complicated and sensitive circumstances in which we have operated, we came together and pulled off a rather huge task based on the scope of the operations in which we were called upon to participate and the type of services we were asked to provide."

Lawyer says that preliminary numbers reported February 13 during a debriefing net in Nacogdoches indicated that 198 amateurs logged in at one time or another in Nacogdoches County and 148 in San Augustine County. Lawyer says an estimated 80 percent of the participating amateurs were from outside the two counties. "It took all of us to make it happen, and without all of us, it wouldn't have been the success that it was," Lawyer said. "You have reason to be proud that you are 'amateurs'--those who do it for the love of it."

==>HARMONIZED 7 MHz ALLOCATION GAINS SUPPORT IN THE AMERICAS

A dozen countries in the Americas have agreed to support a proposal for a "harmonized" 300-kHz amateur band in the vicinity of 7 MHz. The issue of a uniform worldwide 40-meter allocation is on the agenda of the World Radiocommunication Conference 2003 (WRC-03), set to be held in Geneva this June and July. The US has so far taken no position on the issue.

"It is possible that other countries will sign on when this proposal is circulated among all 34 member-states of the Inter-American Telecommunication Commission (CITEL)," said ARRL Technical Relations Specialist Jon Siverling, WB3ERA. "It takes at least six countries of the Organization of American States to make an Inter-American Proposal (IAP). If more countries sign on, the IAP will have greater weight at WRC-03."

Argentina, Canada, Colombia, Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras, Mexico, Paraguay, Peru and Venezuela agreed to the Canadian-sponsored IAP for a 300-kHz amateur band--from 7 to 7.3 MHz--in all three ITU radio regions. That position is in line with what the

International Amateur Radio Union (IARU) has been calling for.

The support came during a meeting of CITEL's Permanent Consultative Committee for Radiocommunications (PCC.II-RADIO) Working Group, which is preparing Inter-American Proposals for WRC-03. PCC.II-Radio met February 3-7 in Orlando, Florida. Fourteen CITEL member states attended the Orlando session.

Siverling has been chair of so-called Chapter 5 issues for CITEL, leading up to WRC-03, which he will also attend. Chapter 5 issues include the Maritime Mobile, Amateur and Amateur-Satellite and Broadcasting services in the MF and HF bands.

Another matter on the WRC-03 agenda is possible changes to Articles 25, 19 and 1 to the international Radio Regulations. Fifteen countries--Argentina, Brazil, Canada, Colombia, Costa Rica, Dominican Republic, El Salvador, Guatemala, Honduras, Mexico, Paraguay, Peru, the US, Uruguay and Venezuela--signed an IAP favorable to the Amateur Service. The US signed the IAP but withheld support on two of the 18 specific provisions.

Siverling explained that the IAP approved at Orlando conforms with IARU positions on the three articles. Article 25 covers technical requirements and operator qualifications, including Morse code proficiency--which could be left up to individual administrations to require following WRC-03; Article 19 covers call sign configurations, and Article 1 deals with issues consequent to any changes to Article 25.

Twelve CITEL countries agreed in Orlando on an IAP to propose a "footnote allocation" of 135.7-137.8 kHz to amateurs in Region 2. This band is already available to amateurs in some CEPT countries.

The 136-kHz issue came up as a Canadian proposal to create a secondary allocation, but the issue is not on the WRC-03 agenda. According to Siverling, International Telecommunication Union (ITU) member-states want to eliminate or minimize footnotes in the Radio Regulations. The IAP for a "footnote allocation" at 136 kHz, however, was seen as a way to get the issue on the WRC-03 agenda "on an exception basis," he said.

Siverling explained that the CITEL IAP leading to a possible allocation in Region 2 of the 136-kHz band at WRC-03 has been handled separately from the pending US amateur LF allocation. Acting on an ARRL request, the FCC has proposed a domestic (US-only) allocation at 136 kHz on a non-interference basis. "At some point, the twain will meet," Siverling said.

==>HOLLINGSWORTH PREACHES COURTESY, COMMON SENSE

FCC Special Counsel Riley Hollingsworth told those attending his forum at the Richmond, Virginia, Frostfest February 9 that Amateur Radio enforcement still has a long way to go, but that amateurs can do a lot through peer pressure to head off problems before they become enforcement

issues.

"Enforcement is no substitute for courtesy and common sense," Hollingsworth declared. "More courtesy would go a long way. Hollingsworth again suggested that amateurs "operate so that listeners will be impressed with Amateur Radio," not offended or turned off by it. He said awareness of Amateur Radio is on the rise in the wake of media attention since September 11, 2001, and, more recently, with ham radio assistance in the search for debris from the shuttle Columbia. He pointed to 20 and 75 meters as the current enforcement hot spots as well as the bands where the least courteous operating practices are found--some of which he described as "a disgrace" to the Amateur Service.

Off-the-air peer pressure, he said, is an effective tool to provide guidance to amateurs who may be unaware of how they sound to others on the air. The reactions of some hams when they confront interference--or perceived interference--can be worse than the original interference--whether or not it's deliberate. "Don't overreact," Hollingsworth advised. "The best reaction is no reaction whatsoever."

"You have to always be aware of your image and be willing to protect it," he told those gathered in the packed forum. "You can't shoot yourself in the foot." More than 1000 attended the Richmond Frostfest, sponsored by the Richmond Amateur Telecommunications Society <http://www.rats.net/>.

The use of new technology and on-the-air experimentation also sometimes brings controversy to the amateur bands, Hollingsworth said, and may prompt an occasion for the FCC to revisit its current Part 97 Amateur Service rules. Hollingsworth pointed to the use of so-called "enhanced SSB," where experimenters have been attempting to achieve full-carrier AM-like high-fidelity audio in that mode. Hollingsworth said the presence of the enhanced SSB experimenters has led to complaints to the FCC--as many as 20 per week--that these signals are taking up excessive bandwidth.

Hollingsworth told his Richmond audience that deliberately operating a wideband mode in a crowded spectrum is "shortsighted and rude," may be ignoring the "minimum bandwidth necessary" rule. If its use isn't accompanied by courtesy and common sense, he said, it will lead to pressure on the FCC to revise the Amateur Service rules.

The "Emission Standards" section of Part 97--specifically §97.307(a) and (b)--requires amateur transmissions to not occupy "more bandwidth than necessary for the information rate and emission type being transmitted, in accordance with good amateur practice" and to "not cause splatter" on adjacent frequencies.

Hollingsworth said the bandwidth of a given signal is not easily determined by the average amateur transceiver--even one equipped with a band scope of some sort. He pointed out that the problems with apparent splatter can be aggravated by the use of a noise blanker on the receiving end. "Just because it sounds wide doesn't mean it is wide," he said, adding that he'd prefer the amateur community come up a way to accommodate

such experimentation, because "a government solution will be worse than the problem."

==>UTAH AMATEUR RADIO ANTENNA BILL ON ITS WAY TO GOVERNOR'S DESK

Less than a month after its introduction, Utah's Amateur Radio antenna bill is on its way to the desk of Gov Michael Leavitt. The bill unanimously passed the Utah Senate February 13, 26-0. The measure, HB 79, was introduced January 20. It earlier passed the Utah House, 65-8.

"I would like to express appreciation to the many Amateur Radio clubs and individual Amateur Radio operators throughout Utah who spent many hours publicizing this bill and ensuring Utah representatives and senators were contacted about the importance of this bill," said ARRL Utah Section Manager Mel Parkes, AC7CP. "Once the bill is signed Utah will be come the 17th state to enact PRB-1 legislation."

Sponsored by Rep Neal B. Hendrickson, HB 79, "Regulation of Amateur Radio Antennas," made it through the house 11 days after getting a favorable committee recommendation. The Utah Senate Business and Labor Committee unanimously approved HB 79 and sent it to the Senate floor February 6. HB 79 would prohibit municipalities and counties in Utah from enacting ordinances that fail to comply with the limited federal preemption known as PRB-1.

The measure would require that local ordinances involving placement, screening or height of an Amateur Radio antenna that are based on health, safety or aesthetics "reasonably accommodate amateur radio communications" and "represent the minimal practicable regulation to accomplish the municipality's purpose."

Parkes has credited Mike Davis, KD7FQD, and John Hanson, KI7AR, for developing the bill and getting Hendrickson to sponsor it.

A copy of the proposed legislation is available on the Utah State Legislature Web site <http://www.le.state.ut.us/~2003/bills/hbillint/hb0079.htm>.

==>AMATEUR RADIO'S PUBLIC SERVICE STORY IS NOW AVAILABLE ON VIDEO!

An updated Amateur Radio Today video now is available for free downloading from the ARRL Web site <http://www.arrl.org/ARToday/>. The MPEG-format file is 70 Mbytes.

Narrated by former CBS News anchorman Walter Cronkite, KB2GSD, Amateur Radio Today showcases the public service contributions made by hams throughout the country. Highlights include ham radio's response on September 11, 2001, ham radio's part in helping various agencies respond to last year's wildfires in the Western US, and ham radio-in-space educational initiatives. Directed by Dave Bell, W6AQ, Amateur Radio Today was written by Alan Kaul, W6RCL. The production team included Bell and Kaul as well as Bill Pasternak, WA6ITF, and Bill Baker, W1BKR. The editor was Keith Glispie, WA6TFD.

Amateur Radio Today is an ideal presentation for clubs, government meetings, civic organizations and any other venue where you want to vividly illustrate what Amateur Radio has to offer the public. The video runs just six minutes and is available in several formats. The digital version of Amateur Radio Today is available in MPEG video format, which can be played by Windows Media Player, Apple QuickTime or RealPlayer software. It can be run from the CD or copied to your hard drive (not included).

This copyrighted program is not intended for broadcast use (including over-the-air, cable or Internet) and may not be reproduced or distributed without permission. You also can order Amateur Radio Today on CD-ROM and VHS tape. The CD-ROM version also requires that you have software that can play MPEG files installed on your computer.

==>SOLAR UPDATE

Solar sage Tad "Staring at the Sun" Cook, K7VVV, Seattle, Washington, reports: Solar flux and sunspot numbers rose this week over last. Average daily sunspot numbers were up nearly 70 points, and average daily solar flux rose by more than 11 points. Neither number was rising over the past few days, and both are expected to continue to decline.

The predicted solar flux for Friday through Monday is 130, 130, 125 and 125. Solar flux is expected to reach a short-term minimum near 115 around February 21-22, and then reach another peak roughly around March 5-9. Don't expect high values as in the past few years though. For example, during this same week last year, the average daily solar flux was nearly 62 points higher--201.8.

For the ARRL International DX Contest (CW) this weekend we could see some unsettled or perhaps active geomagnetic conditions. The earth should be inside a solar wind stream flowing from a coronal hole on Friday and Saturday. But the current prediction is for a planetary A index of only 15 over the weekend. No doubt higher latitude A indices could be higher.

Sunspot numbers for February 6 through 12 were 135, 153, 162, 194, 163, 134 and 119, with a mean of 151.4. The 10.7-cm flux was 149.5, 147.3, 139.2, 141.4, 136.2, 134.9 and 131.6, with a mean of 140. Estimated planetary A indices were 16, 13, 13, 15, 16, 12 and 12, with a mean of 13.9.

==>IN BRIEF:

* This weekend on the radio: The ARRL International DX Contest (CW) and the YL-OM Contest (SSB) are the weekend of February 15-16. JUST AHEAD: The CQ 160-Meter Contest (SSB), the REF Contest (SSB), the UBA DX Contest (CW), the FYBO Winter QRP Field Day, the North American QSO Party (RTTY), the Russian PSK WW Contest, the High Speed Club CW Contest, the North Carolina QSO Party and the CQC Winter QSO Party are the weekend of February 22-23. See the ARRL Contest Branch page

<http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Thanks to a new grant from ARRL's corporate partner, United Technologies Corporation, students successfully completing Level II and Level III on-line Amateur Radio Emergency Communications classes now are eligible for reimbursement of their $45 registration fee. Registration for the grant-sponsored ARRL Level III Amateur Radio Emergency Communications (EC-003) and for the unsponsored HF Digital Communications (EC-005) courses opens Monday, February 17, 12:01 AM Eastern Standard Time (0501 UTC). Senior amateurs are especially encouraged to take advantage of the Amateur Radio Emergency Communications classes. Registration will remain open through Sunday, February 23 or until all seats have been filled. Classes begin Monday, February 24. No seats remain in the February registration period for the ARRL Level II Amateur Radio Emergency Communications (EC-002). Registration for the Antenna Modeling (EC-004) course remains open through Sunday, February 16. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to receive advance word of registration opportunities via e-mail. To take advantage, send an e-mail to prereg@.... On the subject line, include the course name or number (eg, EC-00#). In the message body, include your name, call sign, e-mail address, and the month you want to start the course. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* Indiana amateur antenna bill advances: The latest effort to get an Amateur Radio antenna bill on the books in the State of Indiana took another step forward this week. Senate Bill 109 received a "do pass" recommendation following a hearing and a 5-3 vote February 12 by members of the Senate Governmental Affairs Committee. The measure now goes to the full Senate. In addition to incorporating the essence of the limited federal preemption known as PRB-1 into state statutes, the measure would prohibit localities from restricting the height of an Amateur Radio antenna to less than 75 feet above ground level. "I expect opposition on this bill from the Indiana Association of Cities and Towns, and the Indiana Historical Preservation Society," said ARRL Indiana Section Manager Jim Sellers, K9ZBM. Sellers was among those speaking in favor of SB109 at the committee hearing. He told the panel that there is a patchwork of ordinances across the state regulating various allowable antenna heights, some of them too low to provide effective communication. SB109 would provide a uniform standard.

* Atlantic Division seeks nominees for annual awards: The ARRL Atlantic Division is seeking nominees for its 2003 awards for Amateur of the Year and Technical Achievement. The Amateur of the Year Award recognizes a ham in the division whose record merits recognition for outstanding contributions to the Amateur Radio Service. The Technical Achievement

Award honors amateurs who contribute to the advancement of the radio art and whose attitude exemplifies the highest dedication to service to others and to science, rather than self. Groups of two or more Amateurs may be nominated for a joint award in this category. All nominations must be received by March 15, 2003. Visit the Atlantic Division Web site <http://www.bfdin.net/atldiv/AtlAwards.htm> to obtain an award nomination form and additional details. For more information, contact Atlantic Division Vice Director Bill Edgar, N3LLR, n3llr@..., or write him at 22 Jackson Ave, Bradford, PA 16701.

* ARISS chair begs patience regarding RS0ISS packet system: The chairman of the Amateur Radio on the International Space Station international team, Frank Bauer, KA3HDO, is asking hams to be patient regarding resumption of the ISS packet operation. "Over the past few weeks the ARISS team has received numerous queries as to when the packet system will be turned back on," Bauer said. "We want to thank you all for your concern in getting this important capability up and running again." Bauer said ARISS has been working with NASA and Russian space officials to get the system operational again, but that the ISS crew has other priorities--especially in the wake of the Columbia tragedy. Bauer said that given the busy crew schedule, amateurs should not be surprised if the RS0ISS packet system is off the air for a bit longer. Once it's operational, he advised amateurs not to post messages to the crew since the crew has not had the opportunity to read the mail.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRL Web site <http://www.arrl.org/> offers access to news, informative features and columns. ==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from

ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Is Your Rig 'Inferior Grade'?
from Phil Brazzell KU4AB on February 17, 2003
View comments about this article! (http://www.eham.net/articles/4618#comments)

Why do so many ads for used ham equipment have the line: "never run mobile" when its a mobile rig being sold? Why do you see so many Ham HTs at the hamfest or on eBay that look great but don't work?
Are we being sold "inferior grade" equipment?
Recently a ham friend handed me his new HT and said, "check this out"... I noticed right off that it was "built like a brick" I plucked my 6month old Alinco off my hip and WOW it felt like a toy compared to his new Vertex VX-150, yet it cost much more. I admired it and handed it back almost wishing I'd waited to buy a HT.
I went home and as I worked around the shack I looked at the broken Ham rigs on the shelves that I'd acquired to "fix". I turned to the old MOTOROLA Mocom 70 sitting in the rack that we use for a repeater transmitter, still faithful after 30 years? I reflected on a Icom HT I had bought new yet, even though it had never been dropped, had to have the antenna connector re-soldered twice within a year just from swapping antennas. I thought of another ham's nice Kenwood HT. The clip that holds the battery in place broke shortly after he'd bought it... Another ham had the belt clip break off his new Alinco. I thought back at how many times I'd seen a construction worker walking around with a Motorola on his hip so scarred up that you could hardly tell who manufactured it, yet it still worked great. What a difference!
Doesn't it seem that we are being sold "inferior grade" rigs?
I went to the phone and ordered two of the VERTEX rigs... Thanks VERTEX! It's about time! Icom, Kenwood, Alinco are you listening? I'm tired of light duty equipment. I'd rather have it built "commercial grade" and have it still be working next year! I'd even pay more for it!
Build it we'll buy them...
73's Phil

mOTOROLA did have the GP-68. It was a commercial UHF
Handheld. It would provide TX-RX very well at 70cm.
If one did a MOD it would be keypad programmable.
I do not know if it is type accepted by the FCC.
Do a google seach on it. People were selling them at Dayton about 6 years ago for $400 or less.

Motorola also makes an HF RIG. I think it is commercial only. It looks like no other HF radio I have ever seen. Again check it out on Google.
I am sure it is ultra expensive!

Motorola had a policy they will not produce a VHF/UHF handheld. They feel it would not live up to commercial standards.

For ham use, I always liked Kenwoods. The service is horribe. There is an aurthorised Kenwood/icom repair center in Texas. The guy is a ham. He is much better then kenwood at repairs.

"They" DO build commercial grade radios. WE don't like
to pay the big price for them..... Then again,
I have had my little Icom Q7a HT since they first came
out, Dropped it countless times from over four feet
directly to a concrete floor, left it out in the rain,
and generally beat it up. AND IT STILL WORKS PERFECT!
Yaesu also has a few recent models that are really
tough. The little Icom ICQ7A now sells for just over
100 bucks. What a deal! Electronic equipment, Including
radios, are just getting better (More reliable) and
cheaper as time goes on. Every manufacturer has the
great tough models, and also the "bad" equipment
everyone would rather forget about.
I don't know what the goal of this thread is, But
do NOT attempt to steer the market in to only one type
of product!
I would rather have a good choice of equipment that I decide what to buy from, Than have "someone" decide what is inferior or not. Let the MARKET decide.

Hams tend to be economy minded (cheap?).
You get what you pay for.
Considering that I really like HF Ham Radio (a lot), I decided to invest (for the long haul) in the FT-1000D and IC-781 - both "Battleship" quality. Its is rumored that the Major ham Mfgs will not roll out radios in the $3500 or higher area since few would sell today. We can demand higher quality gear by demonstrating our willingness to spend more for it. Otherwise, we will continue to see a trend of "Fisher Price" like "Warranty Challengers".

If the "not run mobile" label is attached to a used rig ad, it is often as not an attempt to indicate the radio is in good shape cosmetically as well as electrically. It may or may not be indicative of a problem with the operation of the radio itself. As far as today's radios being "inferior", that is pretty subjective judgement. I have had no problems with a FT1000D and FT900CAT, both radios purchased new. A used IC746 has worked well for me. My 10 year old Alinco DJ-560 HT still functions just fine. A guy related in a QST article that he dropped a VX-5R off a motorcycle going 70 mph, and when he retrieved the HT, it worked great; I've dropped my VX-5R on concrete more times that I care to admit, and it works like new. I haven't had much experience with Kenwood rigs, but I suspect they are about the same as Yaesu, Alinco, and Icom in terms of quality and durability. If all else fails, build your own rig. My K2 is put together like a tank, and if I ever do have any problem with it, I can fix it myself.

Mail this to a friend! (http://www.eham.net/forums/mailto/1?id=18730)

My only comment is...I have 3 older Icom handhelds.. IC2at,IC3AT, IC4AT I bought all three brand new, have used them everyday for years. They look pretty bad now days, have been dropped, run over, left sitting in the sun, dropped in water ect. The cases are cracked and glued with super glue many many times over. BUT they still work perfectly! To me that speaks of pretty good construction. I almost hate to buy a new HT because the older ones I have are still working even if the dont have all the bells and whistles.

Fancy is NOT always better..

Dan

I think that "built like a brick" went right out the door as soon as the "KISS" principle left.

As we want more and more features in increasing smaller packages, thermal effects and physical shock/stress begin taking their toll. Apart from my HF (which is 7 years old) all of my VHF equipment is early 80's vintage--before SMD was the norm. And it works beautifully.

I'll be honest, I don't think today's VHF equipment is "inferior" per se...."disposable" would be a better term. It will usually cost more to fix it than it's worth.

As far as HF goes, it seems most people are satisfied with the radios of today. I have a theory as to why this is...maybe it's because the manufacturers spend more time designing a $1500 HF than a $350 VHF mobile. Sometimes I really think the manufacturers underestimate the knowledge of the first time radio buyer and push a product that is less than robust.

Steve, KE4MOB

1041. QST - January' 2003

Yahoo group: m_a_r_s
Date: 2003-02-18 04:16:31 UTC
From: Sandip Adiwarekar
Topic: 1041 Message: 1041

Now available in the MARS Library!!!

QST - JAN'2003 Contents :-
a.. A compact 100-W Z-Match Antenna Tuner by Phil Salas, AD5X (p.28)
The nice thing about the Z-Match tuner is that it will match just about anything on the HF bands and it uses only two controls. Here's a 100W version using toroid inductor....

b.. A 222MHz Transverter for Yaesu FT-817 by Paul Wade, W1GHZ (p.31)
Missing the multimode action on 222Mhz? This easy-to-build transverter is the perfect addition to Yaesu's popular mini rig....

c.. The Two Tube Tuna Tin Transmitter (T5) by Steve Johnston, WD8DAS (p.39)
The tuna tin emerges once again as a classic two-tube transmitter. This easy-to-build, diminutive blowtorch can pump out 8W with a comforting glow that transistors can't match.....

d.. Vibroplex - The Company and its Classic Key by John Ceccherelli, N2XE (p.48)
On one leve, the Vibroplex is just a bug - a type of Morse code key. But on another, it's a piece of ham radio istory that resonates through the fists of generations of brasspounders....

e.. Restoring a Heathkit by Ralph C. Craig, AJ8R (p.56)
Bringing a classic radio back to life can be a challenge, but as the author found, it's likely to be a rewarding one.....

f.. Public Service - Escape from Alcatraz Challenge Swims...

g.. Product Review -
a.. ICOM IC-T90A - Triband Handheld Transceiver - $250 (p.63),
b.. Peet Ultimeter 2100 Weather Station - $399 (p.66)

h.. New Products -
a.. Kill-A-Watt AC Power Meter from Radio City ($49.95 - p.60) which instantly measures ac voltage, current, power, kilowatt hours, line frequency (Hz) and power factor for loads of up to 1875W (125V at 15A maximum).
b.. Internet/Radio Linking Interface from ILINKCA and VA3TO ($45 - p.60) features TOT, true RS232 communications, a DTMF controlled auxiliary relay and small area for experimenters.
c.. 80/75-Meter Vertical from Array Solutions ($1340 - p.68) consists of freestanding 70-foot aluminium radiating element that's attached to a steel foldover base.
d.. Broadband folded dipole antenna from Barker & Williamson covers 160 through 10 meters with an SWR of less than 2:1 across entire frequency range, 90' long ready to go right out of the box with no taps, nothing to tune and nothing to adjust.

i.. Software -
a.. WINCAP Wizard 3 - Propagation Software - $65 (p30)
b.. TRX-Manager - Rig Control Software - $69 (p55)
c.. HCLog - Logging Software - $20 (p.98)

d.. Internet-based DX spotting service powered by HAMCALL.

j.. Regular Features - Correspondence, Workbench, Hints & Kinks, Technical Correspondence, How's DX?, The World above 50MHz, Old Radio, Amateur Satellites, QRP Power, OP-ED, 75-50 & 25 Years Ago, Special Events, Contest Corral, Strays, Hamfest Calendar, Coming Conventions, ARRL Buyer's Guide.

k.. New Advertisements -

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

I am very pleased to inform you that Rohit Pardeshi - VU2ROH son Rohan Pardeshi is now VU3ROH. He cleared his Grade - I, but since he was 12 years old when he appeared he has a Grade - II ticket. He is probably the youngest HAM in Mumbai.

1043. Life Membership Fees

Yahoo group: m_a_r_s
Date: 2003-02-20 16:05:45 UTC
From: mehul2k@vsnl.com
Topic: 1043 Message: 1043

Hi All,

As discussed earlier Family & Physically Impaired Life Membership Fees are revised as follows:

Family Life Membership
==========
First Member - Rs.2500
Spouse - Rs.2000
Harmonics - Rs.1500

Life Membership for Physically Impaired Members - Rs.1000
==========

Also note that 80-G certificate is available for all Life Memberships.

Kindly take the opportunity to become life members. Please forward all the chqs or cash to registered office address or my residence by courier.

Thnks,

Mehul Chovatia
Treasurer - MARS

This weekend on the radio
ARRL Certification and Continuing Education course registration
Correction
Indiana amateur antenna bill passes Senate
ARRL to sponsor emergency communications course seminar
ARRL seeks assistant technical editor

+Available on ARRL Audio News

============================================================
==>AMATEUR RADIO SPECTRUM PROTECTION ACT REINTRODUCED IN US HOUSE

The Amateur Radio Spectrum Protection Act has again been introduced in the
US House of Representatives. The measure is an ARRL legislative
initiative. Florida Rep Michael Bilirakis put the latest version of the
bill, HR 713, into the legislative hopper on February 12. It has been
referred to the House Committee on Energy and Commerce. When last
introduced in 2001, the measure was known as HR 817.

The House bill already has two cosponsors, Reps John Boozman, Arkansas,
and Patrick Tiberi, Ohio. Both cosponsored last year's bill.

HR 713 is aimed at ensuring the availability of spectrum to Amateur Radio
operators. It would protect existing Amateur Radio spectrum against
reallocations to or sharing with other services unless the FCC provides
"equivalent replacement spectrum" elsewhere. Bilirakis, a Florida
Republican, has twice before sponsored similar legislation at the League's
recommendation. A Senate version of the bill is pending.
```

The measure would amend the Communications Act to require the FCC to provide "equivalent replacement spectrum" to Amateur Radio and the Amateur-Satellite Service in the event of a reallocation of primary amateur allocations, any reduction in secondary amateur allocations, or "additional allocations within such bands that would substantially reduce the utility thereof" to amateurs.

The 2001 version of the measure attracted 53 cosponsors in the House but last spring became one of many pieces of legislation caught up in the so-called "Enron logjam," during which the Internet and Telecommunications Subcommittee did not meet, although its full committee, Energy and Commerce, held numerous hearings concerning Enron.

The ARRL is urging members of the Amateur Radio community to contact their representatives in Congress and request that they cosponsor HR 713. Experience has shown that, while most members of Congress understand and appreciate the benefits of Amateur Radio, some may be reluctant to sign onto a technical piece of legislation without some indication of support from their own constituents. A sample letter is available on the ARRL Web site.

The text of HR 713 is available via the Thomas Web site <http://thomas.loc.gov/>. Enter "HR713" in the "Bill Number" window. ARRL asks that members soliciting their members of Congress to cosponsor this legislation to copy their correspondence to the League via e-mail to specbill03@....

==>N6AJO APPOINTED PACIFIC DIVISION VICE DIRECTOR

ARRL President Jim Haynie, W5JBP, has appointed East Bay Section Manager Andy Oppel, N6AJO, to become Pacific Division Vice Director. The appointment February 20 fills the vacancy in the Pacific Division leadership created when former Vice Director Bob Vallio, W6RGG, acceded to Pacific Division Director upon the death of Director Jim Maxwell, W6CF, on February 6. Oppel's appointment is for the balance of Vallio's term, which expires January 1, 2005.

"I've been working with Bob Vallio for more than 20 years," said Oppel, who lives in Alameda and took over the East Bay Section Manager's position from Vallio in January 2000. Prior to that, he was an Assistant SM in East Bay for eight years under Vallio's section leadership. Oppel said their long-term working relationship would definitely be an asset as he and Vallio take on their new leadership roles in the Pacific Division.

A ham since 1977 and a General-class licensee, Oppel, 50, said his interest in emergency communications work is what helped to get him into ham radio. He serves as a mentor for the Amateur Radio Emergency Communications Level I course.

ARRL Field and Educational Services Manager Rosalie White, K1STO, has appointed Dennis Franklin, K6DF, of Fremont to take over the reins from Oppel as East Bay SM.

As the new Pacific Division Director, Vallio greeted Oppel's appointment enthusiastically and said he planned to continue the agenda he and Jim Maxwell had begun together three years ago. "Jim wasn't done with the things that he wanted to do, and I wasn't done trying to help him do them," Vallio said. Before becoming a Vice Director, he had served for more than two decades as East Bay Section Communications Manager and Section Manager. As a Vice Director, he served on the ARRL Board of Directors' Membership Services Committee.

First licensed as a Novice in 1952, Vallio says he's been active on HF, VHF and UHF for almost his entire 51-year tenure as an amateur licensee. He also serves as a director and secretary of the Yasme Foundation and is a member of the Northern California DX and Northern California Contest clubs as well as of the Alameda County Sheriff's Communications Team (Radio Amateur Civil Emergency Service--RACES). He is retired from Pacific Bell.

Franklin, a retired federal employee, was first licensed in 1965. An ARRL Life Member, he's is an Amateur Radio Emergency Communications course mentor and a volunteer examiner.

An ARRL Life Member, Franklin is an Amateur Radio Emergency Communications course mentor and a volunteer examiner.

==>ARISS CONTACT WITH JAPANESE SCHOOL FIRST SINCE COLUMBIA TRAGEDY

Pupils at an elementary school in Japan have been the first youngsters to speak to the astronauts aboard the International Space Station since the shuttle Columbia tragedy. The contact took place February 18 between 8N3HES at the Hirano Elementary School and astronaut Don Pettit, KD5MDT, at the controls of NA1SS. The direct 2-meter contact was arranged by the Amateur Radio on the International Space Station (ARISS) program, which has been on hold since the shuttle catastrophe.

No one asked any questions about the Columbia tragedy during the approximately 10-minute contact that was marred by some communication difficulty. An audience of approximately 180 people--essentially the entire school plus several reporters--was on hand for the ARISS contact. Pettit managed to answer eight of the nine questions put to him by the fifth and sixth graders

One student wanted to know what Pettit would bring with him if he had to live in space for the rest of his life. "I would hope to bring my whole family," Pettit responded. "I would bring my wife and my children and we would live in space together."

Because of the Columbia disaster, the mission of the Expedition 6 crew members already has been extended until at least June. It had been scheduled to end next month.

Other students asked questions relating to everyday life aboard the space station, including how the crew gets rid of its trash. Pettit explained that after putting the trash into airtight bags, it's loaded on an empty

Progress cargo supply rocket and sent back into Earth's atmosphere. "It's the ultimate means of recycling your garbage," he said.

Pettit told the youngsters that it's "nice and warm" aboard the space station--about 22 degrees Centigrade--but that the crew could set the temperature to whatever they desired.

One student asked what the crew would do if someone became ill. "Fortunately no one has become sick on our mission, so we haven't had to worry about that," Pettit replied. He said that in the case of sickness among the crew, the crew would contact flight surgeons on Earth to get advice. He also explained that the crew has a medical kit on board for those kinds of situation.

ARISS is an international project with participation by ARRL, AMSAT and NASA.

==>HAMS TAKE ON SNOWSTORM, FLOOD DUTY IN EASTERN US

Amateurs in the Eastern US this week responded after heavy snow in some regions and icy conditions and flooding in others knocked out and disrupted communications in several states.

In Kentucky, Section Emergency Coordinator Ron Dodson, KA4MAP, reported that northern and central Kentucky was under ice and snow February 17 as a result of precipitation over the weekend. Dodson said the City of Lexington and Fayette County were hardest hit. At one point, some 65,000 customers were reported without power after ice-laden tree branches felled utility lines. At week's end, Dodson reported that work was continuing on power restoration in Lexington and Fayette County, where about 30,000 remained without power.

Lexington-Fayette County Amateur Radio Emergency Service (ARES) teams activated February 16 to provide communication support for road crews, power crews and at four shelters set up at American Red Cross and Salvation Army offices for those without heat due to the power outages. Dodson said Amateur Radio was providing links on VHF and UHF between all field operations and the local Emergency Operations Center in Lexington as well as with the state EOC in Frankfort, Kentucky's capital.

"We have flooding occurring in southern and eastern portions of the state where all the precipitation fell as rain," Dodson said earlier this week. Many area highways were closed due to high water.

Paintsville-Johnson County Emergency Coordinator John Hager, N4KJU, reported that ARES activated February 16 after meeting with local emergency managers. Fifteen ARES members responded, and activation on VHF provided communication for the fire department and rescue squad when commercial power was interrupted for about five hours. Hams were deployed at all 10 county fire departments and at the EOC.

Dodson said the ARES response gave the Lexington Fayette Urban County Government "an up-close-and-personal look at Amateur Radio and how they

can benefit from it." Dodson praised amateurs who participated despite having troubles of their own at home that included no power, frozen pipes and trees covered with ice.

In the Washington, DC, area--which received more than two feet of unwelcome and unusual snowfall--virtually all travel was reported paralyzed. Prince George's County, Maryland, Radio Amateur Civil Emergency Service (RACES) was activated to assist in picking up and delivering dialysis patients to and from local facilities as well as providing other needed transportation assistance. Murray Green, K3BEQ, reports that the county EOC was activated, and Deputy Radio Officer, Frank Scott, K3HDM, took the reins as net control station. Primary communication was via VHF repeaters.

In Northern New Jersey, ARES and SKYWARN activated 15 SKYWARN nets that garnered 173 checkins during the storm, said Section Emergency Coordinator Steve Ostrove, K2SO. In all, reports were logged from nine New Jersey counties as well as two in New York and one in Pennsylvania. Hams put in nearly 70 work-hours.

In Ohio, Section Manager Joe Phillips, K8QOE, reports that hams responded to weather emergencies throughout the day February 16. Phillips said the Ohio Single Side Band Net (OSSBN) was called into an emergency session by Assistant Section Manager Connie Hamilton, N8IO, and Ohio Section Emergency Coordinator Larry Rain, WD8IHP.

"Icy streets and falling snow clogged roads and ice covered trees striking power lines caused power outages throughout Ohio," Phillips said. "The OSSBN moved emergency traffic and kept Ohio hams in constant contact with the Ohio Emergency Management Agency." He said in the Dayton area, Amateur Radio operators with four-wheel drive vehicles stood by to transport essential personal such as medical personnel to their jobs.

In New England, which is much more used to heavy snowfalls, the newly formed Worcester Emergency Communications Team (WECT) in central Massachusetts activated a net at the request of Worcester emergency management officials. The net ran most of Presidents' Day--when the majority of the snow fell in the region. "The activation gave us a chance to test our capabilities and explore both our strengths and weaknesses in terms of emergency communications," said Worcester ARES EC and City RACES Officer Mark Rubin, WB1ARZ.

Rubin said the team set up a VHF station at the Worcester EOC. At one point, he and another WECT member were atop the EOC roof in blizzard conditions setting up a 5/8-wave antenna. More than two feet of snow fell in some parts of Southern New England.

==>NEW ARRL SECTION MANAGERS ELECTED IN FOUR SECTIONS

Roy Rabey, AD5KZ, will become the new North Texas Section Manager this spring after he topped a field of three candidates that included the incumbent. Rabey, who lives in Bedford, outpolled first-term North Texas

SM Larry Melby, KA5TXL, and Glenn Warnstaff, K5CPD. Rabey received 576 votes to Melby's 499 and Warnstaff's 303. New SMs also will be taking office in Montana, Wyoming and Oklahoma. Incumbents were re-elected without opposition in five other ARRL sections. Votes cast in all contested races were counted February 18 at ARRL Headquarters.

In Montana, Doug R. Dunn, K7YD, defeated James Fuller, N7VMR, 234 to 73 votes. Dunn will take over the reins from current Montana SM Darrell Thomas, N7KOR, a 10-year veteran who decided not to run for another term.

In Oklahoma, John Thomason, WB5SYT, of Edmond, topped Melvin Miller, K5KXL, 520 to 148 votes for the section's top job. Thomason will take over the job being relinquished by Charlie Calhoun, K5TTT, who decided not run again. Calhoun has been Oklahoma SM since 1999.

In Wyoming, Jay E Ostrem, W7CW, of Gillette, was unopposed for election and was declared elected. Ostrem will succeed outgoing Wyoming SM Bob Williams, N7LKH, who did not run for another term. Williams has served as SM since 1997.

Incumbent ARRL SMs in five other sections were unopposed for re-election to new two-year terms and were declared elected. They are John Meyers, NB4K, Kentucky; Cliff Hauser, KD6XH, Arizona; Malcolm Keown, W5XX, Mississippi; Joe Brown, W6UBQ, Orange; and Jim Lasley, N0JL, Iowa.

All new terms of office begin on April 1.

==>FCC PROPOSES FINE FOR HAM ACCUSED OF INTENTIONAL INTERFERENCE

The FCC has proposed fining a Nebraska Technician-class Amateur Radio operator, Scott E. Kamm, N0UGN, of Waterbury, $12,000 for alleged willful and repeated interference, broadcasting of music and failing to identify with his call sign. The FCC's Kansas City office released the Notice of Apparent Liability for Forfeiture (NAL) on January 24.

Responding to complaints of continuing interference on the input of a 2-meter repeater, FCC agents monitored the frequency last December 9. They observed "very strong signals on the frequency 146.31 MHz consisting of music, sound effects and unmodulated carriers" and no station ID. The FCC said the transmissions were "interfering with existing communications in progress" between other amateur stations.

The FCC said it used direction-finding techniques to determine that the source of the signals was Kamm's residence in Waterbury. The next day, an FCC agent monitored the same sorts of transmissions, tracked the source to Kamm's residence, and inspected Kamm's amateur station.

"The agent found an amateur radio transceiver capable of operating on 146.31 MHz," the FCC said. Kamm claimed no transmissions were made from his station and that he used the unit to receive only.

Based on its evidence, however, the FCC Kansas City office determined that Kamm "willfully and repeatedly" violated FCC Part 97 rules "by causing

intentional interference, broadcasting music and failing to identify with his station call sign." The FCC determined that the appropriate fine was $12,000 and ordered Kamm to pay the fine within 30 days unless Kamm seeks a reduction or appeals the proposed forfeiture.

Kamm already has come to the attention of the FCC's Enforcement Bureau. He was the target of several letters and an FCC Warning Notice from Special Counsel Riley Hollingsworth during 2002. Last fall, the FCC's Wireless Telecommunications Bureau set aside Kamm's amateur license based upon complaints about the operation of his station and questions regarding his qualifications to be a licensee. Kamm's license expired last September, and his renewal application has reverted to a pending status while the matter was referred to the Enforcement Bureau.

==>NEW YORK REINTRODUCES HAM RADIO ANTENNA BILLS

For the third year in a row, Amateur Radio antenna legislation has again been introduced in the New York Legislature. ARRL Hudson Division Director Frank Fallon, N2FF, says the text for the bills--one in the General Assembly and the other in the Senate--is identical to previous measures. Last year's bill passed in the State Senate but died in the Assembly's Rules Committee.

"We are off and running again with our tower bills," Fallon said this week. The bills, A2662 and S63, were introduced in late January with most of the same sponsors. Fallon said he expects the fact that the Senate passed an identical bill last year will be "a big advantage" to the 2003 efforts. Both bill have been referred to the respective Local Government committees.

S63 is sponsored by Sen Dale Volker while A2662 is sponsored by Assemblymen Ron Tocci and Paul Tonko. In memoranda of support attached to their bills, Volker and Tocci said that Amateur Radio operators, "provide an emergency communications network that is disaster-tested and robust" free of charge to the citizens of New York. "A key element of a radio amateur's capability to communicate is a small radio tower that is high enough to ensure effective communication," they added.

If the legislation is approved by the legislature and signed by Gov George Pataki, a former Amateur Radio operator, it would prevent passage of any political subdivision zoning ordinance by-law, rule, regulation, order or other local law or ordinance that would "prohibit or effectively prohibit the construction or use of an antenna support structure by a federally licensed Amateur Radio operator."

The legislation also would require municipalities to adhere to the provisions of the limited federal preemption known as PRB-1, and their wording mirrors that preemption. Municipal ordinances impacting the placement, screening or height of antenna support structures "must reasonably accommodate effective operation of amateur radio antennas and shall impose the minimum regulation necessary to accomplish the political subdivision's legitimate purpose," the bills' texts read.

But the New York bills go beyond simply incorporating PRB-1 into state law. They would prohibit municipalities from passing laws or ordinances to "restrict antenna support structure height to less than 95 feet above ground level or restrict the number of antenna support structures."

More information on the New York antenna bills is available on the New York State Legislature Web site <http://public.leginfo.state.ny.us/menuf.cgi>.

==>SOLAR UPDATE

Solar soulman Tad "You Give me Fever" Cook, K7VVV, Seattle, Washington, reports:Sunspot numbers were lower this week, into the double-digits below 100. The average daily number was about 54 percent lower than the previous week, and daily average solar flux was off by nearly 20 points, or about 14 percent.

Earth has been affected by a high-speed solar wind since February 15, and this hurt conditions during the ARRL International DX Contest last weekend, at least in the higher latitudes. Both mid-latitude and planetary K indices were as high as 4 on Saturday and Sunday, and Alaska's high-latitude College K index was up to 6 on both days. This was especially detrimental to signals traveling over polar paths. But in a few days conditions improved, and on Wednesday evening during a visit to K7SS I had good signal reports into Kuwait running 100 W beaming over the pole using his new three-element continuously tunable Yagi.

Geomagnetic conditions are expected to be unsettled on Friday, with a planetary A index around 20. Solar flux should rise, with predicted values of 120 for Friday and Saturday and 125 for Sunday and Monday. Current projections show solar flux peaking around 150 from March 6-8.

Sunspot numbers for February 13 through 19 were 113, 113, 96, 41, 16, 51 and 57, with a mean of 69.6. The 10.7-cm flux was 130.6, 131.4, 123.6, 118.5, 112.1, 109.9, and 116.3, with a mean of 120.3. Estimated planetary A indices were 8, 19, 18, 15, 11, 17, and 12, with a mean of 14.3.

==>IN BRIEF:

* This weekend on the radio: The CQ 160-Meter Contest (SSB), the REF Contest (SSB), the UBA DX Contest (CW), the FYBO Winter QRP Field Day, the North American QSO Party (RTTY), the Russian PSK WW Contest, the High Speed Club CW Contest, the North Carolina QSO Party and the CQC Winter QSO Party are the weekend of February 22-23. JUST AHEAD: The ARRL International DX Contest (SSB), the Open Ukraine RTTY Championship and the DARC 10-Meter Digital Contest are the weekend of March 1-2. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the Radio Frequency Interference (EC-006) and Satellite Communications (EC-007) courses opens Monday, February 24, 12:01 AM

Eastern Standard Time (0501 UTC). Registration will remain open through Sunday, March 2. Classes begin Monday, March 3. No seats remain during this registration period for the ARRL Level III Amateur Radio Emergency Communications course (EC-003). Registration for the HF Digital Communications course (EC-005) remains open through Sunday, February 23. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course to be advised via e-mail in advance of registration opportunities. Send an e-mail to prereg@.... On the subject line of your message, include the name or number (eg, EC-00#) of the course you'd like to take. In the message body, include your name, call sign, e-mail address and the month you want to start the course. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* Correction: The story "Utah Amateur Radio Antenna Bill on its Way to Governor's Desk," in The ARRL Letter, Vol 22, No 07, contained some incorrect information on the Senate vote. The bill unanimously passed a third reading in the Utah Senate February 14 on a 23-0 vote. More information on this legislation is available on the Utah Amateur Radio Club's "News About UARC and Ham Radio in Utah" Web site <http://www.xmission.com/~uarc/anounce1.html#prb1bill>.--some information from Gordon Smith, K7HFV.

* Indiana amateur antenna bill passes Senate: Indiana's Amateur Radio antenna legislation, Senate Bill 109, passed the Indiana Senate with a vote of 41-8. SB 109, The Regulation of Amateur Radio Antennas, would incorporates the essence of PRB-1 into the state's laws and prohibit any county or municipality from restricting the height of amateur radio antennas to less than 75 feet above ground. "This legislation would not likely have passed without the efforts of many Indiana amateurs who contacted their state senators and urged passage of SB 109," said ARRL Indiana Section Manager Jim Sellers, K9ZBM. "My thanks to every Indiana amateur who took the time to contact their state senators and urged passage of this Legislation." Sellers also thanked State Government Liaison David Spoelstra, N9KT, as well as the bill's author and sponsor State Sen Rose Ann Antich. The bill next goes to the Indiana House of Representatives. ARRL Central Division Director Dick Isely, W9GIG, congratulated Sellers and "all the Indiana amateurs that have been working long and hard to get the provisions of PRB-1 embedded into Indiana law."

* ARRL to sponsor emergency communications course seminar: The ARRL will offer a free Amateur Radio Emergency Communications course (ARECC) seminar March 8, in conjunction with the 2003 Roanoke Division Convention in Charlotte, North Carolina. The seminar will not include the Level I course itself. This program is designed to explain in greater detail the duties of volunteer certification mentors, instructors and examiners of the Amateur Radio Emergency Communications courses and provide additional information for those considering these volunteer positions. "With Level I emergency communications training being offered nationwide under the

homeland security grant from the Corporation for National and Community Service, we hope to have all ARECC team players reading from the same page to ensure success under the federal grant guidelines," said ARRL Emergency Communications Course Manager Dan Miller, K3UFG. The seminar will be held Saturday, March 8, at the Charlotte Merchandise Mart, Independence and Freedom Halls, 2500 E Independence Blvd. Seating may be limited. Contact Dan Miller, K3UFG, k3ufg@...; 860-594-0340; fax 860-594-0259, at ARRL HQ if you plan to attend. For registered CMs, CIs and CEs who attend, mileage may be reimbursable up to a total of $35. Seminar attendance does not include admission to the convention, which is March 8 and 9. For more information on the 2003 Roanoke Division Convention, visit the sponsoring Mecklenburg Amateur Radio society Web site. <http://www.w4bfb.org/hamfest2003/hamfest.html>.

* ARRL seeks assistant technical editor: ARRL has an opening for a full-time Assistant Technical Editor at ARRL Headquarters in Newington, Connecticut. The job has a wide range of responsibilities involving several ARRL publications. Primary responsibilities are as QST product review editor, National Contest Journal handling editor and editor of The ARRL Repeater Directory. Among other qualifications, the successful candidate will have a broad knowledge of and experience with Amateur Radio and electronics, especially the design and construction of Amateur Radio equipment, antennas and accessories; a college degree, preferably in a related field; a minimum of one year of writing or editing experience; an Amateur Radio license. The starting date for this position is on or around August 1, 2003. More information is available on the ARRL Web site <http://www.arrl.org/announce/jobs/>. Send resume and cover letter to Robert Boucher, ARRL, 225 Main St, Newington, CT 06111, or via e-mail rboucher@... or fax (860-594-0298). No telephone calls, please. ARRL is an Equal Opportunity Employer.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

1047. Sunset from columbia

Check this out...

This is photograph was taken by the crew on board of "The Columbia" during its last mission.

This photograph was taken via satellite, on a cloudless day .The picture is of Europe and Africa when the sun is setting. Half of the picture is in night.

The bright dots you see are the cities lights

The top part of Africa is the Sahara Desert. Note that the lights are already on in Holland, Paris, and Barcelona, and that's it's still daylight in London, Lisbon, and Madrid.

The sun is still shining on the Strait of Gibraltar.

The Mediterranean Sea is already in darkness.

In the middle of the Atlantic Ocean you can see the Azores Islands; below them to the right are the Madeira Islands; a bit below are the Canary Islands; and further south, close to the farthest western point of Africa, are the Cape Verde Islands

Note that the Sahara is huge and can be seen clearly both during daytime and night time

To the left, on top, is Greenland, totally frozen... Fantastic photograph!

1048. Re: [m_a_r_s] Sunset from columbia

Dear Mehul,
It's a great picture.
Thank you for sending the picture.
Keep it up.
Happy Landings !!!!!

The ARRL Letter
Vol. 22, No. 09
February 28, 2003
***************

IN THIS EDITION:

* +All-ham ISS crew returning via Soyuz capsule
* +ARRL concerned about proposed 70-cm changes
* +Hams aid debris search in Western states
* +FCC lifts ham ticket of Michigan pirate broadcaster
* +Hurricane conference looks ahead to stormy skies
* +Ham-concert pianist plans cancer run
* Solar Update
* IN BRIEF:
This weekend on the radio
ARRL Certification and Continuing Education course registration
Seats still available for ARRL RFI course
+4L4FN leaving North Korea
Kentucky ARES teams have busy month
Pioneer 10 spacecraft sends last signal
Summits on the Air (SOTA) encourages portable hilltop operation

+Available on ARRL Audio News

============================================================

==>ISS CREW TO RETURN TO EARTH VIA RUSSIAN SOYUZ CAPSULE

The all-ham crew aboard the International Space Station will return to
Earth in early May via the Russian Soyuz escape vehicle. Appearing before
the US House Science Committee February 27, NASA Chief Sean O'Keefe said
that the 16 ISS partner countries have agreed to use the Russian capsule
to ferry a new two-person crew to the station--one American and one
Russian--and to bring the current three-man crew home. The shuttle fleet
remains grounded in the wake of the Columbia tragedy.

"There are no threats to the ISS or its crew in the near term, and we are
working options to be able to sustain both over the long term," O'Keefe
said in remarks prepared for delivery to the lawmakers. O'Keefe noted that
the ISS would run short of potable water by June and that the Soyuz 5S
vehicle now attached to the ISS will reach its lifetime limit in late
April or early May and need to be returned. The fresh crew would remain in
space until October, when a new crew would be sent up.
```

Additional unmanned Russian Progress cargo rocket flights will be scheduled to keep the ISS supplied--the next arriving shortly after the new crew in June. That Russian Progress supply mission will carry enough food, water, fuel and other provisions to sustain the two-person crew in space at least through October.

The implications of a two-person crew on the Amateur Radio on the International Space Station (ARISS) program are not yet fully clear. A successful ARISS school contact with Hochwald Gymnasium in Wadern, Germany, was completed via DL0WR on February 27.

"Things continue to be very dynamic as the Columbia accident investigation unfolds," ARISS International Chairman Frank Bauer, KA3HDO, said February 27 in reaction to O'Keefe's announcement. "Despite the reduction in crew size, the ARISS team has been told that we will continue to perform one to two ARISS school group contacts a week." Bauer said since less scientific work will happen while the shuttle program is on hold, opportunities for school contacts will remain the same.

Crew member Don Pettit, KD5MDT, also was reported on the air this week seeking random contacts from NA1SS. Stan Vandiver, W4SV, in Indiana, reports he worked NA1SS February 27, but added that he'd heard that Pettit has been on the air on other occasions as well. The ISS downlink frequency is 145.800 MHz.

But the substitution of the Russian Progress rockets for the shuttle as a transportation system between Earth and the ISS will strictly limit the amount and type of supplies and equipment carried to the space station. The priorities will be food and water. This means that the ARISS hardware--including SSTV and all-mode HF/VHF/UHF gear that was planned to be flown this year--probably will be delayed, Bauer said.

O'Keefe meanwhile said that the ISS partnership was "committed to maintaining crew on-orbit." He told the House Science Committee that the new, two-person crew was training on Soyuz systems at Russia's Star City cosmonaut training center.

Now onboard the ISS are Expedition 6 Commander Ken Bowersox, KD5JBP, NASA ISS Science Officer Don Pettit, KD5MDT, and Flight Engineer Nikolai Budarin, RV3FB. The crew this week resumed a full schedule of maintenance and research work on the space outpost. The Expedition 6 team will mark 100 days in orbit on March 3.

NASA has not yet revealed who the two new ISS crew members will be. Originally set to replace the current crew next month was the Expedition 7 team of Commander Yuri Malenchenko, ISS Science Officer Ed Lu, KC5WKJ, and Flight Engineer Alexander Kaleri, U8MIR. The back-up Expedition 7 crew member is Mike Foale, KB5UAC. All four are now training in Russia.

Bauer said he considers the option to fly Lu and Malenchenko on Expedition 7 "the highest probable scenario, in my opinion. But is not definite yet." Pedro Duque, KC5RGG, who planned to use the ARISS equipment on the upcoming Soyuz flight, will probably fly in the fall, Bauer speculated.

Malenchenko and Lu have worked together in space before. During a shuttle Atlantis mission in 2000, the Russian and the American conducted a more-than-six-hour space walk to install equipment on the then-unoccupied ISS. That same shuttle flight also delivered the initial ARISS VHF and UHF hand-held transceivers, a packet TNC and other ham gear.

==>ARRL EXPRESSES CONCERNS ABOUT HAM RADIO IMPACT OF 70-CM CHANGES

The ARRL says two FCC-proposed actions could negatively affect Amateur Radio. One would substantially expand the geographical area in the US subject to power limitations on 70 cm. The other would deploy National Weather Service wind-profiler radars in the 448-450 MHz segment.

"The Commission has proposed two actions that have a potentially substantial adverse impact on a large number of Amateur Radio operators in this proceeding," the ARRL said in comments filed this month in ET Docket 02-305. "In each case, the Commission can minimize that impact."

In a Notice of Proposed Rule Making (NPRM) late last fall, the FCC proposed on behalf of the National Telecommunications and Information Administration (NTIA) to--among other things--more than double the size of the geographical area in New Mexico and Texas where amateurs in the 420-450 MHz band would be limited in power to protect military radiolocation service operations. Amateur transmitters in certain geographical areas already are limited to 50 W PEP "unless expressly authorized by the FCC after mutual agreement, on a case-by-case basis" between the FCC district director and the applicable military frequency coordinator--§97.313(f). The NPRM also reflects action by NTIA specifying the operation of federal government wind profilers in the band 448-450 MHz.

Acknowledging that the Amateur Service is secondary to government services in the band, the ARRL nonetheless asked the FCC to ensure that the affected zone in Texas and New Mexico "is minimized as much as possible, consistent with protection of military facilities." The ARRL also requested the FCC to create "a streamlined procedure for case-by-case exemptions" from the power restrictions.

"It is difficult for ARRL to address the contention of the Army that amateur power in excess of 50 W PEP in the additional protected areas requested by the Army would cause interference to military radiolocation facilities involved in missile tracking," the League said in its comments, "because the claim made by the Army is not substantiated by any technical information." The proposed area would include all of New Mexico and all of Texas west of 104 degrees W longitude. The ARRL said it was "not intuitively obvious" that such a large restricted area was necessary.

The ARRL concluded that a 50-W power restriction was "not a substantial burden" on many FM repeater users but that it could mean lowering the outputs of some critical repeaters used for emergency and public service work or taking them off the air altogether. It also could affect so-called weak-signal, experimental and Earth-Moon-Earth operations, the ARRL said. More than five dozen repeaters in the affected region could be affected,

the League estimated.

Concerning the wind profilers, the League said it had understood that the National Weather Service--which operates the radars--would notify ARRL of their locations as selected. "Ideally," the League said, "since the amateur repeaters are incumbent in the band now, the National Weather Service should select sites that minimize the effect on those repeaters."

The complete text of the ARRL's comments, the FCC NPRM and other documents are available via the FCC's Electronic Comment Filing System (ECFS) site <http://www.fcc.gov/cgb/ecfs/>. Click on "Search for Filed Comments" and enter "02-305" in the "Proceeding" field.

==>HAMS AID COLUMBIA DEBRIS SEARCH IN WESTERN STATES

Amateur Radio operators continued their involvement with efforts to locate space shuttle Columbia debris, as NASA's search shifted focus to include points west of Texas. According to NASA, the search for parts is running along the shuttle's re-entry path--basically 60 miles north or south of a line from San Francisco, California, to Lafayette, Louisiana.

New Mexico amateurs were among those helping to check in the Albuquerque area. "Based on a number of sources and analysis, NASA had reason to believe that debris from the shuttle Columbia may have impacted in Embudito Canyon," read a statement on the New Mexico Search and Rescue Support Team Web site <http://www.nmsarsupport.org/>. The team includes a number of hams in its ranks.

NASA wanted to follow up on both radar and eyewitness reports of possible shuttle debris in Embudito Canyon--in the Sandia Mountains east of Albuquerque. Authorities asked the NM SAR Support Team to provide communication and incident base support February 15 for a massive search involving more than 150 searchers. Although several small objects were found in the rugged terrain, none were attributed to the Columbia.

Keith Hayes, KC5KH, of the NM SAR Support Team estimates that more than 40 Amateur Radio operators participated in the effort, serving as incident command staff, providing communications for tactical and logistics support, and as members of field search teams.

"In addition to providing tactical and logistical support with its specialized communications trailer, 14 ham radio members of the New Mexico SAR Support Team provided additional APRS tracker and field team GPS track data collection," Hayes said. "Bernalillo County ARES Search and Rescue provided additional off-site logistical communications."

On February 24 near Caliente, Nevada, investigators continued to look for possible debris from Columbia that was tracked by air traffic control radar. Materials have been found in the area, but so far none have been confirmed to be from Columbia, NASA said.

NASA has asked anyone in Arizona, Nevada, New Mexico, and Utah for help in locating any material that may have fallen from Columbia as it was

re-entering Earth's atmosphere. "Everyone is asked to be on the lookout for possible shuttle material 60 miles north or south of the re-entry track," NASA said in a news release.

==>MICHIGAN PIRATE BROADCASTER BANNED FROM HAM RADIO FOR FIVE YEARS

The FCC has canceled the license of a Michigan Amateur Radio operator and told him he may not apply for another ham ticket until 2007. The Commission took the action against Thomas A. Brothers, ex-KI8BE, of Berkley, because he'd been the operator of an unlicensed FM "pirate" radio station.

FCC Special Counsel Riley Hollingsworth wrote Brothers February 14 to confirm receipt of his amateur license--which Brothers had agreed to surrender. The FCC also had imposed a $10,000 fine against Brothers, who's in his early 20s, but rescinded the forfeiture last December because of Brothers' demonstrated inability to pay. Brothers' Advanced class ticket was cancelled December 5, 2002. He had been licensed since 1997 and formerly held the call sign KC8CRI. Hollingsworth said he requested the five-year reapplication hiatus.

FCC sources say the Commission's Detroit Field Office became aware as early as 1998 that Brothers was operating an FM pirate radio station on 88.3 MHz from his home. On multiple occasions, an FCC agent used direction-finding gear to track the signal to Brothers' residence and sent Brothers Warning Notices ordering him off the air. Brothers ceased the pirate broadcasting in 1998, but by 2000 he was back on the air, and an agent from the Detroit Field Office again traced the broadcast signal to Brothers' home at least twice in 2000 and 2001, following up with Warning Notices.

In January 2002, the FCC issued Brothers a Notice of Apparent Liability for $10,000 for repeatedly violating Section 301 of the Communications Act by operating an FM station without a license. In a subsequent Petition for Reconsideration, Brothers did not dispute that he willfully and repeatedly has violated Section 301, but he asked the FCC to cancel the fine because--among other factors--of his inability to pay. The Detroit Field Office turned the case over to Hollingsworth late last year to consider sanctions against Brothers' Amateur Radio license.

==>AMATEUR RADIO HURRICANE CONFERENCE LOOKS AHEAD TO STORMY WEATHER

The upcoming 2003 hurricane season was the focus earlier this month as Amateur Radio volunteers, the National Hurricane Center's W4EHW Amateur Radio Group, representatives of the Hurricane Watch Net and emergency officials gathered for the eighth annual Amateur Radio Hurricane Conference. Among the approximately 50 attendees February 1 at the National Hurricane Center (NHC) <http://www.nhc.noaa.gov/> in Miami were representatives from the US as well as from throughout the Caribbean.

"The presentations, post-season analysis and discussions are very helpful in preparing for the coming hurricane season," said Julio Ripoll, WD4JR,

the NHC's assistant Amateur Radio coordinator.

ARRL Public Service Team Leader Steve Ewald, WV1X, highlighted the latest news in emergency communication training from ARRL through the Amateur Radio Emergency Communications courses <http://www.arrl.org/cce/courses.html>. He also explained how the federal Corporation for National and Community Service (CNCS) grant was expanding opportunities for hams nationwide to take the Level I Amateur Radio Emergency Communications course. Ewald also discussed how the ARRL Field Organization serves as a ready resource during emergencies.

National Hurricane Center Amateur Radio Coordinator John McHugh, KU4GY, and Ripoll organized and led the annual event. Among other things, they brought attendees up to date on the latest news and activities of the 36-member team of Amateur Radio Station W4EHW. The station will adopt a new call sign, WX4NHC, on June 1 at the start of the new hurricane season. Ripoll said the new call sign would give "better on-the-air recognition, as WX is understood to mean weather, and NHC is well-known for National Hurricane Center."

W4EHW celebrates its 23rd year of continuous service this year. Calling upon a staff of trained volunteers, the NHC's amateur station activates during tropical storms or hurricanes and gathers and disseminates real-time, surface-level weather data from hams and other volunteer observers. NHC forecasters use the data and information to develop their forecasts. During the 2002 hurricane season, W4EHW was on the air for more than 140 total hours, gathering over 300 reports via 20 meters (14.325 MHz) and, for the first time, via the Internet Radio Linking Project (IRLP) VHF/UHF repeater network. Hurricane Watch Net Manager Mike Pilgrim, K5MP, told the conference that he expects the HWN to explore the possibility of accepting hurricane reports via EchoLink in the coming season.

Hurricane Hunter aircraft pilot Capt Dave Tennesen, NL7MT, told the conference that he's never without ham radio onboard, and he's been known to occasionally check into the Hurricane Watch Net during his Hurricane Hunter flights. "Ham radio serves as a vital backup link to NHC if other means of communications fail," he said.--information from Julio Ripoll, WD4JR, and Steve Ewald, WV1X

==>CONCERT PIANIST-HAM'S RUN TO BENEFIT CANCER RESEARCH

Combining music, athletics and Amateur Radio to raise funds and awareness for cancer research, Martin Berkofsky, KC3RE, is set to run from Tulsa, Oklahoma, to Arlington Heights, Illinois, this spring and summer. An internationally known concert pianist and music scholar, Berkofsky plans to celebrate his 60th birthday and his recovery from cancer with the 700-mile "Celebrate Life Run." Along the way, he hopes to contact as many hams as possible on VHF and UHF as he navigates the back roads of the Midwest.

"The plan is to cover 10 miles a day, six days a week," Berkofsky said. "Of course, there will be days of bad weather and stubbed toes, but there is more than sufficient time allowed."

The run starts on his birthday, April 9, at the Cancer Treatment Centers of America Hospital in Tulsa, where he was treated. Berkofsky expects to reach his destination--the headquarters of the Cancer Treatment Research Foundation in Illinois--in late August. He plans to kick off his run with a free piano concert in Tulsa.

Berkofsky said he's obtained a copy of ARRL's TravelPlus for Repeaters CD-ROM to determine the locations of repeaters along his route. He'll raise funds through donations at his three performances and through per-mile sponsorships from groups and individuals. All proceeds from the events go to the Cancer Treatment Research Foundation.

Berkofsky suggested those interested should check the Web site of his Cristofori Foundation < http://cristoforifund.tripod.com/>. Once the run is under way, Cancer Treatment Centers of America plans to track Berkofsky's progress on its Web site.

Throughout his life, Berkofsky has enjoyed a parallel fascination with electronics and music. A child prodigy at the piano, he was licensed in 1957 at age 14, first as KN3HDW, later K3HDW. Berkofsky has performed, taught and operated from more than 25 countries and is renowned in the music world for his Liszt performances and scholarship.

==>SOLAR UPDATE

Solar sage Carl Luetzelschwab, K9LA, fills in this week for Tad "Sunshine, Sunset" Cook, K7VVV: Solar activity during the reporting period, Friday, February 21, through Thursday February 27, was very low to low. The largest X-ray flare was a C5 event on Saturday. There were no radio blackouts (R in the WWV announcement) or proton events (S in the WWV announcement) during the period.

Geophysical activity was quiet to active from Friday through Wednesday and ranged from unsettled to minor storm on Thursday. There were no significant geomagnetic storms (G in the WWV announcement) during the period. The minor storminess on Thursday only lasted about nine hours.

Solar Cycle 23 continues its descent. Cycle 23 peaked in April 2000 with a smoothed sunspot number of 121. A second peak occurred in November 2001 at a smoothed sunspot number of 116, which gave 6-meter aficionados worldwide F2 propagation. Cycle 23 is predicted to reach its minimum in the 2006-2007 timeframe.

This weekend is the ARRL International DX Contest (SSB). For the contest period, solar activity is expected to be low, and the geomagnetic field is expected to be unsettled. This translates to generally decent propagation. Cycle 23's decline will take its toll on 10 meters, however. The East Coast should still have decent 10-meter openings into Europe, and the West Coast should still have decent 10-meter openings into Asia. But 10-meter

openings from the East Coast to Asia and from the West Coast to Europe, along with openings to Europe and Asia from the Midwest, could be tough. So enjoy 10 while you can. This contest is also a good opportunity to work new countries for your DXCC award.

Sunspot numbers for February 20 through 26 were 66, 87, 53, 41, 44, 48 and 45, with a mean of 54.9. The 10.7 cm flux was 118.3, 119.6, 106.6, 104, 102, 101.6 and 109.4, with a mean of 108.8. Estimated planetary A indices were 16, 13, 11, 11, 6, 5 and 16, with a mean of 11.1.

==>IN BRIEF:

* This weekend on the radio: The ARRL International DX Contest (SSB), the Open Ukraine RTTY Championship and the DARC 10-Meter Digital Contest are the weekend of March 1-2. JUST AHEAD: The South African Radio League (SARL) Field Day Contest, the RSGB Commonwealth Contest (CW), the North American Sprint (RTTY), the UBA Spring Contest (CW), the NSARA Contest and the Wisconsin QSO Party are the weekend of March 9-10. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration opens Monday, March 3, 12:01 AM Eastern Time (0500 UTC), for the on-line Level I Emergency Communications course (EC-001). Registration remains open through the March 8-9 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, March 18. Thanks to the federal homeland security grant from the Corporation for National and Community Service, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the course. During this registration period, approximately 200 seats are being offered to ARRL members on a first-come, first-served basis. Senior amateurs are strongly encouraged to take advantage of this opportunity. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course to be advised via e-mail in advance of registration opportunities. Send an e-mail to prereg@arrl.org. On the subject line of your message, include the name or number (eg, EC-00#) of the course you'd like to take. In the message body, include your name, call sign, e-mail address and the month you want to start the course. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@...; 860-594-0340.

* Seats still available for ARRL RFI course: Seats remain available for the Radio Frequency Interference (EC-006) and Satellite Communications (EC-007) courses <http://www.arrl.org/cce/courses.html>. Registration will remain open through Sunday, March 2. Classes begin Monday, March 3. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program

Coordinator Howard Robins, W1HSR, hrobins@....

* 4L4FN leaving North Korea: Ed Giorgadze, 4L4FN, the first amateur to operate extensively from North Korea and to earn DXCC from that entity, will leave for his next duty assignment March 1. Last fall, after about one year of operation, Giorgadze--an employee of the United Nations World Food Program who had been operating as P5/4L4FN from Pyongyang--was ordered off the air by North Korean authorities. The ARRL accredited SSB and RTTY operation of P5/4L4FN for DXCC, and Giorgadze himself earned a mixed DXCC Award during his stay. As of the end of his operation last November 22, P5/4L4FN had logged a total of 16,194 QSOs (12,170 unique call signs) that included 167 DXCC entities worked. More information on P5/4L4FN is available on the AMSAT Net Web site <http://www.amsatnet.com> of QSL Manager Bruce Paige, KK5DO. Click on "P5 North Korea."

* Kentucky ARES teams have busy month: Amateur Radio Emergency Service members stood ready to help February 20 after an insulation factory exploded near Corbin in southern Kentucky. The blast killed one worker and injured 43 others. With the area still reeling from an ice storm and flooding earlier in the month, commercial communication and power system delivery were spotty. Kentucky Section Emergency Coordinator Ron Dodson, KA4MAP, said there were initial reports that burn victims from the factory fire also possibly suffered cyanide exposure. He said Kentucky ARRL Official Emergency Station Ron Nutter, KA4KYI, was instructed by Lexington Emergency Management to help with getting vital chemical information from the affected area to treating hospitals, so doctors would be prepared for the injured and implement decontamination procedures. Nutter contacted two other Lexington hams--William DeVore, N4DIT, and Joseph Leitner, WD4EJA, both of whom still had power at their residences--to call into Corbin-area repeaters and ask for information on the chemicals. It was determined subsequently that there was no chemical contamination of the injured. The factory disaster apparently began near a furnace, where raw fiberglass is mixed with a resin. The blaze sent black smoke billowing through residential areas, forcing hundreds of people to temporarily evacuate. On February 24, operations ceased for amateurs involved Lexington-Fayette County ARES in response to the weather emergency. ARES members were on duty for more than a week.

* Pioneer 10 spacecraft sends last signal: Talk about weak-signal DX! NASA says that after more than 30 years, it appears the venerable Pioneer 10 spacecraft has sent its last signal to Earth. Pioneer's last, very weak signal was received on January 22. NASA engineers report Pioneer 10's radioisotope power source has decayed, and it may not have enough power to send additional transmissions to Earth. NASA's Deep Space Network (DSN) did not detect a signal during the last contact attempt February 7. The previous three contacts, including the January 22 signal, were very faint with no telemetry received. The last time a Pioneer 10 contact returned telemetry data was last April 27. NASA plans no additional contact attempts for Pioneer 10, which is 7.6 billion miles from Earth. At that distance, it takes more than 11 hours 20 minutes for the radio signal to reach Earth. More information is available on the Pioneer 10 Web page

<http://nssdc.gsfc.nasa.gov/nmc/tmp/1972-012A.html>.

* Summits on the Air (SOTA) encourages portable hilltop operation: Richard Newstead, G3CWI, is encouraging participation by US amateurs in the Summits on the Air (SOTA) program, which promotes portable, hilltop operation. "It started about a year ago, and, so far, seven countries have schemes running," Newstead told ARRL. "The scheme is based on a core set of rules, and each country adds its list of summits to enable it to participate." Newstead says the list of summits need not be comprehensive but must include a mix of easy and difficult peaks. He says there are awards for both activators and chasers. Details are available on the SOTA Web site <http://www.sota.org.uk> or by contacting SOTA General Manager John Linford, G3WGV, <g3wgv@...>.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRL Web site <http://www.arrl.org/> offers access to news, informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled from The ARRL Letter.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your

e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

1050. Monthly Meeting.

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The Monthly meeting of March 2003 will be held on 9th march 2003 at 10:00 hours at B.S.Bengelle Girls High School.

The Agenda for the meeting is as follows:-

1. Briefing for the VHF field Exercise to be held on 16th March 2003.
2. Preparations for A.G.M.
3. Display of RCL - VHF base Station (30 Watts).
4. Finalizing the list of bulk import of Radio sets (HF & VHF)
5. Proposal for the starting of next batch of Ham Radio classes.
6. Distribution of pending I.D Cards and caps. (Especially New Callsigns Holders)
7. Collections of fees for 2003 -2004 & life membership fees.

All members are requested to kindly attend the meeting on time.

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

You are aware that MARS is planning to put up 2 VHF repeaters in Mumbai. The first location is going to be in Andheri (Lokhandwala Complex) which will give us full VHF connectivity in Mumbai.

The Second repeater is likely to be placed on the Mumbra Hill near Thane, which will give us connectivity with Nasik, Pune ,Gujrat etc...The priminery site inspection is already conducted by VU2GT, VU2NLF, Milind Korde & Anish Korde.

In order to finalize the above mentioned location, a field survery will be conducted by MARS, Many teams will head in different different directions from Mumbai such as One team will head for Pune other to Nasik & other to Dahanu and so on....

All the teams will try to establish contact with the base team on Mumbra Hills (Thane) from their field location. This will give us the idea of the Coverage of our proposed repeater.

The above exercise will be conducted on 16th March 2003 (Sunday). Some teams will be leaving for their locations on Saturday and have a 2 days outing. (Optional).

The briefing for this exercise will be conducted during the monthly meeting on 9th March 2003 at 10:00 am. (Sunday). All members wishing to participate for this VHF Exercise are required to attend the Briefing meeting.

Please note members not attending the briefing meeting will not be allowed to participate for the Field Exercise. (Discipline is a must in order for a succesful exercise and planning).

Looking forward to having a eyeball with on sunday.

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

A special meeting for the Disaster Communications Team (Scramble Team) will be conducted on Sunday 9th March 2003 at 09:00 am (Before the monthly meeting). A final list of the Scramble team members will be prepared during this meeting.

All the permenant members of the team and the SWLs desiring to join the team are required to attend the meeting without fail.

Scramble Team members will be required to sign a declaration (Undertaking) to join and be a permenant member of this elite team.

In Future only the permanant members of this team will be allowed to participate in the field exercises for Special Training. hence you have to decide now that weather you are IN or OUT.

The Rules and Dicipline will be very strict and you would be required to move out at short notice of 12 hours even during simulation exercises. So therefore please understand this is not for any tom,dick and harry. only the serious members will total commitment will be in this team.

Please do not confuse between field exercise and Scramble Team Exercise, (Field exercise is for simple training where as Scramble Team is Advance Training of field Operation and Survival Training).

Members not joining the team are requested NOT to attend this meeting (As they will not be allowed anyway) and come only at 10:00 am for the monthly meeting.

Members failing to attend this meeting will not be allowed to be on the team. SO MAKE SURE YOU ARE THERE.

73
VU2NLF
Scramble Team Leader.

1053. Picture from Space

Hi all on frequency!

Further to the picture in question (Sunset from Space) here is something I found disputing it. May be one can tell us whether the argument is justified. Don't miss the (proposed) conclusion.

73
VU2NHR
(Nirav)

QUOTE
This picture could be taken by Columbia but definitely not during last mission. The last mission of Columbia was during winter in Northern Hemisphere. Which means sun sets earlier in the higher latitudes (northern parts) than at lower latitudes (near equator). So for the same longitude the northern parts should go in darkness earlier than the southern parts. If you notice the eastern part of Britain is still in sunlight (which is longitude of 2 deg. east from Greenwich). At the same time the eastern coast of Norway(longitude 5 deg. east) is also in sunlight. Whereas, very small northern portion of France is still in sunlight and in Africa the sun is just setting over Liberia (longitude 5 deg. west) Which indicates that sun is setting later near the north than near the equator. Take a look at map and mark the location of line separating sunlight from dark and it will be clear to you. This picture has to be taken in the summer. Last time Columbia was launched in summer was on July 23, 1999. (Mission STS-93). So if this photograph is from Columbia, it's from their 1999 mission but definitely not from their last mission.

One other problem I have with this picture is that "Celtic Shelf" (Low depth sea around Britain)and "Atlantic Ridge" (the fracture lines in the earth's crust under the ocean (also known as trench lines) which push continents away from each other are visible in the picture (just as they would in a map). These trench lines are more than 10000 feet deep in the ocean and no matter how clear the water is, they are never visible from outer space. "Celtic shelf" itself is few thousand feet deep and it's unlikely that it would be seen through outer space. So my guess is that someone superimposed the map of earth on NASA's picture and created this composite. That's why the color of the land appears to be similar to the colors which you normally see in a map. (otherwise Sahara desert does not extend continuously to the eastern coast of Africa).

In conclusion, this is definitely not a photograph and it's definitely not from the last mission of Columbia. However, I must admit that this picture is spectacular.

Hello YL/OM,

Here is some Morse code for characters that may be all of us did not learn (including me though we were quite good at the time of the exam in both speed and accuracy for non-radio-officer standards). Are there any characters that have been missed and should be in this list?

My Perspective as a Newcomer
Don (AE6AT) (http://www.eham.net/user/profile/AE6AT)on March 5, 2003
View comments about this article! (http://www.eham.net/articles/4762#comments)

The Ham Community is amazing! I have been a Ham for only a little over a year and had almost no contact with Ham Radio before that. What I have experienced in that year as a Ham has caused me to have great regard, respect and admiration for Hams, and a sense of pride being one.
At first I listened a lot on the HF bands and heard the professional sounding way Hams talk to each other. Call signs, answering with information about their location and equipment, always courteous and considerate. I heard people who didn't want to have a long conversation continue talking and politely answer questions. I heard people make mistakes and be embarrassed but be politely excused with friendliness. I heard people helping people and talking about their problems with a sympathetic ear. I heard a Ham using a Braille machine get patience and understanding.
I read Ham magazines and was astonished at the level of technical expertise and detail I saw. Astonished at the wide variety of Ham activities; Casual operating, kit building, contesting, Morse code, Amateur TV, satellites, repeaters, antennas, mountain topping, Dxpeditions, collecting counties, states, countries, QSL cards, public service, experimentation, clubs, Hamventions, Hamfests. The list goes on and on and on with each individual Ham choosing his favorites. I expect to be able to explore and enjoy the Ham experience the rest of my life.
So far I have principally operated on HF phone with only one simplex VHF contact since my location is in a rural mountain valley and is not very good for VHF. Although I can hear a number of repeaters I think repeaters are to be used for purposeful communications such as calling specific Hams, asking directions, talking to people you know or emergencies, so I don't use them.
I am working on my code speed and have great respect for the time and effort it takes to get to 20 words per minute. Being a new Extra Class I feel guilty and not genuine at only having to pass the 5 word per minute code test and have vowed to get to 20 words per minute. I can't imagine how anyone can do 30 or 40 or faster. Amazing, unfathomable.
I have read that Ham behavior on the air is representative of the behavior of the general populace. I don't believe so. From what I have seen and heard the Ham community is much better than that and I aspire to be a contributing and positive part of it.
When I am driving on the freeway and some one cuts me off and my temper goes past the legal limit, I remind myself I am Ham and what that means to me and it is easy to let it go.
I thank the Ham community for giving me this perspective and feeling of pride.
Respectfully from one operator to another,
Don

Don,
Congratulations on getting your Extra. Do NOT feel you are NOT a real ham, and do not let anyone tell you that! You have passed the exam, and you have every right to be proud of that fact.
You will meet a few "grouchies" here and elsewhere, who will say that if you didn't "hike 25 miles in 6 feet of snow when it's 20 below zero" just to take your exam, you had it too easy. Just Ignore them, and consider the source.

The important thing is be as courteous an operator as you can be, be helpful to those around you, respect other operators, and have fun! I hope to meet you on the air sometime soon!
73,
Larry WA9SVD

P.S. You will eventually recognize the callsigns of the "grumpies" an be able to filter out or ignore their negative comments. And remember, they are a minority.

I just got my Technician license on Feb. 17. I've been reading all I can in magazines and online. I just purchased a VHF/UHF radio, my first (Kenwood TM-D700A). I've been listening to conversations and have yet to make a QSO because, honestly, I don't want to screw up and violate any sort of norm or embarrass myself on my first attempt to contact someone.

I have a computer background and am fascinated at what can be done with packet radio and even with what is being done with Echolink and ARPS.

I live in Minnesota and most of the conversations I've listened to are on a repeater I found on (or near, I'm not sure. I think the St Paul club runs it, but am not positive yet) 146.850. I was amazed at the number of hams that checked in on Sunday night.

Passing the test was easy. Learning how things really work is much more difficult. I'll probably keep lurking in the background listening in and gathering information till I feel more comfortable with my radio and more secure in what I'm doing. In the mean time, I'll keep getting ready for the next test.

Don,

Bravo! And welcome to the wide, wonderful and (sometimes) crazy world of ham radio.

As to your Extra - look at it this way. I was first licensed in 1964 but didn't get my Extra until 2000 when they first dropped the 20 WPM requirement.

It's a long story about "stolen" frequencies due to "Incentive Licensing" etc. But never let anyone tell you that you are not a true ham! If you like CW then enjoy it - - it not - - that's great too! These days we have a multitude of modes and bands and only a few old codgers still believe that being a "real" ham requires mastery of a antiquated skill originally used to communicate messages between railroad stations!

Enjoy ham radio with two caveats:

1) Minimize your time on these websites - they eat up "on the air" time and they tend to be habituated by cranky old, unhappy (usually white) men.

2) Stay away from 75M phone for the same reasons!!!

73,
George*
KE2IV

*and yes, I am white, and yes I am getting old(er), but hopefully not too cranky and I only work DX in the window on 75M!!

Congrats on your new found hobby. I was a 2 meter tech from 1978 (I never was a novice) untill a couple years ago. It was always the code holding me back. I kept my license current but basically went inactive untill feb of 2001 when I bought a vx5r. What a neat little rig, when my last one was a new ft 101 ee!!

I decided to study for my general, and found I could be grandfathered in as a general as I had already passed the (then) general test and the 5 wpm in 1978. so I upgraded and a week an a day later I passed my extra. It was always the code holding me back. (I don't do well on foriegn languages either), any ways I had the knowledge thanks to 8 years in the Air Force in classified electronics, and I'm glad I am an Extra now.

Remember that you passed the test they gave at the time you upgraded, that is decided by the FCC not you. I am an extra lite with a quarter century of dues paid so where do I fit, ??? Any where I want.

Get on the repeaters and make frends, its just one more way to be aham. My buddies and I spot interesting DX now and then and tell each other on the repeater, amoung other things.

There are so many things to do as a ham, from antennas to satilites to tv to teaching others to helping with disasters and so on. I'm proud to be a ham, and at age 54 I am thinking about finally going after a private pilot license, if I pass the physical. why not, after all I made my extra and it only took 20 something years .. enjoy ... 73 tom

Congratulations!
I too am a recent Extra, and I can appreciate your perspective. It took me about a year after getting my tech license to get enough courage to get on 2 meters and actually TALK to someone. I've been an Extra for 8 months, and just last week made my first HF QSO via PSK31. When I took the 5 WPM General test I felt anxious knowing most of the VE's had taken the 20 wpm, but they were genuinely nice and made me feel like I had accomplished something when I passed. I've had some bad experiences with hams on websites like this, but most of the hams I've talked to "on the air" have been very helpful. I still feel like I'm somewhere between being a Tech and a "Paper Extra", but I'm learning quickly and more importantly having a blast.
So have fun, and maybe I'll hear you on airwaves sometime.

Regards,

James Rice KC8RXE

Don, congratulations on not only being a new ham, but an Extra also. We need to have more operators with as positive and an uplifting attitude as you. I, too, am an "Extra Lite", being licensed in 1999 and made Extra in 2000. In my short time as a Ham, I have seen both the good and the bad of Amateur Radio, but I love the hobby as much as you do. I love working HF mobile and psk31, and doing public service--especially the Ft Lauderdale Winterfest Boat Parade. Keep up the great attitude, help the hobby grow and become even better than it is. Remember, it is not just a hobby, it's an obsession!

From a ham who had to do 20 wpm to get his Extra, don't feel guilty! You have earned your Extra ticket and that is that.

Sometimes reading the flames that go on on the postings here and on qrz.com makes me wonder if hams are really as polite and positive as you say. Then I get on the air with an op who becomes a friend and I realize that these boards do not represent hams as a whole.
Great to have you aboard.
BTW: When I got my Extra, they had just recinded the 5 years as a ham requirement to get an Extra. I didn't feel guilty then either.

Excellent article. Although I've been licensed for nearly thirty years, I've recently relived the thrill of a new amateur as my wife and my daughter both obtained their first Amateur licenses within the past six months.

As has been mentioned in this thread, some new hams have a bit of trepidation about actually getting on the air. One suggestion is to get a copy of ARRL's "The Radio Amatuers Operating Manual". As you explore the wonderful variety of Amateur Radio activities, you can read the appropriate chapter in it to get you familar with the pecularities of a given mode/activiity before you actually try it. Having that knowledge greatly increases your confidence!

That goes for us older hams who still have the wonder of talking through the air and want to try something different!

Great article! I concur with your fascination with this hobby. I am a newcomer too (just upgraded to General 1/03) and I'm going to start studying for the Extra soon. KE2IV is right- stay mostly away from the discussion type forums and newsgroups, because the whiners and cranks tend to hang out there and there's no reasoning with these people. There is some good info to be had too, such as product reviews and homebrew advice, but you really need to separate the wheat from the chaff. I find it's better to talk with local hams and attend club meetings for good advice.

The good news is that there are lots of interesting, knowledgeable people out there to learn from and make friends with, so if you haven't already joined a radio club, I encourage this if there is one in your area. Hams are very helpful people and like to share

with they know with newbies.

KC0PED- I noticed that you're local to me- the 146.985 repeater belongs to WB0OND, is located in Inver Grove Heights and gets a lot of use. I belong to the St. Paul Radio Club, they are meeting this coming Friday at the Red Cross Building in downtown St. Paul, Robert & Plato Streets (basement level). I just joined and it seems like a fun group.

Here's to RF (radio fun)!

Holy cow, Don! Nicely said. It is very refreshing to hear someone new to the hobby express the same enthusiasm most of us had as newbies. I was first licensed in 1962 as a Novice and didn't have the time (or desire) to crank up the code speed until 1996. I practiced for a couple of weeks, then decided to take the Extra written to get it "out of the way". The VEC talked me into taking the Extra code portion of the exam as long as I was there. I was more surprised than anyone when I passed it....but that was the same way I had felt when I passed 5WPM and 13WPM. It's all relative.

Welcome to the greatest hobby on earth! Learn all you can and share it with others. Please continue to share your wonderful attitude too! It's so nice to hear.

Don,

Please don't feel guilty about being a 5 WPM Extra. You are 100% pure ham Extra. FYI, the code test way back in early last century was 5 WPM and those guys are regarded as gods.

Quite a few new hams on this thread. That sure cheers me up. We need new blood for sure.

Congratulations to all of you.

I was licensed as a novice in 1962 and passed the general exam at the FCC field office in 1963. I didn't go for extra until 3 years ago, sweated over a hot computer until I could copy 25wpm, passed the test, and I've only had 2 CW QSOs since. I like CW, it's just that I love to rag chew and I can say/hear a lot more in a given time on phone.

Listen for a topic on your local repeater that you know something about. When you feel that you have something to contribute, pipe up with your call sign and join in the conversation.

As for 75 meters, there are a few groups of grumps, but many more great people there. Just listen, you'll find them. (Try 3768 in the evening)

I too have always felt a sense of pride in being a ham. There is a lot of good stuff going on on all modes and on all frequencies. COMERCIAL BREAK...Consider getting involved in ARES and RACES...END OF COMERCIAL.

Welcome to all the newcomers here, and what a refreshing change to hear that you are all happy!

By all means, be 'radio active'. Try as many different things as your time and budget will allow, and keep working to improve you station. If you can contribute to the development of the new technologies that keep exploding all around us, please do. If not, be supportive of those that can!

Get involved with your local radio club (St. Paul is a good one!) and maybe try some public service events, do Field Day, and go see what your local ham neighbors demo at their meetings.

I don't know what an Extra Lite is - are those of us who took the Extra back in the 70's 'Extra Heavies'?
I resemble that remark! Work on getting your code speed up so you can get bigger scores in the contests and actually enjoy using the mode...

Congratulations and welcome to ham radio. I concur with all the comments to concentrate on the positive. Ham radio has lots of activities going on. Find a club, DX, VHF/UHF, general interest or whatever and get involved. Learn what can be found at hamfests, look for antennas in fleamarkets and look for new activities to involve yourself. Just when you think you've seen it all, someone will invent a new mode or a gadget that makes communicating easier.

Good luck, I hope to work you on the air soon.

Bill, W4WNT

Way to go, Don. I've been a Ham for 7 years, and I feel exactly like you do. I have a feeling that whoever Elmered you did it right! It is so wonderful to read positive things, as most stuff is someone telling us how wonderful and smart they are, or they or whining or complaining about some meaningless bullroar.

You will find your niche. Be patient. Don't worry about CW either. I would hope you might give it an extended try, as regardless of how old the mode may be, it gives great reward to those with the perserverence to develop some skill.

It is the hobby of a lifetime, that is for sure. Ham Radio is much more than operating, whatever might be your favorite mode. It is an attitude and a lifestyle. If you feel this way now, I would almost guarantee it will only get better for you. Don't worry about any idiots you run into, just don't let them upset you. I sure hope to run into you on the air sometime soon. A salute to you! Richard, n5xm

Don,

Welcome to ham radio, and remember you earned your Extra. I was first licensed as a Novice in 1971, and I still remember how much fun I had operating CW on 80,40, and 15 meters with a Heathkit HW-16. I still enjoy ham radio very much, and it's one of my two main hobbies (the other is playing music, mostly bluegrass).
One of the great things about ham radio is that there are so many facets to explore. There's always something new to learn and experience. One of the other great things is the interesting people you meet. Like society at large, there are a few bad apples, but the vast majority of hams I have talked to over the years have been friendly and interesting, and I've learned a lot from them.
73,
Jeff, KC1MK

Welcome! Glad you're here and glad you're loving it.

Make up your own mind! If you want to give 75 meters a try, do it - don't let someone else tell you it is a "bad band." It isn't. Lead yourself, don't let others lead you.

Listen, and not just to one frequency, whether it is 20, 10, 75, 40 or somewhere else - tune the band. You'll find cliques - or the "bad dudes" - on every band - guys (and sometimes gals - of every color) who only talk to their long time friends (though not as

cliqueish as the spouse 'cell phone' conversations on 2 meters) and you'll find those who welcome you with open receivers. Pick the ones you like, on any band, ignore the ones you don't like, on any band, and don't automatically accept someone else's opinion as being the opinion YOU should have. Think. Listen. Choose. Do.

Explore the hobby. Don't close doors because someone tells you to. Figure it out yourself, and FOR yourself.

Welcome, and enjoy

73
Ed, W5HTW

Mail this to a friend! (http://www.eham.net/forums/mailto/1?id=19318)

First thing I'd like to say is welcome to ham radio. It's always great to see a new ham, especially someone with your enthusiasm for the hobby. You have made a good start and if you stay on that path, you'll be one great ham.

I started my ham career in December 1988, when I got my Novice license. 6 months later, I upgraded to General and then in August 1990, I did Advanced. I stayed at Advanced until January of this year, when I finally upgraded to Extra. I enjoy working CW too, but that 30-40wpm stuff isn't for me, I'm perfectly content with 10-15wpm on my straight key.

When I'm on the air, I always exercise a level patience with other hams like what you've described. How important that is really hit home early on in my ham career, when I worked a station in Alexandria, Louisiana, which was only around 90 miles from where I was living at the time(Lake Charles, LA), on 80 meter CW late one night. When I got the QSL card in the mail, I learned I had been talking with a blind ham because the card was in Braille. That card was one of my favorites, and still is a decade later.

In addition to new modes, try getting involved in public service events, such as providing communications with a group at public events. Try getting involved helping others learn about ham radio, or become a Volunteer Examiner. There are so many things hams do to give back while enjoying the hobby.

Don't let anyone tell you you aren't a real ham, because from what I see, you are. Don't worry about the "Extra Lite" thing. I'm a 13wpm Extra as opposed to a 5wpm Extra, does that make me an "Extra Medium?"

Welcome to ham radio, and I hope you stay with us for a long time to come,

73,

Jonathan, KB5IAV
http://www.qsl.net/kb5iav

Mail this to a friend! (http://www.eham.net/forums/mailto/1?id=19320)

Don, welcome to the ham radio world, and congratulations for your Extra ticket.

I took JA no-code phone operator license on 1975, the station license of JJ1BDX in 1976, when I was 10, upgraded with a 5WPM telegraph operator license in 1979. I was indeed a kid then, but I had a dream of talking with North American people from Japan (remember no Internet in 1970s for a general public :-))

I once decided to quit amateur radio on 1992, however, after a whole bunch of pain and agony against packet radio networking using TCP/IP in Japan, mostly because of bullying by JA old timers. I was also chasing an illusion - doing a DX on 6m with a dipole, when 99.9% of 6m activists in Japan use 6 element yagi. No HF gear I could use then. I thought I lost interest in the amateur radio.

After ten years, on June 2002, when I knew the packet radio friends went into the good-old HF DXing exploration and after my recovery of a nearly-lethal allergic syndrome which lead to a hospitalization of three weeks, I decided to reactivate my license, following the friends. The only gear I could use was a 50W ICOM transceiver with an external tuner and a 7-meter length wire antenna, but thanks to the Cycle 23 condx, I found I could contact around the globe by CW. And my Internet skills helped me a lot to discover a huge resource, which didn't exist in 1992.

26 years after getting my first ticket, I realized I could really enjoy ham radio. HF below 30MHz is a lot of fun, even with a random wire! I have confirmed more than 100 DXCC entities, in less than 7 months. Of course including many American States and Canadian Provinces/Territories.

I decided to take exams for the JA 1st class operator license (equivalent to US Extra), because the JA 3rd class license did not allow me to QRV on 30m/20m bands, and the output limit of 50W. I passed the exam on December 2002, with some painful requirement of 80% solid copy of 12WPM English Morse code.Some JA OTs are picky on this because they had to also pass 10WPM (or 50-characters-per-minute) Japanese Katakana Morse code exam for their 1st class license, but I don't care those narrow-minded OTs; a first class op earns the first class anyway.

I should say the same on the 5WPM criticism from people who had to pass 20WPM exams; though 5WPM is rather slow on the air, the fact that you only pass the 5WPM exam does not restrict you from learning and improving your CW proficiency for higher speeds. Of course in the actual QSOs you should be capable to send/receive 20WPM or even faster on CW, but I respect the requests to QRS, becaust there's no legal requirement of faster code proficiency. So Don, don't be afraid of sending slow CW, and do request QRS if you need to do so. ARRL provides a very good learning material of W1AW Code Practice files, even in the MP3 format; I often listen to their practice files of 20WPM and faster for my own practice.

I should also say that the hardest part of ham radio exams is to understand the basics of electric/electronic circuitry and the math behind the theories, including complex numbers and polar coordinates. I know some JA friends who have passed the code exam element but still struggling to pass the radio-engineering exam element. So I guess those who have passed the Element 4 of FCC exam have achieved a lot!

Recently I also got the US 5WPM Extra license on February 2003 as AE6LI, by having all 4 exam elements in 2 hours, at an ARRL VE session in Tokyo. I studied a lot; I needed to concentrate on reviewing all the question pools, and I learned a lot about US FCC regulations, the background philosophy of American ham radio which is quite different from the Japanese one. I even had to fly from Osaka to Tokyo. So I am proud of being an Amateur Extra licensee. Next time when I visit the States I will surely activate my US license :-)

The good part of ham radio is that you can keep improving and learning new things, and find out people who you can share your thoughts. The bad part is that you need to tolerate people who have different attitudes, habits, or tastes, but that's what we all should do because we live in a society anyway.

So keep going, Don, and I hope to have a QSO with you soon.

73 de Joe JJ1BDX/3 es AE6LI

Welome Don!

Your enthuisiasm reminds me of my first experiences on the air here in South Africa (ZS). To make the whole experience more memorable, I passed the 12wpm CW at one of our Anglo-Boer war commemorative special event stations-on tha actual battleground, beneath the thorn trees!.
You will meet Many intersting fellas on air-and some with less than wholesome manners as well-but it is a great hobby!.
Try some homebrewing-nothing like building your own station from scratch-The most rewarding experience ever-especially when the reports are totally flattering..
Have fun, see ya on the bands!

A great read Don and welcome to AR!

However re your point about repeaters being only for 'purposeful' communication, I say don't worry about it! 99% of all our amateur communication could be considered 'trivial', 'unimportant' or not 'purposeful'. This includes 100% of the most interesting contacts you hear on the air! This is not a criticism, merely an observation. Besides, must all we do have a purpose?

'Calls to specific hams' and 'talking to people you know' on repeaters are just as purposeless as other amateur communication. They should not be considered to take priority over 'general calls' and 'talking to people you don't know'. Indeed it could even be argued that the latter is closer to that spirit of amateur radio than the former.

Any time a repeater is left idle, is a communications opportunity lost, never to return. Use repeaters as much as you please and do not hold back because you consider that your use of them is somehow less purposeful than others' use of them.

Of course this feeds back into the 'no activity on repeaters' threads, which I think could be related.

73, Peter VK3YE

Way to go Don and welcome. I concur with your observations that 99.9% of the radio operators I've come to know are top notch folks. Most are very willing to share their experiences, once you get them to open up and start talking.
If I may offer a method I used to increase my code speed and to do it via a live qso on CW. I too was very nervous striking up a qso on code; worried about making too many mistakes and forgetting where I was in a conversation. I developed a printed script. It's one page and on it I printed my qso information and also entered blank fields for the other person's info, like name, qth, antenna, power, etc. As you've heard, most CW qsos at least start out with the same information being passed back and forth, info as listed above. I vowed to do two qsos per day. I got on 40M and called cq, and/or called a station already on the air, and went by the script. Having the script already printed out helped me to remember my place when I sent my info; I just sent the info off the script. As I got more proficient, I embellished more and later found I didn't need the script. Try it and again, congrats. Cu in the pileups, Phil KB9CRY

Congrats on your accomplishments!

"I am working on my code speed and have great respect for the time and effort it takes to get to 20 words per minute. Being a new Extra Class I feel guilty and not genuine at only having to pass the 5 word per minute code test and have vowed to get to 20 words per minute."

You can only take whatever test is offered. When you pass the test, you have earned your new ticket.

Your goal of 20WPM should bring you a lot of fun; and you will discover more about yourself in its pursuit.

I took my general test at an FCC office. Had to get up before the crack of dawn and drive over an hour to the test site. Plus find the building and be there in time for the test session. Didn't get a lot of sleep the night before.

The VEC program is so much NICER!

Took me a few years to get my extra. At the time, I was an extra light since I used the Bash Book to study from, and took the test with VEs from the first question pool.

Once you pass your test, the only thing that is important is good operating, and by my point of view, to help hams, and keep learning about our hobby.

Have FUN
Bob, headed thru my third sunspot cycle.

Having gotten my Extra under the new 5 WPM rules, I felt the same as you Don. Thing is, the rule changes aren't under our control. I had my 13 WPM General for about seven years and had a study book for getting my Advanced. Had to switch gears when they shuffled things around. :)

My opinion now, and is shared by most of the respondents, is that you have your ticket. How you got it isn't the issue, that you have it is. Be it 20 WPM or 5 WPM, it's an FCC mandated test that you passed, thus satisfying all the legal mumbo jumbo you need to operate. Don't let a few stuffed shirts tell you otherwise. You're not a fraud, you're not a 'cheater', and you're by no means not qualified. The fact you passed the test is proof enough of that. You're a bona fide ham, and thus welcome to the team.

See you on the airwaves.

Congadulations! Some have said the Extra Exam is as taxing as the old 1st class commercial raio telephone.
No CW required. I passed the 2nd class phone many years ago. Wanted to get my 1st class phone. Missed
by 6 points. By the time I wanted to take the first phone again, the FCC did away with it. So my commercial ticket says GENERAL RADIOTELEPHONE. No one
can tell if I passed the 1st phone.

Do not let the 5 WPM get you down. You earned your EXTRA, no if's and's or but's! I did not pass the 20 WPM until the CW test went to comprehension. the old EXTRA and General CW test was to copy random letters and numbers error free. Failed the 13 WPM twice.

You got advanced electronic theory down. It is up to you if you want to get your CW up or not.

You will encounter a few EXTRAS that passed the 20WPM
that will "COP A TUDE". A new friend who I met on Eham
is a vibroplex wizard. He can do 35WPM. He has a little joke about phone only people, but that is just his humor. Why he is not a comedy writter is beyond me.

Some feel that my 20 WPM test was comprehension, and not the harder random numbers and letters, make me
a less than EXTRA EXTRA.

On a good day I can only copy 10-13 WPM.

You passed the CW test. There are many that complain
that they should have to pass any CW test at all!
There is a movement to have a CW free testing system.

You should be very proud. I found the EXTRA just as hard as the 1st and 2nd class commercial test.

If you are interested, the Commercial phone test is given by FCC autherized testing centers. You just passed the extra, I am sure with a little study you can pass the commercial ticket. The ticket you get from the FCC looks 10X better than a ham ticket.

Since the FCC is out of the licensing business, General commercial class holders can get Commercial TV and Radio broadcasters licensed.

Just an idea. strike when the iron is hot!

Best of luck to you, and welcome. Hope to work you on the air. Remember you do have the first 25KHZ on most bands for CW. There are some EXTRA only vioce freqs too.

You could also get your speed up on CW in the novice segments.You will be doing a great service. Hey you might want to get up to 15-20WPM to use the EXTRA only CW portions.

That is incentive. If you can do CW at 10-20WPM, I do not think any EXTRA can say BOO to you.

Again congrats and 73 de WA2JJH

Mail this to a friend! (http://www.eham.net/forums/mailto/1?id=19406)

Okay, everyone, I think two things are obvious:

1) Don wrote a great piece and we are all thrilled.

and...it worked...

2) THE DRINKS ARE ON DON. YES, OH, YES, OH YES!!!

73 All,
George

The ARRL Letter
Vol. 22, No. 10
March 7, 2003
****

IN THIS EDITION:

* +Spectrum Protection Act filed in US Senate
* +Support grows for favorable 40-meter plans
* +Astronaut says he'll miss ability to fly
* +Hamvention hopes to continue calling Hara home
* +Hams respond to gas shutdown
* +Updated General class syllabus released for comments
* +UK to AK on LF!
* Solar Update
* IN BRIEF:
This weekend on the radio
ARRL Emergency Communications course registration
Emergency Communications Level I course registration information
Arkansas gets new Section Manager
FCC makes housekeeping changes in Amateur Service rules
FCC cites RV owners in RFI complaint
Former ARRL staffer Marjorie Tenney, WB1FSN, SK
Vote on QST Cover Plaque award
Dayton Contest Dinner tickets now on sale

+Available on ARRL Audio News

==========

==>AMATEUR RADIO SPECTRUM PROTECTION ACT NOW IN BOTH HOUSE AND SENATE

The Amateur Radio Spectrum Protection Act of 2003 now has been introduced in both chambers of Congress. Idaho Sen Michael Crapo introduced the Senate version of the bill, S 537, on March 6. Original cosponsors were Sen. Daniel Akaka (D-HI) and Sen. Larry Craig (R-ID).Florida Rep Michael Bilirakis put the latest House version of the bill, HR 713, into the legislative hopper on February 12. The measures, an ARRL initiative, have been introduced twice before in Congress. ARRL President Jim Haynie, W5JBP, believes this third time could be the proverbial charm.

"Actually, this is the best opportunity that we've ever had to get this bill through, because more members of Congress than ever before are paying attention to ham radio now," said Haynie, who's been in Washington this week to talk Amateur Radio with lawmakers and regulators. In addition, Haynie pointed out, the House and Senate will be considering major

spectrum reform bills, and the Amateur Radio Spectrum Protection Act could serve as an amendment to that sort of legislation.

HR 713 and S 537 are aimed at ensuring the availability of spectrum to Amateur Radio operators. The legislation would protect existing Amateur Radio spectrum against reallocations to or sharing with other services unless the FCC provides "equivalent replacement spectrum" elsewhere.

Haynie encouraged members of the Amateur Radio community to contact their senators and representatives to urge their cosponsorship, which lends support to legislation while it's in committee. The House bill has been referred to the Committee on Energy and Commerce; the Senate bill will be considered by the Commerce, Science, and Transportation Committee. In addition, although more members of Congress than ever understand and appreciate the benefits of Amateur Radio, some may remain reluctant to sign onto a technical piece of legislation without some indication of support from their own constituents.

"The League is doing all it can, but we know the success or failure will be in the hands of the amateur community," said Haynie, who pledged the ARRL's continuing efforts to get the bill enacted. "Letters and e-mails are the key to getting legislation passed."

A sample letter is available on the ARRL Web site <http://www.arrl.org/govrelations/arspa.html>. Those writing their lawmakers are asked to copy their correspondence to the League via e-mail <specbill03@...>.

The measures would amend the Communications Act to require the FCC to provide "equivalent replacement spectrum" to Amateur Radio and the Amateur-Satellite Service in the event of a reallocation of primary amateur allocations, any reduction in secondary amateur allocations, or "additional allocations within such bands" that would substantially reduce their utility to amateurs.

The text of HR 713 and S 537 is available (or will soon be available) via the Thomas Web site <http://thomas.loc.gov/>.

==>SUPPORT GROWING FOR FAVORABLE 40-METER REALIGNMENT PLANS

With World Radiocommunication Conference 2003 (WRC-03) getting under way in about three months in Geneva, support is growing for two favorable proposals to create a 300-kHz worldwide 40-meter allocation. ARRL and the International Amateur Radio Union (IARU) seek a return to the 300-kHz allocation that existed worldwide prior to World War II but that now exists only in the Americas. Delegates to WRC-03 will attempt to address--and possibly eliminate--the overlap on 40 meters between amateurs in the Americas (Region 2) and broadcasters elsewhere (Regions 1 and 3).

"There is encouraging news," says ARRL CEO David Sumner, K1ZZ, in his "It Seems to Us . . ." editorial set to appear in April QST. He reports that, thanks to the efforts of IARU volunteers and others, more than 30

countries now have gone on record to support either one or the other of two favorable 40-meter realignment formulas. Sumner said more support is needed, but he called the interim head count "a good start."

Most popular among the half dozen realignment schemes outlined by participants at last November's WRC-03 Conference Preparatory Meeting is so-called Method B. This approach calls for a three-stage transition that would begin by allowing Region 1 and 3 amateurs on 7100-7200 kHz on a secondary basis starting in 2005 and end with all ITU regions gaining access to 7000-7300 kHz by the end of 2009--with the top 100 kHz shared with fixed and mobile stations in Regions 1 and 3. Broadcasters would shift upward to 7300-7550 kHz worldwide.

For US and other Region 2 stations, such a change would mean an end to deafening nighttime phone band QRM from broadcasters and the necessity to operate split-frequency to work stations in Regions 1 and 3 on SSB.

Sumner says Method B is now a European Common Proposal with initial support from 17 CEPT administrations. At least three other countries in Africa, Asia, and the Pacific have also expressed support for Method B, he said. The IARU team now is working to gain the support of additional administrations in Regions 1 and 3 either for Method B or for the similar Method A, Sumner reports. Otherwise identical to Method B, Method A does not include any sharing with fixed and mobile services.

In the Americas, a dozen ITU Region 2 countries last month agreed to support an Inter-American Proposal that's virtually the same as the so-called Method D. Proposed by Canada, Method D would provide 300 kHz worldwide for amateurs by shifting broadcasters in Regions 1 and 3 upward by 200 kHz. Region 2's broadcasting allocation would remain unchanged. IARU Region 2 is now working to expand the list of Region 2 countries supporting that plan.

The US so far has taken no position on the 40-meter realignment issue, although it has long supported a 300-kHz worldwide, exclusive allocation for Amateur Radio. The FCC WRC-03 Advisory Committee has recommended that Method A be a US proposal, but the National Telecommunications and Information Administration (NTIA) has not yet agreed.

"Acting on behalf of the federal government users of the radio spectrum, the NTIA has been advocating 'no proposal' from the US, a position that the ARRL is working hard to overcome," Sumner points out. "A small number of federal agencies claim to be concerned that their backup circuits on HF would be affected by an upward shift of broadcasters."

Sumner also calls it "unfortunate" that some broadcasters persist in efforts to link the 7 MHz WRC-03 agenda item with another that deals with the adequacy of broadcasting spectrum between 4 and 10 MHz. Sumner said the broadcasting spectrum item is "a separate issue with an entirely different genesis.

==>ASTRONAUT TELLS GERMAN HIGH SCHOOLERS HE'LL MISS ABILITY TO FLY

Despite a last-minute glitch with an antenna rotator, an Amateur Radio on the International Space Station (ARISS) contact involving students at the Hochwald Gymnasium (high school) in Wadern, Germany, went off right on schedule. During the February 27 QSO, 16 students--all brand-new new amateur licensees--spoke via DL0WR in Saarland with ISS Science Officer Don Pettit, KD5MDT, at the controls of NA1SS. The high school was only the second school in Germany to experience an ARISS contact.

"Most significant is that the ARISS contact gave birth to 16 new members of the Amateur Radio community," said ARISS Mentor Peter Kofler, IN3GHZ, who called the accomplishment a "superb illustration of the educational power of the ARISS school contacts." That their first ham radio activity was a contact with the ISS was "a dream come true," he added.

The fact that each student had his or her own ticket also covered the sometimes-overlooked legal issue of third-party traffic between the US space station and the German students. Germany and US do not enjoy a third-party traffic agreement. Michael Kraus, DF3VM, conducted the students' training over a period of several weeks. Students ranged in age from 15 to 19. On the classroom side, the students had been working with physics teacher Marco Holzer since last November to prepare for the big day.

Pettit told the high schoolers that the thing he misses most in space is his family. The thing he'll miss the most when he gets back to Earth, however, is the possibility to fly while in microgravity. "When I get back to Earth, I'll miss that the most," he said.

He explained that while the ISS occupants are able to float freely, there is a "ceiling" and a "floor" to the spacecraft. The "floor," he said, has a darker color than the other surfaces.

Pettit also described how the crew enjoys the spectacular view of Earth below through the airliner-sized ports on the ISS, talked about what the astronauts do in their spare time and explained the scientific research the Expedition 6 crew is involved with. No, he said, there are no alcoholic beverages onboard Space Station Alpha.

In the parking lot of the auditorium where the contact took place, coordinating teacher Hubert Schäfer, DJ8VH, and some fellow members of the Wadern Deutscher Amateur Radio Club (DARC)-affiliate, which loaned its DL0WR call sign to the occasion, had set up a 12-meter-tall mast to support the antenna system. Barely an hour before the contact was to take place, the primary antenna rotator failed. A backup unit put into play worked flawlessly.

Reporters from two television, two radio stations and two newspapers covered the event. The Hochwald contact marked the 88th ARISS school contact.

ARISS is an international program with participation by ARRL, NASA and AMSAT. For more information, visit the ARISS Web site <http://ariss.gsfc.nasa.gov>.

==>HAMVENTION HOPES TO CALL HARA ARENA HOME A WHILE LONGER

Although 2003 marks the last year of a five-year contract to hold Hamvention at Hara Arena, organizers hope to keep the show there for the indefinite future. Rumors crop up each year--and this has been no exception--that this year's event will be the last to take place at the venerable venue near Dayton, Ohio, that's served as Hamvention's home since 1964. Negotiations on a new contract to retain Hara for future shows remain in the offing. Billed as "the world's largest Amateur Radio gathering and trade show," Hamvention 2003 takes place May 16-18.

"We haven't made any decisions yet," Hamvention Production Manager Garry Matthews, KB8GOL, said this week. "We want to get this year's show under our belt and then renegotiate the contract." At the same time, Matthews said, there are no plans to go elsewhere, nor is Hamvention under any threat or pressure to relocate. "There's nothing planned to move," he said. "But," he conceded, "we've looked at alternative locations in case something happens. Anything could happen to Hara."

Matthews says the sponsoring Dayton Amateur Radio Association has explored several other possible locations for Hamvention, which has quietly dropped "Dayton" from the show's official name. Matthews says no other site in the Greater Dayton area will serve the purpose that Hara does. "None of the other venues will support the show at its current size," he said.

Speaking of size, Hamvention reported that attendance for last year's 50th anniversary event was 24,832--down about 5 percent from 2001's crowd of 26,151. 2002 marked the second year in a row that Hamvention's attendance had dipped.

Attendance climbed to 28,804 in 2000, the year of the ARRL National Convention at Dayton. Matthews has said that any crowd larger than 28,000 starts to push the envelope as far as Hara Arena is concerned--especially the human comfort factor. Hamvention attendance peaked in 1993 at 33,669--before the event date changed from April to May.

As for continued use of Hara Arena, Matthews points out that the building has never been sold, is not for sale now and never has been. As for a new contract with Hara? "We'll evaluate the show after June 1, and we hope to improve some things," he said, without revealing any details.

In the meantime, he's pouring his energy into the arrangements for this year's show, but, he reports, things have been slower to come together in terms of advance sales to visitors and vendors. "If we go to war, people might not want to travel," he said. "There's nothing to panic about, but it's tougher this year."

Some changes already have been announced. Among other things, Hamvention this year will replace its annual banquet and entertainment with a more low-key award winners' reception at Hara Saturday evening.

Between now and show time, Matthews says Hamvention will--among other moves--boost its advertising and promotion to counteract the sluggish

advance sales. "We're going to have a good show," he predicted confidently.

For additional insights and information on Hamvention, see "How Hamvention Happens," in April 2000 QST and available on the ARRL Web site <http://www.arrl.org/news/stories/2003/03/06/4/0004053.pdf>. For more information on Hamvention 2003, visit the Hamvention Web site <http://www.hamvention.org>.

==>AMATEURS RESPOND TO PENNSYLVANIA "BIG CHILL"

Amateur Radio Emergency Service/Radio Amateur Civil Emergency Service (ARES/RACES) team members in southern York County, Pennsylvania, activated March 3 after a natural gas shutdown forced residents to evacuate their homes to escape winter's chill. Some two dozen amateurs took shifts to assist the American Red Cross, staff the local emergency operations center and provide other necessary communication. ARRL Eastern Pennsylvania Section Manager Eric Olena, WB3FPL, reports that Amateur Radio involvement in the gas emergency ended around midday on March 5.

York County ARRL Emergency Coordinator Kerry Smeltzer, KA3KAR, says the problem, reportedly the result of a regulator failure, cut off the main natural gas supply serving the communities of Red Lion and Dallastown. Estimates vary as to the number of residents directly impacted by the gas failure, but they ran anywhere from 5000 to 10,000. Red Cross "mass care" facilities in two local schools let residents take advantage of heated facilities and hot meals. Smeltzer and his family were among those taking refuge.

In addition to the ARES/RACES teams activated in York County, Smeltzer said, ARES teams in surrounding counties and from nearby Maryland were on standby for the duration in case needed. ARES/RACES used two local VHF repeaters for most communications. Smeltzer said that the Baptist Men's Kitchen was on site to provide meals. The Civil Air Patrol also responded.

==>QUESTION POOL COMMITTEE RELEASES DRAFT ELEMENT 3 SYLLABUS FOR COMMENT

The Question Pool Committee of the National Conference of Volunteer Examiner Coordinators has released a draft syllabus for the Element 3 (General) Amateur Radio examination. This syllabus will be used to develop a new General class question pool that will become effective July 1, 2004. The QPC is inviting comments on the document as well as suggested questions for the General-class question pool.

ARRL VEC Manager Bart Jahnke, W9JJ, says comments and questions may include, but are not limited to, such things as new material in terms of technology or operations, topics that might be deleted as no longer relevant and corrections involving grammar, spelling and technical details.

The General class syllabus is an outline of 10 question-topic areas--called "subelements"--from which actual Element 3 examination

questions will be developed. These include FCC rules, operating procedures, radio wave propagation, Amateur Radio practices, electrical principles, circuit components, practical circuits, signals and emissions, antennas and feed lines and RF safety.

A question pool based on the revised syllabus will be released later this year. The QPC will invite public input on the General questions once they've been made public. A new Technician class question pool released last November takes effect in the exam room on July 1 of this year.

The draft General (Element 3) syllabus <http://www.arrl.org/arrlvec/gp-syllabus-2004.html> is available on the ARRL Web site, which also includes all current question pools <http://www.arrl.org/arrlvec/pools.html>.

QPC Chairman Scotty Neustadter, W4WW, has requested comments to the committee by July 15, 2003. The amateur community may e-mail comments to the Question Pool Committee at qpc@....

==>UK TO AK ON 136 kHz

Reaching Alaska from the United Kingdom using just 1 W ERP is quite a feat for any band, but the Radio Society of Great Britain reports that Laurie Mayhead, G3AQC, was heard in Alaska on 136 kHz. In the early hours of February 15, he transmitted to Laurence Howell, GM4DMA/KL1X in Anchorage, and just before UK dawn at 0615 his call sign was clearly identified using software to read the signal.

G3AQC was using QRSS--very slow CW--with a 60-second-long dit. The 7278-km distance is a transmission record for 1 W ERP on 136 kHz.

Two years ago, Mayhead and Larry Kayser, VA3LK, made ham radio history when they completed the first two-way transatlantic exchange on 136 kHz, also using very slow speed CW. Last year G3AQC became the first person to span the Atlantic on 73 kHz.

Howell expressed surprise that the path involved in the latest accomplishment is "notoriously poor" between southeastern Alaska, on the east coast of the Pacific, and Europe. "The signal would theoretically go on a Great Circle route to nearly 80 degrees north, over the northern Canadian Arctic, northern Greenland, east of Iceland, Glasgow, then over the UK to the South Coast--across and through the auroral oval."

He said there's speculation that the actual path might been around or even under the auroral zone, since there was no auroral Doppler seen on the received signal. Howell and Mayhead credited research and preparation carried out by G3NYK, G3LDO, W3EEE and W4DEX, for helping to set the new LF record.--RSGB

==>SOLAR UPDATE

Heliophile Tad "I Live for the Sun" Cook, K7VVV, Seattle, Washington, reports: This week we saw the average daily sunspot number increase nearly

50 points over the previous week, and the average daily solar flux was up 30 points. The geomagnetic indices were active after a robust solar wind arrived on March 3. The most active period was late on March 3 into March 4 when the planetary K index reached 4 and Alaska's College K index reached 6.

On Thursday evening of the reporting period we were affected by a high-speed solar wind stream from a coronal hole causing minor geomagnetic storms in high latitudes. This would result in absorption of HF signals over polar paths. Geomagnetic indices are expected to be unsettled to active over the next few days, and solar flux should decline again. Solar flux is expected to go below 145 by March 10, then reach a short-term minimum below 110 around March 22-23.

Sunspot numbers for February 27 through March 5 were 82, 77, 73, 67, 136, 160 and 138, with a mean of 104.7. The 10.7-cm flux was 117.6, 124.9, 138.1, 147.3, 149.1, 146 and 148.5, with a mean of 138.8. Estimated planetary A indices were 22, 17, 14, 14, 15, 26 and 16, with a mean of 17.7.

==>IN BRIEF:

* This weekend on the radio: The South African Radio League (SARL) Field Day Contest, the RSGB Commonwealth Contest (CW), the North American Sprint (RTTY), the UBA Spring Contest (CW), the NSARA Contest and the Wisconsin QSO Party are the weekend of March 9-10. JUST AHEAD: The Pesky Texan Armadillo Chase is March 13. The YLISSB QSO Party (SSB), the 10-10 Mobile Contest, the BARTG Spring RTTY Contest, the SARL VHF/UHF Contest, the Russian DX Contest, the AGCW VHF/UHF Contest and the Virginia QSO Party are the weekend of March 15-16. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration opens Monday, March 10, 12:01 AM EST (0500 UTC), for the on-line Level II Emergency Communications course (EC-002). Registration remains open through the March 15-16 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, March 25. Thanks to a recent grant, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the course. During this registration period, approximately 50 seats are being offered to ARRL members on a first-come, first-served basis. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@...; 860-594-0340.

* Emergency Communications Level I course registration information: March registration is closed for the Amateur Radio Emergency Communications Level I on-line course (EC-001) sponsored by the Corporation for National

and Community Service (CNCS). All available seats have been filled. Registration for the next available Level I class opens Monday, April 7, at 12:01 AM EST. Senior amateurs are strongly encouraged to take advantage of this opportunity. Those considering enrolling in the Level I class are urged to take the Connecticut Distance Learning Consortium WebMentor sample course to familiarize themselves with the course template and tools used in all ARRL Certification and Continuing Education (C-CE) on-line courses. Sign up for e-mail registration reminders for all C-CE courses by sending a request to prereg@arrl.org. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. Address your Emergency Communications course questions to ARRL Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@....

* Arkansas gets new Section Manager: ARRL Field and Educational Services Manager Rosalie White, K1STO, has appointed Robert D "Dennis" Schaefer, W5RZ, to be the new Arkansas ARRL Section Manager. Schaefer, who lives in Dover, served as a Section Communications Manager (SCM) from 1968 until 1970 and as an Assistant SM. He now serves as a Delta Division Assistant Director and as a District Emergency Coordinator. He succeeds SM Bob Ideker, WB5VUH, who first served as SM from 1991 through 1995 and who returned to office in 2001. Ideker had decided to not run for another term, and Eldon Bryant, K7ZQR, was nominated and elected to replace him. Bryant subsequently decided not to assume the office, however. Schaefer's term as SM term begins April 1. Arkansas members may contact Schaefer via e-mail <w5rz@...>.

* FCC makes housekeeping changes in Amateur Service rules: The FCC has made some minor changes in the Part 97 Amateur Service rules as a result of decisions at past World Radiocommunication Conferences. In a wide-ranging Report and Order released March 3 that affects several radio services, the FCC has removed §97.401(b) and international footnote 5.120 from the Amateur Service rules. The sections reference International Telecommunication Union (ITU) Resolution 640, which invited administrations to provide for the needs of international disaster communications and for the needs of emergency communications within their national regulations using certain amateur bands. Resolution 640 was deleted at WRC-97, and footnote 5.120 at WRC-2000. "We do not think this will have an impact on the Amateur Service emergency communications because Sections 97.111(a)(1) and 97.101(c) of our Rules allow amateur stations to communicate with foreign stations in disaster areas, making the provisions based on the former ITU Resolution No. 640 unnecessary," the FCC said in the RO&O in ET Docket 02-16. Those sections permit "transmissions necessary to exchange messages with other stations in the amateur service" unless an administration objects and require control operators "at all times and on all frequencies" to give priority to stations providing emergency communications. Footnote 5.120 had listed 80, 40, 30, 20, 17, 15, 12 and 2 meters as bands to be used in the event of natural disaster.

* FCC cites RV owners in RFI complaint: The FCC has told an Oregon couple to stop using its Winegard amplified television antenna (Model Sensar/Roadstar) on their recreational vehicle "until the condition causing harmful interference has been corrected." The FCC contacted Jimmy and Jan Bowen of Gresham, Oregon, following a February 3, RFI complaint from an Amateur Radio operator to the FCC Portland office. The interference was reported on 447.375 MHz. An FCC agent investigating the allegation tracked the interfering signal to the Bowen's RV in Portland. The FCC cited Part 15 rules and noted that certain Winegard antenna amplifiers "have been the source of radio frequency interference in a number of cases." Due to the complaints, Winegard <http://www.winegard.com> has agreed to replace defective units at no charge. The FCC advised the couple to contact Winegard to make necessary arrangements.

* Former ARRL staffer Marjorie Tenney, WB1FSN, SK: Former ARRL Headquarters staff member Marjorie C. Tenney, WB1FSN, died February 22. She was 78. Known for her friendliness and willingness to help others, Tenney worked in various HQ capacities from 1965 through 1985. ARRL Chief Executive Officer David Sumner, K1ZZ, remembered Tenney as consistently cheerful person who was eager to be of help to members and coworkers. Survivors include her husband, Herbert, WB1ETL, three sons--including Richard, WB1ASG--and a daughter.

* Vote on QST Cover Plaque award: The winner of the QST Cover Plaque Award for December 2002 was Dick Stroud, W9SR, for his article "Try Copper for 2 Meters--the CuLoop." The January 2003 winner was Paul Wade, W1GHZ, for his article "A 222-MHz Transverter for the Yaesu FT-817." The February 2003 winner was David A. Rosenthal, N6TST, for his article "Portable in Paradise: Cruise Ship Dxing." Congratulations, Dick, Paul and David! The winner of the QST Cover Plaque award--given to the author--or authors--of the best article in each issue--is determined by a vote of ARRL members. Voting takes place each month on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/qstvote.html>. Cast a ballot for your favorite articles in the March issue of QST. Voting ends March 31.

* Dayton Contest Dinner tickets now on sale: The North Coast Contesters have announced that tickets for the 11th annual Dayton Contest Dinner now are on sale. The dinner will be held Saturday, May 17, 6:30 PM, at the Crowne Plaza Hotel in downtown Dayton. Seating is limited, random and not reserved. All dinner ticket orders are handled exclusively by Craig Clark, K1QX, Radioware and Radio Bookstore, PO Box 209, Rindge, NH 03461 <http://www.radio-ware.com>. Order tickets weekdays by calling toll-free 800-457-7373 or via e-mail <jcclark at prexar.com>. Major credit cards are accepted.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@...
<http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

1060. VHF Exercise for repeater.

Yahoo group: m_a_r_s

Clear DayMUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

MARS will conduct a VHF exercise to survey for a ideal location for the prospective VHF repeater on sunday 16 march 2003 at 08:00 am.

At present Mumbai does not have any VHF repeater , VU2BBB the Mumbai repeater is not operational and Mumbai needs a repeater very badly.

MARS plans to put up 2 VHF Repeaters, One will be installed in Andheri, Mumbai for local VHF activity and the 2nd VHF repeater will be for VHF Dxing.

The VHF exercise on sunday will be for the 2nd VHF repeater to do a feasibility study for ideal location for this Dx VHF repeater, The details of the exercise is as under :-

Location Callsign frequency.

Matheran VU2GT , Sanjay Kadam, Zalke 145.500 Mhz. (Simplex) - [repeater]
Tunganeshwar VU2UGO/ VU3AUA ,Deepak , tirandaz Mickey 145.600 Mhz. (Simplex) - [repeater]
Parsik Hill VU2PJPN/ VU2KQS, Anish Korde, Jigar 145.700 Mhz. (Simplex). [repeater]

Towards Pune VU2ZRS , Ferokh, Dr. Mittal, Nishant - Mobile Operation.
Towards Nasik VU2HIT, parin, Sailesh Pradhan, Sirish Dhuru - Mobile Operation.
Towards Valsad VU3MBF, Feroze patel, Harsh - Mobile Operation.
Towards Aurangabad. VU2UGJ, VU2IVO, VU2YJM, harsha - Mobile Operation.
Torwards Mahad / Goa VU2NLF, Abhay Shah. - Mobile Operation.

MARS looks forward to connect Mumbai, Pune, Nasik, Aurangabad and many stations in Gujrat on
2 meters with the help of this 2nd repeater.

All Hams in Mumbai are requested to kindly come up on these above mentioned frequency so that we can a proper data, which we help us in selecting the prospective location for this VHF Dx Repeater.

Dear Members,

Please note we have started to collect annual fees for 2003-04. Please pay on time to avoid last minute run-arounds.

As informed earlier Family & Physically Impaired Life Membership Fees are revised as follows:

Family Life Membership
==========
First Member - Rs.2500
Spouse - Rs.2000
Harmonics - Rs.1500

Life Membership for Physically Impaired Members - Rs.1000
==========

Kindly take the opportunity to become life members. Please forward all the chqs or cash to registered office address or my residence by courier.

Thnks,

Mehul Chovatia
Treasurer - MARS

Clear Day MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

Further to the mail by Mehul Chovatia - our treasurer.

Kindly note that all the members opting for life membership will be issued 80 G receipt for tax benefit and save 50% . so technically you end up paying only half the amount for i.e. a handicap person paying Rs.1000/- to the society gets Rs.500/- as tax benefit or a person paying Rs.2500/- get tax benefit of Rs.1250/-

Also please note that the senior citizen life membership is also Rs.1000/-

Kindly avail the facilities and become a member for ever.

Ordinary members are also requested to send their annual fees of Rs.250/-

All cheques to be drawn in favor of "MUMBAI AMATEUR RADIO SOCIETY.

Members can send their fees to the tresurer directly at :-

Mehul Chovatia
Karnataka House,
2nd floor, Dadi Santuk Lane,
Chira Bazar, Mumbai - 400 002.

or alternatively send it to our office address :-

Mumbai Amateur Radio Society.

Motorola Unveils Latest Single-chip GPS Receiver
RF Design Staff
Hannover, Germany -- Motorola Inc. (http://65.54.246.250/cgi-bin/linkrd?_lang=EN&lah=b5587413152b60596f6da5d0cb55dfd7&lat=1048583272&hm___action=http%3a%2f%2fwww%2emailcubed%2ecom%2fclick%2easp%3fx%3d5ee5%2e13e2%2e547924), working with IBM Microelectronics (http://65.54.246.250/cgi-bin/linkrd?_lang=EN&lah=a7d2f80e2bedb5e7b14a376a2e84ccd1&lat=1048583272&hm___action=http%3a%2f%2fwww%2emailcubed%2ecom%2fclick%2easp%3fx%3d5edc%2e13e2%2e547924), announced a new technology for adding location sensing to virtually any portable electronics product.
The new technology, called Motorola Instant GPS, is a self-contained, single-chip, assisted global positioning system (A-GPS) receiver small enough to fit into a wristwatch, the company says. Some of the portable electronic applications include cameras that time- and location-stamp photos, PDAs with maps and real-time navigation, and E-911 compliant cellular phones that can find friends, family members, and restaurants.
Motorola's Instant GPS combines Motorola's GPS design with IBM's silicon germanium (SiGe) chip-making technology. IBM plans to manufacture the new GPS chips for Motorola; samples are available immediately for OEM suppliers of portable electronic devices.
"IBM's technology enabled Motorola to reach its performance goal of detecting GPS signals so faint they'd be comparable to those received in Chicago from a light bulb burning in Korea," said Walt Lange, associate director for foundry services, IBM Microelectronics.

Overlooked But Always in Demand
Dale "Kuby" Kubichek, N6JSX /8 (N6JSX) (http://www.eham.net/user/profile/N6JSX)on March 25, 2003
Add a comment about this article! (http://www.eham.net/forums/post/Articles/L4923)

Over looked but always in demand HAM

02/2003 by N6JSX /8

Years ago when HAM's had to design and build/modify their own equipment the technical abilities of HAM's were recognized and accepted as a "normal" attribute of HAM radio. But today few HAM's do anything more technical than push a button, install a pre-tuned antenna, or hook up the red wire to the + terminal on a power supply. The art and requirement of HAM's designing, building, repairing, or modifying has faded away as electronics classes have faded away in our school systems. HAM radio, in general, has become a class of radio "operators" with few even knowing what a Colpitts, Hartley, Wein, Butterworth, Marconi, Faraday, Tesla, Kirchhoff, or Zepp even mean to radio. Few HAM's, today, fix their own radios, in part, due to the complexities, miniaturization, lack of schematics/PCB layout, or a lack of knowledge/skills. HAM radio is evolving and knowledge requirements are changing - for good or bad is an article for another day.

Most HAM's are operators/communicators but there is another sub-group within HAM radio that is more than just an operator, they are what I call the HAM Engineer. The HAM Engineer is, typically, a professional electronics/RF engineer, technician, or even an x-military technician. They can troubleshoot, repair, modify, build, and even design communications equipment or devices. Some of these HAM Engineer's can be found as "T"/fox Hunters.

The HAM Engineer is an overlooked, yet, required commodity to the ARES, EMA, RACES/DCS operations and repeater systems. When communications equipment goes down these HAM Engineer's can swiftly jump into the troubleshooting mode in an attempt to quickly fix the radio system restoring communications. It may be as simple as replacement a fuse, diagnosing a dead power supply, or finding a connector coax short but it will take a minimum amount of test equipment and spare parts.

These HAM Engineer's are needed more today than anytime in our history to support emergency operations, emergency communications equipment, repeater operations, and mobile/remote operations. HAM Engineer's need to become an integral part of ALL emergency support plans. HAM Engineer's could perform pre-emergency audits of the communications facilities advising what type of support equipment and documentation should be in place to support a possible emergency repair action (short of major radio repairs). HAM Engineer's can design, build, re-build, repair, and over see the erection of an emergency communications antenna providing the materials are readily available.

To this end I have created the HAM Engineer's "FIELD GO BAG" should have (at a minimum):

DMM w/probes (extra battery) RS22-163 or better

VSWR/power meter (1.8 - 440 MHz capability) RS940-0592/RS940-0593

jumper coax(s) and adaptors (UHF/BNC/N/SMA) to fit radios

PL-259 connectors (6 each) RS278-205

PL-259 connectors w/RG-8x insert - will work on RG-58) (6 each) RS278-204

BNC connectors (w/crimp tool) (6 each)

50' RG-8X/58 coax RS278-971

Outdoor antenna kit (2 each for 75/40m) RS278-758

wire jumpers w/clips RS278-001/RS278-1156

fuses - ranging 1A-30A various types RS270-1203/RS900-7133/RS270-1262

wire - various AWG minimum 3-6'

electrical insulation tape role (10' min) RS64-2352

heat shrink tubing various dia./lengths w/butane lighter (optional) RS278-1611

hand tools:

soldering pencil - butane (w/extra butane tank) RS64-2188

soldering pencil repair kit (VAC 30W) RS64-2803

soldering gun (VAC dual pwr) RS64-2187

solder 60/40 rosin flux core RS64-008

solder wick or solder sucker RS64-2090/RS64-2098

wire strippers RS64-1922

wire cutters (sharp) RS64-2045

knife (utility/xacto - sharp)

screw drivers - straight/Phillips/jewelers

non-conductive tweeker screwdriver RS64-2220

pliers (2) (regular, vice grip, needle nose)

crescent wrenches (2) (6? & 12?)

magnifying glass (lighted optional w/extra batteries)

pen light flash light (w/extra batteries)

permanent marker (Sharpe)

etc. - personal preference

(Note: RS numbers refer to Radio Shack part numbers)

This type of HAM Engineer's "GO BAG" should become an integral part of ANY emergency communications vehicle/site. The emergency organizations need to identify these volunteer HAM's and integrate them into their operations plans and activation rosters.

Go Bonkers over cricket with Balram D Maity (http://g.msn.com/8HMPENIN/2740)

1073. A Wonderful Ham Story You Can Add To!

A Wonderful Ham Story You Can Add To!
from Cap'n Fatty Goodlander on March 19, 2003
View comments about this article! (http://www.eham.net/articles/4883#comments)

Ahoy Friends and Family...
Just a quick note to ask if you know any amateur radio operators (known as 'hams') in your area?
If so, could you do me a small favor for a very good cause?
We've become very good friends with an Indian ham (VU2ITI) named T.K. Mani who lives in Cochin, India.
He helped us out tremendously by fixing our SSB radio aboard Wild Card----and refused all payment.
Once we started hanging out with him we discovered what a wonderful guy he truly is. (See the story, which follows).
In any event, he and his entire radio club is in need of any-and- all-types of amateur radio magazines... like CQ, QST, or 73.
Is there is any chance that you could collect some of these magazines... or contact some local amateur radio group to do so... and mail them to the address which follows?
I know it would take a little time and some money----but, believe me, it would be greatly appreciated by the amateurs of India.... and by me personally.
It doesn't matter how old or ripped up the mags are... they'll read whatever you send them to tatters!
Thanks so much.
Here's the address:
T.K. Mani
Department of Electronics
Cochin University of Science and Technology
THRIKKAKARA Kochi 682022
Kerala, India

Thanks again.
Cap'n Fatty Goodlander
Sailing Yacht WILD CARD
Cochin, India
Indian Ocean
Earth
On Radios, Indian Friends and Electronic Heros Copyright 2003 by Cap'n Fatty Goodlander
In the last few years, we've sailed to dozens of counties, many of which are reputed to be the friendliest in the world. Nowhere, however, have we made more wonderful friends quicker than in India.
Take electronic guru and university professor T. K. Mani as example: once he heard there was a visiting American yacht '...stranded without a radio,' he dropped everything and rushed down to the Cochin harbor to help.
My wife Carolyn and I happened to be away traveling inland at the time, so he kept returning day after day until he found us aboard----despite the hour-long, heavy-traffic

commute.
I was, frankly, somewhat suspicious of him at first. Without even looking at the radio, he assured us he could fix it. His only question was, "Do you need it back tomorrow, or can I have a couple of days?"
To dampen his optimism, I warned him that the radio had not worked since we'd been hit by lightening and that I had no idea what was wrong with it, no schematic diagram, no parts list, etc.
He just shrugged.
I didn't know it at the time, but T.K. Mani had every right to be confident.
About thirty years ago, when he was a teenager, he saw a newspaper ad for a small radio receiver for 10 rupees, about twenty cents American. He wanted that radio so bad he could taste it, and began bugging his hardworking-but-nearly-penniless father day after day. His family was VERY poor and often hungry----and his father told him repeatedly that it was too expensive. But Mani wanted it, wanted it, wanted it... so badly that his father ultimately relented and gave Mani the 10 rupees.
Mani sent away for the radio, and waited. And waited. And is still waiting. "It was a rip off... a scam," he told me. "I never got the radio. I was furious. My father said, 'I told you so!'"
Mani could not believe it. His chance to own a radio and to hear beyond the front door of his tiny rural shack... was gone forever.
Or was it?
Mani decided to build his own radio. He collected old television sets and gutted them for parts. He went to the library and read dozens of books on amateur radio. He visited every radio repair shop within hiking distance of his house----and silently watched/questioned the technicians hour after hour after hour.
"One old radio guy lent me what we both thought were enough parts to build a radio -- but we were wrong. Dozens of times, I put it together... and nothing. It was discouraging. I spent all my spare time working on it, soldiering different parts together... testing my circuits. Then I got a new carton of used stuff... transformers and tubes and copper windings... and exactly two years after I started... I heard a faint signal through my headphones! I'd done it. I'd built a radio."
No one has ever built a radio in Mani's village before----or even heard of anyone doing so.
Mani immediately became famous. He soon built a transmitter...
"It was supposed to be two watts," he said, "but it was actually a little less than one. But I had my amateur radio license (VU2ITI) by then, and I made a lot of contacts with that crude little x-mitter.."
Suddenly, Mani's world was huge. Every day he talked to sophisticated, educated people from around the world----and was taken seriously by them.
It dawned on him that electronics could be his ticket out of the grinding poverty of his youth.
Mani ceaselessly built radio after radio... all from scratch, with salvaged parts... and soon headed off to college to study electronic theory. Eventually he got his master's degree, a teaching job at the local university, and now, when I meet him, is only a few short months away from receiving his doctorate.
Along the way he invented the 'acoustical ocean rain gauge' which remotely monitors the amount and location of rainfall at sea-----a very important device in drought-stricken India.
Anyway, Mani knows his stuff -- and proved it by returning to Wild Card a couple of days later with the repaired radio... and installing it in such a manner that its output was radically higher than ever!
"How much do I owe you," I asked.

"How 'bout," he said with a sly smile, "the privilege of your company at my home for a traditional Kerala feast?"
How do you repay such a person... a total stranger in a completely foreign land... for such a kindness? For not only fixing something important for you, but also welcoming you into his heart, home and life?
It was a challenge. Since Mani refused all payment, we made a sizable donation to his amateur radio club -- for an upcoming hamfest.
After meeting his lovely wife Sheela and partaking of her wonderful food-----we returned the invitation and had them both aboard Wild Card for a 'typical American meal' of meat-and-mash- potatoes and, of course, hot apple pie.
Learning that Mani was involved with fund-raising for a school for children with 'special needs,' Carolyn and I decided to sponsor a deserving child by paying a year's tuition.
But most of all, we just enjoyed each other's company. Mani was very interested in our voyage, and Carolyn and I were very interested in his life. He stopped by Wild Card almost daily, and introduced us to his entire family, many friends----and even roped me into giving an hour long lecture on marine electronics to his eager students.
One of Mani's teaching assistants was getting engaged, and we had a seat of honor at the day-long party -- during which one hundred people taught us to eat with our hands... amid much laughter and love. (The marriage was an 'arranged' one: the groom's parents had found the bridge via a newspaper advertisement and this was only the third time she and the groom had ever met... always with both sets of parent's present, of course!)
Perhaps the nicest moment came when I held his lovely, laughing daughter Krishna (she's mentally challenged) in my arms and sang 'Sweet Adeline' and 'On Moonlight Bay' and 'Old Man River' to her.
In essence, we became fast friends. We relaxed and luxuriated within each other's presence. Mani showed us his world, we showed him ours. Sure, we mostly talked -- but after awhile the pauses were as comfortable as the conversation.
That's the very best part of sailing around the world... meeting wonderful people like T.K. Mani of Cochin, India.

Mail this to a friend! (http://www.eham.net/forums/mailto/1?id=19907)

Well, I've been reading of Capt. Fatty's adventures for years in sailing rags, especially Latitude 38. This was a wonderful story! Comes at a good time, too, doesn't it?

Now I know what to do with the QSTs that are piling up! I'll be sending whatever radio literature I can find to India.

Thanks, Fatty!

FM Satellite Operating EttiquetteFM Satellite Transponder Operating Etiquette (or 'Satiquette').
The South African satellite, SUNSAT, has recently commenced amateur transponder operation on the 2 metre and 70cm amateur bands. Unlike most amateur satellites, this 'bird' carries an FM voice repeater, which enables many more amateurs to experience the thrill of satellite operation. However, this accessibility, combined with the single channel available on current generation FM satellites means that congestion is a big problem which needs to be managed, if everyone is going to get their turn on the transponder. As SUNSAT has become popular here in VK during the spring of 1999, the problem of congestion and operating procedure worsened to the point that a lot of time is being wasted due to stations 'doubling' and having to re-transmit their signal reports or other information.

Satellite transponders, a quick overview.

This is a short overview on the different types of analogue satellites and how FM satellites compare to the linear transponders used on other satellites, as well as their terrestrial cousin, the FM voice repeater. Here is a table showing the differences and similarities between the different devices.

Characteristic FM satellite transponder FM terrestrial voice repeater Linear satellite transponder
Simultaneous users 1 1 Several
Crossband Yes No (usually) Yes
Availability Limited (active passes only) Continuous Limited (active passes only)
Coverage radius 3000+ km 20 - 200km (most cases) 3000+ km
Mode FM FM All (SSB or CW preferred)
Typical minimum uplink power. 1 - 5 watts EIRP Varies depending on location 10-50 watts EIRP

In the table above, several conclusions can be drawn. Firstly, like their terrestrial cousins, FM satellite transponders can support only one user at a time. This is one of the main constraints of these devices. Also, the uplink requirements are quite modest, well within the range of handheld equipment (successful satellite operation has been achieved with a few watts from within trains, trams and buses). Combined with the limited availability of the transponder and the enormous coverage possible, dogpiles and congestion are highly likely. It's worth noting that congestion isn't a serious problem on the linear transponder satellites due to the number of simultaneous QSOs supported, as well as the higher "barriers to entry" (namely multimode VHF/UHF radios and higher power and antenna requirements) To alleviate this problem, good operating procedures are a must.

Operating procedures for FM satellites.

Most material I've seen on satellite operation deals with linear transponders. While these procedures are mostly good operating habits and common sense, they do not specifically emphasise the key constraints placed upon the FM transponders, namely limited QSO throughput due to single channel operation, and higher levels of demand. As a result, any

operating procedures must address these issues and ensure as many people as possible can make contacts during the pass. My suggestions are drawn from a combination of FM repeater procedures, contesting and traditional satellite operation, as elements of each of these facets are incorporated into FM satellite operation. I'll summarise my procedures below:

1.. First and foremost is to listen before and while (if possible) transmitting, to ensure your transmissions don't drown out a weaker station who may be on the edge of a pass or running QRP. Satellites should be an alligator free zone. It is strongly recommended that you set your station up so you can monitor the downlink while transmitting, so you can hear how well you are accessing the satellite and whether you accidentally clobbered someone else. Similarly, if you can't hear the transponder, don't transmit. Do something else more productive, such as realign your receiving antenna to improve reception.
2.. Be brief. Because the traffic levels can be quite high, contest style (callsign/signal report/next station) operation is the most appropriate for most situations. Many stations also exchange QTH and first names, which is OK if time permits. If transponder activity is low, you can have a brief chat, but the opportunities for this are becoming rare now.
3.. Take turns. If you've just worked a handful of stations, be polite and hand the transponder over to someone else so they can work a few. There may be an opportunity to call back in later during the pass and work some different stations as the satellite passes over different areas, and others will appreciate your courtesy.
4.. When calling, a simple announcement (e.g. "This is VK3JED listening SUNSAT" or even "VK3JED listening") will suffice, like it does on a terrestrial repeater. Anyone within transponder range will hear your call. A short CQ call ("CQ SUNSAT, this is VK3JED") is OK too. Long CQ calls waste transponder time and frustrate everyone listening. Save the long CQs for HF, where they're appropriate. Only call CQ when there's a distinct lack of activity, such as at the very start of a pass and sometimes late in the pass after everyone else has finished. A well placed CQ call late in a pass might alert someone ahead of the satellite that a pass has just commenced over their QTH.
5.. Wait your turn. If a QSO is in progress, wait until it finishes before putting in your call. Butting in too soon is rude and wastes precious transponder time as the stations involved in the QSO have to repeat themselves due to your QRM.
6.. Don't tune up! Believe it or not, there are stations who test their satellite access by dropping a carrier over the top of everyone and perhaps announcing "Hello hello". Simply putting out a call at the appropriate time will provide all the signal checks you need (and net you a worthwhile contact! :)), without annoying everyone else on the transponder. If you're really that doubtful about your equipment, perhaps connect your dummy load, test in the shack and try again another day, rather than disrupting everyone else. If you just want to hear your voice, well a tape recorder or a pair of walkie talkies will do just as well...
7.. Reward good operation. If you're answering a call, why not reward the good operators and put the alligators last on your list of priorities. If all satellite users favour good operators, perhaps everyone will learn that good ops have the highest QSO rates and earn the most satellite awards. :-) Peer pressure is a powerful motivating force, as any teenager will know (but probably not admit to! :-)).
8.. Use the minimum power necessary. While power levels are not critical on FM satellites (unlike linear transponders where an excessively strong signal can affect other QSOs on the transponder), using the minimum power necessary allows you to easier tell if you're 'doubling' with someone else. For the South African SUNSAT satellite, you shouldn't need more than 5 watts into a basic (1/2 wave handheld or turnstile) antenna, perhaps a bit more if the antenna is setup for terrestrial operation, to overcome radiation pattern limitations. As an example of good operation, recently one station who had multiple beams

wound his power back to 20 mW. The signal into the bird was full quieting, but it was still possible to tell if someone else was underneath his signal. If he had run 100W, he couldn't have known if he'd stepped on anyone else, due to the capture effect of FM.
If everyone follows these simple guidelines (which are basically common sense and courtesy), then FM satellite operation can be enjoyable for everyone, regardless of whether you run a sophisticated satellite station or a couple of handhelds from the back yard. FM satellite transponders are like FM repeaters, only more extreme. On the positive side, they can enable minimally equipped stations thousands of kilometres apart to communicate with ease. On the other hand, the worst aspects of repeaters can be experienced as well, such as congestion, doubling and even the odd idiot dropping carriers! (I don't know how the idiots manage to always have a very strong signal, even when the repeater is 800 km off the ground!). The operators themselves (that's YOU!) have the power to determine what sort of experience FM satellite operation will be in the future.

A final note. I suggested that satellite operators listen to their downlink while transmitting for several reasons. Firstly, of course, to hear if you're accessing the satellite and that you're on frequency, and secondly to ensure you're not going over the top of someone else. Those who aspire to SSB satellite operation will need to be able to monitor signal so they can compensate for Doppler shift (which affects SSB much more severely than FM). To do this requires suitable equipment and a bit of skill. The equipment can be either a multi band transceiver with crossband duplex capabilities, such as some modern multiband rigs, or a pair of transceivers, one tuned to the uplink and one tuned to the downlink. You will also need headphones or an earpiece to avoid causing feedback when transmitting.

Hearing youself in your ears every time you transmit can be disconcerting at first, and being able to listen for heterodynes and general signal quality while talking can take a little practice. It's not difficult to learn, and practice is easy and shouldn't be intrusive on your normal operation. Some ways to practice self monitoring are:

a.. The simplest is to have a receiver tuned to your transmitting frequency. This will allow you to hear yourself. However, it doesn't allow you to montior other band activity while transmitting since your transmitted signal will overpower everyone else's.
b.. Alternatively, if you live close to a repeater that you use regularly (or have a set of cavities!), you can set the receiver to monitor the output of the repeater at all times. Whenever you transmit, you will hear yourself (provided desense from your transmitted signal doesn't wipe out the received signal) on the output, as well as any other QRM. This is a fairly accurate simulation of FM satellite operation, and the most recommended way to practice monitoring your own transmitted signal.
c.. Crossband duplex operation can also help one to practice listening while the button is down, though this is a bit more like a telephone than satellite operation.
Keep up the good habits and hope to hear you on the birds. 73 - VK3JED.

1075. QSYd to New QTH

(http://www.ablepanasonic.com/index.html)

NEW IMPROVED VERSION:
(1) Two year warranty, not just one year
(2) Louder audio transmit and receive
(3) Better SNR: less noise, more range
(4) Adaptive Frequency Hopping: skips noisy channels

The EnGenius SN-920 is the most powerful cordless phone that can legally be used in the United States.
A test by an independent lab showed range OVER EIGHT MILES in open terrain. You can expect several miles in a more normal environment.
- MORE POWER: (900mW vs. 630mW in previous SN-900
- SMALLER HANDSET (40% smaller than SN-900)
- LIGHTER HANDSET (just 8.8 ounces with battery)
- NEW BATTERY (NiMH, not NiCd)
- Can use a HEADSET
- Range can be 8 miles in open terrain, and 12 floors in a building.
- Range in a typical urban or suburban environment is 1 - 4 miles
- Use up to 36 handsets and 4 bases.
- Music-on-hold jack in base
- Key guard
- Call timer
- Easier access to directory
- Display shows 4 lines of text & graphics, not just 3
- 900MHz Digital Spread Spectrum/Frequency Hopping
- Caller ID/Call Waiting
- Optional external antenna provides maximum range.
- Compatible with SN-900
The standard phone package (SN920-1) is a 3-piece system. You'll get a base that plugs into an electrical outlet and a phone jack, plus a portable handset, and a charger stand for the handset. The charger stand can go almost anywhere, because it needs just electrical power, but no phone jack. You can put it in a room or a building with no phone wiring!
Up to 36 handsets can be used with up to 4 base units. Handsets can communicate with each other privately, independent of base and phone line. When used as two-way radios, operation is "full-duplex" like a phone -- no need to push a button to talk.Phone calls can be transferred from one handset to another.
Each handset comes with one NiMH battery pack. You can order another if you want. One charger stand can charge a battery inside a phone, plus a separate battery. You can change batteries while a call is on hold.

Talk time is up to 3 hours, and recharging time just 80 minutes. Standby time is up to 40 hours.
The use of multiple base units can permit a group of handsets to be used in a large area, and allows multiple lines to be shared by a group of phones.
Bases can be connected directly to phone company dial tone, or to any phone system that can

accept single-line analog phones. If bases are connected to a PBX or "hybrid" phone system, users can dial 9 to get any line available.
You'll get FREE "ground" shipping in the US, plus unlimited toll-free tech support

Availability: Usually ships the same business day.

SN920-1$348.00

(http://store1.yimg.com/I/panasonic-ablecomm_1733_976886)
Comes with NiMH battery, charger and two antennas. Works with EnGenius SN-900 and SN-920 systems. Will NOT work by itself.

Availability: Usually ships the same business day.

SN920-HC$168.00

Provides maximum range with an EnGenius phone, where the base can't be mounted up high, or is deep inside a building. Useful for industrial parks, farms, ranches, construction sites, auto dealers, educational campuses, factories.

The antenna comes with 65 feet (20 meters) of heavy-duty coaxial cable. The standard antenna on the base unit is replaced by the external antenna's coaxial cable connector. The manufacturer recommends installation by a professional radio antenna installer.
NOTE: $5 shipping charge when ordered with EnGenius Ultra-1 or Ultra-2. Shipping charge is at least $20 when ordered without Ultra-1 or Ultra-2.

Availability: Usually ships the same business day.

ULTRA-EA$96.00

(http://store1.yimg.com/I/panasonic-ablecomm_1733_359151)
Additional or replacement Nickel Metal Hydride battery pack for EnGenius SN-920 long-range cordless phone. $30 with FREE SHIPPING in the US when ordered with an SN920 phone. $7 shipping charge when ordered alone.

Availability: Usually ships the same business day.

SN920-BA$32.00

(http://store1.yimg.com/I/panasonic-ablecomm_1733_1136608)
Provides lots of protection and easy access. Comes with swivel belt clip. Protects antenna while retracted. Openings for volume control and headset adapter.

Availability: Usually ships the same business day.

SN920-HDCASE$28.00COLOR: yellowblack

(http://store1.yimg.com/I/panasonic-ablecomm_1733_985229)
FREE SHIPPING in the USA when ordered with a phone. $8 shipping charge when ordered alone

Availability: Usually ships the same business day.

SN920-BC$10.00

(http://store1.yimg.com/I/panasonic-ablecomm_1732_833412)
Works with headsets that have 2.5mm plugs. Connects to bottom of handset.

FREE SHIPPING in the USA when ordered with a phone. $8 shipping charge when ordered alone.

Availability: Usually ships the same business day.

SN-920HA$20.00

(http://store1.yimg.com/I/panasonic-ablecomm_1732_835785)
FREE SHIPPING in the USA when ordered with a phone. $8 shipping charge when ordered alone

Availability: Usually ships the same business day.

SN920-MC$10.00

Fear Of Soldering!
from Mike Wingfield, W8MW on April 1, 2003
View comments about this article! (http://www.eham.net/articles/5108#comments)

Fear Of Soldering!

Perhaps you?ve heard about it. Maybe you?ve seen it on the news. It?s ugly; it?s insidious and it?s invading the amateur radio service at an alarming rate. It?s Fear Of Soldering.

Fear Of Soldering affects 4 out of 5 newly licensed radio amateurs. In a recent survey less than 10 percent of those examining the printed circuit board from a 1963 vintage Heathkit SWR bridge could state with certainty whether solder was used in the assembly process. Another survey revealed that the majority of amateurs consider soldering guns too dangerous to keep in the house. When presented with this information, Mr. Weller himself cried tears as big as those of the native American Indian standing next to the polluted river in that famous public service announcement.

For some amateurs, soldering isn?t all that scary. It?s simply the use of alloys with a low temperature melting point to establish a mechanical bond and low resistance connection between conductors in a circuit.

Fear Of Soldering presents ramifications that strike deeply into the very heart of the hobby. Tasks once considered simple are now beyond the technical skill set found in ham shacks. No longer will amateurs be soldering microphone connectors, coaxial cable connectors, lugs, jacks, switches and wires. Self-reliance and pride in accomplishment, at the most fundamental levels of electricity and electronics, have apparently outlived their usefulness. Houston, we have a problem.

But there is no problem according to the American Radio Relay League. ARRL spokesman Basil Cridpitty, WB1LIE, said Fear Of Soldering is actually a positive thing that will bring more new licensees to the ranks of the hobby. He explained that plug-n-play has already made soldering an ancient art akin to using a cat whisker to find the most conductive surface on a crystal detector. Besides that, he said QST has received no paid advertising dollars from any of the manufacturers of solder, soldering equipment or soldering paste for over 30 years, while plug-n-play manufacturers spend huge dollars on QST ads.

So, the bottom line: Solder bad. Plug-n-Play good. And you can take that to the bank!

resentment against homebrewing

Reply (http://www.eham.net/forums/post/Articles/20337)

by JJ1BDX (http://www.eham.net/user/profile/JJ1BDX) on April 1, 2003

Mail this to a friend! (http://www.eham.net/forums/mailto/1?id=20337)

I hope and I believe this is an April fool story.

On the other hand, I see some significant social movement of resentment against soldering at home. Even Akihabara (the biggest electronic parts complex in Japan and maybe throughout the world) has been invaded by non-homebrewing industries. Some people consider those who homebrews electronic circuits too eccentric and extraordinary to fit into the society.

And even many of so-called hardware engineers think they can build the circuits just manipulating solely in front of a computer. They only know the surface-mountable parts. For the software engineers, it's getting much worse - they just don't know soldering, or know little about cabling.

I believe that being able to build an electronic circuit is a very important, if not critical, skill to be creative on real-world problem solving. I think all amateurs should learn, or at least try to learn, soldering and related engineering skills.

MUMBAI AMATEUR RADIO SOCIETY

dear friends,

The Early Birds Net has once started on 145.00 Mhz at 07:00 AM.

Today there were 5 checkins.

VU2JPN - Mumbai

VU2JNM - Navsari.

VU2HOC - Valsad.

VU2PJM - Udwada.

VU2WLL - Udwada.

Four out of five were Dx stations, Its time for Mumbaities to Wake Up.

Do join us on the Early Birds Net every morning and help in increasing 2 meter activity.

Subject: [ans] ANS-089 Weekly Satellite Report

This report is organized into 2 parts.
Part 1 - operational analog amateur satellites.
Part 2 - operational digital amateur satellites.

Would you like to help keep other satellite operators up to date
with the latest information? I'm looking for a new ANS-WSR editor.
If you're interested, please drop me a note: n1jez@...

WEEKLY SATELLITE REPORT PART 1

AMSAT NEWS SERVICE BULLETIN 089.S1 FROM AMSAT HQ
SILVER SPRING, MD, MARCH 30, 2003
TO ALL RADIO AMATEURS
BID: $ANS-089.S1

AO-40 AMSAT OSCAR 40
Launched: November 16, 2000 aboard an Ariane 5 launcher
from Kourou, French Guiana.
Status: Currently, the U/V/L-1/L-2 to S-2/K passband is active
at various times.
Uplink V-band 145.840 - 145.990 MHz CW/LSB
U-band 435.550 - 435.800 MHz CW/LSB
L1-band 1269.250 - 1269.500 MHz CW/LSB
L2-band 1268.325 - 1268.575 MHz CW/LSB
S1-band 2400.350 - 2400.600 MHz CW/LSB
Downlink: S-band 2401.225 - 2401.475 MHz CW/USB
K-band 24,048.010 - 24,048.060 MHz CW/USB

AO-40 experimental transponder operation started on May 05, 2001 at
approximately 08:00 UTC when the U-band and L1-band uplinks were
connected to the S-2 transmitter passband downlink via the Matrix
switch.

The nominal ALON/ALAT is now 30/0.
The passband has been moved to MA 120 - 240.

Gene, W3PM has an Excel spreadsheet that will help evaluate your
AO-40 groundstation. Download it at:
http://www.amsat.org/amsat/ftp/software/spreadsheet/w3pm-ao40-v2.1.zip

Scott, NX7U has a program that automatically calculates Uplink S/N
against a supplied Nova for Windows orbital listing. Download it at:
http://members.cox.net/nx7u/ao40/ao40v20_AutoSNR.zip

The "AO-40 FAQ", compiled by Steve, VK5ASF is now available at:
http://www.amsat.org

Ground stations capturing telemetry from AO-40 are asked to send a
copy of the data to the AO-40 archive at: ao40-archive@....

For the current transponder-operating schedule visit:
http://www.amsat-dl.org/journal/adlj-p3d.htm

[ANS thanks AMSAT-NA and AMSAT-DL for this information]
=====
ARISS - INTERNATIONAL SPACE STATION
Worldwide packet uplink: 145.990 MHz FM
Region 1 voice uplink: 145.200 MHz FM
Region 2/3 voice uplink: 144.490 MHz FM
Worldwide downlink: 145.800 MHz FM
TNC callsign: RS0ISS-1

The ARISS initial station was launched September 2000 aboard shuttle
Atlantis. ARISS is made up of delegates from several major national
Amateur Radio organizations, including AMSAT.
Status: Operational.

The current Expedition 6 crew is:
Commander Ken Bowersox, KD5JBP
Flight Engineer Nikolai Budarin, RV3FB
NASA ISS Science Officer Don Pettit, KD5MDT

The Packet system is currently non-operational.

Alain, IZ6BYY and Claudio, IK1SLD wish to announce the opening
of the ISS Fan Club. Visit: http://www.issfanclub.com

The ISS Fan Club announces the introduction of the "ISS
Achievement Award". Visit: http://www.issfanclub.com/iaa

Information on how to access the Amateur Radio equipment aboard
the ISS is available at:

http://www.marex-na.org/fileshtml/unprotopage.html

The ISS daily crew schedule can be found at:
http://spaceflight.nasa.gov/station/timelines/
When crew members have free time, they may be available for
Amateur Radio operations.

U.S. callsign: NA1SS
Russian callsigns: RS0ISS, RZ3DZR

The QSL routes for W/VE stations working the International
Space Station (all callsigns):

U.S. stations (a SASE is required to get a QSL in return):
Margie Bourgoin, KB1DCO
Attn: ARISS Expedition-1 (or 2, 3, etc.) QSL
ARRL, 225 Main Street
Newington, Connecticut 06111

Canadian stations:
Radio Amateurs of Canada
Attn: ARISS Expedition-1 (or 2, 3, etc.) QSL
720 Belfast Road, Suite 217
Ottawa, Ontario KEG 0Z5

European stations (a SASE and 2 IRC's are required to get
a QSL in return).
AMSAT-France
14 bis, rue des Gourlis
92500 Rueil Malmaison
France

More information is available at: http://ariss.gsfc.nasa.gov/

[ANS thanks Will Marchant, KC6ROL, and Jean-Louis Rault, F6AGR,
for this information]
=====
AO-7 AMSAT OSCAR 7
Uplink: 145.850 to 145.950 MHz CW/USB Mode A
432.125 to 432.175 MHz CW/LSB Mode B
Downlink: 29.400 to 29.500 MHz CW/USB Mode A
145.975 to 145.925 MHz CW/USB Mode B
Beacon: 29.502 MHz, 145.972 MHz, 435.1 MHz, 2304.1 MHz
Launched: November 15, 1974 by a Delta 2310 from Vandenberg Air Force Base,
Lompoc, California. Status: Semi-operational in sunlight.

After being declared dead 21 years ago in mid 1981 due to battery failure,
AO-7 has miraculously sprung back to life and was first detected by
Pat Gowen, G3IOR on June 21, 2002 at 1728 UTC. Jan King, W3GEY reports
AO-7 is running off the solar panels only. It will only be on when in
sunlight and off in eclipse. Therefore, AO-7 will reset each orbit and
may not turn on each time.

On July 11, 2002 AO-7 was successfully commanded for the first time since
it was declared dead 21 years ago. Commands were sent and accepted to
change the CW beacon code speed.

Command investigation continues. So far, 11 different commands have been
accepted by AO-7.

Yoshi Imaishi, JF6BCC is compiling an excellent list of observations.
Please send him whatever you have. jf6bcc@...
You can view the list at:
http://plaza16.mbn.or.jp/~palau/temp/AO7-mode-report.xls

Tim, K3TZ has written a program to decode AO-07 telemetry.
The program can be downloaded at:
http://www.qsl.net/k3tz/files/K3TZ_AO-07_Telemetry_Decoder_0.5.zip

For more AO-7 info: http://www.amsat.org/amsat/sats/n7hpr/ao7.html

[ANS thanks Pat Gowen, G3IOR and Jan King, W3GEY for this information]
=====
AO-10 OSCAR 10
Uplink: 435.030 to 435.180 MHz CW/LSB
Downlink: 145.975 to 145.825 MHz CW/USB
Beacon: 145.810 MHz (unmodulated carrier)
Launched: June 16, 1983 by an Ariane launcher from Kourou,
French Guiana. Status: Semi-operational.

AO-10 has been locked into a Mode-B, 70-cm uplink and
2-meter downlink for several years.

W4SM has more information about the satellite at the following URL:
http://www.cstone.net/~w4sm/AO-10.html

[ANS thanks Stacey Mills, W4SM, for his AO-10 status information
and web site]
=====
UO-14
Uplink: 145.975 MHz FM
Downlink: 435.070 MHz FM
Launched: January 22, 1990 by an Ariane launcher from Kourou,
French Guiana. Status: Operational, mode J.

Tim, KG8OC, features UO-14 information on the Michigan AMSAT
web site:
http://www.qsl.net/kg8oc

Ray, W2RS, has revised the AO-27 FAQ on < www.amsat.org > to
include information on UO-14.

[ANS thanks Chris Jackson, G7UPN/ZL2TPO, for UO-14 information]
=====
RS-15 RADIO SPORT RS-15
Uplink: 145.858 to 145.898 MHz CW/USB
Downlink: 29.354 to 29.394 MHz CW/USB

Beacon: 29.352 MHz (intermittent)
SSB meeting frequency: 29.380 MHz (unofficial)
Launched: December 26, 1994 from the Baikonur Cosmodrome
Status: Semi-operational, mode-A, using a 2-meter uplink and a
10-meter downlink.

Dave, WB6LLO, has operating information for both RS-15 on his
web site. In addition to satellite data, antenna information for
mode-A operation is also featured. The WB6LLO web site URL is:
http://home.san.rr.com/doguimont/uploads

[ANS thanks Dave Guimont, WB6LLO, for this information]
=====
FO-20 JAS-1b
Uplink: 145.90 to 146.00 MHz CW/LSB
Downlink: 435.80 to 435.90 MHz CW/USB
Beacon: 435.795
Launched: February 07, 1990 by an H1 launcher from the Tanegashima
Space Center in Japan.
Status: Operational. FO-20 is in mode JA continuously.

Tak, JA2PKI, reported FO-20 control station operators believe that the
UVC (Under Voltage Controller) is now regulating the transponder. The
controller monitors battery voltage and tries to protect the batteries
from over discharge.

[ANS thanks Kazu Sakamoto, JJ1WTK, for the FO-20 status reports]
=====
RS-20
Beacon: 145.828, 435.319 MHz
Launched: November 28, 2002 aboard a Kosmos 3-M rocket from Plesetsk.
Status: Telemetry heard on the 70 cm beacon.

RS-20 is an experimental payload aboard the Russian satellite known as
Mozhayets -- a navigational and scientific satellite. RS-20 transmits
CW telemetry. Each frame begins and ends with the call sign RS-20.

Table for decoding telemetry is as follows:
Name Limits Decoding Assignment

RS 20 The callsign
UBS N=100:170 U=N / 10 Volts On board voltage
IBS N=10:250 I=N / 100 Ampers On board current
USUN N=0:180 U=N / 10 Volts Charge voltage from solar battery
ISUN N=0:180 I=N / 100 Ampers Charge current from solar battery
ITXA N=0:170 I=N / 100 Ampers D.C. current of the 435 MHz Tx
PTXA N=0:70 P=N / 10 Watts UHF power of the 435 MHz Tx
TTXA N=50:190 T=N - 100 deg C Temperature of the 435 MHz Tx
ITXB N=0:150 I=N / 100 Ampers D.C. current of the 145MHz Tx
PTXB N=0:70 P=N / 10 Watts VHF power of the 145MHz Tx
TTXB N=50:190 T=N - 100 deg C Temperature of the 145MHz Tx
TEXT N=30:250 T=N - 100 deg C Temperature of the outer case

TINT N=30:190 T=N - 100 deg C Temperature of the inner case
TOR N=10:250 T=N - 100 deg C Temperature of the Earth sensor
UOR N=0:100 U=N / 10 Volts Temperature of the Sun sensor
MTX N=0:255 Table of operational modes. The housekeeping info.
MRX N=0:255 Table of operational modes. The housekeeping info.
RS 20 The callsign

Please send reception reports to:
plis@... or zaitzev@...

[ANS thanks Alexander N. Zaitzev, RW3DZ for this information]
=====
AO-27 AMRAD
Uplink: 145.850 MHz FM
Downlink: 436.795 MHz FM
Launched: September 26, 1993 by an Ariane launcher from Kourou,
French Guiana. Status: Semi-operational, mode J.

AO-27's orbit has moved the satellite into a period of Full Orbit Solar
Illumination. Due to this, the TEPR method of timing the Transmitter does
not work. Therefore AO-27 cannot turn its transmitter on by itself and can
only be turned on by ground station command.

March 15th, 2003 UTC
New software has been uploaded successfully to AO-27. The new commands are
working great and ON-ORBIT checkout is continuing. During the upcoming week
control operators will be checking out the new scheduler and fine tuning the
scheduler parameters. We will be turning on the Analogue Repeater for time
to
time during this checkout period when we don't need to collect telmetry. If
all continues to go well, we will be able to turn AO-27 back to Normal
self scheduled operations in a few weeks.

Thanks goes out to N1UC and W4XP for their tremendous effort in getting this
new software up to the bird.

The latest information on AO-27 from control operator Michael
Wyrick, N3UC (former N4USI), can be found at:
http://www.ao27.org

An AO-27 question-and-answer page is available on the AMSAT-NA web
site, with updates by Ray, W2RS. The URL is:
http://www.amsat.org/amsat/intro/ao27faq.html

[ANS thanks AMRAD for AO-27 information]
=====
FO-29 JAS-2
Launched: August 17, 1996, by an H-2 launcher from the Tanegashima
Space Center in Japan. Status: Operational.

Voice/CW Mode JA
Uplink: 145.90 to 146.00 MHz CW/LSB

Downlink: 435.80 to 435.90 MHz CW/USB
Beacon: 435.795 MHz

Digital Mode JD
Uplink: 145.850 145.870 145.910 MHz FM
Downlink: 435.910 MHz 1200-baud BPSK or 9600-baud FSK
Callsign: 8J1JCS
Digitalker: 435.910 MHz

Mineo, JE9PEL, has an FO-29 satellite telemetry analysis program that
will automatically analyze all digital telemetry from the satellite
(such as current, voltage and temperature). FO29CWTE is available at:
http://www.ne.jp/asahi/hamradio/je9pel/

[ANS thanks Kazu Sakamoto, JJ1WTK, for the FO-29 status reports]
=====
SO-41 SAUDISAT-1A
Uplink: 145.850 MHz
Downlink: 436.775 MHz
Broadcast Callsign: SASAT1-11
BBS: SASAT1-12
Launched: September 26, 2000 aboard a converted Soviet ballistic
missile from the Baikonur Cosmodrome.
Status: Operational but intermittent.

The spacecraft is operating in Mode-J, currently configured as an
analog FM voice repeater, as power and spacecraft experiments permit.

Further information is available at:
http://www.amsat.org/amsat/sats/n7hpr/so41.html

[ANS thanks Turki Al-Saud for this information]
=====
SO-50 SAUDISAT-1C
Uplink: 145.850 MHz (67.0 Hz PL tone)
Downlink: 436.800 MHz
Launched: December 20, 2002 aboard a converted Soviet ballistic
missile from the Baikonur Cosmodrome. Status: Operational.

SO-50 carries several experiments, including a mode J FM amateur repeater
experiment operating on 145.850 MHz uplink and 436.800 MHz downlink.
The repeater is available to amateurs worldwide as power permits, using a
67.0
Hertz tone on the uplink, for on-demand activation.

[ANS thanks Turki Al-Saud for this information]

/EX

SB SAT @ AMSAT $ANS-089.S2
WEEKLY SATELLITE REPORT PART 2

AMSAT NEWS SERVICE BULLETIN 089.S2 FROM AMSAT HQ
SILVER SPRING, MD, MARCH 30, 2003
TO ALL RADIO AMATEURS
BID: $ANS-089.S2

UO-11 OSCAR-11
Downlink: 145.826 MHz FM (1200-baud AFSK)
Mode-S Beacon: 2401.500 MHz
Launched: March 1, 1984 by a Delta-Thor rocket from Vandenberg Air Force Base in California. Status: Semi-operational.

OSCAR-11 has continued to operate in a default mode, controlled by the watch-dog timer. The satellite transmits continuous ASCII telemetry for about seven days on 145.826 MHz, followed by about 14 days of silence. These times appear to be somewhat variable, and on the last occasion the sequence was ten days off and nine days ON. The mode-S beacon on 2401.5 MHz transmits continuously.

At the present time, ground control are unable to command the satellite, due to low temperatures affecting the command decoder. They will attempt to command the satellite when the command decoder temperature has risen to 15C.

The mode-S beacon has been heard by Michael OH2AUE. He uses a home brew feed horn antenna with a three stage pre-amp.

A Windows program for displaying and capturing OSCAR-11 data is now available. This is MIXW2, a general purpose Amateur Radio data communication program written by Nick Fedoseev UT2UZ.
You can download the program from www.mixw.net
You need the latest version 2.07.

The following operating schedule is currently suspended.

ASCII status (210 seconds)
ASCII bulletin (60 seconds)
BINARY SEU (30 seconds)
ASCII TLM (90 seconds)
ASCII WOD (120 seconds)
ASCII bulletin (60 seconds)
BINARY ENG (30 seconds)

The ASCII bulletin is currently a static message, detailing modes and frequencies of all active Amateur Radio satellites.

More information on OSCAR-11 is available at the following URL:
http://www.users.zetnet.co.uk/clivew/

[ANS thanks Clive Wallis, G3CWV, for OSCAR-11 status information]
=====
AO-16 PACSAT
Uplink: 145.90 145.92 145.94 145.96 MHz FM
(using 1200-baud Manchester FSK)
Downlink: 437.026 MHz SSB (1200-baud PSK)

Mode-S Beacon: 2401.1428 MHz
Broadcast Callsign: PACSAT-11
BBS: PACSAT-12
Launched: January 22, 1990 by an Ariane launcher from Kourou,
French Guiana. Status: Semi-operational, the digipeater command is on.

A WOD collection of current graphics along with general information
and telemetry samples can be found at:
www.telecable.es/personales/ea1bcu

[ANS thanks Miguel Menendez, EA1BCU, for AO-16 status information]
=====
UO-22 UOSAT
Uplink: 145.900 FM 9600-baud FSK
Downlink: 435.120 MHz FM
Broadcast Callsign: UOSAT5-11
BBS: UOSAT5-12
Launched: July 17, 1991 by an Ariane launcher from Kourou,
French Guiana. Status: Operational.

On November 21, 2002 Chris Jackson, G7UPN reported:

UO-22 is operating OK at the moment. Some new software has been loaded to
try and keep the downlink operating most of the time. It seems that after
around 60000 charge/discharge cycles the Nicad batteries are starting to
show their age!

The downlink will be switched off from time to time over certain parts
of the globe. This is required to allow the attitude control system to
operate correctly since the power system cannot supply enough power to
support both the transmitter and the magnetorquers.

More information on the satellite is available at the following URL:
http://www.sstl.co.uk/

[ANS thanks Chris Jackson, G7UPN/ZL2TPO, for UO-22 information
and Jim Weisenberger, AA7KC, for status information]
=====
IO-26 ITAMSAT
Uplink: 145.875 145.900 145.925 145.950 MHz
FM (1200-baud)
Downlink: 435.812 MHz SSB
Broadcast Callsign: ITMSAT-11
BBS: ITMSAT-12
Launched: September 26, 1993 by an Ariane launcher from Kourou,
French Guiana. Status: Semi-operational, the digipeater function is on
and open for APRS users.

On November 18, 2002 Alberto, IK2BD reported:

The current configuration of IO-26 allows only limited telemetry in MBL
(safe)

mode. To enable full telemetry and digipeating, we must re-load the full IHT high level software suite. This was delayed several times, but we plan to do that in the near future. When the IHT code is running, the bulletin will announce that.

[ANS thanks ITAMSAT Project Manager Alberto E. Zagni, I2KBD, for IO-26 information]
=====
NO-44 PCSAT
Uplink/downlink: 145.827 MHz 1200 baud AX.25 AFSK via W3ADO-1
Aux/Uplink: 435.250 MHz 9600 baud via PCSAT-2 (off)
APRS Downlink: 144.390 MHz (Region 2)
Launched: September 30, 2001 aboard an Athena-1 rocket from the Kodiak, Alaska launch complex. Status: Operational.

PCSat is a 1200-baud APRS digipeater designed for use by stations using hand-held or mobile transceivers. Downlinks feed a central web site < http://pcsat.aprs.org >. The APRS-equipped PCSat was built by midshipmen from the U.S. Naval Academy under the guidance of Bob Bruninga, WB4APR.

PCSAT BBS experiment ENDS

PCsat is in its eclipse season, so we must make sure that NO ONE attempts to use the PBBS any more, as it drains the batteries, and once we loose it, then we lose it for the next 2 months or more. Please return to normal ops. This means:
NO CONNECTIONS TO or THROUGH PCSAT and no CONNECTIONS to PCSAT's BBS. Please use UIDIGIPEATS only and for routine operations, avoid opertions after dark and before sunrise..

A new version of PCSAT.EXE has been posted at:
ftp://tapr.org/dosstuff/APRSdos/pcsat017.zip

For more information, visit the PCSat web site at:
http://web.usna.navy.mil/~bruninga/pcsat.html

[ANS thanks Bob Bruninga, WB4APR, for PCSat information]
=====
MO-46 TIUNGSAT-1
Uplink: 145.850 or 145.925 MHz 9600-baud FSK
Downlink: 437.325 MHz
Broadcast callsign: MYSAT3-11
BBS: MYSAT3-12
Launched: September 26, 2000 aboard a converted Soviet ballistic missile from the Baikonur Cosmodrome. Status: Operational at 38k4-baud FSK.

TiungSat-1 is Malaysia's first micro-satellite and in addition to commercial land and weather imaging payloads offers FM and FSK Amateur Radio communication.

TiungSat-1, named after the mynah bird of Malaysia, was developed as
a collaborative effort between the Malaysian government and Surrey
Satellite Technology Ltd.

[ANS thanks Chris Jackson, G7UPN/ZL2TPO, for this information]
=====
AO-49 AATiS OSCAR-49 (SAFIR-M)
Uplink 435.275 1200-baud AFSK
Downlink 145.825 9600-baud FSK
(optional voice message)
Broadcast callsign: DP0AIS
Launched: December 20, 2002 aboard a converted Soviet ballistic
missile from the Baikonur Cosmodrome. Status: Operational.

AO-49 (SAFIR-M) is a German amateur radio payload onboard the
small German scientific satellite "RUBIN-2".

AO-49 was built by the German amateur radio association
"AATiS e.V." (German acronym for "Arbeitskreis Amateurfunk
und Telekommunikation in der Schule", which means: 'working group
for amateur radio and telecommunications in schools').
AO-49 is designed as a "store and broadcast" system for APRS
based messages, dedicated for the use of schools in combination
with the existing WX-Net and planned buoy experiments in Germany.

No transmissions detected since the 1st of February 2003!
It appears AO-49 is not properly aligned to illuminate the solar
panels. This should end soon. Due to its orbit, AO-49 will be in a
phase without eclipses until 13Feb03.

Martin DG8UAU has written a small software program "SAFIR-M Decoder"
to allow decoding of the received DATA0 frames. It is available at:
http://amend.gmxhome.de in the section Aktuelles.

Details on AO-49 (SAFIR-M) can be found at:
http://amend.gmxhome.de
Information about AATiS e.V. is available at:
http://www.aatis.de

[ANS thanks Oliver Amend, DG6BCE for this information]

/EX

ANS is released worldwide via the AMSAT ANS e-mail reflector and a live
radiocast on the AMSAT-NA 20-meter net held each Sunday on 14.282 MHz.
Pre-net operations start at 18:00 UTC, with current ANS bulletins
transmitted to the eastern U.S. at 19:00 UTC and to the western
U.S. at 19:30 UTC.

Information on AMSAT-NA is available at the following URL:
http://www.amsat.org

AMSAT-NA
850 Sligo Avenue, Suite 600

Silver Spring, Maryland 20910-4703

Voice: 301-589-6062
888-322-6728
FAX: 301-608-3410

Currently, AMSAT-NA supports the following (free) mailing lists:

* AMSAT News Service (ANS)
* General satellite discussion (AMSAT-BB)
* Orbit data (KEPS)
* Manned space missions (SAREX)
* District of Columbia area (AMSAT-DC)
* New England area (AMSAT-NE)
* AMSAT Educational Liaison mailing list (AMSAT-EDU)
* AMSAT K-12 Educational Liaison mailing list (AMSAT-K12)

A daily digest version is available for each list.

To subscribe, or for more list information, visit the following URL:
http://www.amsat.org/amsat/listserv/menu.html

In addition to regular membership, AMSAT-NA offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT-NA Office.

AMSAT-NA has developed an on-line volunteer survey, designed to identify the interests and skills of those who may be available to directly help in efforts to develop the amateur satellite program. The survey is designed to be completed and returned on-line, and takes only a few minutes to fill out. To request the survey, simply send an e-mail request to:
volunteer@...

ANS would like to thank Mike Seguin, N1JEZ, ANS principal satellite investigator and Jerry Brown, K5OE for helping provide current satellite information.

ANS is always dedicated to past ANS editor 'BJ' Arts, WT0N, and to the memory of longtime AMSAT supporters Werner Haas, DJ5KQ, Dennis Kitchen, G0FCL and John Branegan GM4IHJ.

Please send any amateur satellite news or reports to:
ans-editor@...

From: VU2UGO
Topic: 1091 Message: 1091

Hi OMs/YLs,

I've downloaded lots of audio files (around 200mb) and AMSAT articles, newsletters from the below mentioned sites. I've kept everything on the CD which will be circulated in the group of people those are interested in Satellite Communication. So those interested can send me a request direct to my e-mail address vu2ugo@...

NLF, KPL, CBU, VVP, SXF, PIC, KIB - I know you will be QRV on SATs very soon and you are already on my list.

Satellite FAQs and Intros - http://www.amsat.org/amsat/intro/faqs.html
---
W6FOG - http://www.w6fog.com/
W6FOG is netcontroller for AMSAT beginner's NET from SanFransisco Bay Area.
He has kept WAV file for beginners and recordings of previous NETs.
and Links - http://www.w6fog.com/links.html

1093. Four batteries at a great charge

Yahoo group: m_a_r_s
Date: 2003-04-05 07:57:12 UTC
From: Nirav Sanghavi
Topic: 1093 Message: 1093

Hi All!

Being the proud owner of 8 Eveready pencil cells (and an incidental 2m ham rig with a home brewed slim-jim) I would like to buy an Eveready pencil cell charger.

Here's the problem.

They only 'cell' the charger with 4 pencil cells which I don't want. I have identified a shop that would sell the entire combo of a charger and 4 cells for Rs.275.00 or lower.The cells are claimed to recharge 500 times.

(I only use these cells to power my rig and so any ham who knows me will vouch his life that I don't need 12 cells.)

Is there anyone among our members who wants to buy 4 brand new Everyready cells for a fantastic price so that I get to buy the charger only? You will even get to open the blister pack yourself.

Please email or call me at (R) 2 4951736 for the same.

with kind regards,

Nirav

Icom America Inc. Selected as Official HF Radio Provider for "The Human Race Adventure"

BELLEVUE, WA (October, 2002)- Icom America Inc. announces its support of the The Human Race (THR), a documentary and 2003 race around the world relying on ham radio use, according to an agreement reached today between Icom America's National Sales Manager, Ray Novak, KC7JPA and THR producer Bill Desjardins, W1ZY.
The race consists of two ham operators starting from Kansas City, MO, one heading east and the other heading west around the planet. The racers progress is dependent upon forms of transportation volunteered by amateur radio operators met along the way. The start of the race is scheduled for June 2003.

"Icom plays a leading role in efforts to promote Amateur Radio throughout the world," THR Producer W1ZY said today in Boston. 'We're honored for The Human Race to become part of this tradition at Icom."

Icom America has shipped an IC-706MKIIG (http://www.icomamerica.com/amateur/hf/ic706mkiigmain.html) to Boston for use by THR in the next stage of pre-production. The IC-706MKIIG is capable of all-mode communications from 160 meters to 70 cm. It also boasts a continual coverage receiver with digital signal processing over the same range.

"This takes care of mobile ops," W1ZY remarked. "There's just about nothing more one could ask from a ham transceiver. Ray (Novak) picked the '706 after reviewing the project website. I can see why after looking at the operating manual."

The IC-706MKIIG (http://www.icomamerica.com/amateur/hf/ic706mkiigmain.html) and additional equipment provisions will be used during an upcoming trek along the travel route--the next stage of pre-production, according to THR's W1ZY. "We have to flesh out the travel route over the next several months in order to be on target in 2003. The Icom IC-706 will be used for mobile communications during this next stage of pre-production."

THR Producer Desjardins says the pre-production trek performs a shakedown of the systems eventually used to track the two racers, and firms up the route they will follow in 2003.

For more information on The Human Race, or to watch race progress, visit the organization's Website at http://www.etecslo.com/humanrace/index.html

Icom America's parent company, Icom Inc., was founded in Osaka Japan. Icom is a publicly held Japanese corporation; its stock is traded on the Tokyo and Osaka Stock Exchange. Icom began as an engineering and manufacturing company, making advanced, compact solid-state radio equipment for use by amateur radio enthusiasts. Icom has since grown to become an industry leader with a product line that includes state-of-the-art communications equipment for land and marine use as well as avionics. Icom America's headquarters are in Bellevue, Washington.

From: vu2nlf
Topic: 1099 Message: 1099

Untitled DocumentMUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

I am pleased to inform you that a couple of reports (including pictures) of events conducted by MARS (Foxhunt & Prize Distributation Ceremony) have been published in Ham Radio News (January to March 2003 Issue) which is printed by Amateur Radio Society of India and is circulated to all its members in India.

We are very grateful to Mrs Sarla Sharma - VU2SWS, Editor of HRN, (who also is our founder and Life Member) for printing our articles and giving us a National coverage. We are also thankful as she has mentioned about our previlaged Callsign of VU2ST in the HRN.

Ironically, The event managers (VU2ZRS & VU3MBF) On one side have taken the effort of giving us the National Coverage have somehow failed to post any reports & pictures to the MARS members, inspite of having a wonderful facility of our E - Group . Their logic is totally beyond my understanding and reasoning.

Nevertheless I once again thank VU2SWS and sincerely hope that she continues with her work for Ham Radio Promotion.

Dear Members & VU2UGO,

It was great to see you'll in Latur receiving a warm welcome from all the villagers as we always do.
The best part about a Ham Team is that we are always welcomed wherever we go.
Awaiting some more detailed pictures about the rehabilation work done after the last earthquake in latur.
Could we get pictures of some hospitals, schools, etc built by various organisations (like Rotary.. etc)after the earthquake.
Trust my friend VU2ZRS will pass on this message to you'll on laptop.
Once again Congrats VU2UGO... also for being the first to set up station and transmit on Digicam.

MUMBAI AMATEUR RADIO SOCIETY

Mumbai Amateur Radio Society (MARS) - VU2ST, one of the most active Amateur Radio society of Mumbai, conducted Results Distribution ceremony on 1st Feb' 2003 at Garware Club, Wankhede Stadium for students who cleared the Amateur Radio License exams.

To Increase the Ham population in Mumbai, MARS conducted two batches of classes at Churchgate and Thane in July 2002. 72 students appeared for the ASOC exams, 47 passed with Grade I, 8 with Grade II & 5 with restricted grade.

A result distribution ceremony was held to honor these students. Honorable Chief Guest Shri Satishchandra Pradhan - VU2PDT (M.P.) awarded these students with their results.

The function started at 4.15 pm with the arrival of honorable Chief Guest, who was greeted with bouquet and a standing ovation. Honorary Member George Phillips (VU2 GT) was also greeted, followed by a speech from Chairperson, Ms. Nafisa Shikari (VU2 NFS).

Rajan Kavedia (VU2 RIG) was the MC for this function. Event was coordinated very well to ensure coverage of all events and activities, as Mr. Pradhan was leaving the town after the event.

MARS took the opportunity of conferring honorary membership to Mr. Pradhan by handing over society cap, membership certificate and silver coin. Honorary member Mr. George Phillips - VU2GT, who also presided on the dais, also received his cap during this occasion.

This followed with speech from MARS Secretary, Nilesh Rathod (VU2 NLF), who spoke about the classes, HAM radio activities and also presented the scenario if repeaters would be put up. The presentation covered the recommended locations and plans for a Mumbai repeater and DX repeater. MARS also requested honorable chief guest for allocation of funds for the purpose of repeaters.

Honorable chief guest delivered a speech on the advantages of HAM radio and supported the request for repeaters by promising to put efforts to allocate funds from MP quota for this cause. This was followed by speech from VU2 GT.

Results were distributed by Mr. Pradhan to successful SWLs. Caps were distributed to all the SWLs.

The honorable chief guest also awarded prizes to winners of recently held Foxhunt, Treasure hunt and Scramble Team Exercise (Simulated exercise for disaster communications). Following were the winners for these events.

Prize Distribution - Scramble Team

Zyros Zend (Team Leader)

Feroze Patel

Farokh Irani

Jigar Mehta

Nishant Varsani

Rajesh Shethia

Prize Distribution - Treasure Hunt

1st Prize - Huzefa Merchant & Jigar Mehta

2nd Prize - Pravin Panchal, Zarthun Zend, Rajesh Shethia, Sujita & Dhyan

2nd Prize - Dhaval Patel & Dr. Anukanth Mittal

Prize Distribution - Fox Hunt

1st Prize - Sandeep Adiwarekar, Rahul Sankar Roy & Dileep

2nd Prize - Sanjay Kadam, Ashok Parab, Sanjay Shinde, Girish Zalke

Prize Distribution - Mega Fox Hunt

1st Prize - Arun Singh, Kapil Chandni, Shailesh, Vaibhav Palande & Harsha Salian

2nd Prize - Sanjay Kadam, Ashok Parab, Sanjay Shinde & Girish Zalke

3rd Prize - Zorben Zend

After result & prize distribution, Milind Korde and Feroze Patel from Thane and Churchgate batch shared their opinions about the classes and activities of the society.

MARS Treasurer Mehul Chovatia (VU3 MBF) also announced subsidized fees for family memberships. Special subsidies were also announced for senior citizens and physically impaired Life memberships. Mehul also announced about 80-G benefit for life memberships. MARS has a fleet of more then 30 life members.

The event was well organized with participation of 110 HAMs & SWLs from all over Mumbai. Snacks and refreshments were served after the function.

MARS plans to conduct Ham Radio Classes on regular basis at least twice in a year and hopes to increase the ham population in Mumbai by 100 new hams every year.

As mentioned above MARS plans to put up VHF repeaters in Mumbai & Maharashtra and also to connect HAMs to Internet via Amateur Radio. MARS also thrives to lessen the ticket waiting period and constantly engage SWLs in activities so that they are constantly encouraged and in touch with the hobby

73s,

Mehul Chovatia - Event Manager, MARS

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

With much regret I inform you that till today we have not received a single nomination form for the election of the 4th Managing Committee.

I once again request all 46 eligible members to come forward and put in their nomination form. If we do not receive atleast 7 nominations by 20th April 2003, we will have to postone the Annual General Meeting.

I sincerely hope that members will take initative and file their nomination latest by 20th April 2003.

73

Nilesh Rathod, Secretary.

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

It seems that every year I have to practically beg to members to come forward and file their nominations. I really wonder if the founder members have sense of responsibility ????

The last day for filing nomination forms for 4th Managing Committee of our society is 20th April 2003. So far we have received only 1 nomination form. If we do not receive atleast 7 nominations by tommorrow (20th April 2003) , we would be forced to cancel the Annual General Meeting and then call for a Special General Meeting to decide the fate of our society.

I therefore once again request all the founder and eligible members to come forward and file their nominations else we are likely to wind up.

1116. Nomination for Managing Committee

Yahoo group: m_a_r_s
Date: 2003-04-20 08:39:15 UTC
From: kailash_gupta
Topic: 1115 Message: 1116

Dear Nilesh,

I nominate myself for one of the 7 members of the Managing Committee.

I have not received the Nomination Form and my this message may please be treated as filled-in Nomination Form. I also agree to all reasonable terms and conditions which may be there in the Nomination Form. If there is need of some proposer or seconder for the noimination; I request members to send message for proposing and seconding me, if they want to.

I did read your earlier message telling that Nomination Forms have been sent to all eligible members by courier and if any member has not received, the person may call on your mobile number. From my past experience (which may not be necessary guide line for future) I realise that in last two years I have sent many messages on this yahoo group, by snail mail, telephonic message and even during personal meetings; requesting you to send me receipt, constitution, annual reports, budget, cap, ID card, CD, Library Membership card and other documents and things. However, till date I have not received anything. Of couse,I do receive vertual messages on this group and thanks for that. I request you to examine why in future, Nomination Form sending, submitting filled-in Nomination Form and other matters cannot be done through this yahoo group?

The question arises, even then why am I interest in beoming member of the Managing Committee?

Beacuse I want to save MARS from winding up. MARS is doing good work. I am Life Member, athough I am not able to participate in monthly meetings and many other programmes as I donot live in Mumbai. However, I have participated in disaster communication drills from Baroda, at Pune and at Dhanu Road.

Amateur Radio is a hobby and members have other occupations and priorities. There may be small lapses on the part of administration, which I ignore. Athough I would appreciate improvements. I would request members to submit nominations and keep the society going.

When I came in December 2002 to Mumbai and Dhanu Road for scramble team exercise, I had infomed that I am living at Jaipur and had given my address and telephone number. For your record, I am again giving them below.

Kailash Gupta, VU2KIZ
C56, Shastri Nagar
Opp. Tagore School

Jaipur 302 016

dear kailash,

Your nomination form was sent by courier service, but unfortunately it was returned back because the courier does not have service to baroda.

In view of the above circumstances we accept your nomination form by e mail. The AGM and the elections are to be held on 1st May 2003 at 07:30 PM. Kindly make yourself available to attend the same.

As far as your Cap, I.D card, life membership receipts and Annual reports are concerned , I am sure all are ready and lying with Mehul - VU3MBF- Treasurer. It is just that they have not been sent to you. I am sure Mehul will do the needful after reading this mail.

From: Kailash Gupta
Topic: 1115 Message: 1119

Dear Nilesh,

Thanks.

Mehul, kindly send me the material at my Jaipur address given at the bottom of my earlier mail. My LL No. is (0141)2281888.

Hi KIZ,

The AGM report and MARS software CD has already been handed over to you during the last field trip. The cap was prepared after the field trip and hence it is lying with us. Usually we handover the cap personally as it is a matter of regard.

Pls inform if you would be present at the AGM, then I shall handover the remaining stuff to you personally or else I shall courier it to you.

Thnks N Regds,

Mehul
Treasurer - MARS.

dear kailash,

Your nomination form was sent by courier service, but unfortunately it was returned back because the courier does not have service to baroda.

In view of the above circumstances we accept your nomination form by e mail. The AGM and the elections are to be held on 1st May 2003 at 07:30 PM. Kindly make yourself available to attend the same.

As far as your Cap, I.D card, life membership receipts and Annual reports are concerned , I am sure all are ready and lying with Mehul - VU3MBF- Treasurer. It is just that they have not been sent to you. I am sure Mehul will do the needful after reading this mail.

Subject: [m_a_r_s] Nomination for Managing Committee

Dear Nilesh,

I nominate myself for one of the 7 members of the Managing Committee.

I have not received the Nomination Form and my this message may
please be treated as filled-in Nomination Form. I also agree to all
reasonable terms and conditions which may be there in the Nomination
Form. If there is need of some proposer or seconder for the

noimination; I request members to send message for proposing and seconding me, if they want to.

I did read your earlier message telling that Nomination Forms have been sent to all eligible members by courier and if any member has not received, the person may call on your mobile number. From my past experience (which may not be necessary guide line for future) I realise that in last two years I have sent many messages on this yahoo group, by snail mail, telephonic message and even during personal meetings; requesting you to send me receipt, constitution, annual reports, budget, cap, ID card, CD, Library Membership card and other documents and things. However, till date I have not received anything. Of couse,I do receive vertual messages on this group and thanks for that. I request you to examine why in future, Nomination Form sending, submitting filled-in Nomination Form and other matters cannot be done through this yahoo group?

The question arises, even then why am I interest in beoming member of the Managing Committee?

Beacuse I want to save MARS from winding up. MARS is doing good work. I am Life Member, athough I am not able to participate in monthly meetings and many other programmes as I donot live in Mumbai. However, I have participated in disaster communication drills from Baroda, at Pune and at Dhanu Road.

Amateur Radio is a hobby and members have other occupations and priorities. There may be small lapses on the part of administration, which I ignore. Athough I would appreciate improvements. I would request members to submit nominations and keep the society going.

When I came in December 2002 to Mumbai and Dhanu Road for scramble team exercise, I had infomed that I am living at Jaipur and had given my address and telephone number. For your record, I am again giving them below.

of our society is 20th April 2003. So far we have received only 1 nomination form. If we do not receive atleast 7 nominations by tommorrow (20th April 2003) , we would be forced to cancel the Annual General Meeting and then call for a Special General Meeting to decide the fate of our society.

============================================================

==>"BROADBAND OVER POWER LINE" POSES HF INTERFERENCE THREAT

The FCC soon will invite public comment on the concept of using existing
electrical power lines to deliver Internet and broadband service to homes
and offices. The Commission initiated a Notice of Inquiry (NOI) in ET
Docket 03-104 when it met April 23. What the FCC calls "Broadband over
Power Line" (BPL) is a form of carrier-current technology typically known
as power line communication (PLC). Whatever its name, the technology is
raising serious interference concerns within the Amateur Radio community,
since BPL would apply high-frequency RF to parts of the power grid. One
aspect of the NOI is to gather information on potential interference
effects on authorized spectrum users.

"Entire communities will be affected, so every amateur in that community
could have part of the radiating system 'next door' on the power wiring on
his or her street," cautioned ARRL Lab Supervisor Ed Hare, W1RFI. Hare
chairs the PLC Work Group of the IEEE C63 Accredited Standards Committee
```

on Electromagnetic Compatibility <http://c63.ieee.org/>.

The complete NOI has not yet been released, and until that happens, the FCC will not formally accept comments in the proceeding. The ARRL will be among those expected to submit detailed comments in ET 03-104.

So-called "access BPL" would use medium-voltage (1 kV to 40 kV) power lines to deliver Internet and broadband applications. Hare says access BPL is likely to be a more significant interference source than in-building PLC technology "because overhead electrical wiring is a much better antenna than the electrical wiring within a building."

ARRL CEO David Sumner, K1ZZ, editorialized on the subject of PLC in "It Seems to Us . . ." in the October issue of 2002 QST. "Is it possible to do power line communications without causing interference to over-the-air communications?" Sumner asked. "Count us among the skeptics. What may be a fine transmission line at 60 Hz looks more like an antenna at HF." Hare said his own computer analyses of interference potential from access BPL/PLC suggest "a significant increase in noise levels" from deployed systems.

The FCC appears enthusiastic about BPL, however, saying it has the potential to "provide consumers with the freedom to access broadband services from any room in the house without adding or paying for additional connections." The Commission also touted BPL as "a competitive alternative to digital subscriber line and cable modem services."

New digital power line designs use multiple carriers spread over a wide frequency range--from 2 MHz up to 80 MHz--and capable of high data rates--up to 20 MB/s, the FCC said.

In addition to viewpoints on interference potential, the FCC also has requested comments on the current state of high-speed BPL technology, test results from BPL experimental sites, appropriate measurement procedure for testing emission characteristics for all types of carrier-current systems, changes that may be needed in Part 15 technical rules, and the equipment approval process to foster the development of BPL.

Tests of BPL are under way in several states, including Alabama, Maryland, Missouri, New York, Ohio, Pennsylvania and Virginia. Hare says ARRL Lab personnel will visit some of the test cities this spring to take field measurements to quantify the potential for interference to Amateur Radio operations.

BPL/PLC technology already has been deployed in some European countries, and amateurs there have complained about interference. Japan--responding in part to concerns expressed by its amateur community--decided last year not to adopt the technology because of its interference potential.

==>HAMS ABOUND ON UN WORLD FOOD PROGRAM'S IRAQ "FAST INTERVENTION TEAM"

Several radio amateurs--including some of the world's top operators--are among United Nations World Food Program (WFP) "Fast Intervention Team"

(FITTEST) personnel already in Iraq or poised nearby and expected to be inside the war-ravaged country very soon. FITTEST is responsible for building technical infrastructure to ensure WFP can move relief food supplies rapidly and safely. Any ham radio operations would be secondary to the WFP's efforts in Iraq, however.

Peter Casier, ON6TT--who's expected in Baghdad as early as next week--says the WFP will have a critical role in the post-conflict era in Iraq "where 60 percent of the population is dependent on external food aid." In ham radio circles, Casier may be better-known as a top contester and one the operators of Afghanistan's YA5T after the US-led military action there in 2001.

Other YA5T alumni expected to soon be in Iraq as part of the WFP effort include Robert Kasca, S53R--the last UN international staff person evacuated from Iraq before the conflict--Mark Demeuleneere, ON4WW, and Mats Persson, SM7PKK. Casier and Demeuleneere paired up at World Radiosport Team Championship (WRTC) events in 2000 and 2002. Kasca was director of competition for WRTC 2000. Casier says he, Kasca and Dane Novarlic, S57CQ, were on the air from Iraq until just before the war broke out.

Casier reports that Diya Sayah, YI1DZ--one of the primary operators at the Baghdad Radio Club's YI1BGD and the WFP's Baghdad telecommunications officer--is safe and well in Iraq.

FITTEST also has a mandate to install or build basic technical networks, Casier said, including such systems as VHF repeaters, satellite communications and HF fixed and mobile stations. The team also will set up radio rooms, rework administrative procedures, and assign call signs for all UN humanitarian-aid workers and non-governmental organizations (NGOs)--other international aid organizations.

Others ready to go include Ed Giorgadze, 4L4FN, who's in Turkey. Until last November Giorgadze had operated from North Korea as P5/4L4FN while on a WFP assignment in Pyongyang. Patrick Pointu, F5ORF, and Mark Tell, VK4KMT, among several other FITTEST team members who are radio amateurs.

The Daily DX <http://www.dailydx.com> reported this week that Willie Mohney, YI/KV4EB, has been operating daily on 15 meters at or around 21.270 MHz, moving to 20 meters--perhaps around 14.255.

==>TWO-HAM CREW SET TO FLY TO INTERNATIONAL SPACE STATION

Space veterans Russian cosmonaut Yuri Malenchenko, RK3DUP, and NASA astronaut Ed Lu, KC5WKJ, were scheduled to head into space this weekend to assume the reins of the International Space Station (ISS) as its Expedition 7 crew. Crew commander Malenchenko, 41, and NASA Space Station Science Officer Lu, 39, will be the first two-person ISS crew increment and the first primary crew to travel to the space station on a Russian Soyuz spacecraft. Their Soyuz TMA-2 vehicle is scheduled to launch April 26, at approximately 0354 UTC from Baikonur Cosmodrome in Kazakhstan.

They'll arrive aboard the ISS April 28. The two crews will spend six days together on the ISS.

Originally scheduled to return in March aboard the space shuttle Atlantis STS-114 mission, Expedition 6 Commander Ken Bowersox, KD5JBP, Flight Engineer Nikolai Budarin, RV3FB, and NASA Space Station Science Officer Don Pettit, KD5MDT, will return to Earth aboard the Soyuz TMA-1 craft that's now attached to the space station. They're scheduled to land on May 3 in Kazakhstan. Bowersox, Budarin and Pettit have been in space since November 23.

NASA says that with the arrival of the Expedition 7 crew just days away, the Expedition 6 crew has been preparing for "handover" activities this week. On April 23, the crew conducted a motion control system test in the Soyuz TMA-1 that Expedition 6 crew will use to return to Earth.

Malenchenko and Lu will remain in space until October. NASA has said that until the space shuttle returns to flight-ready status pending the outcome of the Columbia accident investigation, Russian Soyuz vehicles will handle ISS crew rotations. NASA Chief Sean O'Keefe said this week, however, that he expects the shuttle fleet to be space-ready by year's end. NASA continues to investigate the February 1 shuttle Columbia tragedy that claimed the lives of seven astronauts, three of them Amateur Radio licensees.

Amateur Radio on the International Space Station (ARISS) Chairman Frank Bauer, KA3HDO, says NASA has okayed a schedule of one or two ARISS school group contacts per week, despite the reduction in crew size. The grounding of the shuttle fleet could put a crimp in plans to deliver new ham radio gear to the ISS this year, however.

==>FCC ALLEGES MICHIGAN HAM ENGAGED IN DELIBERATE INTERFERENCE, THREATS

The FCC alleges that a Michigan ham engaged in deliberate interference and broadcasting and threatened other amateurs, and it's sending Michael Guernsey Sr, ND8V, of Parchment a tape recording to back up those assertions. Since late 1998, Guernsey has been the recipient of seven letters from FCC Special Counsel Riley Hollingsworth, including two warning notices. In 2000, the FCC threatened to designate Guernsey's license for a revocation and suspension hearing. Guernsey subsequently agreed to a nine-month suspension of his HF privileges in 2001.

"The operation of your station over the last several years raises questions about your qualifications to remain a Commission licensee," Hollingsworth wrote Guernsey on April 7. The latest flap primarily involves complaints from other amateurs of deliberate interference on 20 meters. The recorded transmissions were made on March 26, 2003.

In his letter, Hollingsworth noted that some of the interference apparently sprang from on-the-air personal disputes or from what Guernsey perceived as deliberate interference to his transmissions. Even so, Hollingsworth said, Guernsey has apparently ignored the Commission's

written and verbal warnings to not retaliate with similar behavior. Hollingsworth advised Guernsey that the alleged deliberate retaliatory threats and transmissions on top of other QSOs are contrary to FCC rules "and indicate that the numerous warnings to date have little, if any, effect in regarding to bringing your operation into compliance with Commission rules."

Hollingsworth requested that Guernsey review the tape recording and respond in writing and in detail within 20 days. He said the FCC will use the information Guernsey submits to decide whether to designate Guernsey's license for a suspension and revocation proceeding or to lift voice privileges from Guernsey's license for the remainder of his license term, which ends in 2012.

In a related letter, Hollingsworth issued similar words of caution to George Zardecki, N9VTB, of Chicago, with whom, he says, Guernsey has squabbled on the air. While Hollingsworth indicated that he would review and take action regarding Zardecki's deliberate interference complaints, he advised Zardecki that "in several instances, your own conduct was as bad or worse than the party about whom you complained." He cautioned Zardecki against retaliatory interference, slander and name calling.

==>INDIANA, TENNESSEE AMATEUR ANTENNA BILLS HEADED FOR GOVERNORS' DESKS

Amateur Radio antenna bills in Indiana and Tennessee need only their respective governors' signatures to eventually become law. In both cases, the measures would incorporate the wording of the limited federal preemption known as PRB-1 into the laws of each state.

"A stunning reversal of fortune" is how ARRL Central Division Director Dick Isely, W9GIG, described the passage of Indiana's bill, SB 109, which at one point had been shelved in committee. ARRL Indiana Section Manager Jim Sellers, K9ZBM, and others convinced lawmakers to resurrect SB 109. Isely and Sellers credited the efforts of former ARRL State Government Liaison Dave Spoelstra, N9KT, in the successful passage of SB 109. "He was able to provide Jim Sellers and me with a lot of valuable insight into the various legislative moves," Isely said.

Favorably voted out of committee, the measure went on to pass the Indiana House of Representatives April 14 on a 97-2 vote but without the 75-foot minimum regulatory antenna structure height the Senate version of the bill had contained. A House-Senate conference committee, convened to iron out the differences, left out the 75-foot minimum, and the Senate passed the stripped-down measure on a 39-9 roll-call vote. SB 109 now goes to Indiana Gov Frank O'Bannon. If he signs the measure, it will become effective July 1.

In Tennessee, the Senate voted 31-0 on April 14 to accept a previously passed House bill, HB 1010, to replace the Senate's PRB-1 measure, SB 0365. The House vote was 97-0. The bill now goes to Gov Phil Bredesen.

"Many thanks for this progress goes to the teamwork of our State Government Liaison Ingrid Klose, KD4F, Local Government Liaison Jimmy Floyd, NQ4U, and the many Tennessee hams who contacted their senators and representatives to solicit their votes and support," said ARRL Tennessee Section Manager Terry Cox, KB4KA.

At the request of Tennessee Section leadership, lawmakers eliminated language from the original Senate bill that would have incorporated minimum regulatory height limits, below which localities could not regulate. The Senate bill had asked for an up to 200 foot minimum regulatory height for low population density areas and either a 65 or 75-foot regulatory minimum in more densely populated areas, depending on lot size.

"We realized there was a very slim chance of getting the original wording, including height limitations, approved after the resistance we received from the Tennessee Municipal League in last year's effort," Cox explained.

The bills approved in both states prohibit localities from enacting or enforcing ordinances, resolutions or orders that do not comply with the PRB-1 limited federal preemption (§97.15). Both measures also would require ordinances involving the placement, screening or height of Amateur Radio antennas based on health, safety or aesthetics to "reasonably accommodate" Amateur Radio communications and represent the minimal practicable regulation to accomplish a municipality's or county's legitimate purpose.

The Indiana law also would permit municipalities or counties to act to protect or preserve historical or architectural districts established under local, state or federal law.

So far 17 states have incorporated the essence of PRB-1 into their laws, but only a handful--Oregon, Virginia, Alaska and Wyoming--include minimum regulatory height limits in their Amateur Radio antenna laws based on PRB-1.

==>HAMVENTION ANNOUNCES 2003 AWARD WINNERS

Hamvention has named the winners of its 2003 Amateur of the Year, Special Achievement and Technical Excellence awards. Well-known contester Larry "Tree" Tyree, N6TR, will receive Hamvention's 2003 Amateur of the Year Award. Tyree is the creator, organizer, and promoter of the successful Kid's Day <http://www.arrl.org/FandES/ead/kd-rules.html>--now administered by the ARRL. Kid's Day is an operating activity designed to give young people a chance to experience Amateur Radio firsthand and possibly inspire them to become licensees. Tyree also developed the popular TR-LOG contest logging software. A ham since 1967, Tyree lives in Boring, Oregon, with his wife and three daughters.

"I hope to be able to use this to help encourage others to encourage young people to join our hobby," Tyree commented. "Obviously the help the ARRL has given me by taking over the event has been part of the success that enabled this [award]." The award to Tyree is in line with Hamvention's

2003 theme, "Year of the Youth." The show, May 16-18 at Hara Arena near Dayton, Ohio, will be on young hams and on attracting 12 to 18-year olds into Amateur Radio.

Jonathan Taylor, K1RFD, of Ridgefield, Connecticut, is the winner of Hamvention's 2003 Special Achievement Award. Taylor developed the Internet-linking program called EchoLink and the repeater-control program called EchoStation. EchoLink allows amateur stations to connect with each other via the Internet to expand repeater and simplex coverage and to provide Amateur Radio operators with access from their PCs.

Hamvention's 2003 Technical Achievement Award goes to Dr Steve Dimse, K4HG, of Cudjoe Key, Florida. Dimse was behind the development of the global Automated Position Reporting System (APRS) Internet network <http://www.aprs.net/> that links more than 20,000 APRS operators around the world. Dimse also wrote the findU global database software <http://www.findu.com>, and he helped form the Citizens Weather Service (CWS).

Awards will be presented at an award winners' reception at Hara Arena May 17.

Hamvention 2003 also recognized the contributions of several Silent Keys to Amateur Radio. Those recognized include the crew of the shuttle Columbia STS-107 mission, which included three Amateur Radio licensees. Other Silent Keys honored included ham radio author Joe Carr, K4IPV; inventor Al Gross, W8PAL; ham radio author Bill Orr, W6SAI; and ham radio volunteer and Elmer Ernie Hudson, KI8O.

==>FORMER W1AW CHIEF OPERATOR CHUCK BENDER, W1WPR, SK

Former W1AW staff member and chief operator Charles R. "Chuck" Bender, W1WPR, of West Hartford, Connecticut, died April 17. He was 79. Bender served as an operator at Maxim Memorial Station W1AW for more than 37 years--from 1952 until his retirement in 1989--the last 17 years as chief operator.

"Chuck was a fixture at W1AW," said ARRL Chief Operating Officer Mark Wilson, K1RO. "For many League members, he was the visible, human face of ARRL Headquarters as he greeted visitors to the station during his tenure." Bender's photo also graced W1AW's QSL card for a number of years, making him probably one of the most recognized hams in the country.

ARRL Archivist Perry Williams, W1UED, was a long-time colleague of Bender's. "He was a private man who liked to read, and he enjoyed playing chess," Williams recalled. "He loved baseball, and he also bowled a lot with his wife, Arline." The Benders met while both were on the Headquarters staff and got married on Field Day in 1968. Arline Bender, WA1VMC, died last December.

W1AW Station Manager Joe Carcia, NJ1Q, remembered that Bender "was proud of being the W1AW chief operator and that he really liked Amateur Radio."

A Pennsylvania native, Bender saw action during World War II. Before moving to Connecticut in 1952, he held the call sign W3ODU.

Survivors include a daughter, Susan Lyhne. At Bender's request, no public memorial service will be held.

==>SOLAR UPDATE

Solar sage Tad "You Are My Sunshine" Cook, K7RA, Seattle, Washington, reports: -Sunspot numbers and solar flux rose over the past week. Average daily sunspot numbers were up more than 44 points to 100.4, and solar flux was nearly 17 points higher to 118.6. Solar wind and the resulting geomagnetic instability that has been prevalent for the past few weeks continued, and is expected to last at least through this weekend.

The current outlook has the Friday through Monday planetary A index for April 25-28 at 20, 25, 25 and 20. Current projections forecast quiet conditions for May 3-5, but higher just before that period and for nearly two weeks following. The reason for the unsettled to active geomagnetic forecast for this weekend is because of an ongoing solar wind, and an active sunspot that released two solar flares on April 23.

Predicted solar flux is 128 and 130 for Friday and Saturday, April 25-26, and then around 135 through the next week.

Sunspot numbers for April 17 through 23 were 37, 51, 69, 93, 154, 147 and 152, with a mean of 100.4. The 10.7-cm flux was 101, 107.8, 112.1, 118.5, 125.8, 132.4 and 132.8 with a mean of 118.6. Estimated planetary A indices were 30, 20, 18, 16, 21, 22 and 18, with a mean of 20.7.

==>IN BRIEF:

* This weekend on the radio: The SP DX RTTY Contest, the Helvetia Contest, the QRP to the Field, and the Florida and Nebraska QSO parties are the weekend of April 26-27. JUST AHEAD: The AGCW QRP/QRP Contest is May 1. The New England QSO Party, the Indiana QSO Party, the MARAC County Hunters Contest (CW), the IPA Contest (CW/SSB), the 10-10 International Spring Contest (CW), the Microwave Spring Sprint, and the ARI International DX Contest are the weekend of May 3-4. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the Radio Frequency Interference (EC-006) and Satellite Communications (EC-007) courses opens Monday, April 28, 12:01 AM EDT (0401 UTC). Registration will remain open through Sunday, May 4. Classes begin Tuesday, May 6. Registration for the ARRL HF Digital Communications (EC-005) course remains open through Sunday, April 27. Those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future can sign up to be advised via e-mail in advance of registration opportunities. To take advantage, send an e-mail to prereg@.... On

the subject line, indicate the course name or number (eg, EC-00#) and the month you want to start the course. In the message body, provide your name, call sign, and e-mail address. Please do not send inquiries to this mailbox. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* Ham-pianist looking for company, support during run: Internationally known pianist Martin Berkofsky, KC3RE, has made it into Kansas on his 860-mile run to Chicago. A cancer survivor, Berkofsky is celebrating his recovery and raising money for Tulsa's Cancer Treatment Research Foundation (CTRF) <http://www.ctrf.org/> with his CelebrateLifeRun <http://www.celebrateliferun.com/>. Berkofsky left Tulsa April 8, his 60th birthday. "Holding up wonderfully," Berkofsky reports. "The best day was 12.9 miles." He said he's now out of range of the Oklahoma UHF "Super System," where he enjoyed many nice QSOs and had some stations checking in with him daily as the run progressed. Joni Shulman, CTRF's director of programs, said Berkofsky still needs places to stay and spotters to watch out for him along his route. He also enjoys having others run with him. Berkofsky is using APRS to radio his position at least on a daily basis, and he can be tracked on the Web via the findu.com site <http://www.findu.com>.

* Hams assist stranded sailboat: Amateur Radio operators on the Intercontinental and Maritime Mobile Service nets (14.300 MHz) responded to a call from a sailboat stranded between Key West and the Dry Tortugas. Ed Petzolt, K1LNC, in Florida, reported that a power failure aboard the 42-foot sailing vessel Follie a Deux out of Toronto left the boat adrift in calm winds and seas. "They did a pan pan on 14.300 MHz," Petzolt reported April 22. He contacted the US Coast Guard in Key West, which responded. "They attempted to repair the engine without success," Petzolt said later. The sailboat, with two passengers aboard, was towed to Dry Tortugas to await a commercial repair/towing vessel.

* Temporary permission granted for YA1CQ operation: The Daily DX <http://www.dailydx.com> reports that Hiro Nakanishi, JA1CQT, is back in Kabul, Afghanistan, as part of the Basic Human Needs (BHN) contingent. He has been granted temporary permission to operate as YA1CQ until the end of May, although he expects to be in Afghanistan for 12 months. BHN is a nongovernmental organization--or NGO--that's helping with humanitarian relief efforts. Others associated with the BHN team include Ito "Dan" Sadao, JA1PBV. YA1JA is the BHN club call sign.

* W1AA/MSC will be on the air for Marconi event: Members of the Marconi Radio Club <http://www.qsl.net/w1aa/w1aa_1001.htm> will operate on International Marconi Day, Saturday, April 26, as W1AA/MSC. "W1AA/MSC will represent the 1901 Marconi Nantucket Station MSC," said club president Whitey Doherty, K1VV, who explained that the actual W1AA/MSC operation will take place on the mainland, not from Nantucket itself, since the original MSC site is now a residential area. The station remained in

operation from 1904 until 1918. US stations QSL W1AA/MSC with a SASE to Whitey Doherty, K1VV, PO Box 1193, Lakeville, MA 02347. DX QSL via the W1 QSL Bureau.

* K6KPH on the air for International Marconi Day: The Maritime Radio Historical Society's K6KPH will participate Saturday, April 26, in the annual International Marconi Day commemorative event. International Marconi Day takes place each year on a weekend close to the birthday of wireless pioneer Guglielmo Marconi. The event is organized by the Cornish Amateur Radio Club, which will offer awards to stations in various categories. Details are on the club's Web site <http://www.gb4imd.co.uk/>. K6KPH uses the original transmitters, receivers and antennas of famous former RCA coast station KPH on the West Coast. Operating frequencies will be 7050, 14,050 and 21,050 kHz and possibly 3545 kHz. Operations begin April 26 at 1700 UTC. QSL to Denise Stoops, PO Box 381, Bolinas, CA 94924-0381.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRL Web site <http://www.arrl.org/> offers access to news, informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled from The ARRL Letter.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify

membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

MUMBAI AMATEUR RADIO SOCIETY

We are pleased to inform you that the Third Annual General Meeting

of our Society, The Elections for the Fourth Managing Committee and

The Annual Getogether cum Annual Dinner wil be held on 1st May 2003.

Venue : 'S.S. Hall', Garware Club, Wankhede Stadium, 'D' Road

Curchgate, Mumbai - 400 001.

Timing: 7:30 pm to 10:30pm

Agenda for the Meeting.

7:30pm Chairperson's Report.

7:45pm Secretary's Progress Report.

8:00pm Treasurer's Financial Report.

8:15pm Reports from other Members of the Managing Committee

8:30pm Plans and proposals for the year 2003 - 2004.

8:45pm Voting for the Fourth Managing Committee.

9:00pm Any other topic with the permission of the Chairperson.

9:15pm Results of the Election.

9:30pm Dinner.

Also kindly confirm your participation with HIT- 23460575 / CBU - 25675226

We sincerely hope that you will join us and make this event successful.

Thanking You,

For Mumbai Amateur Radio Society.

Nilesh Rathod. - VU2NLF

Secretary

Untitled Document
MUMBAI AMATEUR RADIO SOCIETY

We are pleased to inform you that the Third Annual General Meeting

of our Society, The Elections for the Fourth Managing Committee and

The Annual Getogether cum Annual Dinner wil be held on 1st May 2003.

Venue : 'S.S. Hall', Garware Club, Wankhede Stadium, 'D'
Road

Curchgate, Mumbai - 400 001.

Timing: 7:30 pm to 10:30pm

Agenda for the Meeting.

7:30pm Chairperson's Report.

7:45pm Secretary's Progress Report.

8:00pm Treasurer's Financial Report.

8:15pm Reports from other Members of the
Managing Committee

8:30pm Plans and proposals for the year
2003 - 2004.

8:45pm Voting for the Fourth Managing
Committee.

9:00pm Any other topic with the permission of
the Chairperson.

9:15pm Results of the Election.

9:30pm Dinner.

Also kindly confirm your participation with HIT- 23460575 / CBU - 25675226

We sincerely hope that you will join us and make this event successful.

Thanking You,

For Mumbai Amateur Radio Society.

AMSAT NEWS SERVICE
ANS-117

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

In this edition:
* April 2003 AMSAT-NA President's Letter
* AMSAT-NA Space Symposium 2nd Call for Papers
* AO-40 Update
* OSCAR-11 Report
* Month long ARISS promotion by Halifax ARC
* Upcoming ARISS Contact Schedule
* PCSat Update
* This Week's News in Brief

SB SAT @ AMSAT $ANS-117.01
April 2003 AMSAT-NA President's Letter

AMSAT News Service Bulletin 117.01 From AMSAT HQ
Silver Spring, MD. April 27, 2003
To All Radio Amateurs
BID: $ANS-117.01

Greetings to all AMSAT Members,

It is always a pleasure to write this monthly letter to you and to try and keep you informed and updated on the various aspects of AMSAT-NA.

Firstly let me comment on the status of Echo, our satellite that we hope will be launched later this year. Progress is good, and we hope to have the satellite under test during the late spring or early summer. Final testing prior to shipment will be carried out in our new facility at NASA's Goddard flight Center. I said "new facility" but in fact it is the same facility that we had many years ago when AMSAT first came into existence.
Your Executive Vice-president Rick Hambly and Astronaut Ron Parise worked together to reacquire this building, close to the visitors center at Goddard for AMSAT's use. Rick Hambly will be at the Dayton Hamvention as one of the

speakers at the AMSAT Forum, he will be giving a detailed update on ECHO. Place Forum Room 1, Date Saturday May 17, Time 8.30 am.

The design concepts of the structure of Eagle have been completed and limited work is continuing based on our available income for this project. We have purchased the two Earth Sensors that were subject of a Financial Challenge, issued at Fort Worth and have designed the Can-Buss internal communication system for use in Eagle. The CAN-BUSS Boards will be first flown on P3E by AMSAT-DL and various other organizations are looking at the AMSAT-NA design to determine if it would meet their requirements. This system will also be the subject of a paper at our Dayton Forum when Bdale Garbee will be presenting a paper on the topic.

Gould Smith will present a Satellite Beginners paper at Dayton.
Remember Saturday May 17 in Forum Room 1, 8.30 AM.
Dayton is an excellent time to renew your membership, and this year in addition to membership we will have some Premiums which are available to donors. These include the AMSAT Journal CD-ROMs, Instant track (Y2K compatible version) and a surprise premium to everyone who joins or renews their membership.

Also, please remember to book a seat for the AMSAT dinner at the AMBER ROSE restaurant on Friday evening. This is your event and I look forward to meeting each one of you during that weekend. To book your seat in advance let Martha at the Office know-(301-589-6062 or Martha@...) We do have limited accommodation.

Although I am tempted to spend a lot of time at the Flea Market, I will spend most of the weekend at the AMSAT booth - so do plan to meet me there!. I am delighted to confirm the AMSAT ECHO-LINK conference system is now operational. Once more Paul Williamson has made it happen; use Echo-link to discuss satellites, orbits, and to have a round table discussion. Thank You Paul.

Finally, AMSAT is about to hold our first Fund Raising of the Year, as we usually do in May, and while I appreciate that "times are tough" so they are also for the AMSAT building fund. We really do need to progress with Eagle and to provide all the promises that I have put forward, such as (Mode B) - your help is the main way to get there - some new ideas on fund raising will appear in the May /June Journal - Please read the Apogee View by Guest writer Bill Tynan - Chairman of the Board of Directors.

73,
Robin Haighton, VE3FRH,
President.

[ANS thanks Robin, VE3FRH, for the above information]

SB SAT @ AMSAT $ANS-117.02
AMSAT-NA Space Symposium 2nd Call for Papers

AMSAT News Service Bulletin 117.02 From AMSAT HQ
Silver Spring, MD. April 27, 2003
To All Radio Amateurs
BID: $ANS-117.02

The 2003 AMSAT-NA Annual Symposium is scheduled for October 17-19, 2003 in Toronto, Ontario, Canada. This is the first call for papers to be presented at the 2003 Symposium.

Papers may be presented by the author during the Symposium or simply offered for inclusion in the Symposium Proceedings publication.

The subject matter should be of general interest to amateur radio operators involved in satellite communications. Suggested topics include:

+ operating techniques
+ antenna design and construction
+ space craft design and construction
+ current mission status
+ proposed satellite missions
+ telemetry acquisition and relay

A brief abstract of the proposed paper should be submitted as soon as possible. The final date for abstracts is June 15, 2003.Copy ready papers must be received no later than August 15, 2003.

Electronic submittal is preferred in MS WORD format. Please email your electronic submittals to Wayne Chandler at ve3whc@...

[ANS thanks Wayne, VE3WHC, for the above information]

SB SAT @ AMSAT $ANS-117.03
AO-40 Update

AMSAT News Service Bulletin 117.03 From AMSAT HQ
Silver Spring, MD. April 27, 2003
To All Radio Amateurs
BID: $ANS-117.03

Stacy Mills, W4SM provides the latest information on AO-40 in this report.

"AO-40 is continuing to drift "downward" in ALON as predicted. This is making the squint/range combination less favorable for passband use. In addition, the solar angle is worsening and will shortly exceed 45 degs, limiting available power and warming the spacecraft considerably as the sun swings across the omni end of the spacecraft. The AO-40 passbands have been turned off as of MA=240 (23:50 UTC) on Saturday 4/19. They will remain off for about 4 weeks (or slightly less) until conditions improve. The beacon will remain ON during the whole orbit."

M QST AMSAT OSCAR-40 2003 Apr 19

ALON = 35 deg - 18.2 deg/week; ALAT = 20 degs
Orbit 1133 is last passband until ~mid-May. Beacon remains ON.

The AO-40 team would like your telemetry files!
Please "zip" compress your daily telemetry files and e-mail to:
ao40-archive@...

N QST AMSAT AO-40 SCHEDULE 2003-04-19
MA 010 240 244 010
---------7-----5-----0-----7
Orbit 1134 until S2/K-Tx | S | S | S | S-beacon
~ mid-May: MB | * | * | * | ON
PASSBANDS OFF RUDAK | | | |
V/U-Rx | U | U | V |

SB SAT @ AMSAT $ANS-117.04
OSCAR-11 REPORT 15 April 2003

AMSAT News Service Bulletin 117.04 From AMSAT HQ
Silver Spring, MD. April 27, 2003
To All Radio Amateurs
BID: $ANS-117.04

During the period 21 March to 14 April 2003 the 145.826 MHz. beacon has been heard transmitting continuous ASCII telemetry from 30 March to 07 April. During this period good signals have been received. Telemetry transmissions are expected to resume around April 20 for about 8 - 9 days.

The internal temperatures have continued to fall, by about one degree C, with an up/down variation of half a degree. They are now 5.8 C, 3.8 and 10.0 C for battery, telemetry electronics, and command decoder respectively. The temperatures are expected to fall slowly as the solar eclipse times lengthen, reaching a minimum in the Summer, and then increase in the Autumn. The solar eclipse times should be shorter than last year,resulting in higher temperatures in 2003.

The battery voltage observed during daylight passes has decreased. Observations have varied between 13.2 and 13.8 volts, with an average value of 13.5 volts.

The attitude is now being controlled solely by the passive gravity boom gradient, and there is no control over spin rate. The continuous telemetry has enabled the spin period to be calculated from the X & Y magnetometer readings. The spin period has varied between 342 and 505 seconds. The attitude is normal.

Users of OSCAR-11 should note that the date in the telemetry is advanced by three days. The time is advanced by 18 minutes.

OSCAR-11 now operates in a default mode, controlled by the watch-dog timer. The satellite transmits continuous ASCII telemetry for about 8 - 9 days on 145.826 MHz., followed by about 10 - 12 days of silence. These times appear to be somewhat variable, and this regular sequence might be interrupted by ground control.

The mode-S beacon is ON continuously, even when the VHF beacon is OFF, nominally transmitting an unmodulated carrier on 2401.5 MHz. There is however a VERY low level of AFSK modulation, (now a constant 1200 Hz. audio tone), which has been detected on strong signals. Telemetry indicates that the beacon has partially failed, and is delivering half power. This beacon is a useful test source for those testing mode-S converters, as an alternative to OSCAR-40. However the signals are very weak, and there is a lot of Doppler. Users should also note that the polarization of OSCAR-11 is LHC. Even if you can't hear OSCAR-11, your equipment may still be OK for OSCAR-40. Any reports of reception on 2401.5 MHz. would be most welcome. Please e-mail g3cwv@....

The 435.025 MHz. beacon is normally OFF. It can only be heard on the very rare occasions when the satellite is being commanded by ground control, i.e.. within range of Guildford, UK. When the 435 beacon is transmitting, the 145 beacon is normally OFF. The data transmitted is mainly binary.

Listeners to OSCAR-11 may be interested in visiting my web site.

The web site contains details about using a soundcard for data capture, and also details about using hardware demodulators. There is software for capturing data, and decoding ASCII telemetry and WOD. There is an archive of raw data for analysis, which is continually being expanded, as new data is captured. Originally this was for WOD, but it is now being expanded to include ASCII telemetry. At the present time the telemetry is just for 2002, and 2001. I will add other years as time permits. In parallel there is a news archive which provides an overview of the state of the satellite, at the times when the telemetry was captured.

If anyone out there can provide any data, particularly for the 1984 to 1993 years, this would be most appreciated. Please e-mail me with details. However please DO NOT SEND ANY FILES, before further discussion.

Also included are some audio files, examples of each type of data transmitted by OSCAR-11, each one plays for about ten seconds. There are also examples of mode-S reception. All the audio files are zipped, so that they can be played off-line. These should help listeners identify the various types of data, and give an indication of the signal quality required for successful decoding.

SB SAT @ AMSAT $ANS-117.05
Month long ARISS promotion by Halifax ARC

AMSAT News Service Bulletin 117.05 From AMSAT HQ
Silver Spring, MD. April 27, 2003
To All Radio Amateurs
BID: $ANS-117.05

Canadian Space Agency Astronaut Col. Chris Hadfield, VA3OOG, was on hand for the final day of a month long ARISS promotion sponsored by the Halifax Amateur Radio Club. The HARC members, who had worked so hard during the event, were delighted to have Col. Hadfield take the time to meet with them and discuss the importance of the ARISS program. While the benefit of the Educational Outreach Program to students in classrooms around the world is clear, ARISS also plays a significant and "very real" psychological role to "on orbit" crews during long duration missions.

Col. Hadfield's visit topped off a very successful month of ARISS promotion. We were simply overwhelmed by the response from educators, as over 40 have signed up for additional program information. The Halifax Amateur Radio Club's offer to assist educators in developing and integrating classroom presentations, dealing with radio communications (both terrestrial and space), was met with enthusiasm. It's expected that we should have these workshops in place for the coming fall session. In the mean time, we look forward to assisting with ARISS school applications.

Sharing the excitement of ARISS with people has been fun! It may have been, in part, due to the venue that we had at the Empire 18 Cinemas and that "Space Station 3-D" was being shown in their IMAX facility. People were genuinely excited about what they had seen on the "big screen" and it was a real pleasure to discuss ARISS and Amateur Radio with them. The conservative estimate of the numbers of people that passed our display over the 4-week period was in excess of 50 thousand! Great for the ARISS Program and Amateur Radio!

Well done to all and thanks once again!

[ANS thanks Wayne, VE1WPH, for the above information]

/EX

SB SAT @ AMSAT $ANS-117.06
Upcoming ARISS Contact Schedule

AMSAT News Service Bulletin 117.06 From AMSAT HQ
Silver Spring, MD. April 27, 2003
To All Radio Amateurs
BID: $ANS-117.06

Upcoming ARISS Contact Schedule as of 2003-04-23 04:00 UTC

The ARISS (a joint effort of AMSAT, the ARRL, NASA, the ARISS international partners including Canada, Russia, the European Partners, and Japan) operations team wishes to announce the following very tentative schedule for ARISS school contacts. This schedule is very fluid and may change at the last minute. Remember that amateur radio use on the ISS is considered secondary. Please check the various AMSAT and ARISS webpages for the latest announcements. Changes from the last announcement are noted with (***). Also, please check MSNBC.com for possible live retransmissions (http://www.msnbc.com/m/lv/default.asp). Listen for the ISS on the downlink of 145.80 MHz.

For information about educational materials available from ISS partner space Agencies, please refer to links on the ARISS Frequently Asked Questions page.

If you are interested in supporting an ARISS contact, then you must fill in an application. The ARISS operations mentor team will not accept a direct request to support an ARISS contact.

You should also note that many schools think that they can request a specific date and time. It does not work that way. Once an application has been accepted, the ARISS mentors will work with the school to determine a mutually agreeable date.

Websites that may be of interest include:

http://www.arrl.org/sarex
http://www.arrl.org/ariss
http://www.amsat.org
http://ariss.gsfc.nasa.gov
http://spacelink.nasa.gov/index.html
http://ehb2.gsfc.nasa.gov/edcats/educator_guide/

Your completely filled out application should be returned to the nearest coordinating ARISS region if your specific region is not listed. E-mail is the preferred method of submitting an application.

Here are the email addresses:
ARISS-Canada and all other countries not covered: ve2ka@... (Daniel Lamoureux VE2KA)
ARISS-Europe: jh.hahn@... (J. Hahn, DL3LUM / PA1MUC)

click on English (sorry I don't know French)
you are now at http://www.rac.ca/ariss/
click on News

Currently the ARISS operations team has a list of over 60 schools that we
hope will be able to have a contact during 2003. As the schedule becomes
more solidified, we will be letting everyone know. Current plans call for
an average of one scheduled school contact per week.

This Week's News in Brief

AMSAT News Service Bulletin 117.08 From AMSAT HQ
Silver Spring, MD. April 27, 2003
To All Radio Amateurs
BID: $ANS-117.08

** The Westcott Wireless Preservation Association will be hosting special event station W8AGA on Saturday, May 3rd. The operation will take place from Frank Lloyd Wright's Westcott house in Springfield, Ohio.. --Newsline

** The first tube motherboard appeared last year in response to PC gamers who craved the allegedly "more natural" sound produced by vacuum tube technology. Those who have seen the boards call it a strange sight to behold. --Newsline

** Digital Radio Mondiale has announced that there will be an official launch at the World Radio Conference in Geneva, in June. Digital Radio Mondiale, better known by its initials D-R-M is the world's only non-proprietary, digital broadcasting system for short-wave, medium-wave and long-wave with the ability to use existing frequencies and bandwidth across the globe. --Newsline

** NASA on Friday, April 18, postponed to at least mid-August the launch of its new infrared space telescope designed to study objects that otherwise would be too dust-concealed, too cold or too distant to be detected by existing equipment.. --SpaceDaily

** The launch of NASA's Galaxy Evolution Explorer (GALEX) spacecraft aboard an Orbital Sciences Corporation (OSC) air-launched Pegasus vehicle is scheduled for deployment over the Atlantic Ocean from OSC's L-1011 carrier aircraft on Monday, April 28 at 8 a.m. EDT. This time is contained within a launch window that opens at 7:50 a.m. and closes at 9:50 a.m. DT. --SpaceDaily

1136. Re: Nomination for Managing Committee

Yahoo group: m_a_r_s
Date: 2003-04-29 02:24:28 UTC
From: kailash_gupta
Topic: 1115 Message: 1136

Dear Mehul,

I was trying to attend the AGM. However, due to my morning QTH it will not be possible. This explains delay in reply.

Kindly send receipt; constitution; annual reports, Chairman's Reports, Secretary's Progress Reports, Treasurer's Financial Reports, Reports from other members of the Managing Committee, Plans and Proposals for all the past years and for current year; ID card, CD, Library Membership card and other documents and things to my Jaipur address. Kindly send the CAP also. I thankfully accept regards from MARS while accepting CAP in absentia. Could you kindly send another copy of the AGM Report and MARS software copy you seems to have given me during field trip. I shall be grateful if you could send me a copy of the ARRL Handbook on CD also.

Thanks and regards,

Kailash Gupta, VU2KIZ
C56, Shastri Nagar
Opp. Tagore School

1138. NEWS!!

Yahoo group: m_a_r_s
Date: 2003-04-29 07:15:16 UTC
From: VU2UGO
Topic: 1138 Message: 1138

Hi OMs/YLs!!

1. HAMFEST'2003 (at Gandhinagar) dates are announed on Sunday's VU-FRIENDLY Net by VU2CPV-Pravin. It will be held on 8/9th November, 2003. More details will be available on http://www.giar.org/hamfest03.html

2. NOAA-12 is again back into action (on APT) from last week. A detail Wx SAT report is attached at the end of my message.

3. 2M propagation conditions are very good these days. VU3PAN/VU2SXF worked VU2LB(bhavnagar) simplex with 2W. Today morning I heard Gandhinagar Repeater (145.40MHz -600Hz) and if u r able to trigger that repeater, you can talk to hams upto Rajkot (VU2JF). Suitable timings for working DX are 6-8am & 7-10pm. But sometimes conditions also allow you to work DX in afternoon, last week I had QSO with VU2JRT(Surat) at 1.30pm.

4. On behalf of Early Birds Net Controller - VU2CBU, you all are invited to checkin at 7am everyday on 145.00MHz.

73s and all the best,
Sandip - VU2UGO

WEATHER SATELLITES
==========
APT STATUS REPORT -- 21st April 2003
==========

Satellite Frequency (MHz) Status Image Quality

NOAA 12 137.500 on good
NOAA 14 137.620 off
NOAA 15 137.500 on good
NOAA 17 137.620 on good

CHANGES SINCE LAST REPORT
NOAA 12 APT on (137.500).

THIS WEEK'S POSSIBLE EVENTS.
None expected.

NOTES.

1. NOAA 9 was permanently deactivated some years ago and is tumbling freely. Unfortunately it has a sporadic carrier on 137.500 (varies quickly according to orientation) and can cause interference to NOAA 12 and NOAA 15.

2. NOAA 16's APT transmission system failed a few months after launch.

3. After over 11? years of service (launched 15th August 1991) Meteor 3-5
has finally succumbed. (25th February 2003).
Although it had a number of imaging problems it was, up to the end,
providing acceptable visible imagery. It will be greatly missed.
In its time it also provided IR images and SSTV on APT... ah those were the
days !

LAUNCHES.
Sich-1M NET December 2003. (thanks to Ian Deans for info.)
The next known satellite launch with APT is NOAA N scheduled for NET June
30th 2004.

Douglas Deans.
Dunblane.
Scotland.

DIGITAL STATUS REPORT -- 21st April 2003
==========

CHANGES SINCE LAST REPORT.
None.

THIS WEEK'S EVENTS.
None expected.

Satellite Frequency Mode Remarks
(MHz)
NOAA 12 1698.0 HRPT Good signal
NOAA 14 1707.0 HRPT Good signal (see note 5)
NOAA 15 1702.5 HRPT* Backup channel, weaker signal
NOAA 16 1698.0 HRPT* Strong signal
NOAA 17 1707.0 HRPT* Very strong signal !
FengYun 1C 1700.4 CHRPT Weak signal, use dish 90cm.
FengYun 1D 1700.4 CHRPT Good signal.
Seastar 1702.5 SeaWifs signal OK
encrypted

My thanks to Lawrence Harris for Digital updates.

NOTES.

1. At the NOAA 17 frequency of 1707 MHz occasional interference may be
expected from NOAA 14 at latitudes above 80 degrees. Erratic behaviour of
the inactive NOAA 9 also has proven to be a source of interference at higher
latitudes. NOAA 9 follows a similar track to 17. (Thanks to F. Valk)

2. If you have a good LNA and analogue decoder (Timestep for example)
all sat's with "Good signal" or better can already be received using
a 1.5M helicalbeam (RIG Journal 64) or a small dish (60 to 80cm) with
helical feed.

3. * These sat's have channel 3A/B which allows the composition of
almost true-colour images of daylight passes using R3G2B1
colour scheme. For more info on colouring see RIG Journal 69.

4. ~ 10 Channel imager, use colour scheme R1G9B7 or R1G2B7 for
daylight passes to get near true colour images.

5. For the moment the problems with the AVHRR scan mirror motor have gone
and NOAA 14 is providing excellent AVHRR imagery. Given the age of
the satellite and its recent history it will require to be closely
monitored.

Arne van Belle, WERKGROEP KUNSTMANEN
Co-ordinator Radio Observers (www.kunstmanen.nl)

Douglas Deans.

GEOSTATIONARY WEFAX STATUS REPORT -- 21st April 2003
==========
CHANGES SINCE LAST REPORT
Update to GOES 12. See note 1.

THIS WEEK'S EVENTS
None expected.

Goes West (W America). Wefax 1691.0 MHz 135 W
Goes East (E America). Wefax 1691.0 MHz 75 W. Test transmissions of
LRIT to commence April 2003.
Meteosat 7 (Europe). Wefax 1691.0 & 1694.5 MHz 0 W
Meteosat 5 (India). Wefax 1691.0 MHz (shared usage) 63 E
inclined +/- 4.4 degrees.
MSG-1 Commissioning. Suspect power amplifier (SSPA-C) under
investigation. Location 10.5?W +/- 0.4?, inclination 1.9? and reducing.
Imager commissioning continuing, but working well.
INSAT (India) 2599.225 MHz WEFAX 74 E ?
GMS (Japan/Australia) Wefax 1691.0 MHz (120 KHz deviation) 140 E

NOTES.

1. GOES-12 has replaced GOES-8 as the GOES-East operational
spacecraft on 1st April 2003 at 18.15Z. As from 22nd April GOES 12 data
will no longer be relayed via GOES 8 but will sent direct from the
satellite.
For full details of the transition plan go to :-
http://www.ssd.noaa.gov/PS/SATS/SPBULL/MSG0901934.01.txt

For updates/additions or errors (in this section) reply to
Dave Cawley Information@...

EUMETCAST STATUS REPORT -- 21st April 2003
==========

Service fully operational for ATOVS and RSS on HotBird 6.

PROBLEMS SINCE LAST REPORT.
No substantive unplanned outages reported.

THIS WEEK'S POSSIBLE EVENTS.
MSG -1 HRIT testing (? hourly) may commence for those registered for the trial service.

Any reports for this section of the report should be sent to :-
Douglas Deans douglas@...

NOTES.

1. For further information on the Eumetcast service see :-
David Taylor's web site
http://www.satsignal.net => Weather Satellites, ATOVS
or Eumetsat's web site

Dear Niles,

I am attaching the file containing my presentation in
the International Seminar on Disaster Preparedness and
Mitigation.

You are requested to put this file on MARS web site.

The International Seminar on Disaster Preparedness and
Mitigation was jointly organissed by United Nations
Development Programme, Govt. of India and
Confederation of Indian Industry from November 21 to
23, 2002 at New Delhi.

Kailash Gupta, VU2KIZ had presented a paper in the
conference titled "Amateur Radio Emergency
Communication". I had mentioned in the paper about the
work done by the MARS team and is being done. The
paper is available on the UNDP web site
www.undp.org.in/UNDMT/dpm/Day%
20Three/session%20VII/kailashgupta.ppt

From: VU2UGO
Topic: 1142 Message: 1142

Now in available in MARS Library!!

QST - APR'2003 Contents :-
a.. High Speed Multimedia Radio (HSMM)
Data, Voice and video - simultaneously! Experiments are demonstrating the feasibility of low cost, low power technology for the new ham radio "Hinternet". The HSMM website is located at http://www.arrl.org/hsmm/ . You will find additional information on the current activities of the HSMM Working Group, RLAN technology and links to related sites.

b.. The RockMite - A Simple Transceiver for 40 or 20 Meters
There's something wondrous about an effective rig that's little bigger than a PL-259 connector. This minimalist 1/2W transciver has several sophisticated features - built-in keyer, PIC controller, one-button control - and it fits in an Altoids tin.

The RockMite housed in the aluminium enclosre available from http://www.americanmorse.com/ . A European (7030kHz) version is available from http://www.qrpproject.de/ .

c.. Beginners' Computer Programming for Ham Radio
Part 3 - Get ready to feast on the results of these programming recipes.

d.. Public Service - No Lights, No Telephone - Just the Radio

e.. Product Review -
a.. ADSP2 from SGC
b.. Noise Canceling Speaker from GAP Antenna

f.. New Products -
a.. Ten-Tec Argonaut V MF/HF Transceiver Model 516
b.. RIGblaster Pro

g.. Software -
a.. SkySweeper is a multifaceted software package that turns your sound-card-equipped Windows PC into a powerful signal analysis and decoding system.

h.. Regular Features - Correspondence, Workbench, Hands-on Radio, Hints & Kinks, Technical Correspondence, How's DX?, The World above 50MHz, Old Radio, YL News, QRP Power, OP-ED, 75-50 & 25 Years Ago, Special Events, Contest Corral, Strays, Hamfest Calendar, Coming Conventions, ARRL Buyer's Guide.

i.. New Advertisements -
a.. HF Tribander Performance : Test Methods & Results Book
HF Vertical Performance : Test Methods & Results Book
by H.Ward Silver, N0AX & Steve Morris, K7LXC
b.. Crystal Radio Bonanza Book - Published by Xtal Set Society
c.. The Radio Amateur Callbook - 2003 Winter
d.. True RMS for accuate AC readings by Extech Instruments

From: Mehul Chovatia
Topic: 1145 Message: 1145

Dear Members,

With most regrets I have to put this mail on requesting the members to be responsible and active.

MARS conducted 3rd AGM yesterday with a mere participation of 60+ members. Most of the founder and regular members were not present. Only a few of the members had informed that they would not be making it. The response from SWLs was also not decent. We have wasted food worth more then Rs.5000.

The committee and few hard-working members are struggling to help each one of you as follows:

1. Arranging and Putting up antennae
2. Getting your shacks in order
3. Putting up the repeater
4. Running around to get tickets faster
5. Arranging low value VHF sets
6. Conducting events with best of the facilities
7. Information sharing in terms of newsletters and magazines
8. Getting the gear for the members (Caps, ponchos, Id cards, etc.)
8. Conducting classes and demos and HAM awareness drives and much more...

In such a scenario when these few members are dedicating most of their time for the upbringing of the hobby, there is a very feeble response coming from the mass. Every year the committee has been literally burning out to support and conduct so many activities.

I would request each one of you to be active - at least active enough to confirm your presence or absence for each activity so that the society doesnt end up wasting resources. If the response continues to be like this then we would have no options but to cut down activities and eventually wind-up the organization.

Lastly, it was also observed that lot of members including SWLS have not paid their fees. Please ensure that the dues are cleared asap. Members who have already paid their fees should ignore this para. Pending receipts will be couriered to the members.

73s,

Mehul Chovatia.
MARS.

1146. Why Are Most New Hams Inactive?

Why Are Most New Hams Inactive?
JJ SCOTT (KD7VDB) (http://www.eham.net/user/profile/KD7VDB)on May 1, 2003
View comments about this article! (http://www.eham.net/articles/5211#comments)

About a week and a half ago I got my license it was the happiest day of my life; I couldn't wait until I could get on the air?
Some reasons why most people don't want to get into HAM Radio:
1. Once they get motivated enough to ask to take classes they get discouraged by the technical aspect of it. I do think we should still have this aspect though.
2. Some one tells them they have to take Morse code to be a ham. I think we should still have Morse code but it should only be required for 40m and up to operate because that's about the only time you'll want to.
3. They figure out the price of radios. A basic 2m handheld with 5 watts costs about $150+. But there is a way to beat this, bring back Heathkit and all the kit manufacturers and they need to make affordable VHF and UHF kits.
4. Most people these days don't even realize it exists. If somebody hadn't shown me their radios and let me dink with them I would have never joined. Advertise about what you do instead of drugs, let others know about ham radio!
5. Nobody gets the new guys involved. Take someone out to the repeater station with you to work on it. It will mystify their minds about talking all over the world.
Thanks for reading this and I hope that you try to fix these problems.

Mail this to a friend! (http://www.eham.net/forums/mailto/1?id=21984)

Because the person that showed them Ham Radio in the first place doesn't keep them motivated. Without an Elmer to show them the ropes, their excitement fizzles. Most of these guys don't know what to do, or how to operate and are afraid to ask for fear of ridicule. Someone needs to help the newbies out until they get the hang of operating.

73,
Neil - N6VHF

I have been a HAM for over 25 years. I have taken long breaks from HAM radio, only to return.

IMHO..INTERNET has taken most of the lime light out of HAM radio.

Some one that posted on another thread said"
I was so happy to work japan, only to have my eight year old kid say.... I can do that with AOL."

HAM radio is confused with GMRS/FRS, and 11M.

Many live in a QTH where they cannot put up an antenna. They know any time the buildings cable TV screws up, the ham is the first to blame!

Some just got bored with it.

I used to love to roam around NYC with a dual band h-t.
In NYC nobody cares or is interested.

REILLY at the FCC sends complaint letters to hams that use new types of SSB modulation.

The university I attend is an engineering school.
No ham club. The FM broadcast transmitter is down. I try to offer my skills to get it back on the air,...Nobody cares!forget about starting a HAM radio club at BKLYN POLY TECH, I am the only ham. All the undergrads use the cell phone or FRS.

NEED I SAY MORE!!!!!!

Why Are Most New Hams Inactive?

Mail this to a friend! (http://www.eham.net/forums/mailto/1?id=21986)

Um, what about Ten Tec? Ten Tec's T-kits are available and you can put them together without owning a scope! Their 2 m Transciever kit even has options typically found in most base level 2 m Mobiles and the base model is 195. an extra 84 bucks gets you a 30 wat amp so you can have 30 wats in the mobile. This is a great idea even for the not so new ham.

To get them interested otherwise, you need to "elmer" them. Have a late night informal discussion net. Before big hamfests/hamvention, if you have a bigger vehicle, offer the other hams in your area (new and old) a ride to the show....your heading that way anyway! When your on the road you can chatter on the repeaters or eyeball contacts in the car! Have Pizza parties and invite not only club members, but non members as well. Let them get to know who they talk to on the repeater and they'll feel better about it. And when they do something stupid, try not to admonish them on the air (and embarass them). Give them a landline and tell them that those stations they heard on the repeater that appeared to not be identifying are actually identifying, but we could not hear that part because it was skip(on our local machine you can always hear a machine 200-300 miles away when the band is open....confuses the hell out of new hams...).

Also, clubs need to me more proactive about organizing things on their machines. I can throw out my call a dozen times on a dozen different machines every morning and noone comes

back. Yet sometimes I do this afer someone kerchunks the controller and still noone comes back. Traffic needs to be generated. Organize drive time nets (wheeled, not message traffic). Use the message feature on some repeater controllers to advertise club events. If your part of a vec team, keep track of folks who pass through your testing session and when they get a call issued, send them a piece of traffic.

I actually as of late have been finding more new folks to talk to then old folks. Some of my old friends are not on the repeaters becuase they "only" work HF since upgrading. Come down and slum with the techs! Share ragchews on how you worked Fiji Island or Jordan on a cheap antenna. If the extra's stick to HF, then the techs hear no reason to upgrade! There's nothing wrong with talking on the repeaters to other lower class operators! You Extra's who are DX fiends tend to forget.....we Tech's will not be motivated to join you if you don't talk to us! ;) Also, drop this BS about No-Code Extra's and all. Just becuase you ahd to pass 20 WPM to get your upgrade does not make you a better ham necessarily. All it does is make you an Extra class licensee. One thing I can compare this to....what do you call a student who gets his medical degree with only a c average.....you call them Doctor! That's the same thing here. A Ham who passes the FCC required elements to get a Extra license NOW is a Extra Licensee.

For lack of a stable QTH at the present, I am and have been on VHF only, even though I have attained my General & am working towards Extra. Licensed now about 1.5 years or so, I came to ham radio because I always wanted to try it. And I am no techie in the least. However, something I experience that is missing from ham radio is more comraderie...

If someone calls monitoring on a VHF repeater, and you can tell they have a newer call sign in your area -- CALL THEM back!

Ham radio needs this more than anything else IMHO. Nothing is more discouraging than to call "mobile & monitoring" to get no response, only to have 3 guys start up 1 minute later when one calls the other. What has anyone got to lose with a quick intro QSO? In fact, many times I add "anyone up for a drivetime QSO?" (as i am on the radio most times while mobile) to my call just to open the windows a bit.

I have enjoyed my time in ham radio, and plan to keep going. But I know there are others out there not quite as gregarious as me who need you all to call them back.

Dan

What I do is when a friend or relative I have got intrested int ham radio passes their tech test I give them a 2 meter HT (usually a Rat shack htx 202) and a 30 watt linear and a 2 meter mag mount antenna.

Now they can get right on and enjoy it and keep the interest up. There is always another ham somewhere. get on the air and talk. if the school doesn't have a club try the local town or nearest city.

Ask on the repeater. or what ever you are on. I work, hf , ssb and psk31 and have a ball. I have friends on 2 meters tell me when they hear some one rare on the hf bands, we help each other, and you can work from flordia to calif on 2 meter /440 with an dual band radio and an arrow antenna with 5 watts.. no excuse not to find some one to talk to.

have fun 73 tom N6AJR

I must AGREE WITH K0AST. 2 Meters has always been a little cliqist. Not a good band to meet new ham friends.
20 years ago calling CQ on 146.52 with my 1.5 watt drake TR-33c was more productive.

Most 2 meter machines have a club. Some give the good old americsn welcome. Some if you are not a member, you are chopped liver!

I have found 440 machines much mre friendly in NYC.

In the old days nobody had PL's. All do know.

Keep trying OM. You did pick the worst band to meet new ham friends.

I am very gregerious my self.
I will be the first to admit that ham unity is down from 20 years ago!

I found he contoversial 14.178 gouup very helpful.

Do not loose the faith. IF YOU HAVE 440MHZ DID THAT A TRY. Many 440 guys left 2M, because of the same social dynamic.

Keep trying

all the best MIKE

In an era when most radios were assembled by hand, and involved considerable point-to-point wiring, Heathkits provided a low cost alternative by having the builder provide the labor for the otherwise expensive hand assembly and wiring. With modern automated production processes, there is little opportunity for cost savings by passing the hand assembly to the purchaser.

Look into the ARRL's new CCE course, "Life Beyond the Repeater."

The cost of getting on the air is cheap. In the 70s, a new two meter rig was around $350 and that's in 1970 dollars! That would be like $800-900 in today's dollars! Then what about the features. They've gone through the roof!!! So much better now.

I was inactive in 1976 when I was first licensed. It took me awhile to get an antenna up and to get my first rig. Then there was the fear of my first CW transmission. Yes, it was a tough road with all the learning that was needed. But it was also one of the most rewarding! The harder one works to achieve a goal, the greater the reward.

In response to no. 3 - VHF mobiles and HTs are cheaper now than they ever have been. They even have hundreds of memories and functions you will never use. A kit would cost more to buy and once you built it it would have less features and perform below the standard of commercial rigs. If you want to complain about HAM radio the price and availability of gear is not the place. There are plenty of used HF gear in the $350 - $500 range. Heck, some of the new stuff starts at $600. Compared to what stuff cost even a few years ago and adjusted for inflation it's never been cheaper to get into HAM radio. In most countries HAMs are only the rich. I've seen HAMs in the USA that probably qualify for government assistance.

I still like to talk on the old radio but so many have gone to the computer. I don't think it's the cost because you can always find a deal on ham equipment or horse trade. My radio

is always on but I always hear the same people in ther all the time and it gets boring after a while. To keep up my interest I go out and buy something for the hobby like a new antenna or mike or even a new radio(new to me). But propagation has a lot to do with it too. And exotic DX or a country you don't have may spark some interest but you have to sit down and listen for a while and be willing to wait your turn in a pile up or just listen for some far off station hoping they will hear you. Right now we are living in Germany and the Europeans are in there constantly wanting to talk to the states and other areas so I have to contend with that plus they don't have the same band privileges we do in the states on some bands especially on 40. Yikes!!! Also I just don't think it has the appeal it used to and cell phones over here they are called (HANDYS) FRS/GMRS and PMR (EURO for FRS), and internet over the phone and now internet over the palm computer. You really have to be a hard liner any more to want to get into the hobby like we used to. I still like the old fashion way, pick up the mike and call the world. Always will! 73's

I wonder if maybe they get discouraged by some of you old farts who constantly argue with each other either on the air or in the ham radio newsgroups. They might also get bored with the local 2-meter geeks and their weekly nets where they have trivia questions between each other like how many tubes did they XYZ radio have in 1963? Give me a break!

New hams are our greatest resource for ARES and RACES. They are anxious to learn, and want to be Elmered.

We encourage them to check into nets, take EmCom training and team them up with a "training buddy" who is more experienced, to help them in station building, assembling a go kit, etc. We don't care what class of license they have as long as they are active.

Our Virginia RACES training materials are available as free .pdf downloads for ANYONE to use. Visit our web site at www.varaces.org and click on free training materials.

Amateurs living in Virginia and surrounding states can attend one of our FREE live training classes. The next session is May 31 at Eastern Mennonite College in Harrisonburg, VA. There will be another session October 25th in Hampton, VA, site yet to be determined.

Just to put my 2 cents in...

I've had my license for over 10 years and I was 13 at the time I got it. Obviously, at the time the Internet was not booming. I was highly active for the first 2 years.

Over the course of 10 years, I've learned quite a bit about electronics and computers. Admittingly, I walked away from Ham Radio when I reached High School. Too many other things happening in my life. However, I did return to it once I reached college.

One thing I have learned is that only operating on 2 meters can get old. Fast. I had an HTX 202 for the longest time and that's all I used. I became inactive again after college because of 2 meters getting old.

One day, as I was noticing my license was about to expire, I decided to upgrade to General instead of renewing. After learing 5 WPM code and passing the test, I had a renewed interest Ham radio again. This time, I made sure to aquire an HF rig. The challenge on HF far outweigh sitting on AOL or AIM and chatting with someone half way around the world.

Sure, I still monitor 2 meter repeaters. But now I have more interest in HF, 440, and 2 meter packet. For any new Hams getting into the hobby, please DON'T get stuck on 2 meters FM. Even with a tech licence, you have 6m, 220, 440, or SSB, Satelite, or Packet.

These days I see two kinds of hams coming to exams.
The first are into ham radio to support some other activity, such as car rallying or emergency service of
some kind. These people are stay active in their specialty area until they lose interest in the activity that prompted them to get their ticket in the first place. Some of these do, in a small way, stick their toes into the greater amateur community and over time become more rounded hams. Most still can't stand the three hour repeater rag chew about nothing. (I can't blame them for that)
The other kind of new ham I see finds their way in past the non-existent public profile, past the misconceptions about how "expensive" it all is (have you priced other pastimes these days?). These guys
(and gals) are on the edge, and can come in to or go out of ham radio very easily, depending on the reception they get. If they are shunned (or think they are shunned) on 2m,

then the rig goes into the bottom drawer and they are gone. If they get answers to their questions, help with offsets and CTCSS tones and repeater technique, then they are with us for the long haul. A small percentage of them get their CW after a year or two on VHF, and are lost to 2m for a considerable period. As antenna restrictions become more pervasive there are fewer of these. They aren't ready to rock the boat, or to take up mobile or portable operating just yet.
I'm coming up on a third of a century in ham radio, and haven't been bored or tired of it in all that time.
There have been times when I have considered myself to be too busy or too poor to come out and play radio, but on looking back it seems the problems were all really between my ears. One thing that did keep me off the air for a while was a combination of bad antennas, bad TVI and a lack of knowledge about how to fix either or who to ask. Now I try to be around to answer those kind of questions.

I am always amazed when I hear fellow hams talk negative about the internet. I personally feel that the internet is a enhancement to Ham Radio. Remote base operations, databases, ect. In my opinion (using myself as an example) most new hams struggle with the costs of a full size station. Hobby money is limited with most people. I started my HF experience with building a K-1 and using code. Slowly my budget has allowed me to set up a more robust system. Ham Radio's biggest appeal for me is that there is never ending learning. More I learn about electricity, radio, antennas ect. the more I love this hobby. New hams can just start slowly and learn. HT's are rather inexpensive and used one's are even less. From my perspective, there is an over-whelming amount of stuff to learn. I suppose the new hams are somewhat taken back by that reality.
Thanks for the discussion point 73, Rob AB9DF

I think it is the pre-made toy syndrome. When I was a kid, we made a lot of our toys. For example, we would spend hours digging in the dirt and making forts for our green army men.

Today toys are advertized and when the kids get them, they do what the ads show and then they are essentially done with the toys. I have seen it repeatedly with my own kids.

Today ham radio is largely appliance box operation. The new ham buys his gear, sets up his station, then doesn't have the urge to go farther or learn how anything works. It seems that the object of ham radio is not what it was. It was supposed to provide a pool of technically capable individuals. More and more it seems to be only providing consumers.

I don't have the answers as to how to get kids interested in the way things work and not just the successful conclusion. I don't think the pre-made toys are the answer.

Before we start a dialog on this subject, is this a faulty premise? Where has it been demonstrated that new hams are inactive and especially "most" new hams?
And what, pray tell, does cellular telephone, FRS, CB radio, computers or the Internet got to do with amateur radio? To the extent these "activities" syphon off activity, I submit to you that the person involved has become a ham largely for reasons that will not sustain activity as a ham. This was all quite predictable when ,about 25 or so years ago, we began seeing a serious mania displayed to "recruit" new hams. The "hardcore" of amateur radio was always made up of individuals who found and were drawn to amateur radio on their own. They found it via the "magic" of broadcast band radio and short wave radio and they were enamored by the magic of the distances covered by wireless means. They were motivated by something inside themselves. Many found their way on their own mostly because they were internally motivated. Those types didn't need "recruiting". 30 or more years ago, who ever heard of new hams afraid of making their first qso, phone or cw? Who ever heard of hams back then who had the attitude that antennas were ugly and should be hidden? Only the truly unambitious and unmotivated would allow cw to stand in their path to a license. Have any of you ever heard of Cliff Corne K9EAB? Cliff was in an iron lung and could only wiggle a toe(if I remember the story correctly, as I heard it)but was known to be a competent cw enthusiast. Hows that for motivation? The fact is, for many of us they couldn't have erected barriers high enough to keep us out of ham radio and today they can't seem to lower them enough to suit some. If amateur radio itself, on its own merit and virtue, can't hold the interest of some, I don't give a hoot.And if you're among those to whom amateur radio put a deep hook in you, welcome to a lifetime of fascination.

Mail this to a friend! (http://www.eham.net/forums/mailto/1?id=22006)

I returned to Ham radio last year after a short break of 35 years. But about three years prior to that I bought a small SW receiver for getting the BBC news while overseas. I started to regain my interest in Ham radio by tuning to 75 meter SSB and just listening.

What I heard was then disgusting. Hams were swearing at each other, recording and playing back transmissions of others, and intentionally interfering with each other. My feeling was, "Do I want to be a part of this???"

I turned off the radio and didn't try again for several years. When I did, it wasn't as bad. Maybe I just caught the worst of the worst or maybe it got cleaned up. But I still hear some of that on the air from time to time.

Unfortuneately, I read similar behavior from time to time on the internet. My feeling is that the bickering and name calling turns off a significant number of individuals. When someone expresses an opinion and the replies are, "Only a stupid person would say that," there is a strong chance that many are turned away.

Just my $0.02.

I just received my first licence 2 months ago, I have tried to talk on 2 meters many times by getting on a repeater and giving my call sign and the phrase "monitoring". I hear other stations out there but not one comes back. Occasionally someone will if they have done the same and gotten no response. I agree that most hams in this area (Tulsa, OK) only want to talk to certain other stations and won't reply to unfamiliar call signs. If you participate in the nets you can talk IF you can get in.
Also some hams will tie up a repeater for an hour or more and no one else can get on .
I think this can be discouraging to new a new ham.

I am not a new ham -- I was first licensed in 1963 but I DID go INACTIVE in 1980 and stayed inactive (except for a few very short bursts on 2mtrs FM) for almost 23 years. I believe the reason I was inactive has a little bearing on why many hams become inactive.

I went off in a different direction in my life and did NOT have as much time to spend on Ham Radio but the main reasons I dropped out were not because of time.

Initially I lived with my parents and they let me put up a tower (which I could afford because I lived at home) and a big home brew monoband beam. I could get on SSB and CW and

put out a great signal and ragchew and DX very effectively. I put out a great signal all over the world working primarily 15 meters.

The reasons I dropped out were caused by the fact that I finally moved away from home and have been a renter ever since then - moving around and NOT buying any property.

1. I didn't want to get back on the air with a poor antenna, makeshift antenna, and not be able to put out a decent signal ... Relegated to working little DX and not being able to have decent ragchews. Oh, I know some Hams use compromise antennas with pretty good success but it is a discouraging factor.

2. The cost of possibly overcoming reason #1 was not something I felt like I could afford. Namely, getting and using an amplifier and/or buying or building numerous "exotic" antennas. Neither of these things were assured to help that much anyway.

3. Just the cost of Amateur HF rigs were enough to discourage me (though not enough by themselves to stop me).

I think many NEW Hams run into the same problems. A new Ham often gets his ticket and often buys a 2 meter rig and enjoys it. After a while the shine wears off and it is NOT as exciting and he wants to try the HF bands or new modes. Try to price a new VHF/UHF or HF rig and a decent antenna -- not cheap.

And if they do do get a HF or VHF/UHF rig and can't put up a decent antenna the results can be very disappointing ...

What finally brought me back to active status was reading an article on the web about PSK31. It gave me a glimmer of hope that I could get back on the air without spending an overly amount and have an effective station with a less than optimized antenna. PSK31, because of it's narrow band quality and it's interfacing to my computer, made an apartment antenna actually useful. I found I could have high quality ragchews that were not possible on other modes -- including CW (though I could do OK on CW, PSK worked out much better for ragchewing). It made ham radio fun again -- quality QSO's running less than 50 watts to less than optimal antennas -- and even on 20 meters where the KW+ amps abound!

So the real answer is making Ham radio affordable and effective for folks that can't spend thousands of dollars and have NO space for big antenna farms. That would keep many (but not all) Hams more interested and active.

PSK31 did it for me BUT there are possibly other things that apply better to others. We need to "advertise" more of these other modes and aspects of Ham radio. It seems that too much ARRL magazine space and web space is dedicated to SSB and contests -- both of which takes a good more power and antenna to work effectively on a regular basis.

As elmers lets start talking more about the OTHER aspects of Ham radio to the ones we want to keep active AND help them to put together effective and enjoyable stations.

Cost is not a problem with Ham radio. Radios are cheaper than ever.
Technical obstructions. I disagree. Anything of quality is worth the educational investment. Tech and General class license are not really difficult.
Awareness of the hobby. This is definitely a problem. Computers are in our face everyday. Yesterday on NPR's "Talk of the Nation" ham radio was the topic. This is the type publicity we need.

I believe that it is sad that this is a problem worthy of discussion. I know that with the advent of personal computers, cell phones, and consumer grade walkie talkies that amateur radio is fading. In this I feel that it is important for more active use of the bands. What is VERY important to realize (and many hams may not know this)is the fact that technologies of today have taken up virtually all of the available air space. We may end up getting to the point of the proverbial "use it or lose it" situation. I hope and pray this does not happen but I feel that it might if things go unchanged.

I don't know that "most" new hams are inactive, but I do share K0AST's frustration with 2-meter "cliqs." I have been a ham for 10 years. I got licensed when I went away to college at UCF in Orlando. I was an engineering major and it seemed like a neat thing to do. Lots of young guys, an active club and repeater, a great shack in one of the buildings on campus - I had a phenomenal elmer back then (N4ZIQ - thanks a lot if you're out there!!).

I was very active in my time there. When I moved back home (Fort Lauderdale area) to start my job, I couldn't find many folks to talk to. You would key up and say "WA4SE listening (or monitoring)" and nothing - dead air. Then 30 seconds later some other guy would do the same and his friend would come right back to him. I can appreciate that maybe someone wouldn't be in the mood to talk to someone new, but when this went on for a while, I gave up.

Eventually I made a couple of contacts and I went to a couple of local club meetings, but never really found one that I clicked with. That's not anyone's fault - just unfortunate. I'm 28 and most of these folks are much older. In their defense, most of them were EXTREMELY kind, but they just didn't do much VHF work - mostly HF.

I have been out of the hobby for the better part of 6 years since then. I would really like to get involved again and explore some of the digital modes that can be done with VHF - packet, APRS, etc. - but it's really no fun talking to yourself... I would really like to buy a nice mobile rig for the car - but it's tough to justify it if no one ever wants to chat...

I'm now considering starting a club for students at the high school where I teach, so this has turned into a very relevant discussion. How can I get them motivated and keep them involved? It would be nice for them to meet and chat with some hams of ALL AGES.

On another note - to this day when I return to Orlando, all I have to do is key up and someone comes back for a chat. It's interesting how different ham radio is depending on your location...

I got my tech license about 6 months ago, and have only been able to purchase a 2m/70cm HT, and a broken mobile 2m that I was able to fix up to working. The 2m mobile doesn't have a high fidelity sound because I had to re-wire it, and some people give me crap about that. I think they should just be happy that I am on the air. If they want me to sound like I am next door then buy me a new rig. Also, theres way too much bickering and stupid operators out there. I have volunteered to do some local communications for bike races and so forth, and someone comes up and jams the repeater because we closed it for the day. I am trying to call in a biker down that need medics and some fool is jamming me. Yeah, that makes me want to continue. Why should I want to join a group that just argues? Just because its wireless doesn't make it interesting to listen to. But I am in it for the ARES/RACES, those groups are normally solid operators. And for all those that bitch about the no-codes, calm down, I am trying to learn the code, but college comes first and until then I will just work the VHF/UHF.

As a percentage of income, ham radio gear today costs less than it did in the days of Heathkits. I bought a Heathkit SB102 about 30 years ago, it cost about $350 at that time. Just compensating for inflation it would cost $1450 in today's inflated dollars. A new TS570 transceiver can be bought for less that a $1000 today. Cost is not the issue, and as the logical trend toward inexpensive surface mount components progresses, the possibility of kits for hams diminishes.
Today's infrastructure makes communication anywhere in the world easy, reliable and affordable, check telephone rates, internet rates etc, so from a practical standpoint there are much better ways to communicate almost anywhere in the world today than ham radio.
If new hams are not fascinated by the concept of generating and transmitting rf based signals, pretty much independent of the communications infrastructures, then operating a communication appliance quickly grows old.

Jeez.. ham radio is facing it's biggest threat since WW I (Power Line Communications) and Eham still posts stuff like this.

> 1. Once they get motivated enough to ask to take
> classes they get discouraged by the technical aspect
> of it. I do think we should still have this aspect
> though.

Well, gee, thank you that you think we should keep a technical aspect of ham radio. My apologies to your buddies who thought otherwise that you can't just put your fingerprint on an application to get a license.

> 2. Some one tells them they have to take Morse code
> to be a ham. I think we should still have Morse code
> but it should only be required for 40m and up to
> operate because that's about the only time you'll
> want to.

Yup, you're right, no one uses CW, so why have it? All that di-dah'ing I hear on every ham band must be random noise, I guess.

> 3. They figure out the price of radios. A basic 2m
> handheld with 5 watts costs about $150+. But there
> is a way to beat this, bring back Heathkit and all
> the kit manufacturers and they need to make
> affordable VHF and UHF kits.

Considering the cost most kids spend on all the crap they do, $150 isn't that much. Yeah, I know some people can't even afford that, but, my god, the stuff has to cost SOMETHING. And, as others have said, if you take into account inflation radios are FAR CHEAPER now than they've EVER been (Handhelds cost the same 20 years ago with less features, and people made less money).

> 4. Most people these days don't even realize it
> exists. If somebody hadn't shown me their radios and
> let me dink with them I would have never joined.
> Advertise about what you do instead of drugs, let
> others know about ham radio!

I love to talk about ham radio, but I'm also smart enough to know that not everyone is going to like it, and that's OK. If I know someone who has no interest in science or math, I'm not going to try to convince them to become a ham. If they ask, I'll tell them how much I love it, but I'm not going to bend their arm trying to convince them to enjoy it, too.

> 5. Nobody gets the new guys involved. Take someone
> out to the repeater station with you to work on it.
> It will mystify their minds about talking all over
> the world.

Blah, blah, blah. It's SO EASY to post something that says "we need to get the new guys involved". Stop telling people to do that and do that yourself. You'll make a bigger difference.

Maybe we need a survey made not on the internet but by a company that specialized in surveys and sent to hams who have had a license one year or less and find their reasons, in an unbiased way, why they are operating or not operating. Every hobby, advocation and vocation has some degree of attrition in the begining but I don't think it is as big as presented here.

Reading this thread though I will make some comments:

1. What are the Elmers doing? Are we helping and encouraging them or complaining about the technical aspect or having to learn CW? They need to know if I can do it, they can do it. Teach and learn yourself. I have.

2. Young, younger and youngest! God help ARRL and the ham community. I am not against young operators but I think the recruitment level is too low. We should be shooting for high school and college students. They are arriving to a point in life where they are ready for ham radio meeting the real world. Leaving licensed hams out, how many parents are going to hire a lawyer to fight city hall to put up an antenna? I can just see a kid in the fifth or sixth grade working out a TVI or RFI complaint. Do you honestly think an adult is going to listen to a child in a situation like this? Adults have a hard enough time with it. This is another item to think about.

3. Are we adequately seperating ham radio from the internet. It is true, we are using the internet for many things but we have to get by the I can do that on AOL without a license if we are going to sell ham radio. This is radio, we have to get the interest in radio. Introduce the newcomer to DX, contests and other activities not offered without the use of rdaio frequency energy being radiated. Press the fact that you are controling the system, not an ISP.

4. If all I could work was 2 meters, I'd turn my license back to FCC! The band is for the most part cliquish and loaded with snobs (well maybe they are just afraid of new people). The only reason I keep 2 meters is for mobile on trips. I figure I can get local help in an emergency. I think you need to talk with them. The newbies don't bite. That stranger might even be the one to really help your club someday when you really need it.

5. Are we working to help the newcomer upgrade and encouraging them to do so? Don't just jump up and down crying aboutthe difficulity. I got my 13 WPM General by teaching a calss of new hams. They learned the CW and I got my speed up by helping them. It was a win win situation. I told them I was only a Technician after we all took and passed the test. We all had a good laugh.

Help ham radio, don't hurt it. We can all complain and bicker about the politics of in and surounding ham radio, and there is plenty of it, on these forums but it is best for all

concerned to promote ham radio to the newbie.

1) Contact all "New ops" to inform them of all clubs in their area and meeting times/locations.

2) Clubs should consider creating a "New Op" assistance team. ie: help with antennas, locating low priced used equipment, jargon intro, basic op practices, etc.

I thought this was going to be about the pitfalls new hams run into. No offense, but four of your five points don't coincide with your title - they deal with folks not knowing about ham radio at all. And the fifth one, showing them a repeater, is not exactly showing them how to "work the world".

Let's face it, people's free time is not what it used to be - even those with a technical thirst no longer "need" ham radio to quench it. The things that differentiate ham radio from the other pursuits is what will save it - if anything. IMO, talking to one's neighbors on 2m is not one of these.

If you want to keep new ham operators interested-Stop requiring the learning of the code to get a general- I passed all test to get a general license but can't pass the code and there were alot of ham's there in the same boat-I have not been active since I got my tech license cause I'm not able to pass the code.

The first thing we need to do is find the old two meter rigs and put them back on the air. Activity breeds activity - silence leads to silence.

We had 7 new hams pass their test after our radio classes last fall. In the class, we spent 15 minutes each night introducing a different part of ham radio - public service, DXing, weak signal VHF/UHF/Microwaves, satellites, Echolink, etc.. All the graduates of our classes get a free one year membership in our radio club.

So far, I have only heard three of them on the air. A couple more have made it to a club meeting. Of the 7, I think two of them are pretty active - one on 2 meters and the other primarily on Echolink.

I don't think it's cost, though so many kids today get turned off if you tell them it might cost over $100. I think this is because their parents paid $1,000 for their PC, and are paying $150 a month for cable TV, high speed Internet, and HBO (at least in this area). These little 'extras' are a huge burden on the family income.

We may not be able to bring back the heyday of 2 meter repeaters, but if we care about the future of the hobby, we need to try.

KG4OOA has the right idea with his observation about the ideal age range to target prospective operators. My high school students could really get a lot out of ham radio - and I think there is sufficient crossover between ham radio and computers to attract them. The challenge for me trying to start a club at the school where I teach is going to be getting a demo set up.

I also like the idea of local clubs sending out a newsletter or something to those who are newly licensed. I don't know the specifics, but it shouldn't be too hard to get a monthly listing of new hams within 50 miles of a club's zip code... Heck - I get a traffic ticket and within 5 days, every attorney in the county is filling up my mailbox with flyers...

For what it's worth - I don't buy the "cost" argument either. My students spend $299 on a Playstation and literally thousands (Where do they get that kind of cash?) on computer parts... For $299 you can get a heck of an HT or a decent mobile unit for that to get on the air.

This is a good discussion and will no doubt generate some good ideas!!

By the way - have you looked into the ARRL 'Big Project' - a major push to get ham radio into the schools? I think there are some serious dollars available to get your project started, and some formal curricula for using ham radio in classes.

If you want to start off with a 'bang' sign your school up for ARISS and hopefully in 8-12 months, your kids will get to talk to ISS astronauts via two meters. All you need on your end is speakerphone conferencing ability. That should stir up some excitement. If you don't want to wait that long, I would expect you can find some local hams who'd be able to demo FM satellites, PSK31, and other interesting things.

2 meters is great turn off to new operarors.
Its like thst Jack Nicolson movie..."Is this is good as it gets".

That is an incentive to learn 5 WPM. If all you are going to use is a dualbander, Ham radio will get stale real quick!

The Clique factor #1
No more of a challenge to operate than CB or GMRS.
In fact GMRS the people tend to be more friendly

Changing times. The internet. "Radio? Does anyone do 'radio' anymore?"

For one thing, it comes to easy. It was exciting when there was an apprenticeship, in which you got on the air, and began to learn how it really goes, and how it should go. The Novice ticket was an excellent training program but once it was made long-term and renewable, it became a place to become stagnant. And bored.

Converting people from CB to ham radio. They are already talking 25 miles on their radios and doing what they want to do. Making them into hams on 2 meters doesn't give them more; it gives them less, for now their are rules they need to follow.

Thinking every person in America should be a ham. Exposure of ham radio to people is not a bad thing. But constantly nagging them about becoming a ham is. Maybe they like car racing, or model railroading. This is - or was - a small niche hobby, in which people who were truly interested in the hobby became a part of it. Those who are not interested, but do so to please the hubby, wife, father, friend, are not going to stay.

On that line, a lot of today's hams get their tickets for the sole purpose of keeping in touch with the spouse. They have no interest at all in ham radio specifically, just a means of utility communication. Another "bring home the bread" or "pick up the kids at the kennel" sort of thing. As hams, they have nothing to contribute, and no interest in doing so. Spouse told them "Honey, it's a great way to keep in touch." They bought into it and here they are, licensed cell phone hams.

What about the promotion of ham radio? Ah, yes, working the world, big beam antennas slowly rotating in the sky, kilowatt rigs, phone patches, DX expeditions. So the prospective ham gets terribly excited. Then he studies, hits the VE session, and walks out with a Technician ticket. No big beams, no DX expeditions, no DX, no drama. Just a sort of CB/cell phone that is not at all what he was told ham radio was all about. There is virtually no resemblance. He feels frustrated, for this isn't what he worked for. And he may feel deceived. The excitement disappears, the rig is sold or rarely turned on, and a good many of them go back and pick up the 11-meter microphone where they can have some real fun.

The fact is, changing times. We tend to promote ham radio as if it was what (Message over 64 KB, truncated)

Just as I was leaving my home to go to the MARS AGM, my dad called that I should rush to Jaslok and arrange for an ambulance as my grandfather took seriously ill and slipped into a coma. We spent a night on tenterhooks, and only this morning his condition was declared out of peril.

I, therefore, could not attend the meeting.

Regretfully,

Nirav

ps: VU2ICQ, congratulations on your new and appropriate moniker - I do seek you. A person of mine needs to drop by at your place - could you email address off-list?

pps: Happy Birthday (belated but very sincere), KPL (Kiran). May the best of your past be the worst of your future!

1148. 4th Managing Committee Elections

Yahoo group: m_a_r_s
Date: 2003-05-02 16:46:45 UTC
From: Sandip Adiwarekar
Topic: 1148 Message: 1148

Hi !!

4th Managing Committe Elections were held yesterday in the 3rd Annual General Meeting held at S.S.Hall, Garware.

The Nominees for the 7 member Managing Committee Elections were :
1. Mukesh Jaitley, 2. Nilesh Rathod, 3. Rajen Kavadia, 4. Prashant Koli, 5. Kailash Gupta, 6. Arun Singh Rawat, 7. Parin Gangar, 8. Sandesh Kamat, 9. Mehul Chovatia

As per the constitution, the members who are valid callsign holder and with membership of minimum 1year were eligible for the elections.

From the results, 7 members who won the elections are:
1.Mukesh Jaitley (16 votes), 2.Nilesh Rathod (18 votes), 3.Rajen Kavadia (15 votes), 4.Prashant Koli(17 votes), 5.Arun Singh Rawat (15 votes), 6.Sandesh Kamat (15 votes), 7.Mehul Chovatia (17 votes)

Members who lost the elections are Kailash Gupta (1 vote) and Parin Gangar (9 votes).

The new managing committee members declared the office bearers as:
Rajan Kavadia (VU2RIG) as Chairman
Nilesh Rathod (VU2NLF) as Secretary, and
Prashant Koli (VU2CBU) as Treasurer.

****
Inspite of the fact that out of 163 members, only 46 were eligible for the voting as per the constitution, it was shocking to note that :-
- only 18 members out of 46 eligible members attended the meeting
- out of 18 members who actually attended the meeting, 8 were contesting candidates
- 10 remaining members who excercised their rights out of 37 remaining members (those who didn't bothered to attend the meeting -- inspite of the official invitation with thier nomination forms received by them thru courier 15 days in advance), except those who confirmed their absence (when MARS called for)
- MARS always conducts its AGM on 1st of May every year, it happened that way for the 4th consecutive year.
****

73s,
Sandip - VU2UGO
Returning Officer

Dear Members

In addition to VU2ICQ's Mail, i would like to state that inspite of me & CBU personally confirming with members whether they will be attending the AGM ,they did not turn up, this clearly indicates , how much dedication do they have towards our..your society or towards Ham radio, we have wasted a sum of almost more than Rs.5000/. which we could have utilised for a some other events in our society, as you are all aware that the society run classes , request for donation , to get funds so that the society can give better service to all his members.

But it seems the members be it a founder member or new members have taken us for granted ,for all we the commitee and other hard working members do without any self interest , and ICQ has rightly mention if the scenario continues to be like this then we would have no options but to cut down activities and eventually wind-up the organization.

I again request all the member to confirm their partcipation , whether requested or not and after confirming, attend the same,which will save your society from this wasteful expenses.

Also lot of follow up has to be done to collect the fees which was apparent when I was following up for the fees this does not help your society instead it puts an additional burden on the society , which has to literally go to collect the dues from each and every members, REQUEST ALL MEMBERS WHO HAVE NOT PAID FEES KINDLY DO SO AT THE EARLIEST

==>AMATEUR RADIO SPECTRUM PROTECTION ACT TO GET PUBLIC AIRING

The chairman of the House Subcommittee on Telecommunications and the
Internet has agreed to hear testimony on the House version of the Amateur
Radio Spectrum Protection Act of 2003, HR 713, at a public hearing later
this spring. Rep Fred Upton (R-MI) this week assured the bill's sponsor,
Rep Michael Bilirakis (R-FL), that the hearing--which will be convened to
address public safety spectrum needs--will include an opportunity for a
member of the Amateur Radio community to appear before the panel. Upton
also told Bilirakis that he shares his interest in protecting Amateur
Radio.

"That indeed is good news!" said ARRL President Jim Haynie, W5JBP. "A
hearing is exactly what we'd like to have in order to state our case, and
I think we can state a good case, too." The date of the hearing has not
been set.
```

Upton's willingness to hear testimony on the bill is considered critical to providing it with the credibility it needs as it moves through the legislative process. It also marks a major step toward getting HR 713 through this Congress.

The agreement, during a meeting of the full House Energy and Commerce Committee, came after Bilirakis asked to speak prior to consideration of another piece of spectrum legislation, HR 1320, the Commercial Spectrum Enhancement Act, which Upton sponsored. During his comments, Bilirakis spent about five minutes discussing the importance of Amateur Radio to the committee, chaired by Rep Billy Tauzin (R-LA).

The newest cosponsors of HR 713 include representatives Jerry Moran (D-KS), John Olver (D-MA), Mike Ross, WD5DVR (D-AR), and Walter Jones, Jr (R-NC).

The Senate version of the Amateur Radio Spectrum Protection Act, S 537, recently got a boost when the chairman of the Senate Communications Subcommittee, Montana Republican Conrad Burns, signed on as a cosponsor. His cosponsorship indicates that the measure now has his attention and could convince others to follow suit.

Bilirakis filed HR 713 on February 12, while Idaho Sen Michael Crapo introduced S 537 on March 6. The legislation would amend the Communications Act to require the FCC to provide "equivalent replacement spectrum" to Amateur Radio and the Amateur-Satellite Service in the event of a reallocation of primary amateur allocations, any reduction in secondary amateur allocations, or "additional allocations within such bands" that would substantially reduce their utility to amateurs. Bilirakis and Crapo, both Republicans, have twice before sponsored similar legislation at the League's recommendation. The bills point out Amateur Radio's volunteer role in providing emergency communication during disasters and emergencies.

Haynie continues to encourage ARRL members to urge their senators and representatives and to cosponsor the bills. "Letters and e-mails are the key to getting legislation passed," Haynie says. A sample letter is available on the ARRL Web site <http://www.arrl.org/govrelations/arspa.html>. Those writing their lawmakers are asked to copy their correspondence to the League via e-mail <specbill03@...>. (For additional information, see "Communicating with Congress," by Derek Riker, KB3JLF, QST May 2003, p 46.)

The text of HR 713 and S 537 is available via the Thomas Web site <http://thomas.loc.gov/>.

==>FCC ACCEPTING COMMENTS IN "BROADBAND OVER POWER LINE" INQUIRY

The FCC released its Notice of Inquiry (NOI) on the deployment of "Broadband over Power Line" (BPL) technology April 28 and now is accepting electronically filed comments in the proceeding, ET Docket 03-104. The technology has raised concerns of substantial interference to the Amateur Radio HF bands. BPL would couple high-frequency RF to parts of the power

grid and use existing power lines as the transmission medium to deliver broadband and Internet services.

The FCC has expressed unabashed enthusiasm for BPL. ARRL CEO David Sumner, K1ZZ, says Commission members have been acting more like cheerleaders than regulators. "We were disappointed in the tenor of some commissioners' statements, but we were encouraged by the fact that in the NOI itself the FCC did point out that licensed services--including Amateur Radio--'must be protected from harmful interference' from BPL," he said.

In the NOI, the FCC acknowledges the interference risk from BPL. "The multiple-carrier transmission nature of the new high-speed BPL technology could pose increased risk of harmful interference, and thus new BPL devices may need a higher degree of oversight to ensure that authorized users are not subject to interference," the FCC said.

The major interference threat to amateurs comes from so-called "access BPL," because its signals can radiate from outside power lines--possibly for great distances. The FCC also concedes that close proximity of access BPL equipment on utility poles might affect--and be affected by--cable TV and DSL service.

Current FCC Part 15 rules limit the amount of RF energy that can be injected into the power lines, but, as the FCC concedes, "the new generation of high-speed BPL devices that use wide spectrum was not contemplated" when those rules were formulated. The FCC has invited comments on possible changes to those rules.

The FCC also seeks information on a possible access BPL standards, spectrum and bandwidth, modulation techniques and data transmission speeds. Additionally, the Commission seeks the status of BPL development and anticipated deployment in the marketplace.

ARRL Laboratory Manager and RFI guru Ed Hare, W1RFI, has cautioned that BPL deployment could mean "a significant increase in noise levels" on HF. "Right now with BPL/PLC, there are more questions than answers, and until those questions are answered, these systems should not be widely deployed," Hare said. "The time to raise and answer these questions is now. I truly hope that the NOI will provide a means for the FCC to do just that."

The ARRL Lab has prepared a comprehensive information page, "Power Line Communications (PLC) and Amateur Radio," on the ARRL Web site <http://www.arrl.org/tis/info/HTML/plc/>. ARRL Lab staff members also plan to visit sites where BPL is undergoing field testing.

The complete NOI is available on the FCC Web site <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-100A1.doc>. The FCC now is accepting electronically filed comments via its Electronic Comment Filing System (ECFS) <http://www.fcc.gov/cgb/ecfs/>. Under ECFS Main Links, click on "Submit a Filing." In the "Proceeding" field, enter "03-104" and complete the required fields. Comments may be typed into a

form, you may attach a file containing your comments or submit them via e-mail, per instructions on the ECFS page. The comment deadline will be 45 days after publication of the NOI in the Federal Register.

==>ASTRONAUT SUGGESTS LUNAR BASES AS STEPPING STONE TO MARS, UNIVERSE

NASA Expedition 6 International Space Station Science Officer Don Pettit, KD5MDT, has suggested that NASA should consider setting up lunar bases in the future as a stepping stone to expand mankind's exploration of the universe. The comment came in response to a student's question during an Amateur Radio on the International Space Station (ARISS) school group contact. Several students at Cowichan Secondary School in Duncan, British Columbia, Canada, had the opportunity to quiz Pettit about life in space via Amateur Radio on April 21. The QSO between VE7CVA and NA1SS was the last for members of the Expedition 6 crew of Pettit, Commander Ken Bowersox, KD5JBP, and Nikolai Budarin, RV3FB, who head back to Earth this weekend (see <http://www.arrl.org/news/stories/2003/04/28/1/>).

"I hope the next step for manned space exploration will be to go away from the planet Earth for a while instead of just going in circles around the planet," Pettit said. Setting up bases on the moon and learning how to operate at that distance from Earth, he said, would represent "a logical next step" in space exploration. "When you have your technology down, then you can go off to Mars and try doing a little exploration there," he added.

Pettit remarked that his five months aboard the ISS have been "an amazing experience" and "really quite enjoyable."

A couple of the Cowichan students wanted to know about sleeping in space. Pettit said he does dream in space. "When I initially started dreaming, I would dream about walking places," he said. "Now, though, I starting to have dreams when I'm on space station and not on Earth and I'm flying everywhere in my dreams." He explained to another youngster that the ISS crew members take their cues about when to sleep from their bodies, not from periods of light and dark. As the ISS orbits Earth, the sun "rises" and "sets" 16 times a day, he pointed out.

A dozen students in grades six through twelve took part in the contact as 150 members of the public and news media representatives looked on. The students were selected from schools throughout the region based upon a poster and essay competition. Members of the Cowichan Valley Amateur Radio Society assisted in setting up for the contact. Dale Jones, VE7DDK, was the control operator.

On April 16, Budarin spoke with youngsters in his home country of Russia during two ARISS contacts with students in Tver--located some 150 km from Moscow. According to Sergei Samburov, RV3DR--who heads Russia's ARISS efforts--a selection of students from 53 schools were picked to ask their questions. The contacts--made on successive orbits--went well, according to Samburov. Between the contacts, he and cosmonaut Sergei Treschev, RZ3FU, answered students' questions and talked about life in space.

ARISS school group contacts are off limits for the next few weeks due to the crew change. The Expedition 7 team of Cosmonaut Yuri Malenchenko, RK3DUP, and veteran NASA astronaut Ed Lu, KC5WKJ, arrived aboard the ISS on April 28, and Lu will take over as NASA ISS Science Officer.

ARISS is an international project with participation by ARRL, NASA and AMSAT. For more information, visit the ARISS Web site <http://www.rac.ca/ariss/>.

==>COLUMBUS HAMVENTION? VENDORS VOICE PREFERENCES ON ALTERNATIVE SITES

Most big Hamvention inside exhibitors have indicated they'd prefer the world's largest annual ham radio gathering to be held in Columbus, Ohio, if Dayton's Hara Arena were no longer available. This is the last year of Hamvention's five-year contract with Hara Arena. Event organizers have begun preliminary talks with Hara's owners for a new pact, but say they want to keep all options open. Hamvention takes place May 16-18, and the show's Production Manager Garry Matthews, KB8GOL, says Hamvention 2003's fortunes have begun moving in a more positive direction in recent days.

"I think it's going to be a good year," predicted Matthews, who said he's seen a dramatic increase in interest over the past week. "I think the show may be slightly smaller this year in terms of inside exhibitors and outside vendors," Matthews conceded, "but if activity continues as it has since Monday of this week, we possibly could sell out the show. We're getting orders every day."

Earlier this spring, Matthews reported that things had been slower to come together in terms of advance sales to visitors and vendors. He said organizers have been beefing up direct-mail and other Hamvention promotional activities over the past couple of weeks, however, and results have been encouraging.

One popular Hamvention staple--the FCC forum--will be missing this year. Because of some miscommunication and scheduling problems, neither Bill Cross of the FCC's Wireless Telecommunications Bureau nor Riley Hollingsworth of the FCC's Enforcement Bureau will attend Dayton Hamvention this year. Last-minute efforts to find suitable substitutes for Cross and Hollingsworth did not pan out, and the forum's two-hour Saturday morning time slot remains unfilled.

Matthews and FCC sources have indicated that tentative plans are in place to schedule an FCC symposium at Hamvention 2004 featuring Cross, Hollingsworth and FCC High-Frequency Direction Finding Facility Manager Dave Larrabee.

Matthews said that while it was unlikely Hamvention would be moving to Columbus--some 60 miles from Dayton--any time soon, it remained "a very strong contingency" if Hamvention ever did have to move elsewhere. "Our option with Hamvention would be to stay at Hara for as long as we possibly could, as long as we could make it work and the show could be a good show," he said. Hamvention is sponsored by the Dayton Amateur Radio Association, but Hamvention has quietly dropped "Dayton" from the show's

official name.

Hamvention's preference survey went to 225 of the largest inside exhibitors, and Matthews said 80 percent of those indicating a preference picked Columbus as their top choice as an alternative site, while 12 percent said "no" to Columbus. Matthews said the Columbus Fairgrounds appears to be a suitable site were Hamvention to ever consider relocating. The other two preferences were Indianapolis and Cincinnati respectively.

Matthews said Hamvention officials this year plan to survey a selection of "average hams" during the show itself. Attendance at last year's 50th anniversary event was 24,832--down about 5 percent from 2001's crowd of 26,151.

Late news about the show is on the Hamvention Web site <http://www.hamvention.org>

==>FCC SEEKS ASSISTANCE IN CURBING UNLICENSED 10-METER INCURSIONS

The FCC has requested the assistance of the ARRL Amateur Auxiliary/Official Observers <http://www.arrl.org/FandES/field/org/oo.html> in monitoring for illegal operation on 10-meters. The request came in an April 28 letter from FCC Special Counsel Riley Hollingsworth, who says incursions on the band by apparently unlicensed operators continue to be a major enforcement headache.

"This is the first phase of a renewed investigation effort and may be thought of as detect, collect data, and report," said ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG. Skolaut forwarded the request to members of the Amateur Auxiliary May 1.

Hollingsworth said the FCC wants help with a stepped-up effort over the next six months--from May through October--to identify any unlicensed operation on 10 meters "whether from business entities--including trucking companies--truckers or other individuals operating domestically." Hollingsworth said the FCC does not need direction-finding but would appreciate where possible "the names and cities of the operators, and license plate numbers and state if from a vehicle."

Skolaut said the FCC would like to concentrate on obtaining reports of this type of operation to help identify specific areas of the US where this problem is prevalent, although he concedes that not all illegal 10-meter operation originates in the US. "The FCC asks that OOs obtain as much information as possible and send their reports through normal channels to ARRL Headquarters," he said. The decision to record the transmissions of suspected interlopers was left to the discretion of the individual OOs.

The FCC request was made under a longstanding agreement between ARRL and the FCC regarding the use of Amateur Radio volunteers to assist in enforcement.

==>VHF GROUP TOLD ARRL WILL FIGHT INTRUDERS AGGRESSIVELY

ARRL General Counsel Chris Imlay, W3KD, urged those attending the annual conference of the Southeastern VHF Society <http://www.svhfs.org/> April 26-27 to continue to occupy the microwave bands. The ARRL official also encouraged the group to develop new and innovative communication techniques--such as IEEE 802.11 high-speed wireless--to expand Amateur Radio's presence on its microwave allocations. Imlay told some 70 amateurs attending the SVHFS event in Huntsville that amateurs were being asked to share their VHF and UHF bands with more and higher-powered unlicensed Part 15 devices, and he pledged the League's aggressive defense against these intruders.

"The FCC seems to want the amateur community to accept higher and higher 'interference temperatures,'" Imlay said, referring to higher noise levels caused by increased band occupancy. "We will fight that!"

Imlay also presented an overview of the current regulatory climate in Washington and a detailed, band-by-band outline of the threats <http://www.arrl.org/news/bandthreat/> to Amateur Radio frequencies from commercial interests. He noted ARRL's strong opposition to an FCC proposal to agree with a 2001 request from SAVI Technology that would allow operation of advanced RF identification (RFID) devices between 425 and 435 MHz. The ARRL contends that the RFID proposal is contrary to the philosophy of FCC Part 15 rules and could result in significant interference to amateur operations.

During the gathering, the SVHFS donated $300 to the ARRL Defense of Frequencies Fund and another $300 to AMSAT-NA.

==>SOLAR UPDATE

Propagation guru Tad "Shooting Star" Cook, K7RA, Seattle, Washington, reports: Even as the current solar cycle slowly declines, there still will be periods of rising activity, and this week was one of those times. As this bulletin is being written May 1, a large sunspot--number 349--is aimed squarely at Earth. For weeks now, Earth has been in a solar wind stream, and the appearance of sunspot 349 as well as other new spots resulted in a rising sunspot number.

After periods in the single digits, the daily sunspot number reached 224 on April 29. It hasn't been this high since March 9. Average daily sunspot number for this week rose nearly 85 points to 185.1. Average daily solar flux was up nearly 29 points. So, enjoy conditions when and if geomagnetic conditions stabilize to a K index of three or less.

Over the next week geomagnetic activity should settle a bit, providing improved HF conditions. The predicted planetary A index for today through Monday, May 2-5, is 25, 15, 10 and 15. Predicted solar flux for those same days is 145, 140, 135 and 130. Maximum usable frequencies (MUFs) over most paths should be somewhat lower during May than in April.

Sunspot numbers for April 24 through 30 were 171, 173, 193, 200, 175, 224 and 160, with a mean of 185.1. The 10.7-cm flux was 128.3, 143.6, 143.7, 154.1, 152.2, 155.1 and 153.5, with a mean of 147.2. Estimated planetary A indices were 24, 32, 15, 15, 20, 20 and 40, with a mean of 23.7.

==>IN BRIEF:

* This weekend on the radio: The New England QSO Party, the Indiana QSO Party, the MARAC County Hunters Contest (CW), the IPA Contest (CW/SSB), the 10-10 International Spring Contest (CW), the Microwave Spring Sprint, and the ARI International DX Contest are the weekend of May 3-4. JUST AHEAD: The Armed Forces Day Crossband Communications Tests, the Nevada and Oregon QSO parties, the VOLTA Worldwide RTTY Contest, the FISTS Spring Sprint, the CQ-M International DX Contest and the 50-MHz Spring Sprint are the weekend of May 10-11. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration opens Monday, May 5, 12:01 AM EDT (0400 UTC), for the on-line Level I Emergency Communications course (EC-001). Registration remains open through the May 10-11 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, May 20. Thanks to a federal Corporation for National and Community Service grant, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the course. During this registration period, approximately 200 seats are being offered to ARRL members on a first-come, first-served basis. Senior amateurs are strongly encouraged to take advantage of this opportunity. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, <dmiller@...>; 860-594-0340.

* ARRL Certification and Continuing Education course registration: Registration for the Radio Frequency Interference (EC-006) and Satellite Communications (EC-007) courses remains open through Sunday, May 4. Classes begin Tuesday, May 6. Those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future can sign up to be advised via e-mail in advance of registration opportunities. To take advantage, send an e-mail to prereg@.... On the subject line, indicate the course name or number (eg, EC-00#) and the month you want to start the course. In the message body, provide your name, call sign, and e-mail address. Please do not send inquiries to this mailbox. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@arrl.org.

* Amateurs invited to participate in Armed Forces Day event: The US Army, Air Force, Navy, Marine Corps and Coast Guard will cosponsor the annual military/Amateur Radio crossband communications tests May 10-11. The event will mark the 53rd celebration of Armed Forces Day. Although Armed Forces Day actually is Saturday, May 17, the Armed Forces Day Amateur Radio event

is held a week earlier to avoid conflicting with Hamvention <http://www.hamvention.org>. The event features a military-to-amateur crossband communications SSB voice test and the Secretary of Defense message receiving test. During the crossband test, 14 military stations will listen on amateur frequencies and transmit on selected MARS frequencies. Most military stations will commence operation at 1200 UTC on May 10. Amateurs are asked to limit contacts to two minutes or less. Eight military stations will transmit the Secretary of Defense's Armed Forces Day message at stated intervals via digital modes, including RTTY, PACTOR, AMTOR, CLOVER and MT63. QSLs and certificates are available. More information is available on the ARRL Web site <http://www.arrl.org/contests/announcements/af-day/armdfrcs-2003.html>.

* New Echo satellite could be launched this year: AMSAT President Robin Haighton, VE3FRH, says AMSAT hopes to launch its new "Echo" satellite, now under construction, later this year. "Progress is good, and we hope to have the satellite under test during the late spring or early summer," he said in a recent AMSAT President's Letter. The so-called "AO-E" satellite will offer analog (including FM voice) and digital operation, high downlink power (7 W nominal), multiple channels (two transmitters), simultaneous voice and data, a multiband/multimode receiver and a turnstile UHF antenna. Optional payloads include APRS and PSK31 support. More information on the Echo project is available on the AMSAT-NA Web site <http://www.amsat.org/amsat/sats/echo/article-02-11.html>.--AMSAT News Service

* CQ Hall of Famers announced: CQ magazine has announced this year's CQ DX and Contest Hall of Fame inductees for 2003. Ken Keeler, N6RO, and Dan Street, K1TO, will receive their plaques May 17 at the Contest Dinner in Dayton. Street and teammate Jeff Steinman, N5TJ, topped the field in the last three runnings of the World Radiosport Team Championship. Leif Ottosen, OZ1LO, who was inducted into the Contest Hall of Fame last year, also will be presented with his award. One DXer will be inducted into the CQ DX Hall of Fame this year. James Brooks, 9V1YC, is being recognized for his DX operations, support and unique presentations of DXpeditions through video.--The Daily DX

* Jim Maxwell, W6CF, memorial Web site established: The family of Jim Maxwell W6CF, has established a Jim Maxwell Memorial Web site <http://www.jimmaxwell.net/>. The site includes recollections, tributes and photographs from the friends and family of Maxwell, the ARRL Pacific Division Director who died February 6 at age 69. He had served as a member of the ARRL Board of Directors since 2000 and as Pacific Division Vice Director from 1994 until 2000. A Life Member of the ARRL and an avid DXer, Maxwell also generously supported the League through contributions to the ARRL Diamond Club, the ARRL Foundation and other programs.--Glenn Thomas, WB6W

* Vote on QST Cover Plaque award: The winner of the QST Cover Plaque Award for March was Anthony Monteiro, AA2TX, for his article "Work OSCAR 40 with Cardboard Box Antennas!" The April winner was Dave Benson, K1SWL, for his

article "The RockMite-A Simple Transceiver for 40 or 20." Congratulations, Paul and Dave! The winner of the QST Cover Plaque award--given to the author--or authors--of the best article in each issue--is determined by a vote of ARRL members. Voting takes place each month on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/qstvote.html>. Cast a ballot for your favorite articles in the May issue of QST. Voting ends May 31.

* W8 QSL Bureau address change: Effective May 1, the address for the W8 incoming QSL Bureau will change to W8 QSL Bureau, PO Box 307, W Chester, OH 45071-0307. Jay Slough, K4ZLE <k4zle@...>, has been named to replace the retiring Ed Gassman, N8HTT, who has managed the W8 QSL Bureau for several years.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.)

Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Expedition 6 Crew Back Home

AMSAT News Service Bulletin 124.01 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.01

The all ham ISS crew of Expedition 6 returned safely home on a Russian Soyuz capsule in Kazakhstan. Crew members Commander Ken Bowersox, KD5JBP, NASA ISS Science Officer Don Pettit, KD5MDT, and Nikolai Budarin, RV3FB, landed on Sunday at 0207 UTC.

This was the first time U.S. astronauts returned to a foreign country and the first time astronauts parachuted to a landing on soil instead of water.

Welcome home!

[ANS thanks NASA-TV for the above information]

AMSAT President Addresses SARS Concerns for Annual Meeting

AMSAT News Service Bulletin 124.02 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.02

To All AMSAT Members,
As your President, I am reviewing the situation for the
location of the 2002 Annual Meeting and Space Symposium.
Currently this is due to be held in Toronto later this
year in October.

The outbreak of SARS in Toronto has caused some worry by
travellers to and from Toronto, but let me assure you that
at present the SCARS outbreak appears to be under control
and is being limited to a few Health care facilities.

Should the situation change for the worse, then we will make
a change (Washington DC and Orlando are being considered)
however current indications are that within a month the
situation will have changed for the better and
that we will continue with Toronto.
I will keep you updated.
73
Robin Haighton VE3FRH
President AMSAT

UPDATE: May 2, 2003 "Robin reports that it is now 3 weeks since any member
of the Toronto general public has been confirmed with a case of SARS. The
number of people in isolation is reducing as their isolation time expires
and it would appear that the situation is improving everyday. Robin will
provide additional information on a regular basis".

[ANS thanks Robin, VE3FRH, for the above information]

New Two-Ham ISS Crew Makes Human Spaceflight History

AMSAT News Service Bulletin 124.03 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.03

There are five Amateur Radio operators aboard the International Space
Station this week. The Expedition 6 crew of Commander Ken Bowersox, KD5JBP,
NASA ISS Science Officer Don Pettit, KD5MDT, and Nikolai Budarin, RV3FB,
today welcomed Expedition 7 crew members Commander Yuri Malenchenko, RK3DUP,
and Ed Lu, KC5WKJ.

"The two crews will conduct joint operations this week," NASA announced. "Among their handover activities, Expedition 6 crewmembers will brief the new crew about ongoing science and station maintenance activities." The two crews will spend six days together on the ISS.

Over the weekend, Malenchenko and Lu became the first primary ISS crew to travel to the ISS via a Russian Soyuz TMA-2 spacecraft instead of arriving on a US space shuttle. They launched April 26 from Baikonur Cosmodrome in Kazakhstan. After the successful docking at the ISS, the crews began transferring clothing and supplies carried into orbit on the new Soyuz. They are scheduled to conduct a safety briefing later today.

NASA has grounded its shuttle fleet while it continues to investigate the February 1 Columbia STS-107 mission disaster, in which seven astronauts died. On his flight to the ISS, Lu wore an STS-107 patch on his spacesuit. He told reporters that he and Malenchenko were doing what the lost astronauts and their families would have wanted them to do by continuing space exploration.

Malenchenko and Lu are the first visitors to the ISS in more than four months. After a successful docking, hatches between the ISS and the Soyuz were opened, and Malenchenko and Lu entered the ISS today (April 28) at 0727 UTC. Bowersox, Pettit and Budarin, who have been aboard the orbital outpost since November 25, will depart for Earth May 3 using the Soyuz TMA-1 vehicle that's been docked at the space station for several months.

Malenchenko and Lu are slated to spend six months aboard the station, conducting a series of scientific and educational activities. Russian Progress rockets will deliver supplies to the ISS during their stay. Both men are space-travel veterans who worked together in 2000 on an ISS construction-phase shuttle mission.

The five space travelers are scheduled to take part in a news conference April 29 at 1530 UTC. NASA TV, available on some cable systems, will carry the news conference live.

SB SAT @ AMSAT $ANS-124.04
Upgraded GPS satellite Shipped To Cape for July Launch

AMSAT News Service Bulletin 124.04 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.04

As the U.S. Air Force prepares to launch its third Global Positioning System (GPS) satellite this year, prime contractor Lockheed Martin has set a new record for operational checkout of the recently-launched GPS IIR-9 satellite.

Following the March 31 launch of GPS IIR-9, Lockheed Martin executed an accelerated on-orbit payload initialization in just 11 days -- a record for any GPS satellite -- so that the satellite could be quickly placed into service in support of the current military operations. Two months earlier, the team achieved a 20-day check out of GPS IIR-8, which was launched on Jan. 29.

The next satellite, designated GPS IIR-10, was recently shipped to Cape Canaveral from Lockheed Martin's facilities in Valley Forge, Pa. for a scheduled launch in late July.

The satellite features significant performance upgrades, including a modernized antenna panel and increased power for GPS receivers. There are eight new-generation GPS IIR spacecraft currently on orbit out of a total GPS constellation of 28 satellites.

The GPS IIR satellites are compatible with the current system and provide improved navigation accuracy, achieved by using an ITT Industries payload system. Additionally, increased autonomy and longer spacecraft life are inherent in the Lockheed Martin satellite design.

To bring new capabilities to the GPS constellation, Lockheed Martin is under contract to modernize eight existing GPS IIR spacecraft already built and in storage.

GPS modernization is being performed at the Space & Strategic Missiles - Valley Forge, Pa. facilities and ITT Industries, Clifton, N.J. facilities. The first launch of a GPS IIR-M satellite is scheduled for July 2004. The U.S. Air Force Space and Missile Systems Center, El Segundo, Calif., is the contracting agency.

Pegasus Puts GALEX In Orbit

AMSAT News Service Bulletin 124.05 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.05

Orbital Sciences Corporation successfully launched the National Aeronautics and Space Administration (NASA)'s Galaxy Evolution Explorer (GALEX) satellite into its targeted orbit aboard the company's Pegasus rocket Monday.

The 312-kilogram (690-pound) GALEX scientific satellite, which Orbital designed and built at its Dulles, Virginia satellite manufacturing facility, was accurately delivered into its targeted orbit approximately 690 kilometers (420 miles) above the Earth, inclined at 29 degrees to the equator.

Boeing engineers have provided a number of studies to help NASA keep the International Space Station (ISS) viable for the foreseeable future, relying upon Russian vehicles, Soyuz and Progress, to transport cargo to the station.

Engineers at Boeing NASA Systems in Houston, many from the ISS Vehicle Integrated Performance and Resources (VIPeR) team, studied ways to maintain a safe and operable ISS.

The team was asked by NASA immediately after the space shuttle Columbia accident to study a number of options, taking into account the delay of the unique cargo ferrying capabilities of the space shuttle.

The Boeing ISS team's primary assessment effort focused on a smaller ISS crew size and assessed the consumables used by the station and its crew and the need for spare hardware.

The ISS team is relying upon the Russian vehicles as the only means of transporting cargo to the ISS until the shuttle returns to flight and/or the European Space Agency's Automated Transfer Vehicle is available.

The team tracked the primary consumables used by the station and its crew and worked closely with NASA's ISS Mission Integration group. Boeing conducted various analyses to minimize ISS supply and return requirements while optimizing the ISS vehicle performance and research.

The VIPeR team first focused on the issue of propellant on board the station, which is used to keep the ISS in the proper orbit and orientation and has been one of the most critical consumables in past studies. They concluded that currently planned Progress launches would meet propellant re-supply needs.

The next critical consumable is the water necessary to support the crew and system needs. Each crewmember uses about two kilograms of water a day for drinking, food and oxygen generation. The team looked at how water could be brought up while also examining ways to reduce water needs.

"We looked at how long we could leave three crewmembers up there and when we would go to two crew members," said Neil Lemmons, senior systems engineer with the Boeing VIPeR team.

"Without the space shuttle, it was quickly determined by all involved that a three person crew could not be sustained," said Bob Korin, manager of the Boeing VIPeR team. Keeping a crew on the ISS was important, he added, because it would "give us a set of eyes, hands and creative thinking capability to respond to things that arise."

Although there would be some limits, a two-person crew could also continue to do scientific research. The Boeing teams, including a strong effort by the safety community, looked at the risks associated with a smaller two-person crew and concluded that there were no significant safety concerns.

A two- person crew not only keeps research going but also maintains support for preventative and corrective maintenance, anomaly investigation and response, and other ISS System Operations needs that can best be done by an on-orbit crew.

Boeing and NASA engineers have studied the impact of a two-person crew on future science research. "The focus has been on new samples and consumables for the science and research apparatus already on board the ISS that require minimal space and weight," said Rick Golden, program manager of ISS payload integration.

"Our group (Boeing and its subcontractors, Teledyne Brown Engineering and United Space Alliance) ensures that interfaces between the science experiments and the space station are compatible," said Golden.

"A lot of our focus has been working the safety aspects to fly U.S. payload hardware on Soyuz and Progress launches," Golden explained. "We are positioning a select number of payloads at the Baikonur launch site in order to be able to take advantage of any space that becomes available on the upcoming Progress flights."

The Boeing ISS team reassessed the manifests for several planned shuttle launches. "We had to support system maintenance which may have required changing out filters, valves, bags and things along those lines or other items to support system repair," said Korin.

The team came up with a prioritized shopping list and looked at what they could take up without the space shuttle. The NASA/Boeing ISS team evaluated the amount of propellant, water, gas, and dry cargo that is needed to the support the ISS and its crew.

The ISS subsystem teams, including the logistics and maintenance team, played a critical role in defining the shopping list of needed items.

The Environmental Control and Life Support System group identified the selector valve and filter for the Carbon Dioxide Removal Assembly and the Internal Thermal Control System group identified the Pump Package Assembly as essential spares to be manifested on the upcoming Russian Soyuz and Progress flights.

The Soyuz is the ISS crew escape vehicle used in case of emergency and is certified for 200 days of life and is rotated every 180 to 190 days. They

are normally taken to ISS by a "taxi crew" who then bring the "old" one back.

The Progress vehicle is unmanned and carries crew supplies and hardware spares to help maintain the life of ISS. There are normally 3 Progress flights a year.

"The Russians have given us about 30 kg allocation for US items to be launched on Soyuz 6S, so we have been working very hard with NASA to make sure all these items are certified to be launched on a Russian vehicle, and the Russians properly stow them for launch," according to Ray V. Gonzales, Boeing launch package manager for Russian vehicles.

"We are also working to get these items to Moscow and then to Baikonur, Khazakstan where they will be launched."

First Canadian Satellite in Over 30 Years to Launch

AMSAT News Service Bulletin 124.07 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.07

SCISAT-1, the first new Canadian scientific satellite since 1971, is scheduled for launch by the National Aeronautics and Space Administration (NASA) in June 2003. On February 4, 1999 the Government of Canada announced the selection of the Atmospheric Chemistry Experiment (ACE) as the scientific mission of SCISAT-1.

The major scientific goal of the Atmospheric Chemistry Experiment (ACE) mission is to measure and understand the chemical processes that control the distribution of ozone in the Earth's atmosphere, especially at high altitudes. The data that will be recorded as SCISAT-1 orbits the Earth will help Canadian scientists and policy makers to assess existing environmental policy, and to develop protective measures for improving the health of our atmosphere and preventing further ozone depletion. The ACE mission is designed to last at least two years.

SCISAT-1 is the first Canadian scientific satellite since the ISIS II satellite was launched in 1971. Here are some quick facts about the new satellite:

Total mass: 150 kg
Total power usage: 70 W
Powered by: single solar panel
Total memory: 1.5 Gigabyte
Spacecraft contractor: Bristol Aerospace : Winnipeg, Manitoba
Scientific Payload: ACE-FTS (Bomem Ltd.)

MAESTRO (MSC, U of T, EMS)
Scheduled launch date: July 2003
Launch vehicle: Pegasus XL rocket
Orbit: 650 km above the Earth
Number of times SCISAT-1 will circle the Earth in 1 day: 15
Number of sunrises and sunsets SCISAT-1 will see in 1 day: 30

India's Space Agency to Build a Slew of Satellites

AMSAT News Service Bulletin 124.08 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.08

India is developing a slew of satellites for uses ranging from navigation to tele-medicine, the chief of the national space agency said.

The Indian Space Research Organisation chairman said the agency was experimenting with satellite navigation systems modelled on those used in Europe and the United States.

India is also developing a satellite network devoted exclusively to education called EDUSAT.

"Here we had a discussion with the human resource development ministry and now we are building a satellite" to help with teacher training at the primary and university levels in remote regions.

The agency is also seeking a foothold in tele-medicine, the chairman said.

"The idea is to bring the best of medical help from the city to rural areas. If everything goes well and there is a justification for a full-fledged satellite then we may go for a health satellite," he said.

Established in 1969, the ISRO launched its first satellite, Aryabhata, on April 19, 1975.

The first operational Indian remote sensing satellite was launched in 1988 while the communications satellite INSAT took off in 1982, the first of six such satellites sent into orbit.

Satellites devoted to astronomy and to study the physical characteristics of clouds are also on the drawing board.

Gyro fails, Hubble goes to Sleep

AMSAT News Service Bulletin 124.09 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.09

The Hubble Space Telescope has gone into an electronic deep sleep, a safe mode automatically initiated by the spacecraft because of the failure of one of the gyroscopes that is supposed to stabilize the satellite.

A problem, presumably with the gyroscope's motor, prompted the shutdown sometime Tuesday morning, said officials with NASA and the Space Telescope Science Institute, the research group that helps operate Hubble.

Engineers at Goddard Space Flight Center in Maryland were unable to restart the failed gyroscope.

Hubble has six gyroscopes, but at least three must work for it to maintain the position and stability necessary for its very precise observations. The failed Gyro No. 3, if completely broken, would be the second of the six to die.

Engineers expected to turn on one of the redundant, or backup, gyroscopes and get the telescope back to conducting science by late Wednesday night, said Ed Campion, a spokesman at NASA's Goddard center. If that works, only one backup gyro would remain.

"Hubble is a very conservative spacecraft," he said. "When it senses something is wrong, it goes into this safe mode. We expect it back online sometime tonight and we should know more by tomorrow morning."

On Tuesday, a program scientist touted accomplishments of the telescope at the 40th Space Congress going on here this week.

With the boosted capability of an advanced camera installed by spacewalking astronauts in 2002, the spacecraft is confirming the universe is expanding faster than scientists once believed. A few years ago, scientists theorized that after the Big Bang, the universe would keep expanding but at a slower rate. Slowly, an accumulation of evidence, including work done with Hubble, is suggesting the universe's expansion is speeding up.

Shuttles won't fly again this year, lawmakers say

AMSAT News Service Bulletin 124.10 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.10

NASA's remaining three shuttles won't return to flight this year as the agency had optimistically planned, members of Congress said Thursday.

That means NASA likely will have to rely again in February on a Russian Soyuz spacecraft to take another fresh crew to the International Space Station.

After meeting privately for an hour with retired Adm. Hal Gehman, chairman of the Columbia Accident Investigation Board, two senior House lawmakers emerged to predict NASA's shuttles would remain grounded for some time given the scope of work the independent panel is likely to recommend this summer.

Upcoming ARISS Contact Schedule

AMSAT News Service Bulletin 124.11 From AMSAT HQ
Silver Spring, MD. May 4, 2003
To All Radio Amateurs
BID: $ANS-124.11

Upcoming ARISS Contact Schedule as of 2003-04-30 04:00 UTC

The ARISS (a joint effort of AMSAT, the ARRL, NASA, the ARISS international partners including Canada, Russia, the European Partners, and Japan) operations
team wishes to announce the following very tentative schedule for ARISS school
contacts. This schedule is very fluid and may change at the last minute. Remember that amateur radio use on the ISS is considered secondary. Please check the various AMSAT and ARISS webpages for the latest announcements. Changes from the last announcement are noted with (***). Also, please check MSNBC.com for possible live retransmissions
(http://www.msnbc.com/m/lv/default.asp). Listen for the ISS on the downlink of
145.80 MHz.

For information about educational materials available from ISS partner space Agencies, please refer to links on the ARISS Frequently Asked Questions page.

If you are interested in supporting an ARISS contact, then you must fill in an application. The ARISS operations mentor team will not accept a direct request to support an ARISS contact.

You should also note that many schools think that they can request a specific date and time. It does not work that way. Once an application has been accepted, the ARISS mentors will work with the school to determine a mutually agreeable date.

Websites that may be of interest include:

http://www.arrl.org/sarex
http://www.arrl.org/ariss
http://www.amsat.org
http://ariss.gsfc.nasa.gov
http://spacelink.nasa.gov/index.html
http://ehb2.gsfc.nasa.gov/edcats/educator_guide/

Your completely filled out application should be returned to the
nearest coordinating ARISS region if your specific region is not
listed. E-mail is the preferred method of submitting an application.

Here are the email addresses:
ARISS-Canada and all other countries not covered: ve2ka@... (Daniel
Lamoureux VE2KA)
ARISS-Europe: jh.hahn@... (J. Hahn, DL3LUM / PA1MUC)
ARISS-Japan and all Region 3 countries: iaru-r3@... (Keigo Komuro
JA1KAB)
ARISS-Russia: n2ww@... (Valerie Agabekov N2WW/UA6HZ)
ARISS-USA: ARISS@... (The American Radio Relay League)

ISS Expedition 6 crew:
Kenneth Bowersox KD5JBP
Nikolai Budarin RV3FB
Donald Pettit KD5MDT

ISS Expedition 7 crew:
Ed Lu KC5WKJ
Yuri Malenchenko RK3DUP

Congrats to Ken, Nikolai, and Don for all of the ARISS contacts. ARISS
contacts
are off limits for the next several weeks due to the crew handover. (***)

Contact was not completed

The latest ARISS announcement and successful school list is now available on the
ARISS web site. Several ways to get there.

Latest ARISS announcements and news
http://www.amsat.org/amsat/ariss/news/arissnews.txt

Successful school list
http://www.amsat.org/amsat/ariss/news/Successful_ARISS_schools.rtf

or
http://ariss.gsfc.nasa.gov

If you can not get into the GSFC site, then go directly to the RAC site.
(***)

click on English (sorry I don't know French)
you are now at http://www.rac.ca/ariss/
click on News

Currently the ARISS operations team has a list of over 60 schools that we
hope will be able to have a contact during 2003. As the schedule becomes more
solidified, we will be letting everyone know. Current plans call for an average
of one scheduled school contact per week.

73,
Charlie Sufana AJ9N

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The Monthly meeting of May 2003 will be held on 11th May 2003 at 10:00 hours at B.S.Bengelle Girls High School.

The Agenda for the meeting is as follows:-
1. Allocation of Portfolios

2. Finalizing the activity list for 2003-2004.

3. Progress on Licences of our last batch. (Churchgate & Thane).

All members are requested to kindly attend and opt for some portfolio and help us in increasing Ham Radio Actvity. The list of the portfolio is listed below, you may choose to lead or to assist.

PORTFOLIOS for the year 2003 - 2004.

1. Awareness Drives

2. Ham Radio Classes.

3. Field Exercise. - Equipment Operating Skills Trainer

4. M.O.T.A

5. 15th August Special Night owls Net.

6. Ganesh Visarjan

7. J.O.T.A

8. Fox Hunt

9. Scramble Team.

10. Contest.

11. Liaisons work with WPC.

12. Liaison work with SB-1 Mumbai.

13. VHF Repeaters (Andheri & Matheran) - (Installations & Maintenance)

14. I.R.L.P (Installations & Maintenance)

15. Internet Connectivity via VHF Packet Radio (Installation & Maintenance)

16. Club Station (Installations & Maintenance)

17. Satellite Communications.

18. Import of ham Radio Equipments.

19. Library In Charge

20. WEB Master.

21. Hardware Installation Assistance Manager

22. Media (News Papers , Radio, TV etc..)

23. Sponsor Ships

24. News Letter (Soft & hard copy) - Monthly / Quarterly.

25. P.R.O for grievances and assistance for our members.

26. Dx - Expeditions.

27. Home Brewing

28. New Technologies / Up Gradations.

29. Sport Activity (Rallies) Manager

30. Early Birds Net / Night Owls Net Manager.

Please attend the monthly meeting with fail and help us plan our society's events.

1158. QST May'2003

Yahoo group: m_a_r_s
Date: 2003-05-06 09:56:19 UTC
From: VU2UGO
Topic: 1158 Message: 1158

Now in available in MARS Library!!

QST - MAY'2003 Contents :-
a.. From Ether to Ethernet
The merging of wired networks with radio has resulted in a more flexible, reliable and portable radio system. Make DX Contacts and enhance your emergency communications with a hand-held radio.
Internet Radio Linking Project - http://www.irlp.net
IRLP user guidelines : http://www.kwarc.org/irlp/
Streaming audio feed of IRLP : http://www.kwarc.org/listen/

b.. A Small, Portable Dipole for Field Use
The title says it all - a practical, transportable antenna for Field Day and a valuable addition to your emergency kit.

c.. The Black Widow - A Portable 15 meter Beam
Looking for a portable 15-meter antenna for camping or Field Day? Four fishing poles, 50 feet of wire, a few pieces of wood, some PVC and a painter's pole make a stinging portable performer. Detailed construction drawings for the antenna and the mast components are available at http://www.arrl.org/files/qst-binaries/black-widow.zip
Related links : http://www.cebik.com/moxpage.html
http://www.qsl.net/ac6la/moxgen.html
http://www.eznec.com

d.. VHF/UHF Discone Antenna
A practical antenna for 144, 222 and 440 Mhz and everything in between! A Design for lower-end frequency of 144MHz will operate at all frequencies up to and well past 450MHz while maintaining a 2:1 SWR.

e.. Expand Your Mind - On-line!
The "classrooms" of the ARRL Certification and Continuing Education Program are as near as your Keyboard. ARRL has created an entire on-line courses written by experts in their fields. Despite the on-line aspect, you aren't alone during your studies. Each course includes "mentors" who are available to personally answer your questions. Visit CCE Website at http://www.arrl.org/cce

f.. A Radio Amateur's Guide to London and the UK
What to do, what to see - and how to open UK repeaterrs with your funny accent.

g.. A Modern GDO - The "Gate" Dip Oscillator
Building an RF circuit? Use an updated version of an indispensable and legendary piece of equipment to test it - the "dipper".

h.. Public Service
- Central Kentucky Amateurs Respond to Ice Storm
- Missing in Village Creek

i.. Product Review -
a.. Yaesu FT-897 MF/HF/VHF/UHF All-mode Transceiver ($954)
b.. SteppIR 3-element Yagi Antenna ($1099)

j.. New Products -
a.. Emergency Family Preparedness Video (VHS - $19.95)
b.. QSL Index dividers from Radio Warehouse ($19.95 + shipping)

k.. Software -
a.. You've Got...Spam!
E-mail is commonplace in the Amateur Radio Community. Unfortunately, so is spam. Read more to find out Who is sending all this stuff? How did they get your e-mail ID? How can you avoid spam? etc....

Top anti-spam packages (as per PC Magazine Feb 25,2003)

l.. New Advertisements
a.. The North Georgia QRP Club Compendium Volume-1 ($12+shipping; CD-ROM $6+shipping)
b.. Hello World : A Life in Ham Radio ($17.47)
c.. W3FF Antennas

m.. Regular Features -
a.. Hands-on Radio (Experiment #4 - Active Filters),
b.. Hints & Kinks (Ground Rod Installation - inexpensive and easy, tower guard...),
c.. Happenings(Amateur Radio Spectrum Protection Act Now in Both House And Senate),
d.. The World above 50MHz (EME in the Digital Age),
e.. How's DX? (International Foundation QSL Collection),
f.. Microwavelengths (Give me power)
g.. QRP Power (The RockMite)
h.. Old Radio (The National NC-183D),
i.. Correspondence, Workbench, Technical Correspondence, Feedback, Hamfest Calendar, Strays, 75-50 & 25 Years Ago, Contest Corral, Hamfest Calendar, Coming Conventions, Special Events, Ham Ads

1163. IC 208.....I found an English page!!!

Yahoo group: m_a_r_s
Date: 2003-05-07 11:53:13 UTC
From: vijay motwane
Topic: 1163 Message: 1163

VHF/UHF FM TRANSCEIVER IC-208H High Power Dual Bander with Wideband Receiver

Powerful 55W/50W output power
Individual MOS-FET power amplifier modules supply the power for Icom's most powerful dual band mobile with 55W/50W (VHF/UHF). Stable power for long distance communications plus reduced power settings (15/5W) for local communications.

Wideband receiver
See why Icom has a world renowned reputation for superb wideband receivers with the IC-208H. The IC-208H wideband receiver covers 118-173, 230-549 and 810-999MHz* as standard. Listen to your Amateur VHF/UHF bands, as well as aviation, marine, weather and other utility communications in a compact mobile package. Extends your mobile radio enjoyment!
* Excluding Cellular range.

Detachable front panel
Limited installation space is no problem with the IC-208H. The separation cable, OPC-600/R, is supplied with the radio allowing the compact remote control head* to be installed almost anywhere.
* 111 (W) ? 40(H) ? 26.3 (D) mm; 43/8 ? 19/16 ? 11/32 in.

500 alphanumeric memory channels
With this much memory, you can fill your IC-208H with your favorite frequencies and operation settings such as output power, tone, and more! Then name each memory channel with up to 6 characters for quick channel identification.

Improved Dynamic Memory Scan (DMS) system
The improved DMS system allows you to scan all the selected banks you want to scan by simply adding/deleting bank links with Icom's exclusive Bank Link system. Yet another convenient feature to make the IC-208H a more practical radio.

User friendly design
The large multi-function tuning knob provides intuitive channel tuning or band hopping. The multicolor display lighting and backlit buttons adds a new 'fun' dimension to operating the IC-208H.

HM-133, remote control microphone
The supplied HM-133 remote control microphone allows you to control almost every function of the IC-208H from the mic.

And more...

- Built-in CTCSS and DTCS tone squelch
- Pocket beep and tone scan
- Selectable squelch delay
- FM narrow capability
- RF attenuator linked to the squelch control

- 16 DTMF memory channels (24 digits per channel)
- 9600bps data connector (mini DIN 6-pin)
- Auto repeater function*
- Weather channel with weather alert*
(* U.S.A. version only)

Sensitivity (at 12dB SINAD)

: Less than 0.18?V (144/430MHz band only)

Squelch sensitivity

: Less than 0.13?V (at threshold;144/430MHz band only)

Selectivity (Wide/Narrow)

: More than 12/6kHz at -6dB
Less than 30/20kHz at -60dB

Spurious rejection ratio

: More than 60dB

Audio output (at 13.8V DC)

: More than 2.0W at 10% distortion with an 8 load

Ext. speaker connector

: 2-conductor 3.5 (d) mm (1/8")/8

Supplied accessories:
- Hand microphone, HM-133
- 3.5m (11.5ft) separation cable, OPC-600/R
- DC power cable, OPC-1132
- Mounting bracket
- Spare fuse
All stated specifications are subject to change without notice or obligation.

OPTIONS
SEPARATION ACCESSORIES

- OPC-600/R, OPC-601/R SEPARATION CABLES
For operation with the front panel detached. OPC-600/R: 3.5m (11.5ft); OPC-601/R: 7.0m (23.0ft)

- MB-58 REMOTE CONTROL HEAD BRACKET
Mounts the remote control head in a convenient location for operation with the front panel detached.

- MB-65 MOUNT BASE
Mounts the remote control head with the MB-58. Adjustable angle and direction for optimum positioning.

- OPC-1132, OPC-347 DC POWER CABLES
OPC-1132: 3.0m (9.8ft); OPC-347: 7.0m (23ft)

MICROPHONE ACCESSORIES

- HM-118N HAND MICROPHONE
Regular hand microphone.

- HM-118TN/TAN DTMF MICROPHONE
DTMF microphone.

- HM-133 REMOTE CONTROL MICROPHONE
Full remote control microphone with keypad backlighting.

- OPC-440, OPC-647 MIC EXTENSION CABLES
OPC-440: 5.0m (16.4ft); OPC-647: 2.5m (8.2ft)

- OPC-589 MIC ADAPTER CABLE
Allows you to connect an 8-pin microphone.

OTHER ACCESSORIES

- CS-208 CLONING SOFTWARE + OPC-478/OPC-478U CLONING CABLE
For quick and easy programming of memories, etc. OPC-478: RS-232C cable; OPC-478U: USB cable

- OPC-474 CLONING CABLE
Transceiver to transceiver cloning cable.

- MB-17A MOBILE MOUNTING BRACKET

- SP-10 EXTERNAL SPEAKER

- OPC-441 SPEAKER EXTENSION CABLE
5.0m (16.4ft)

What is SARS? Find out! Be informed. (http://g.msn.com/8HMIENIN/2737??PS=)

1164. Speed PSK-31 transmit time with lower case letters

Yahoo group: m_a_r_s
Date: 2003-05-07 11:41:40 UTC
From: VU2UGO
Topic: 1164 Message: 1164

PSK-31 and its phase-shifted brethren are becoming very popular for ragchewing in the digital subbands. Yet because of its duty cycle is 100%, my trusty old ICOM 751's fan will roar to life to cool torrid transistor finals during particularly long and enjoyable PSK conversations.

While thinking about how PSK-31's Varicode (character set) is set up, I realized that the time-honored RTTY practice of sending upper-case letters is not the most efficient way to transmit. In the traditional Baudot code, all characters are five bits long. As the name implies, the PSK varicode, invented by Peter Martinez, G3PLX, has characters that vary in length from two bits ("e") to 10 bits ("Z"). A glance at the Varicode character table shows that lowercase letters clearly use fewer bits than uppercase letters.

A little math showed me how much shorter. Lowercase letters average 5.96 bits in length, while uppercase letters average 8.23 bits. It sounded good, so I decided to make a "practical test". I disconnected the soundcard interface and just sent the phrase "The tired old ham lumbered over the lazy dog to get another 807" through the PC speakers. It took 21 seconds to send the phrase in uppercase; it took 16 seconds to send it in lowercase.

After that, I released the Caps Lock key on the computer. Sending all lowercase letters might look a little odd, but it's more efficient, and I can tell you that the final of my transceiver is 24% happier!

1166. Handies for Sale.

Yahoo group: m_a_r_s
Date: 2003-05-07 14:50:23 UTC
From: vijay motwane
Topic: 1166 Message: 1166

Dear Friends,

I have received two Kenwood TH 78A dual band handies two days back, for sale.

Though both are in excellent physical condition and very sparingly used, one handie has a problem with it's memory: it does not accept any frequency in memory mode. It works 100% ok in VFO mode and scans alright. Both handies have Rx from 118 Mhz to 1000 Mhz.

The seller expects 5 K for the one with memory problem and 12 K for the perfect one. This one has come with a 5W battery.

Interested hams may contact me on my cell: 98211 29268.

73,

Vijay VU2VVP

Dreaming of a holiday? Make it happen. In Switzerland!

Hey Sandip,
Terrific info,only try telling the russians!!!! Please can somebody
tell me the full forms of the short forms like M.O.T.A, I.R.L.P
(portfolio-MARS)? Just curios.
Sarla

Hey Sandip,
Terrific info,only try telling the russians!!!! Please can somebody tell me the full forms of the short forms like M.O.T.A, I.R.L.P (portfolio-MARS)? Just curios.

Subject: [m_a_r_s] Speed PSK-31 transmit time with lower case letters

PSK-31 and its phase-shifted brethren are becoming very popular for
ragchewing in the digital subbands. Yet because of its duty cycle is 100%,
my trusty old ICOM 751's fan will roar to life to cool torrid transistor
finals during particularly long and enjoyable PSK conversations.

While thinking about how PSK-31's Varicode (character set) is set up, I
realized that the time-honored RTTY practice of sending upper-case

letters

is not the most efficient way to transmit. In the traditional Baudot code,
all characters are five bits long. As the name implies, the PSK varicode,
invented by Peter Martinez, G3PLX, has characters that vary in length from
two bits ("e") to 10 bits ("Z"). A glance at the Varicode character table
shows that lowercase letters clearly use fewer bits than uppercase

letters.

A little math showed me how much shorter. Lowercase letters average 5.96 bits in length, while uppercase letters average 8.23 bits. It sounded

good,

so I decided to make a "practical test". I disconnected the soundcard interface and just sent the phrase "The tired old ham lumbered over the

lazy

dog to get another 807" through the PC speakers. It took 21 seconds to

send

the phrase in uppercase; it took 16 seconds to send it in lowercase.

After that, I released the Caps Lock key on the computer. Sending all lowercase letters might look a little odd, but it's more efficient, and I can tell you that the final of my transceiver is 24% happier!

Hi Sarla,

IRLP stands for Internet Repeater Linking Project. The official site for IRLP is www.irlp.net. This site is very informative about the topic and also gives information on the various nodes operating across the globe. VU2GMN from Madras is one of the node from India.

There are other related projects like Echolink (www.echolink.org), Ilink and Wires (http://www.vxstd.com/en/wiresinfo-en/faq.html).

73s,

Mehul.

1176. Voice Workshop

Yahoo group: m_a_r_s
Date: 2003-05-08 12:52:47 UTC
From: VU2UGO
Topic: 1176 Message: 1176

The association of Voice Artisters(AVA) will conduct a two-day workshop, Art of Voicing (workshop on voice culture) on May 10 and 11 at SNDT Women's University.

Eminent personalities in the field will deliver lectures and holding practical sessions.

For details, write to D-I, Plot No.48, Aareshwar Society, MHADA, Andheri(W) or call 56976732, Pawan Kalra on 9821015133 or Swati 9820075972. Entry will be on first come first serve basis.

- Mid-day, 8th May 2003, Page 8
--*-*-*-*-*-*-*-*-*
BTW i spoke to Narendra on 56976732, he gave the following info:-
- Fees for the workshop for General people - Rs.750/- and Students - Rs.500/- (including lunch, tea & snacks for 2 days)
- Timings : 10 am to 5 pm
- Covering basic modules of voice culture, lectures and practical sessions
- Limited seats left (9 seats, at the time of posting this e-mail)
- today is the last day to register in person / by email at awaaz@...
or tomorrow before 11am

==>AMATEURS SUPPORT TORNADO RELIEF-RECOVERY EFFORTS

Amateurs in Missouri, Kansas, and Tennessee this week continued relief and
recovery support in the wake of a severe outbreak of deadly tornadoes May
4 that also affected other states. Oklahoma City-area amateurs responded
to assist after a tornado hit that region May 8. At week's end, the death
toll from the May 4 storms stood at 40; many more were injured, and
countless homes and other structures were damaged or destroyed. Thousands
of residents in the stricken areas were left without power or telephone
service. Those left homeless by the storms have been taking refuge in Red
Cross shelters or with friends or relatives. Amateur Radio operators have
been assisting in damage assessment as well as providing communication
support for the Red Cross and The Salvation Army's shelter and feeding
efforts.

In Kansas, ARRL Section Manager Ron Cowan, KB0DTI, reports severe damage
in two counties, with houses destroyed and utilities out in the path of
the twister. The tornado remained on the ground for 90 minutes, plowing
through Leavenworth and Wyandotte counties in Kansas before crossing the
border into Platte and Clay counties in Missouri. The funnel cloud finally
```

lifted northeast of Kansas City.

"Wyandotte/Kansas City RACES was active with spotting and later damage assessment," Cowan said. RACES went on standby on May 5. Johnson County Amateur Radio Emergency Service (ARES) opened a VHF net, coordinated by EC and Salvation Army Team Emergency Radio Network (SATERN) Coordinator June Jeffers, KB0WEQ, within 30 minutes of touchdown. SATERN members and other ham radio volunteers assisted Salvation Army canteens that rolled in immediately after the storm.

Cowan said Crawford County in southeastern Kansas also suffered major damage. Most affected was the area north of Pittsburg and the communities of Girard and Franklin, which were right in the storm's path.

In Missouri, ARRL Section Emergency Coordinator Don Moore, KM0R, said tornado damage was reported throughout the greater Kansas City area. Moore has been posting updates on the Missouri Section ARES Web site <http://www.ares-mo.org/may0403storms.asp>. He said multiple nets--including ARES, Radio Amateur Civil Emergency Service and SKYWARN--relayed storm information to emergency officials on May 4 and later assisted with damage assessment. The National Weather Service credited ham radio operators with dozens of storm-related reports over the weekend.

Hams in Pierce City--in the direct path of one tornado and especially hard hit--were using a repeater in nearby Aurora to supplement public safety communication. Hams in Southwest Missouri also handled health-and-welfare inquiries via the Missouri Traffic Net (3963 kHz).

In West Tennessee, May 4 marked the second time in four years that the Jackson-Madison County area was devastated by tornadoes. "Lives were lost and people injured," said Madison County EC Kenny Johns, AB4EG.

Some 27,000 residents remain without power, Johns reported, adding that the tornado made a direct hit on the emergency operations center. The storm also did not spare the sheriff's department, the post office or the federal building in Jackson.

"First day was shock, second day was just deciding what to do first, third day recovery was well under way, fourth day there was more hope, help and a great county spirit," Johns said.

Johns said an ARES net was in operation in West Tennessee. "Right now we are able to handle it," he said at week's end. "Hams from surrounding counties are helping. Their efforts have been appreciated." Even as the massive cleanup effort began, forecasters were calling for additional severe weather in the days ahead. Flooding from continued heavy rains was an additional complication.

In Oklahoma, ARRL Section Manager John Thomason, WB5SYT, reports that amateurs responded "within minutes" of a tornado that struck the Oklahoma City area May 8. They remained in place at week's end. More than 100

people reportedly were injured, and the tornado leveled or damaged hundreds of structures, including a General Motors manufacturing plant. Hardest hit was the suburb of Moore. The storm left more than 30,000 homes without power.

"Emergency communication, delivering supplies to Salvation Army canteens and helping with health and welfare are in process," Thomason said. "This tornado hit some of the same areas as did the F5 tornado of May 1999." The 1999 storm claimed nearly 50 lives.

To keep an open frequency for amateurs to support The Salvation Army's relief efforts, the FCC has declared a general communications emergency for the Oklahoma area. Effective immediately, amateurs are required to refrain from using 3900 kHz, plus or minus 3 kHz, unless they are taking part in the handling of emergency traffic. The order remains in effect until rescinded.

"The Amateur Radio effort will be under way for some time," Thomason said. In a message to his Section, Thomason advised patience with the public, the process and other Amateur Radio volunteers. "By pulling together during these times the public, which desperately needs our help, benefits," he said.

==>NTIA ADMINISTRATOR LAUDS, CAUTIONS FCC IN "BROADBAND OVER POWER LINE" INQUIRY

The administrator of the National Telecommunications and Information Administration (NTIA) <http://www.ntia.doc.gov/>, Nancy J. Victory, has applauded the FCC's decision to launch its inquiry into Broadband over Power Line (BPL)--a form of power line communications (PLC). In an April 24 letter to FCC Chairman Michael Powell, the other four commissioners and to FCC Office of Engineering and Technology Chief Edmond J. Thomas, Victory said BPL "holds great promise" and urged the Commission to "move forward expeditiously with its inquiry." At the same time, she called on the FCC to make sure that BPL does not cause harmful interference to other services.

"I also urge the Commission to promptly adopt any subsequent rule changes that may be appropriate to facilitate broadband PLC deployment, while ensuring that those rules prevent harmful radio frequency (RF) interference to other communications mediums." Victory wrote.

BPL has raised the specter of substantial interference to the HF bands since it involves coupling high-frequency RF to parts of the power grid and using existing power lines as the transmission medium to deliver broadband and Internet services. The new so-called "access BPL" and "in-home BPL" devices operate on multiple carriers spread over a wide spectrum, which could be as much as from 2 MHz up to 80 MHz.

Victory offered NTIA's services in assisting the FCC with measuring and testing broadband PLC emissions. An arm of the US Department of Commerce, the NTIA regulates radio spectrum allocated to the federal government.

The FCC released a Notice of Inquiry on BPL deployment, ET Docket 03-104, on April 28. The complete NOI is available on the FCC Web site <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-100A1.doc>.

Interested parties may submit electronically filed comments via the FCC's Electronic Comment Filing System (ECFS) <http://www.fcc.gov/cgb/ecfs/>. Under ECFS Main Links, click on "Submit a Filing." In the "Proceeding" field, enter "03-104" and complete the required field. Comments may be typed into a form or you may attach a file containing your comments. Comments also may be submitted via e-mail, per instructions on the ECFS page. The comment deadline will be 45 days after publication of the NOI in the Federal Register.

ARRL Laboratory Manager Ed Hare, W1RFI, has urged League members to become informed and to comment in the proceeding. "The time to raise and answer interference questions is now," he said. The ARRL Lab has prepared a comprehensive information page, "Power Line Communications (PLC) and Amateur Radio," <http://www.arrl.org/tis/info/HTML/plc/>. ARRL Lab staff also will visit sites where BPL is undergoing field testing.

==>TENSE MOMENTS MARK SAFE RETURN OF ALL-HAM EXPEDITION 6 CREW

The International Space Station's all-ham Expedition 6 crew of Commander Ken Bowersox, KD5JBP; Flight Engineer Nikolai Budarin, RV3FB, and NASA ISS Science Officer Don Pettit, KD5MDT, is back on Earth. After spending more than five months aboard the ISS, Bowersox and Pettit became the first NASA astronauts to travel home from the ISS on a Russian Soyuz TMA-1 vehicle and the first to land in a foreign country. But their return trip was not without incident.

After undocking from the ISS May 3 at 2243 UTC, Bowersox, Pettit and Budarin touched down May 4 at 0207 UTC in Kazakhstan--some 285 miles shy of their intended target. The unexpected turn of events led to some tense moments in the Russian mission control center, where space officials of both countries were carefully--and anxiously--monitoring the crew's return.

The Soyuz was pulled onto its side in the hard landing, and its antennas were damaged in the impact. Search aircraft eventually picked up the Soyuz' emergency beacon and were able to locate the spacecraft and its crew some 2-1/2 hours after touchdown. It was another two hours before recovery helicopters arrived to pick up the crew from the remote Kazakh steppes. All three were in good health, but NASA sent in two flight surgeons and medical supplies to the Central Asia landing site just in case.

At week's end, it remained unclear why the advanced-model Soyuz TMA--the first of its generation to land on Earth--undershot its intended landing zone. News accounts indicate the vehicle inexplicably took a steeper and faster "ballistic" re-entry trajectory instead of a more-controlled landing approach. Russian space officials have promised an investigation. The Soyuz will handle all crew transport to and from the ISS while the US shuttle fleet remains grounded following the Columbia disaster February 1.

The grounding of the shuttle fleet forced Bowersox, Pettit and Budarin to spend another two months in space while US and Russian space officials worked out crew-exchange arrangements.

After a stop at Baikonur Cosmodrome, the crew headed for Star City, Russia, and the Gagarin Cosmonaut Training Center. There, they were reunited with their families and began physical rehabilitation after months of living in a weightless environment. They'll also undergo a debriefing. Bowersox and Pettit are slated to return to Houston in mid-May.

Expedition 7 Commander Yuri Malenchenko, RK3DUP, and NASA ISS Science Officer Ed Lu, KC5WKJ, arrived on the ISS April 28 aboard a Soyuz TMA-2 spacecraft for a six-month duty tour. They'll return to Earth in early November. Amateur Radio on the International Space Station (ARISS) <http://ariss.gsfc.nasa.gov> school group contacts will remain on hold for the next few weeks as the new crew settles in.

==>WASHINGTON HAM WINS INAUGURAL GOLDFARB MEMORIAL SCHOLARSHIP

Ben Schupack, NW7DX, of Sammamish, Washington, is the first-ever winner of the William R. Goldfarb Memorial Scholarship <http://www.arrl.org/news/stories/2003/01/27/102/index.html>. The award, administered through the ARRL Foundation, provides a full, four-year undergraduate scholarship to a meritorious young Amateur Radio operator. The new award is the result of a generous endowment from the late William Goldfarb, N2ITP.

"Amateur Radio has played an incredible role in my life and as a ham," Schupack wrote in his award application. "Amateur Radio has opened many doors for me. I have become interested in electronics, foreign languages, antennas, propagation and more."

In addition to the Goldfarb Scholarship, the Foundation awarded scholarships worth more than $31,000 to college-bound Amateur Radio operators <http://www.arrl.org/news/stories/2003/05/07/2/winners.html>.

A senior at Eastlake High School with a 3.96 grade point average, Schupack, 18, plans to attend Whitman College <http://www.whitman.edu/> in the fall to major in chemistry on his way to a dentistry career. The Goldfarb Memorial Scholarship covers all typical college expenses, including tuition, room and board and textbooks for the recipient's four-year undergraduate education.

A distinguished prep trombone player, Schupack has been a member of the US National Honor Band and the All-Northwest Honor Band. He's also a member of the National Honor Society and EHS's varsity cross-country and track teams.

An Amateur Extra licensee and an ARRL member, his ham radio accomplishments are impressive. The 40-WPM Morse operator placed first in the world for the 2001 World Wide WPX Contest in the Rookie, Low-Power,

Single Operator category; he was also first in that category in 1999 for Canada, operating as NW7DX/VE7. He's also a member of the ARRL A-1 Operator Club and enjoys kit building and homebrewing. Primarily a CW operator, Schupack said he also enjoys SSB and is exploring the newer digital modes.

Before his death in 1997, Goldfarb set up a scholarship endowment of close to $1 million in memory of his parents, Albert and Dorothy Goldfarb, who died when he was a teenager. More information on the Goldfarb Memorial Scholarship and on the ARRL Foundation is available on the Foundation's Web site <http://www.arrl.org/arrlf>.

==>FCC AFFIRMS HEFTY FINE FOR AMATEUR IN INTERFERENCE CASE

The FCC has affirmed a $12,000 fine against Technician-class Amateur Radio operator Scott E. Kamm, N0UGN. The FCC released a Forfeiture Order May 7 alleging willful and repeated interference, broadcasting of music and failing to identify with his call sign. The FCC's Kansas City office had released a Notice of Apparent Liability for Forfeiture (NAL) on January 24, but Kamm never filed a response, the FCC said. The Commission ordered Kamm to pay the fine within 30 days.

Kamm's station was in Waterbury, Nebraska, at the time he was cited last fall, although the FCC granted his February 27, 2002, application to change his mailing address to a location in Sioux City, Iowa.

Responding to complaints of continuing interference on the input of a 2-meter repeater, FCC agents monitored the machine's input frequency last December 9. They observed a very strong signal on 146.31 MHz "consisting of music, sound effects and unmodulated carriers" and no station ID. The FCC said the transmissions were interfering with amateur communications already in progress.

The FCC twice tracked similar signals to Kamm's residence in Waterbury, Nebraska, inspected his station and found a transceiver capable of operating on 146.31 MHz, the FCC said. Kamm claimed no transmissions were made from his station.

During 2002, Kamm was the target of several letters and an FCC Warning Notice from Special Counsel Riley Hollingsworth. Last fall, the FCC's Wireless Telecommunications Bureau set aside Kamm's amateur license renewal based upon complaints about the operation of his station and questions regarding his qualifications to be a licensee. Kamm's amateur license expired last September 29, and his license renewal application, filed August 8, has reverted to pending status.

==>TENNESSEE, INDIANA AMATEUR ANTENNA BILLS SIGNED INTO LAW

Amateur Radio antenna bills in Tennessee and Indiana have been signed into law by the governors of those states. Their successful passage brings to 19 the number of states that have adopted amateur antenna laws based on the limited federal preemption known as PRB-1. Original versions of both

bills had contained minimum regulatory antenna structure heights, below which localities could not regulate. Both left their respective legislatures without those provisions.

Tennessee Gov Phil Bredesen signed his state's bill--a compromise between the House and Senate versions of the legislation--on April 29. The measure became law immediately upon his signature.

ARRL Tennessee State Government Liaison Ingrid Klose, KD4F, credited "a concerted effort by Tennessee hams" for the bills' passage. She also said it was significant that Bredesen signed the bill instead of just letting it become law without his signature. "We believe that speaks for the understanding the governor has, not only of the role of Amateur Radio relative to the communications needs of Tennessee, but also of our needs in order to be able to provide good communication service when needed," she said.

At the request of Tennessee ARRL Section leadership, lawmakers eliminated language from the original Senate bill that would have incorporated a schedule of minimum regulatory height limits. Tennessee Section Manager Terry Cox, KB4KA, said proponents realized that chances of retaining the original wording were slim, given the opposition to last year's proposal, which had included a similar schedule of minimum antenna structure heights.

Indiana's bill got Gov Frank O'Bannon's signature on April 30. It becomes effective July 1 The bill that cleared the General Assembly did not contain language incorporating a 75-foot minimum regulatory antenna structure height, written into the Senate version of the bill but not included in the version passed by the House. A House-Senate conference committee cut out the 75-foot minimum, and the Senate passed the stripped-down measure on a 39-9 roll-call vote.

The bills approved in both states prohibit localities from enacting or enforcing ordinances, resolutions or orders that do not comply with the PRB-1 limited federal preemption--distilled within the Part 97 Amateur Service rules in §97.15, "Station antenna structures." Both measures also require ordinances involving the placement, screening or height of Amateur Radio antennas based on health, safety or aesthetics to "reasonably accommodate" Amateur Radio communications and represent the minimal practicable regulation to accomplish a municipality's or county's legitimate purpose.

The Indiana law also permits municipalities or counties to act to protect or preserve historical or architectural districts established under local, state or federal law.

Amateur Radio antenna laws in only a handful of states--Oregon, Virginia, Alaska and Wyoming--include minimum regulatory height limits. Amateur Radio antenna bills are pending in several other states, including New York, New Jersey and California.

==>RSGB DELEGATION REPORTS ON FOUNDATION LICENSE SUCCESS IN UK

Great Britain's new Foundation license <http://www.arrl.org/news/stories/2002/01/10/1/> has reversed the slide in licensee numbers and reinvigorated Amateur Radio in the UK. That was the assessment of Radio Society of Great Britain (RSGB) <http://www.rsgb.org> President Bob Whelan, G3PJT, who headed an RSGB contingent that visited ARRL Headquarters April 29-30.

"We had some pretty alarming statistics," Whelan told his audience of ARRL staff members. He said the RSGB realized that if nothing changed, the number of Amateur Radio exams given would drop to zero in five years, "and time was marching on." That trend, coupled with a rising median age in the Amateur Radio population in the UK and RSGB members' desire for a "practical, progressive" approach to licensing prompted the RSGB to rethink the licensing structure, Whelan said.

As a result, the RSGB conceived of and convinced the Radiocommunications Agency to approve the Foundation license as a "radically different" entry-level approach to Amateur Radio and the first step in a three-tiered licensing structure. Among other new requirements, Foundation applications must demonstrate the ability to make an on-the-air contact. Because the RSGB considered HF access "essential" to newcomers, it devised a Morse assessment--rather than a proficiency examination--to qualify applicants.

Since the Foundation license became available January 1, 2002, Great Britain has seen the number of amateurs rise by 4000--approximately a quarter of them under age 21. "It was slightly unexpected," Whelan conceded. The RSGB had planned on an initial rush of 1000 candidates, but three months into the new program, the organization found itself inundated with 3000 applications. There are 50,000 amateur licensees in the UK. Foundation licensees sport M3-prefix call signs and have privileges on all bands from 136 kHz to 440 MHz--except 10 meters--with a 10 W power limit.

Foundation license classes often are offered through weekend sessions sponsored by local radio clubs. In addition to the Morse assessment, which has no specific code speed requirement, applicants must pass a 20-question (soon to be 25-question) written examination.

More information on the Foundation License is available on the RSGB Web site <http://www.rsgb.org> (click on "Foundation Licence Courses").

The RSGB delegation also included General Manager Peter Kirby, G0TWW, and Commercial Manager Mark Allgar, M1MPA. While at ARRL Headquarters, the RSGB team also discussed with ARRL staff members preparations for World Radiocommunication Conference 2003, International Amateur Radio Union concerns, power line communications, sales and marketing issues and other topics of mutual interest.

==>SOLAR UPDATE

Propagation prophet Tad "Sun King" Cook, K7RA, Seattle, Washington, reports: Active geomagnetic conditions continue. Average planetary A index

this week was 20.7, and 23.7 the week before.

Solar flux and sunspot numbers were down this week. Average sunspot numbers were down nearly 40 points from the previous week, and average solar flux was down more than 10 points. Predicted solar flux for Friday, May 9, to Monday, May 12, is 95, 95, 100 and 100.

The latest forecast shows planetary A index not going below 20 until May 16. The earth is currently inside a solar wind stream. An interplanetary shock wave, probably from a coronal mass, hit Earth May 9 at 0500 UTC and should keep conditions active.

Sunspot numbers for May 1 through 7 were 171, 175, 134, 172, 144, 117 and 109, with a mean of 146. The 10.7-cm flux was 148.7, 156.5, 147.7, 142, 128.8, 122 and 110.2 with a mean of 136.6. Estimated planetary A indices were 40, 17, 10, 7, 12, 23 and 36, with a mean of 20.7.

An expanded Solar Update appears each Friday on the ARRL Web site <http://www.arrl.org/>.

==>IN BRIEF:

* This weekend on the radio: The Armed Forces Day Crossband Communications Tests <http://www.arrl.org/news/stories/2003/04/28/100/>, the Nevada and Oregon QSO parties, the VOLTA Worldwide RTTY Contest, the FISTS Spring Sprint (May 10), the CQ-M International DX Contest and the 50-MHz Spring Sprint are the weekend of May 10-11. JUST AHEAD: The US Counties QSO Party (SSB), the Anatolian RTTY Worldwide Contest, His Majesty the King of Spain Contest (CW) and the Baltic Contest are the weekend of May 17-18. The CQ Worldwide WPX Contest (CW) is the weekend of May 24-25. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration is closed for the Level I ARRL Amateur Radio Emergency Communications on-line course (EC-001) that begins May 20, sponsored by the Corporation for National and Community Service. Registration opens Monday, May 12, 12:01 AM EDT (0401 UTC), for the Level II Emergency Communications on-line course (EC-002). Registration remains open through May 18 or until all available seats have been filled--whichever comes first. Class begins Tuesday, May 27. Thanks to a grant from United Technologies Corporation, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the Level II course. During this registration period, approximately 50 seats are being offered to ARRL members on a first-come, first-served basis. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to receive advance word of registration opportunities via e-mail. To take advantage, send an e-mail to prereg@.... On the subject line, include the course name or number (eg, EC-00#). In the message body, include your name, call sign, e-mail address, and the month

you want to start the course. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce/> and the C-CE Links found there. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@...; 860-594-0340.

* ARRL Certification and Continuing Education course registration: Registration for the ARRL Antenna Modeling (EC-004) course <http://www.arrl.org/cce/courses.html> opens Monday, May 12, 12:01 AM EDT (0401 UTC). Registration remains open through Sunday, May 18. Class begins Tuesday afternoon, May 20. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* Correction: An article "Amateur Radio Spectrum Protection Act To Get Public Airing" in The ARRL Letter, Vol 22, No 18 (May 2, 2003), incorrectly identified the political affiliation of Rep Jerry Moran of Kansas. Rep Moran is a Republican.

* Turkish hams help following earthquake: Within hours after a deadly earthquake hit in the vicinity of the city of Bingol in southeastern Turkey on May 1, a contingent of Amateur Radio operators arrived on the scene. Amateurs, who traveled from Erzurum with a Civil Defense team, were able to reach the repeater in Erzurum--some 3210 meters above sea level--from some parts of the stricken city. From Erzurum, a Turkey Radio Amateur Club (TRAC) station relayed traffic via HF, said TRAC President Aziz Sasa, TA1E. Sasa says a three-person team from TRAC's Malatya Branch arrived at the disaster scene about 10 hours later and got an HF station on the air at the Incident Command Center. In addition, he said, two members from TRAC's Ankara Branch were deployed via a military aircraft with Civil Defense personnel. The Amateur Radio operation wrapped up May 4 along with rescue activities. "During the four-day operation a nationwide HF network was active," Sasa said. "As there is the fear of some further strong seismic activities in that particular region, we will try to arrange a VHF-UHF local area voice network there as quickly as possible." He said ham radio operators and equipment are scarce in the extremely mountainous area, but the elevation eases the installation of a VHF-UHF network.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRL Web site <http://www.arrl.org/> offers access to news, informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a

weekly "ham radio newscast" compiled from The ARRL Letter.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

1184. Some stuff about Google

Yahoo group: m_a_r_s
Date: 2003-05-13 14:09:25 UTC
From: Nirav Sanghavi
Topic: 1184 Message: 1184

Here is an article with links that a friend of mine had sent. Hope you use it well to hunt up some good deals on the web for high quality HF sets. If you find any, you owe me one - an HF set that is!

Dont miss seeing the links mentioned in the article.

regards,

VU2NHR - Nirav

I think many of us are using Google for web searches, and I was not aware of all the "hidden"
features Google supports for searching. The following is an excerpt from a review in the IHT of a book called "Google Hacks":

Tips and tricks for Google geeks
Users fine-tune a search engine
By Lee Dembart (International Herald Tribune)
Monday, April 21, 2003

PARIS: You no doubt use Google to search the Web. Everybody does. But you probably don't know all of the things that Google can do, and you may not know that you can create your own programs to improve Google's already impressive searching power.

Did you know, for example, that you can use Google as a U.S. telephone directory?

To start, all you need to know is the person's last name and state. Type "phonebook:" followed by the last name and two-letter state abbreviation in the Google search field. (The search returns a maximum of about 600 hits, so to find names that are fairly common, you'll have to help it out by providing a city or a first name.)

If you type rphonebook:, you will get only residential listings. If you type bphonebook:, you'll get only business listings. (Don't leave out the colon after "phonebook.") You can even use this feature as a reverse directory. Type phonebook: (area code) (number), and Google will (usually) give you the name of the person who has that number.

I recently learned this trick from a new book, "Google Hacks," by Tara Calishain and Rael Dornfest, which is published by O'Reilly and lists for $24.95, or ?17.50 in Britain.

Computer books from O'Reilly usually demand a fair amount of technical knowledge. But this one is an exception. Its subtitle is "100 Industrial-Strength Tips and Tools," and while all 100 of them aren't as useful or as easy as the phonebook example, many of them are.

Did you know that there are special syntaxes you can use to narrow your Google search? If you're researching an academic subject, type site: edu into the search window, and you'll restrict your hits to .edu sites - colleges and universities. It is also possible to search Google for a particular file type, such as a Microsoft Word document or an Adobe Acrobat file.

Another useful enhancement to Google, which Calishain said came too late to be included in the book, is Google Alert (www.google alert.com). You enter your search terms, and the site, which is not affiliated with Google, automatically runs a Google search every day and e-mails the new results to you.

You can see a full list of all the tips in the book at hacks.oreilly.com/pub/ht/2. Several of them, including the phonebook tip, are available there as a free sample. It's No. 17.

Calishain, the co-author of the book, has more free samples at her Web site, www.researchbuzz.com, an informative site dedicated to search engines and databases on the Web. You can find the Google tools that she has devised at www.buzztoolbox.com/google. Among the handy ones is Goofresh, which lets you search for pages that were indexed today, yesterday, in the last seven days or the last 30 days.

Another person who has invented tools for Google and put them online is Kevin Shay. One of his programs lets you search Google for terms that are within one, two or three words of each other (www.staggernation.com/cgi-bin/gaps.cgi). That's Hack #71 in "Google Hacks."

Calishain and Shay were able to develop these useful enhancements using an application programming interface that Google put out last year that lets people make improvements using the computer language Perl. There's a whole section of "Google Hacks" devoted to this subject, starting with Hack #50, "Introducing the Google Web API."

Untitled Document
MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

I am pleased to announce that we are starting our next batch of ham radio classes in June 2003 at Churchgate. The date will be announced shortly by Prashant Koli - VU2CBU, who heads the Education Commitee. (offcourse myself and many others will be assisting him).

All of you are therefore requested to give the names of your family members, relatives, friends etc.. who are interested in joinng the classes to VU2CBU. (resi : 2567 5226 // mobile :20510070).

Please note that we are conducting only one batch this time and therefore we have limited seats, there are already 35 students listed in our pending log register. So please register fast..

The fees and other details will be announced shortly by VU2CBU.

From: vijay motwane
Topic: 1188 Message: 1188

ARISS
School Contacts

Frequently
asked Questions

The following questions and answers are based on material prepared by the ARRL and NASA.

WHAT IS ARISS?

ARISS, (Amateur Radio on the International Space Station) is a program that offers an opportunity for students to experience the excitement of Amateur Radio by talking directly with crewmembers of the ISS (International Space Station).

Teachers, parents and communities will see how Amateur Radio can energize youngsters about science, technology, and learning.

Speaking with astronauts and other crewmembers is a unique educational experience. ARISS would like to take this opportunity to involve large numbers of individuals, particularly youth, in technology and the International space program with the help of Amateur Radio.

WHO SPONSORS ARISS?

Amateur Radio organizations, and space agencies in the USA, Russia, Canada, Japan and Europe sponsor these exciting experiments.

Hundreds of Amateur Radio operators, including those from NASA Amateur Radio clubs at Johnson Space Center, Goddard Space Flight Center, and Marshall Space Flight Center, work behind the scenes to make these educational experiences possible.

I AM A HAM. HOW CAN I INTRODUCE ARISS TO MY CHILD?

Bring a shortwave receiver to school and let students eavesdrop on Amateur Radio retransmissions. Then set up a 2-meter satellite ground station in class, and try a satellite contact. The teacher can apply for a future school contact, almost guaranteeing that students will have an opportunity to communicate with a crew.

CAN HAMS MAKE UNSCHEDULED ARISS CONTACTS?

Yes. The ISS crew has not lost sight of why it has been so successful. It is the Amateur Radio community that has brought astronauts voices into schools. Crew members make random contacts with earth-bound hams. They make contacts during their breaks, pre-sleep time and before and after mealtime. Astronauts have contacted thousands of hams around the world. Computer software allows the crew to operate the 2-meter packet gear radio in unattended mode, and hams can make contacts when the crewmembers are working.

WHAT TYPE RADIO DO I NEED?

A typical ARISS ground station includes a 2-meter FM transceiver and 25-100 watts of output power. A circularly polarized crossed-Yagi antenna capable of being pointed in both azimuth (N-S-E-W) and elevation (degrees above the horizon) is desirable. But successful contacts have even been made with verticals and ground plane antennas. Commercial and public domain software is available to help track when a shuttle or the ISS will be in range of your station, and where to point your antenna. For more details on assembling your station, you can buy a Satellite Handbook from ARRL

HOW DO I TALK TO THE ISS CREW?

You may communicate with the crew using voice, packet (computer) radio or television. It all depends on what equipment the crew has in space. Astronauts aboard the Space Shuttle Columbia in 1996 made hundreds of random voice contacts with ham radio operators. When the astronauts were busy with other activities, a computerized ham station aboard the orbiting shuttle automatically made contact with thousands more hams.

WHICH ASTRONAUTS HAVE HAM CALL SIGNS?

The Johnson Space Center Amateur Radio Club has a web site with information about astronaut hams. Click on the following links for details.

- ISS Expedition Crews callsign (http://www.w5rrr.org/crews.html)

- Astronaut-Ham Web Page (http://www.w5rrr.org/astros.html)

- Callsigns in use on the ISS

WHAT ARE MY CHANCES OF MAKING A RANDOM CONTACT?

The work schedules of the ISS crew dictate when they are able to operate the radios. So most of the general contacts they make are random. The selection committee recognizes the long-standing commitment of the ham radio community in supporting ARISS, and asks the crew to do as many general ham contacts as possible during flights.

WHAT ARE ARISS RADIO FREQUENCIES?

The following VHF frequencies are used for some ARISS contacts. These frequencies were chosen after much deliberation, to minimize problems between ARISS and other 2-meter users. If you have comments, please direct them to AMSAT via Frank Bauer, KA3HDO. We appreciate the cooperation of all amateurs making ARISS successful.

Frequencies used for ARISS
Voice Downlink: 145.80 (Worldwide)
Voice Uplink: 144.49 (Regions 2&3) 145.20 (Region 1)
Packet Uplink: 145.99 (Worldwide)

Most ARISS operations are split-frequency (each school uses separate receive and transmit frequencies). Please do not transmit on the shuttle's downlink frequency. The downlink is your receiving frequency. The uplink is your transmitting frequency. Earth stations should listen to the downlink frequency and transmit on the uplink frequency only when the ISS or spacecraft is in range and crewmembers are on the air.

HOW DOES THE ARISS PACKET SYSTEM WORK?

There is a page of instructions and advice on this web site which will be kept current. To obtain help in using the ISS packet system,

CAN I USE MY SHORTWAVE RADIO TO EAVESDROP ON THE CREW?

Goddard Amateur Radio Club (MD) will often re-transmit live, NASA air-to-ground audio over Amateur Radio frequencies from their club station, call sign WA3NAN. This station, and some VHF and UHF repeater groups, provide this service so amateurs and students can hear the educational communications. You will hear the astronauts, Mission Control, and bulletins about ARISS activities. WA3NAN operates on the high frequency (HF) bands at 3.86, 7.185, 14.295, 21.395, and 28.65 MHz and in the Greenbelt, MD area on VHF at 147.45 MHz (FM).

WHAT ARE "KEPS?"

Spacecraft-tracking software uses "Keps" or Keplerian elements (also known as "orbital" or "tracking" elements) to pinpoint the location of a spacecraft. Keps provide the software with a spacecraft's orbital track, which the computer uses to calculate its location. Using a tracking program tells an observer when a spacecraft will appear above his or her horizon.

WHERE CAN I FIND KEPS?

Keplerian elements are available from AMSAT News Service publishes weekly information bulletins including Keps. These bulletins are distributed electronically through amateur packet radio networks, landline networks and the World Wide Web http://www.amsat.org/

CAN I RE-TRANSMIT COMMUNICATIONS ON THE HAM FREQUENCIES?

The Radiocommunication Regulations define the amateur radio service as being a ?radiocommunication service in which radio apparatus are used for the purpose of self-training, intercommunication or technical investigation by individuals who are interested in radio technique solely with a personal aim and without pecuniary interest?. This entry not only defines the service but sets out in words what might be considered a description of the ?spirit? behind what is the amateur radio service.

Retransmission of NASA space station communications, which is not necessarily originating from a radio amateur and which might include incidental music[1] (http://by2fd.bay2.hotmail.msn.com/cgi-bin/dasp/EN/rte.asp#_ftn1)[1], might in some ways be seen to extend beyond what is permissible by current legislation. However, given the definition of the amateur radio service in the Regulations, above, and that the nature of legislation generally is that specific entries are either permissive or restrictive in nature, one can see why consideration should be given to a request to permit such retransmission. Retransmission of NASA space station communications would arguably allow the use of radio apparatus for the self-training and technical investigation with a personal aim and without pecuniary interest. Thus, provided it is not otherwise beyond the privileges granted by the amateur radio operator?s certificate and provided the NASA retransmissions are in keeping with the amateur radio service as defined by the Radiocommunication Regulations, such retransmission will be deemed to fall within the definition of the amateur radio service.

To be certain there is no problem in your country, please contact the local regulatory authorities.

HOW DO I GET AN ARISS QSL?

QSL cards are similar to postcards. Hams exchange QSLs to confirm their radio contacts with other stations. Participating in ARISS is an exhilarating experience. But waiting for that coveted QSL card requires patience. Designing a card for the ultimate DXpedition is a lengthy process. Once the cards are printed, RAC forwards them to the Amateur Radio club managing the QSLs.

Please include your QSL or report: date, time in UTC, frequency and mode (voice, packet or sstv).
If you wish to receive a card, you must include a large, self-addressed, stamped envelope with proper postage or sufficient IRCs included.

W1AW BULLETINS:

ARRL's Amateur Radio station (call sign W1AW) transmits news bulletins (9:45 PM, 12:45 AM EST) on HF bands at 1.855, 3.99, 7.29, 14.29, 18.16, 21.39, 28.59 MHz and, in the Hartford, CT area, on VHF at 147.555 MHz. Bulletins are also on packet. AMSAT NET: The AMSAT International Satellite Net on Sundays, 14.282 MHz, +/- QRM.

The Importance of Replacing your Coax Cable

The life of a coaxial cable depends on many factors. Some of those factors are ultra-violet exposure, migration, high humidity, age, corrosion, power/heat, and voltage. Here are some important guidelines to remember when you start considering the replacement of your coaxial cable run(s).

1. Ultra-Violet exposure breaks down the plasticizers of the jacket over time. As a guideline: Type IIa (2a) non-contaminating PVC jackets can last twice as long as type Ia (1a) PVC jacket.

2. Migration & Corrosion affects the attenuation stability over time by contamination of the dielectric due to jacket plasticizers, and moisture penetration through the jacket.

3. Power electrical losses result from the generation of heat in the center conductor; braid shield, and the dielectric. The power handling capability of a cable is related to its ability to effectively dissipate this heat. Please be aware that a solid or semi-solid

polyethylene dielectric dissipates heat better than a foam polyethylene dielectric, since most of the heat is generated in the center conductor. On balance, the power handling capability of a coaxial cable is inversely proportional to its attenuation, and to its size. This is why RG213/U (CABLE X-PERTS # 18267) handles higher power more efficiently than for example RG58/U (CABLE X-PERTS # 18240). Another factor is the thermal conductive (or heat transfer) properties of the cable, especially within the dielectric. In other words, high ambient temperature, and high altitude could reduce the power rating by impeding the heat transfer out of the cable. High VSWR also reduces the power ratings due to localized HOT SPOTS at poor connector terminations and/or other improper usage.

4. Operating Voltage is represented by two separate voltage ratings.

a. Corona is a related ionization phenomenon that causes noise generation, which leads to long term dielectric damage, and eventual breakdown of the cable. Note: High wattage amplifiers can cause premature dielectric deterioration and larger Corona affects.

b. Dielectric Withstanding Voltage a voltage level that abruptly breaks down the dielectric. To ensure the dielectric integrity of CABLE X-PERTS cables and assemblies, they are HI-POT? tested during manufacturing and in our ready-made cable assembly department.

In summation, coaxial cable can perform to it?s maximum designed efficiency an average of seven years to ten years, provided the connectors are appropriately terminated and the cable is installed correctly. So if your signal is fading or you?re getting erratic VSWR readings, or are unable to get the maximum performance from your transceiver, then its time to consider changing your coaxial cable or cable assemblies. To help choose the correct cable for your application, use our handy Cable Calculatorand visit our Ready-Made assembly product page. Otherwise, simply contact our sales department for additional help in making your cabling choices.

Routing of Cables

Routing of Cables (with or without connectors)
through the exterior wall of a building or home

1. How many cables do you plan to route through the PVC pipe? Consider future installations too.

2. Total up their O.D. Do this by adding the total O.D. of the cables, be sure to include the connectors if installed. Divide that amount in half. All of our cable's O.D are listed in our catalog. Example: Four legs of RG8/U size and two #5971 rotor cables total nominal "O.D. is slightly over 1".

==>FCC DECLINES TO GRANT LF ALLOCATION, GIVES CHANNELIZED ACCESS TO 5-MHZ

The FCC bowed to power company concerns and declined to grant amateurs an
expected sliver-band allocation at 136 kHz "at this time." But, in a
compromise with government users, the Commission gave amateurs secondary
access to five discrete 2.8-kHz-wide channels in the vicinity of 5 MHz
instead of the 150-kHz band ARRL had requested. In its Notice of Proposed
Rule Making a year ago, the FCC appeared inclined to go along with both
ARRL requests.

The FCC did agree in its Report and Order (ET Docket 02-98) to elevate the
Amateur Service--but not the Amateur-Satellite Service--to primary status
at 2400 to 2402 MHz. The changes to Part 97 go into effect 30 days after
publication in The Federal Register, which has not yet occurred.

"We are disappointed that the FCC could not see its way clear to providing
even a narrow LF allocation to the amateur service, given earlier
encouraging signs and the general trend in other countries," ARRL Chief
Executive Officer David Sumner, K1ZZ, said of the FCC's decision.
```

The FCC, however, found itself more persuaded by arguments from electrical utilities and other commenters that amateur operation at 136 kHz might interfere with power line communications (PLC) used by electrical utilities to control the power grid.

The FCC said a new amateur LF allocation is not justified "when balanced against the greater public interest of an interference-free power grid." The FCC said amateurs wishing to experiment with LF could apply for experimental licenses or operate under existing Part 15 rules. "We will not jeopardize the reliability of electrical service to the public," the FCC concluded.

The granting of just five spot frequencies--5332, 5348, 5368, 5373, and 5405 kHz--at 60 meters was less of a surprise given opposition expressed last fall by the National Telecommunications and Information Administration (NTIA). The NTIA had cited a possible need for the requested band by federal government users and proposed the five specific frequencies for amateur use on a secondary basis. The FCC has granted operation on USB (2K8J3E emission) only, with a maximum effective radiated power limit of 50 W relative to a 0 dB gain antenna--a half-wave dipole. The channels--each with a maximum permissible bandwidth of 2.8 kHz--will be available to General and higher class licensees.

"While the new amateur privileges at 5 MHz are not as flexible as we had hoped, we recognize that much has changed since the ARRL petition for rulemaking was submitted to the FCC in the summer of 2001," Sumner said. "Federal agencies with homeland security responsibilities have renewed interest in HF radiocommunication." The restriction to USB is aimed at maintaining interoperability with federal government users, who conceivably could require immediate access to one of the amateur secondary channels.

Sumner said the ARRL was pleased to see 2400-2402 MHz upgraded to primary. "The upgrade of the 2400-2402 MHz amateur allocation to primary provides a seamless primary allocation from 2390 to 2417 MHz, in addition to the secondary allocations of 2300-2310 and 2417-2450 MHz," he said. Amateurs already have been experimenting with high-speed multimedia operation in the band using IEEE 802.11b protocols.

The Report and Order is available on the FCC's Web site, http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-105A1.doc.

==>AMATEUR RADIO TODAY SENT TO MEMBERS OF CONGRESS

A copy of the new Amateur Radio Today CD-ROM video presentation this week went out to all 535 members of the US Congress. The ARRL video tells Amateur Radio's public service story from a non-Amateur Radio perspective. Former CBS news anchorman Walter Cronkite, KB2GSD, narrates the six-minute presentation.

"After viewing the video, I am sure you will agree that hams are a valuable public safety resource, and continued threats to the spectrum they operate on is not in our national interest," say identical letters to

their colleagues from US Rep Michael Bilirakis, a Florida Republican, and US senators Michael Crapo, an Idaho Republican, and Daniel Akaka, a Hawaii Democrat. The letters also seek additional cosponsors for The Amateur Radio Spectrum Protection Act of 2003. Bilirakis is the House sponsor of the Amateur Radio Spectrum Protection Act of 2003, HR 713, while Crapo sponsored the Senate version of the bill, S 537. Akaka is an original cosponsor of the Senate measure.

The bills, an ARRL initiative, are on their third try in Congress. HR 713 and S 537 would protect existing Amateur Radio spectrum against reallocations to or sharing with other services unless the FCC provides "equivalent replacement spectrum" elsewhere. That would include reallocation of primary amateur allocations, any reduction in secondary amateur allocations, or "additional allocations within such bands" that would substantially reduce their utility to amateurs. The chairman of the House Subcommittee on Telecommunications and the Internet has agreed to hear testimony on the House version of the bill later this spring.

The text of HR 713 and S 537 is available via the Thomas Web site <http://thomas.loc.gov/>.

Individuals may order a copy of the Amateur Radio Today CD-ROM from the ARRL on-line catalog <https://www.arrl.org/catalog/?item=8861> or download it for free. Amateur Radio Today also is available in VHS videotape format. A subtitled (open-captioned) version also is available.

==>ARRL'S "LOGBOOK OF THE WORLD" ENTERS OPEN BETA-TESTING PHASE

The long-anticipated "Logbook of the World" (LoTW)--the ARRL's secure electronic contact-confirmation system--is being opened for beta testing. While a formal unveiling was set for the Hamvention DX Forum May 17, LoTW now is available to all who wish to participate in the beta testing program, expected to last 60 days.

At the heart of the Logbook of the World concept is a huge repository of log data provided by operators--from individual DXers and contesters to major DXpeditions--and maintained by ARRL. Logbook of the World Project Leader Wayne Mills, N7NG, says the system will benefit big and little guns alike by providing quick QSO credit for awards offered by ARRL--and, it's hoped, those offered by other organizations as well--without having to first collect and submit hard-copy QSL cards.

Visit the ARRL Logbook of the World Web site <http://www.arrl.org/lotw> to learn more, download the necessary software and take part in the beta testing effort. For the purposes of the beta test, validated users are asked to submit log data for contacts made on or after January 1, 1998. Once a certificate is issued, beta testers may e-mail their log data to the LoTW database lotw-test@....

LoTW will accept authenticated data--either in Cabrillo or ADIF format--directly from computerized logs via the Internet. Software Development Manager Jon Bloom, KE3Z, noted that because the software still

is under development, any data uploaded during the beta-testing period will be erased before LoTW "goes live." Beta participants will have to obtain new certification even if they've participated in earlier LoTW testing. The beta certification will be good only for the beta-test period.

Bloom emphasized that every call sign would need a separate certificate.

Bloom and Mills encouraged beta-test DXers and contesters to upload their log files--the bigger the better--to test the robustness of the software as well as to populate the database and create a more realistic environment. LoTW will find and match contacts between stations based on the log data submitted by users, and the results will appear on the Logbook of the World Web page.

"We're not replacing the whole paper QSL scheme with Logbook of the World," said Mills, who is also ARRL's Membership Services manager. "This is really a system to offer credits for awards."

==>HAM RADIO TORNADO RESPONSE WINDS DOWN

ARRL Oklahoma Section Manager John Thomason, WB5SYT, said this week that the intense Amateur Radio relief and recovery effort following two tornadoes earlier this month in the Oklahoma City area was "winding down quickly." The FCC rescinded a general communications emergency on 3900 kHz in the Oklahoma area last weekend. Responding amateurs in Oklahoma supported relief activities of The Salvation Army following storms May 8 and 9. Amateurs also provided weather-spotting via the SKYWARN system and handled emergency and health-and-welfare traffic and assisted with damage assessment.

"Amateur Radio responded quickly and thoroughly," Thomason said, adding that hams from the Oklahoma City area as well as other parts of the state turned out to help in what he called "a very challenging and changing environment." Some 50 amateurs were involved in the Oklahoma response, Thomason said. The storms struck just a day after some 30 of the hams involved had attended a two-day Salvation Army-sponsored disaster conference.

The Oklahoma storms capped a week that some have been calling the worst ever for tornado outbreaks. On May 4, tornadoes struck the both sides of the border in the Kansas City area as well as in other parts of Kansas. Tornadoes that spun off the same weather system also hit parts of Tennessee and other states.

In Missouri, Section Emergency Coordinator Don Moore, KM0R, says hams there logged more than 1000 volunteer work hours in eight days. "We have had Amateur Radio operators active in one part of Missouri or another since Sunday, May 4, providing communications for served agencies, assisting in damage assessment or handling health and welfare traffic into and out of the affected areas," he said.

In Kansas, the Johnson County ARES Net was on the air within minutes of the May 4 tornado. Hams used HF to maintain contact among The Salvation Army Emergency Disaster Services headquarters in Kansas City and affected areas south and east of Kansas City. Hams also supported Salvation Army mobile canteens in stricken areas throughout the Kansas City metropolitan area and rode along with damage-assessment teams. Another series of thunderstorms swept into Kansas May 8, and a tornado hit Lawrence near the University of Kansas campus. There were no major injuries, but The Salvation Army dispatched canteen units with ham radio support.

In Tennessee, hams assisted as residents dug out from a tornado that struck the Jackson-Madison County area early on May 5. Madison County EC Kenny Johns, AB4EG--a City of Jackson employee--found himself putting in 12-hour days in cleanup operations. As of last weekend, some 5000 homes remained without power, and Johns said some areas may take up to a month to restore. Nearly 200 structures were destroyed, 11 people were killed, and hundreds were left homeless. Hams were assisting the Madison County Emergency Management Agency as needed, Johns said.

ARRL Assistant SEC for Middle Tennessee Tom Delker, K1KY, said ARES teams in Middle Tennessee provided daily support to served agencies daily since tornadoes on May 5 and 11. Delker said that upward of 400 Middle Tennessee amateurs provided support for state and local emergency management agencies, law enforcement, the American Red Cross and the National Weather Service. When damaging tornadoes struck east of Smyrna on May 11, "ham storm spotters tracked the storm and responded to the call for assistance immediately after touchdown," Delker said. The storm destroyed six homes and left some 30 others with major damage. It was a similar story in nearby Williamson County, where a tornado destroyed one home and damaged others. ARES groups in more than 22 Middle Tennessee counties were active, he said.

==>COLUMBIA PANEL ISSUES PRELIMINARY FINDINGS IN SHUTTLE TRAGEDY

The space shuttle Columbia Accident Investigation Board (CAIB) has released what it's calling "a working scenario" <http://www.caib.us/news/press_releases/pr030506.html> to explain the February 1 tragedy that claimed the lives of seven astronauts--three of them Amateur Radio licensees. Preliminary findings, based on three months of "intense investigation," suggest that just over a minute into the January 16 launch, a piece of foam insulation from the shuttle's external fuel tank struck and damaged the lower left wing reinforced carbon-carbon (RCC) panels. The CAIB says its evidence indicates that a breach in the same area of the left wing allowed hot gases to flow into the wing during re-entry into Earth's atmosphere, eventually leading to the spacecraft's destruction.

"The CAIB is continuing testing and analyses to refine the working scenario," NASA said. The independent investigation board--headed by retired US Navy Adm Harold Gehman--will issue its final report this summer. Gehman told reporters earlier this month that his panel has been careful not to say that the piece of insulation knocked a hole in the

leading edge of the orbiter's wing "because we can't prove it."

In an effort to pin down that probability, investigators at Southwest Research Institute in San Antonio has been using a gas-fired cannon to shoot pieces of insulating foam at actual shuttle RCC and insulating tile components.

Lost in the February 1 disaster were Columbia Commander Rick Husband; Pilot Willie McCool; Mission Specialists Kalpana "KC" Chawla, KD5ESI; David Brown, KC5ZTC; Laurel Clark, KC5ZSU; and Michael Anderson; and Payload Specialist Ilan Ramon--an Israeli astronaut.

The Columbia started to break up over the southwestern US as it entered the earth's atmosphere on the return leg of its 16-day science mission. Many Amateur Radio volunteers provided communication support during the early days of the shuttle debris recovery effort. NASA and Amateur Radio have a longstanding relationship through the Shuttle Amateur Radio EXperiment (SAREX) and Amateur Radio on the International Space Station (ARISS) programs.

More information is available via the NASA Human Spaceflight Web page <http://www.spaceflight.nasa.gov/>.

==>HAMVENTION UNDER WAY IN DAYTON

Billed as the world's largest Amateur Radio gathering and trade show, Hamvention is under way near Dayton, Ohio, this weekend. The show is celebrating "Year of the Youth" at this year's event--its 51st year and its 52nd show May 16-18 at Hara Arena. Upward of 25,000 are expected to attend this year's event.

The ARRL booth in North Hall will offer a retail counter, product demonstrations and DXCC card checking, among other services. ARRL will conduct its general informational forum Saturday, May 17, 8:15-9:45 AM (in Room 3). This week's FCC Report and Order giving amateurs five discrete channels in the vicinity of 5 MHz while denying a request for an LF allocation at 136 kHz is expected to head the list of discussion topics at that forum and perhaps others. This year's FCC forum was cancelled, however.

This year's AMSAT forum for satellite enthusiasts will coincide with the ARRL forum May 17, 8:15-9:45 AM (in Room 1). AMSAT-NA President Robin Haighton, VE3FRH, and other AMSAT notables will detail progress on the new "Echo" satellite, now under construction, that could launch later this year.

Amateur Radio Newsline will sponsor its annual live Town Hall Meeting, Saturday, May 17, 1-3 PM (in Room 3) with Newsline producer Bill Pasternak, WA6ITF, as moderator.

ARRL will present an Amateur Radio public relations forum Sunday, May 18, 8:30-10 AM (in Room 1). There will be door prizes. The ARRL Technology Task Force session will follow at 10:15 until noon.

Hamvention will honor its 2003 award winners at an awards reception Saturday, May 17. Well-known contester Larry "Tree" Tyree, N6TR, will receive Hamvention's 2003 Amateur of the Year Award. Tyree is the creator, organizer, and promoter of the successful Kid's Day, now administered by the ARRL. He also developed the popular TR-LOG contest logging software. Jonathan Taylor, K1RFD, is the winner of Hamvention's 2003 Special Achievement Award. Hamvention's 2003 Technical Achievement Award goes to Dr Steve Dimse, K4HG.

Late news about the show is on the Hamvention Web site <http://www.hamvention.org>

==>SOLAR UPDATE

Solar sage Tad Cook, K7RA, Seattle, Washington, reports:

Disturbed conditions triggered by a continuous solar wind stream appear to go on and on, week after week, seemingly without end. Nice quiet conditions would result from a daily A index of 10 or lower. Average daily conditions near that level haven't been reported since the week of February 20-26 when the daily average A index was 11.1, or January 9-15 when it was 9.1.

Conventional wisdom says that disturbed conditions occur more often when the solar cycle has passed the peak and is headed down, and recent experience seems to bear this out. Recent forecasts for daily solar flux and planetary A index don't predict a daily A index below 10 until May 31.

Sunspot numbers for May 8 through 14 were 33, 23, 22, 47, 66, 59, and 75, with a mean of 46.4. 10.7 cm flux was 100.9, 97.1, 92.7, 91.5, 93.9, 96.1, and 96.3 with a mean of 95.5. Estimated planetary A indices were 30, 29, 43, 31, 18, 27, and 27, with a mean of 29.3.

==>IN BRIEF:

* This weekend on the radio: The US Counties QSO Party (SSB), the Anatolian RTTY Worldwide Contest, His Majesty the King of Spain Contest (CW) and the Baltic Contest are the weekend of May 17-18. JUST AHEAD: The CQ Worldwide WPX Contest (CW), the VK-ZL Trans-Tasman Contest (SSB) and the QRP ARCI Hootowl Sprint are the weekend of May 24-25. The Michigan QRP Memorial Day CW Sprint is May 26-27. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration is closed for the Level II ARRL Amateur Radio Emergency Communications on-line course (EC-002) that begins May 27, sponsored by United Technologies Corporation. Registration opens Monday, May 19, 12:01 AM EDT (0401 UTC), for the Level III Emergency Communications on-line course (EC-003). Registration remains open through the May 24-25 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, June 3. Thanks to a grant from United Technologies Corp, the $45 registration fee paid upon enrollment will be reimbursed after successful

completion of the Level III course. During this registration period, approximately 50 seats are being offered to ARRL members on a first-come, first-served basis. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to receive advance word of registration opportunities via e-mail. To take advantage, send an e-mail to prereg@.... On the subject line, include the course name or number (eg, EC-00#). In the message body, include your name, call sign, e-mail address, and the month you want to start the course. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce/> and the C-CE Links found there. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@...; 860-594-0340.

* ARRL Certification and Continuing Education course registration: Registration for the new ARRL VHF/UHF--Life Beyond the Repeater (EC-008) <http://www.arrl.org/cce/courses.html#ec008> and the High Frequency Digital Communications (EC-005) <http://www.arrl.org/cce/courses.html#ec005> courses opens Monday, May 19, 12:01 AM EDT (0401 UTC). Registration remains open through Sunday, May 25. Classes begin Tuesday, May 27. Registration for the ARRL Antenna Modeling (EC-004) <http://www.arrl.org/cce/courses.html#ec004> course remains open through Sunday, May 18. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....
[C-CE logo]

* ARRL to sponsor emergency communications course seminar in Nevada: The ARRL will offer a free Amateur Radio Emergency Communications course (ARECC) seminar Saturday, May 31, in conjunction with EMCOMM WEST 2003, an ARRL Pacific Division Operating Specialty Convention in Reno, Nevada. The seminar will not include the Level I course itself. This program is designed to explain in greater detail the duties of volunteer certification mentors, instructors and examiners of the Amateur Radio Emergency Communications courses and provide additional information for people considering these volunteer positions. The seminar will be held Saturday, May 31, 1-5 PM, in the South Reno Baptist Church Auditorium, 6780 S McCarran Blvd. (two blocks west of S Virginia Ave). Seating may be limited. Contact ARRL Emergency Communications Course Manager Dan Miller, K3UFG, <k3ufg@...>, (860-594-0340; fax 860-594-0259) if you plan to attend. Seminar attendance does not include admission to the convention, which is May 31. For more information on EMCOMM WEST 2003, visit the convention Web site <http://www.cvrc.net/emcommwest>.

* California ham radio antenna bill set for Senate hearing: The California Senate's Local Government Committee will hear public comment on the state's pending Amateur Radio antenna legislation, Assembly Bill 1228. The hearing is set for Wednesday, May 21, at 9 AM PDT. ARRL staffer and antenna expert Dean Straw, N6BV, is scheduled to testify on behalf of the proposed legislation. The measure would incorporate the essence of the limited federal preemption known as PRB-1 into California's statutes and

require localities to "reasonably accommodate" Amateur Radio communication. The bill cleared the California Assembly April 10 on a 67-0 vote. California is home to nearly 15 percent of the nation's Amateur Radio population. The bill's sponsor, Assemblyman Bob Dutton, is inviting letters of support to The Honorable Bob Dutton, State Capitol PO Box 942849, Sacramento, CA 94249-2063 (fax, 916-319-2163). Correspondents are requested to fax a copy to Peter Detwiler at the Senate Local Government Committee, 916-322-0298.

* Jerry Jennison, N5OKQ, SK: Jerry Jennison, N5OKQ, of San Angelo, Texas, died May 2 following an extended illness. He was 64. An ARRL member and REACT International Life Member, Jennison also was active in the Salvation Army Team Emergency Radio Network (SATERN) and served as SATERN coordinator for the Southern Territory of The Salvation Army. "This is a sad day for SATERN and for the many organizations that Jerry Jennison served in," said National SATERN Director Pat McPherson, WW9E. "Jerry was reflective of the 'Can Do' spirit of the amateur operator." Jennison also was a volunteer for the Red Cross and was a member of the San Angelo Amateur Radio Club. A memorial service was held on May 7.

* Lee Kitchens, N5YBW, SK: Lee Kitchens, N5YBW, of Ransom Canyon, Texas, died unexpectedly May 12. He was 73. An ARRL member, Kitchens served as ARRL West Texas Section Manager from July 2001 until October 2002. ARRL Field Organization/Public Service Team Leader Steve Ewald, WV1X, said he was "surprised and saddened" to learn of Kitchens' death. ARRL Field and Educational Services Manager Rosalie White, K1STO, said Kitchens "was dedicated to communicating important news to the ARRL West Texas Section hams, helping them be more active in the volunteer activities they enjoyed, and increasing the number of ARRL members." Kitchens also was an influential figure in the organization Little People of America (LPA) <http://www.lpaonline.org>, a nonprofit organization that provides support and information to people of short stature and their families. Kitchens was a past president of LPA, a foundation trustee, founder of the West Texas LPA chapter and an organizer and registrar for an upcoming LPA conference. He was LPA's vice president of membership at the time of his death. Kitchens also was a past president and long-time board member of the Human Growth Foundation <http://www.hgfound.org>) and a past mayor of Ransom Canyon, where the city hall is located on Lee Kitchens Drive. He also was a member of Lubbock County RACES/ARES and trustee of a local repeater. The family invites memorial donations to the LPA's newly established Lee Kitchens Memorial Fund, PO Box 65030, Lubbock, TX 79464-5030.--Bill Ricker, N1VUX

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

==>FCC DECLINES TO GRANT LF ALLOCATION, GIVES CHANNELIZED ACCESS TO 5-MHZ

The FCC bowed to power company concerns and declined to grant amateurs an
expected sliver-band allocation at 136 kHz "at this time." But, in a
compromise with government users, the Commission gave amateurs secondary
access to five discrete 2.8-kHz-wide channels in the vicinity of 5 MHz
instead of the 150-kHz band ARRL had requested. In its Notice of Proposed
Rule Making a year ago, the FCC appeared inclined to go along with both
ARRL requests.

The FCC did agree in its Report and Order (ET Docket 02-98) to elevate the
Amateur Service--but not the Amateur-Satellite Service--to primary status
at 2400 to 2402 MHz. The changes to Part 97 go into effect 30 days after
publication in The Federal Register, which has not yet occurred.

"We are disappointed that the FCC could not see its way clear to providing
even a narrow LF allocation to the amateur service, given earlier
encouraging signs and the general trend in other countries," ARRL Chief
Executive Officer David Sumner, K1ZZ, said of the FCC's decision.
```

The FCC, however, found itself more persuaded by arguments from electrical utilities and other commenters that amateur operation at 136 kHz might interfere with power line communications (PLC) used by electrical utilities to control the power grid.

The FCC said a new amateur LF allocation is not justified "when balanced against the greater public interest of an interference-free power grid." The FCC said amateurs wishing to experiment with LF could apply for experimental licenses or operate under existing Part 15 rules. "We will not jeopardize the reliability of electrical service to the public," the FCC concluded.

The granting of just five spot frequencies--5332, 5348, 5368, 5373, and 5405 kHz--at 60 meters was less of a surprise given opposition expressed last fall by the National Telecommunications and Information Administration (NTIA). The NTIA had cited a possible need for the requested band by federal government users and proposed the five specific frequencies for amateur use on a secondary basis. The FCC has granted operation on USB (2K8J3E emission) only, with a maximum effective radiated power limit of 50 W relative to a 0 dB gain antenna--a half-wave dipole. The channels--each with a maximum permissible bandwidth of 2.8 kHz--will be available to General and higher class licensees.

"While the new amateur privileges at 5 MHz are not as flexible as we had hoped, we recognize that much has changed since the ARRL petition for rulemaking was submitted to the FCC in the summer of 2001," Sumner said. "Federal agencies with homeland security responsibilities have renewed interest in HF radiocommunication." The restriction to USB is aimed at maintaining interoperability with federal government users, who conceivably could require immediate access to one of the amateur secondary channels.

Sumner said the ARRL was pleased to see 2400-2402 MHz upgraded to primary. "The upgrade of the 2400-2402 MHz amateur allocation to primary provides a seamless primary allocation from 2390 to 2417 MHz, in addition to the secondary allocations of 2300-2310 and 2417-2450 MHz," he said. Amateurs already have been experimenting with high-speed multimedia operation in the band using IEEE 802.11b protocols.

The Report and Order is available on the FCC's Web site, http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-105A1.doc.

==>AMATEUR RADIO TODAY SENT TO MEMBERS OF CONGRESS

A copy of the new Amateur Radio Today CD-ROM video presentation this week went out to all 535 members of the US Congress. The ARRL video tells Amateur Radio's public service story from a non-Amateur Radio perspective. Former CBS news anchorman Walter Cronkite, KB2GSD, narrates the six-minute presentation.

"After viewing the video, I am sure you will agree that hams are a valuable public safety resource, and continued threats to the spectrum they operate on is not in our national interest," say identical letters to

their colleagues from US Rep Michael Bilirakis, a Florida Republican, and US senators Michael Crapo, an Idaho Republican, and Daniel Akaka, a Hawaii Democrat. The letters also seek additional cosponsors for The Amateur Radio Spectrum Protection Act of 2003. Bilirakis is the House sponsor of the Amateur Radio Spectrum Protection Act of 2003, HR 713, while Crapo sponsored the Senate version of the bill, S 537. Akaka is an original cosponsor of the Senate measure.

The bills, an ARRL initiative, are on their third try in Congress. HR 713 and S 537 would protect existing Amateur Radio spectrum against reallocations to or sharing with other services unless the FCC provides "equivalent replacement spectrum" elsewhere. That would include reallocation of primary amateur allocations, any reduction in secondary amateur allocations, or "additional allocations within such bands" that would substantially reduce their utility to amateurs. The chairman of the House Subcommittee on Telecommunications and the Internet has agreed to hear testimony on the House version of the bill later this spring.

The text of HR 713 and S 537 is available via the Thomas Web site <http://thomas.loc.gov/>.

Individuals may order a copy of the Amateur Radio Today CD-ROM from the ARRL on-line catalog <https://www.arrl.org/catalog/?item=8861> or download it for free. Amateur Radio Today also is available in VHS videotape format. A subtitled (open-captioned) version also is available.

==>ARRL'S "LOGBOOK OF THE WORLD" ENTERS OPEN BETA-TESTING PHASE

The long-anticipated "Logbook of the World" (LoTW)--the ARRL's secure electronic contact-confirmation system--is being opened for beta testing. While a formal unveiling was set for the Hamvention DX Forum May 17, LoTW now is available to all who wish to participate in the beta testing program, expected to last 60 days.

At the heart of the Logbook of the World concept is a huge repository of log data provided by operators--from individual DXers and contesters to major DXpeditions--and maintained by ARRL. Logbook of the World Project Leader Wayne Mills, N7NG, says the system will benefit big and little guns alike by providing quick QSO credit for awards offered by ARRL--and, it's hoped, those offered by other organizations as well--without having to first collect and submit hard-copy QSL cards.

Visit the ARRL Logbook of the World Web site <http://www.arrl.org/lotw> to learn more, download the necessary software and take part in the beta testing effort. For the purposes of the beta test, validated users are asked to submit log data for contacts made on or after January 1, 1998. Once a certificate is issued, beta testers may e-mail their log data to the LoTW database lotw-test@....

LoTW will accept authenticated data--either in Cabrillo or ADIF format--directly from computerized logs via the Internet. Software Development Manager Jon Bloom, KE3Z, noted that because the software still

is under development, any data uploaded during the beta-testing period will be erased before LoTW "goes live." Beta participants will have to obtain new certification even if they've participated in earlier LoTW testing. The beta certification will be good only for the beta-test period.

Bloom emphasized that every call sign would need a separate certificate.

Bloom and Mills encouraged beta-test DXers and contesters to upload their log files--the bigger the better--to test the robustness of the software as well as to populate the database and create a more realistic environment. LoTW will find and match contacts between stations based on the log data submitted by users, and the results will appear on the Logbook of the World Web page.

"We're not replacing the whole paper QSL scheme with Logbook of the World," said Mills, who is also ARRL's Membership Services manager. "This is really a system to offer credits for awards."

==>HAM RADIO TORNADO RESPONSE WINDS DOWN

ARRL Oklahoma Section Manager John Thomason, WB5SYT, said this week that the intense Amateur Radio relief and recovery effort following two tornadoes earlier this month in the Oklahoma City area was "winding down quickly." The FCC rescinded a general communications emergency on 3900 kHz in the Oklahoma area last weekend. Responding amateurs in Oklahoma supported relief activities of The Salvation Army following storms May 8 and 9. Amateurs also provided weather-spotting via the SKYWARN system and handled emergency and health-and-welfare traffic and assisted with damage assessment.

"Amateur Radio responded quickly and thoroughly," Thomason said, adding that hams from the Oklahoma City area as well as other parts of the state turned out to help in what he called "a very challenging and changing environment." Some 50 amateurs were involved in the Oklahoma response, Thomason said. The storms struck just a day after some 30 of the hams involved had attended a two-day Salvation Army-sponsored disaster conference.

The Oklahoma storms capped a week that some have been calling the worst ever for tornado outbreaks. On May 4, tornadoes struck the both sides of the border in the Kansas City area as well as in other parts of Kansas. Tornadoes that spun off the same weather system also hit parts of Tennessee and other states.

In Missouri, Section Emergency Coordinator Don Moore, KM0R, says hams there logged more than 1000 volunteer work hours in eight days. "We have had Amateur Radio operators active in one part of Missouri or another since Sunday, May 4, providing communications for served agencies, assisting in damage assessment or handling health and welfare traffic into and out of the affected areas," he said.

In Kansas, the Johnson County ARES Net was on the air within minutes of the May 4 tornado. Hams used HF to maintain contact among The Salvation Army Emergency Disaster Services headquarters in Kansas City and affected areas south and east of Kansas City. Hams also supported Salvation Army mobile canteens in stricken areas throughout the Kansas City metropolitan area and rode along with damage-assessment teams. Another series of thunderstorms swept into Kansas May 8, and a tornado hit Lawrence near the University of Kansas campus. There were no major injuries, but The Salvation Army dispatched canteen units with ham radio support.

In Tennessee, hams assisted as residents dug out from a tornado that struck the Jackson-Madison County area early on May 5. Madison County EC Kenny Johns, AB4EG--a City of Jackson employee--found himself putting in 12-hour days in cleanup operations. As of last weekend, some 5000 homes remained without power, and Johns said some areas may take up to a month to restore. Nearly 200 structures were destroyed, 11 people were killed, and hundreds were left homeless. Hams were assisting the Madison County Emergency Management Agency as needed, Johns said.

ARRL Assistant SEC for Middle Tennessee Tom Delker, K1KY, said ARES teams in Middle Tennessee provided daily support to served agencies daily since tornadoes on May 5 and 11. Delker said that upward of 400 Middle Tennessee amateurs provided support for state and local emergency management agencies, law enforcement, the American Red Cross and the National Weather Service. When damaging tornadoes struck east of Smyrna on May 11, "ham storm spotters tracked the storm and responded to the call for assistance immediately after touchdown," Delker said. The storm destroyed six homes and left some 30 others with major damage. It was a similar story in nearby Williamson County, where a tornado destroyed one home and damaged others. ARES groups in more than 22 Middle Tennessee counties were active, he said.

==>COLUMBIA PANEL ISSUES PRELIMINARY FINDINGS IN SHUTTLE TRAGEDY

The space shuttle Columbia Accident Investigation Board (CAIB) has released what it's calling "a working scenario" <http://www.caib.us/news/press_releases/pr030506.html> to explain the February 1 tragedy that claimed the lives of seven astronauts--three of them Amateur Radio licensees. Preliminary findings, based on three months of "intense investigation," suggest that just over a minute into the January 16 launch, a piece of foam insulation from the shuttle's external fuel tank struck and damaged the lower left wing reinforced carbon-carbon (RCC) panels. The CAIB says its evidence indicates that a breach in the same area of the left wing allowed hot gases to flow into the wing during re-entry into Earth's atmosphere, eventually leading to the spacecraft's destruction.

"The CAIB is continuing testing and analyses to refine the working scenario," NASA said. The independent investigation board--headed by retired US Navy Adm Harold Gehman--will issue its final report this summer. Gehman told reporters earlier this month that his panel has been careful not to say that the piece of insulation knocked a hole in the

leading edge of the orbiter's wing "because we can't prove it."

In an effort to pin down that probability, investigators at Southwest Research Institute in San Antonio has been using a gas-fired cannon to shoot pieces of insulating foam at actual shuttle RCC and insulating tile components.

Lost in the February 1 disaster were Columbia Commander Rick Husband; Pilot Willie McCool; Mission Specialists Kalpana "KC" Chawla, KD5ESI; David Brown, KC5ZTC; Laurel Clark, KC5ZSU; and Michael Anderson; and Payload Specialist Ilan Ramon--an Israeli astronaut.

The Columbia started to break up over the southwestern US as it entered the earth's atmosphere on the return leg of its 16-day science mission. Many Amateur Radio volunteers provided communication support during the early days of the shuttle debris recovery effort. NASA and Amateur Radio have a longstanding relationship through the Shuttle Amateur Radio EXperiment (SAREX) and Amateur Radio on the International Space Station (ARISS) programs.

More information is available via the NASA Human Spaceflight Web page <http://www.spaceflight.nasa.gov/>.

==>HAMVENTION UNDER WAY IN DAYTON

Billed as the world's largest Amateur Radio gathering and trade show, Hamvention is under way near Dayton, Ohio, this weekend. The show is celebrating "Year of the Youth" at this year's event--its 51st year and its 52nd show May 16-18 at Hara Arena. Upward of 25,000 are expected to attend this year's event.

The ARRL booth in North Hall will offer a retail counter, product demonstrations and DXCC card checking, among other services. ARRL will conduct its general informational forum Saturday, May 17, 8:15-9:45 AM (in Room 3). This week's FCC Report and Order giving amateurs five discrete channels in the vicinity of 5 MHz while denying a request for an LF allocation at 136 kHz is expected to head the list of discussion topics at that forum and perhaps others. This year's FCC forum was cancelled, however.

This year's AMSAT forum for satellite enthusiasts will coincide with the ARRL forum May 17, 8:15-9:45 AM (in Room 1). AMSAT-NA President Robin Haighton, VE3FRH, and other AMSAT notables will detail progress on the new "Echo" satellite, now under construction, that could launch later this year.

Amateur Radio Newsline will sponsor its annual live Town Hall Meeting, Saturday, May 17, 1-3 PM (in Room 3) with Newsline producer Bill Pasternak, WA6ITF, as moderator.

ARRL will present an Amateur Radio public relations forum Sunday, May 18, 8:30-10 AM (in Room 1). There will be door prizes. The ARRL Technology Task Force session will follow at 10:15 until noon.

Hamvention will honor its 2003 award winners at an awards reception Saturday, May 17. Well-known contester Larry "Tree" Tyree, N6TR, will receive Hamvention's 2003 Amateur of the Year Award. Tyree is the creator, organizer, and promoter of the successful Kid's Day, now administered by the ARRL. He also developed the popular TR-LOG contest logging software. Jonathan Taylor, K1RFD, is the winner of Hamvention's 2003 Special Achievement Award. Hamvention's 2003 Technical Achievement Award goes to Dr Steve Dimse, K4HG.

Late news about the show is on the Hamvention Web site <http://www.hamvention.org>

==>SOLAR UPDATE

Solar sage Tad Cook, K7RA, Seattle, Washington, reports:

Disturbed conditions triggered by a continuous solar wind stream appear to go on and on, week after week, seemingly without end. Nice quiet conditions would result from a daily A index of 10 or lower. Average daily conditions near that level haven't been reported since the week of February 20-26 when the daily average A index was 11.1, or January 9-15 when it was 9.1.

Conventional wisdom says that disturbed conditions occur more often when the solar cycle has passed the peak and is headed down, and recent experience seems to bear this out. Recent forecasts for daily solar flux and planetary A index don't predict a daily A index below 10 until May 31.

Sunspot numbers for May 8 through 14 were 33, 23, 22, 47, 66, 59, and 75, with a mean of 46.4. 10.7 cm flux was 100.9, 97.1, 92.7, 91.5, 93.9, 96.1, and 96.3 with a mean of 95.5. Estimated planetary A indices were 30, 29, 43, 31, 18, 27, and 27, with a mean of 29.3.

==>IN BRIEF:

* This weekend on the radio: The US Counties QSO Party (SSB), the Anatolian RTTY Worldwide Contest, His Majesty the King of Spain Contest (CW) and the Baltic Contest are the weekend of May 17-18. JUST AHEAD: The CQ Worldwide WPX Contest (CW), the VK-ZL Trans-Tasman Contest (SSB) and the QRP ARCI Hootowl Sprint are the weekend of May 24-25. The Michigan QRP Memorial Day CW Sprint is May 26-27. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration is closed for the Level II ARRL Amateur Radio Emergency Communications on-line course (EC-002) that begins May 27, sponsored by United Technologies Corporation. Registration opens Monday, May 19, 12:01 AM EDT (0401 UTC), for the Level III Emergency Communications on-line course (EC-003). Registration remains open through the May 24-25 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, June 3. Thanks to a grant from United Technologies Corp, the $45 registration fee paid upon enrollment will be reimbursed after successful

completion of the Level III course. During this registration period, approximately 50 seats are being offered to ARRL members on a first-come, first-served basis. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to receive advance word of registration opportunities via e-mail. To take advantage, send an e-mail to prereg@.... On the subject line, include the course name or number (eg, EC-00#). In the message body, include your name, call sign, e-mail address, and the month you want to start the course. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce/> and the C-CE Links found there. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@...; 860-594-0340.

* ARRL Certification and Continuing Education course registration: Registration for the new ARRL VHF/UHF--Life Beyond the Repeater (EC-008) <http://www.arrl.org/cce/courses.html#ec008> and the High Frequency Digital Communications (EC-005) <http://www.arrl.org/cce/courses.html#ec005> courses opens Monday, May 19, 12:01 AM EDT (0401 UTC). Registration remains open through Sunday, May 25. Classes begin Tuesday, May 27. Registration for the ARRL Antenna Modeling (EC-004) <http://www.arrl.org/cce/courses.html#ec004> course remains open through Sunday, May 18. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....
[C-CE logo]

* ARRL to sponsor emergency communications course seminar in Nevada: The ARRL will offer a free Amateur Radio Emergency Communications course (ARECC) seminar Saturday, May 31, in conjunction with EMCOMM WEST 2003, an ARRL Pacific Division Operating Specialty Convention in Reno, Nevada. The seminar will not include the Level I course itself. This program is designed to explain in greater detail the duties of volunteer certification mentors, instructors and examiners of the Amateur Radio Emergency Communications courses and provide additional information for people considering these volunteer positions. The seminar will be held Saturday, May 31, 1-5 PM, in the South Reno Baptist Church Auditorium, 6780 S McCarran Blvd. (two blocks west of S Virginia Ave). Seating may be limited. Contact ARRL Emergency Communications Course Manager Dan Miller, K3UFG, <k3ufg@...>, (860-594-0340; fax 860-594-0259) if you plan to attend. Seminar attendance does not include admission to the convention, which is May 31. For more information on EMCOMM WEST 2003, visit the convention Web site <http://www.cvrc.net/emcommwest>.

* California ham radio antenna bill set for Senate hearing: The California Senate's Local Government Committee will hear public comment on the state's pending Amateur Radio antenna legislation, Assembly Bill 1228. The hearing is set for Wednesday, May 21, at 9 AM PDT. ARRL staffer and antenna expert Dean Straw, N6BV, is scheduled to testify on behalf of the proposed legislation. The measure would incorporate the essence of the limited federal preemption known as PRB-1 into California's statutes and

require localities to "reasonably accommodate" Amateur Radio communication. The bill cleared the California Assembly April 10 on a 67-0 vote. California is home to nearly 15 percent of the nation's Amateur Radio population. The bill's sponsor, Assemblyman Bob Dutton, is inviting letters of support to The Honorable Bob Dutton, State Capitol PO Box 942849, Sacramento, CA 94249-2063 (fax, 916-319-2163). Correspondents are requested to fax a copy to Peter Detwiler at the Senate Local Government Committee, 916-322-0298.

* Jerry Jennison, N5OKQ, SK: Jerry Jennison, N5OKQ, of San Angelo, Texas, died May 2 following an extended illness. He was 64. An ARRL member and REACT International Life Member, Jennison also was active in the Salvation Army Team Emergency Radio Network (SATERN) and served as SATERN coordinator for the Southern Territory of The Salvation Army. "This is a sad day for SATERN and for the many organizations that Jerry Jennison served in," said National SATERN Director Pat McPherson, WW9E. "Jerry was reflective of the 'Can Do' spirit of the amateur operator." Jennison also was a volunteer for the Red Cross and was a member of the San Angelo Amateur Radio Club. A memorial service was held on May 7.

* Lee Kitchens, N5YBW, SK: Lee Kitchens, N5YBW, of Ransom Canyon, Texas, died unexpectedly May 12. He was 73. An ARRL member, Kitchens served as ARRL West Texas Section Manager from July 2001 until October 2002. ARRL Field Organization/Public Service Team Leader Steve Ewald, WV1X, said he was "surprised and saddened" to learn of Kitchens' death. ARRL Field and Educational Services Manager Rosalie White, K1STO, said Kitchens "was dedicated to communicating important news to the ARRL West Texas Section hams, helping them be more active in the volunteer activities they enjoyed, and increasing the number of ARRL members." Kitchens also was an influential figure in the organization Little People of America (LPA) <http://www.lpaonline.org>, a nonprofit organization that provides support and information to people of short stature and their families. Kitchens was a past president of LPA, a foundation trustee, founder of the West Texas LPA chapter and an organizer and registrar for an upcoming LPA conference. He was LPA's vice president of membership at the time of his death. Kitchens also was a past president and long-time board member of the Human Growth Foundation <http://www.hgfound.org>) and a past mayor of Ransom Canyon, where the city hall is located on Lee Kitchens Drive. He also was a member of Lubbock County RACES/ARES and trustee of a local repeater. The family invites memorial donations to the LPA's newly established Lee Kitchens Memorial Fund, PO Box 65030, Lubbock, TX 79464-5030.--Bill Ricker, N1VUX

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely,

accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRL Web site <http://www.arrl.org/> offers access to news, informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled from The ARRL Letter.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Requesting an Instruction Manual:
If you cannot find the intended instruction manual you require on this download page, you can make a request to the Support Center to have it uploaded.
Please do not forget to write the model name of the intended instruction manual in your request mail.
It may take some time to prepare the requested manual, in such cases, please allow some time for us to upload it.
Thank you for your request.

1195. SARSAT

Yahoo group: m_a_r_s
Date: 2003-05-21 09:52:04 UTC
From: VU2UGO
Topic: 1195 Message: 1195

Around the world...around the clock...NOAA proudly stands watch. As an integral part of worldwide search and rescue, NOAA operates the Search & Rescue Satellite Aided Tracking (SARSAT) System to locate those in distress almost anywhere in the world at anytime and in most conditions.

The SARSAT system uses NOAA satellites in low-earth and geostationary orbits to detect and locate aviators, mariners, and land-based users in distress. The satellites relay distress signals from emergency beacons to a network of ground stations and ultimately to the U.S. Mission Control Center (USMCC) in Suitland, Maryland. The USMCC processes the distress signal and alerts the appropriate search and rescue authorities to who is in distress and, more importantly, where they are located. Truly, SARSAT takes the "search" out of search and rescue.

SATELLITE STATUS

United States Satellites:
SARSAT 4 (NOAA 11) (SSC# 19531) - Operational
SARSAT 6 (NOAA 14) (SSC# 23455) - Operational **

****
The ARRL Letter
Vol. 22, No. 21
May 23, 2003
****

IN THIS EDITION:

* +Operation on 60 meters to require prudence, caution
* +Good time had by all at Hamvention 2003
* +Malicious interference yields $12,000 fine
* +FCC proposes more 5-GHz spectrum for unlicensed use
* +Incumbent SMs returned in eight ARRL sections
* +QRP at "WARC Speed"
* Solar Update
* IN BRIEF:
This weekend on the radio
ARRL Certification and Continuing Education course registration
+National Hurricane Center's WX4NHC announces 2003 on-the-air test
California ham antenna bill clears Senate committee
Distracted driver legislation raising ham hackles in New Jersey
Hams wanted for new wildlife tracking projects
Ed Bissell, W3AU, SK
John H. Joseph, K3ISR, SK

+Available on ARRL Audio News

==========

==>60-METER OPERATION TO REQUIRE OPERATOR PRUDENCE, CAUTION

When the five channels of the new 60-meter amateur allocation become available later this year, Amateur Radio operators will have to learn some new operating habits and adopt some new on-the-air attitudes. The limited spectrum and stringent bandwidth requirements will mean amateurs will have to demonstrate their best behavior and operating skills if the Amateur Service ever hopes to get an actual band segment at 60 meters.

"In terms of Amateur Radio spectrum, we usually say, 'Use it or lose it,'" said ARRL CEO David Sumner, K1ZZ. "The watchword for 60-meter operators should be, 'Misuse it and lose it.'"

The channelized scheme--similar to the 5-MHz experimental operation under way in the United Kingdom<http://www.rsgb-hfc.org.uk/5mhz.htm>--puts unfamiliar technical compliance demands on US hams who have, until now, not had to worry much about frequency stability or transmitted audio bandwidth. The FCC has granted amateurs 5332, 5348, 5368, 5373, and 5405

kHz--the last channel common to the UK experimental operation's band plan. These are all "channel center frequencies," the National Telecommunications and Information Administration (NTIA) said in a March 13 letter to FCC Office of Engineering and Technology (OET) Chief Edmond J. Thomas. The NTIA, which administers federal government spectrum, opposed allocation of an actual ham band citing the ongoing spectrum requirements of federal licensees with homeland security responsibilities. The channels will be available to General and higher class licensees.

The NTIA says that hams planning to operate on 60 meters "must assure that their signal is transmitted on the channel center frequency." In general, the NTIA has advised, users should set their carrier frequency 1.5 kHz lower than the channel center frequency. According to the NTIA:

Channel Center Amateur Tuning Frequency
5332 kHz 5330.5 kHz
5348 kHz 5346.5 kHz
5368 kHz 5366.5 kHz
5373 kHz 5371.5 kHz
5405 kHz (common US/UK) 5403.5 kHz

ARRL Technical Relations Manager Paul Rinaldo, W4RI, says the assignment of these channels implies that amateurs now must adhere to certain frequency tolerances for their use. While the international Radio Regulations don't list these for the Amateur Service, he notes, they do stipulate tolerances on the order of 20 to 50 Hz for other services.

"We haven't been told anything specific about frequency tolerances for these channels but would probably annoy federal regulators if we strayed any more than 50 Hz from the assigned carrier frequencies," Rinaldo cautioned.

Keeping one's audio within the 2.8-kHz wide channel to comply with the 2K8J3E emission specification is another important issue. ARRL Laboratory Manager Ed Hare, W1RFI, believes prudence calls for not having baseband audio below 200 Hz nor greater than 2800 Hz--for a total bandwidth of 2.6 kHz. "That will probably keep us out of trouble," he said. Noting that the high-frequency response "can vary a lot from radio to radio," however, Hare recommended that amateurs play it conservatively.

Additionally, the FCC has restricted operation to USB only, with a maximum effective radiated power (ERP) of 50 W. The USB-only requirement stemmed from NTIA interoperability concerns. The NTIA wanted to make sure that federal users could copy and, if necessary, identify any amateur station using one of the 60-meter channels. As a result, the 60-meter frequencies will become the only ones available to the general amateur community that do not permit CW operation.

For the sake of this particular grant, the FCC said it would consider a half-wave dipole to have a gain of 0 dBd. In its letter to the FCC, the NTIA stipulated that radiated power should not exceed "the equivalent of 50 W PEP transmitter output power into an antenna with a gain of 0 dBd."

"Although this is less spectrum than the American Radio Relay League petition requested, this is the best we can do pending a definition of Homeland Security HF requirements," concluded Fredrick R. Wentland in the NTIA's letter to the FCC's OET.

Sumner has predicted that, over time, amateurs can and will "develop a record of disciplined, responsible use of the five channels in the public interest that will justify another look at these rather severe initial restrictions."

Just when amateurs will get their first crack at 60 meters is not yet clear. The changes to Part 97 go into effect 30 days after publication of the Report and Order (R&O) in The Federal Register, which has not yet happened. Publication could take anywhere from a few weeks to a few months. ARRL will announce a specific date as soon as it's known.

The FCC Report and Order in ET Docket 02-98 is available on the FCC's Web site <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-105A1.doc>.

==>ARRL ADDRESSES CONCERNS, UNVEILS "LOGBOOK OF THE WORLD" AT HAMVENTION

One day of rain failed to dampen spirits at Hamvention 2003, and the weekend was full of friendship, new products, haggling, learning and fun. An estimated 25,000 attendees inhabited the Hara Arena complex near Dayton, Ohio, for the largest gathering of hams in the Western Hemisphere.

The ARRL's concession buzzed with activity throughout the long weekend, as members took advantage of the chance to meet with League officers, field volunteers and Headquarters staff members, ask questions, buy books and other products, and, of course, to offer comments. ARRL CEO David Sumner, K1ZZ, said many questions centered around two topics: the new 5 MHz allocation and broadband over power line (BPL).

ARRL President Jim Haynie, W5JBP, addressed a large audience attending the ARRL forum May 17. Haynie fielded questions that centered on the health and future of Amateur Radio and homed in on youth recruitment in particular. Haynie gave an overview of the ARRL Amateur Radio Education and Technology Program <http://www.arrl.org/FandES/tbp/>, which puts ham radio resources, equipment and a curriculum into classrooms at no cost to schools. He also touched on League activities regarding BPL and spectrum defense <https://www.arrl.org/forms/fdefense/fdefense.html>.

Wielding stacks of QSLs, more than 150 applicants took advantage of the on-site the ARRL DXCC card-checking booth. ARRL Membership Services Manager Wayne Mills, N7NG, estimated that checkers reviewed more than 16,000 cards in just over two days' time. ARRL volunteers and staff also participated in a number of special-interest forums, with topics including DX, regulations, contesting, digital modes, youth education, RFI, and advanced technologies.

At the DX forum May 17, Mills formally introduced the long-awaited Logbook of the World (LOTW) <http://www.arrl.org/lotw> to the amateur public. The secure server system allows participating operators to upload logs and

confirm contacts for ARRL operating awards such as DXCC and WAS. The system will remain open for public beta testing through July 15, Mills said.

New product announcements are a big part of the Dayton experience, with 2003 proving no exception. Among the scores of offerings, ICOM unveiled the feature-filled IC-7800, heir apparent to its high-end IC-781. The IC-7800 is expected to be available by year's end. Elsewhere, Ten-Tec showed off its new Titan III amplifier, while Elecraft introduced its new series of VHF transverters.

At the TAPR Digital Forum, Gerald Youngblood, AC5OG, peered into the future of ham transceivers when he presented a fully software-defined radio that puts out 1 W of RF from the LF range to 60 MHz. Programming defines nearly every aspect of the radio, opening up the possibility of customizing the operating experience for different combinations of bands, modes and conditions.

==>OHIO HAM HIT WITH $12,000 FINE IN MALICIOUS INTERFERENCE CASE

Cooperation between Canadian and US amateurs has resulted in a $12,000 Notice of Apparent Liability for Forfeiture (NAL) from the FCC to an Ohio amateur. The FCC has alleged that Ronald E. Sauer, WE8E, of Bedford Heights violated Part 97 rules prohibiting deliberate and malicious interference, transmission of music and failure to identify. The case involved daily interference to the Trans Provincial Net <http://www.tpn7055.ca/>, a Canadian net that operates on 7.055 MHz.

"This was no small task and was accomplished with the help of many people from the US and Canada working together," said ARRL Great Lakes Vice Director Dick Mondro, W8FQT, who expressed thanks to all involved. In addition to TPN members, that included Radio Amateurs of Canada (RAC) <http://www.rac.ca> officials, Industry Canada, the FCC, ARRL Michigan <http://www.arrl.org/sections/?sect=MI> and Ohio <http://www.arrl.org/sections/?sect=OH> Section officials, ARRL Official Observers and members of the Cuyahoga Amateur Radio Society <http://www.cars.org/>. "This was indeed an example of teamwork in action and proves again that the FCC does care and continues to work with us to stop interference," Mondro added.

TPN Assistant Manager Jim Taylor, VA3KU, said the interference to the net had gone on for several months. "Our break came when the jammer decided to intensify his efforts by going to his local library and sending out repulsive and threatening e-mails to a few of our members," Taylor said. He and other Canadian hams were able to determine that the e-mails had come from a public library terminal in the Cleveland, Ohio, area. Taylor contacted CARS President Bob Check, W8GC, for assistance in zeroing in on the jammer.

Tracking down the signal source involved mobile direction-finding work by three CARS members, who passed along their findings to the FCC's Detroit Office late last January. Already alerted to the situation, the FCC's

Detroit Office had called on the Commission's High Frequency Direction Finding (HFDF) facility in Maryland. The HFDF group monitored jamming and the playing of music and narrowed down the search to an area near the intersection of Interstates 480 and 77 in the Cleveland area.

In the meantime, the FCC received the CARS report indicating that the interference was coming from Sauer's residence. On January 31, an FCC agent also used direction-finding techniques to track the source of the interference on 7.055 MHz to Sauer's home and conducted an inspection. The FCC said Sauer "admitted that he had been playing music and deliberately jamming the frequency of 7.055 MHz." Sauer "further admitted to jamming and playing music on this frequency on previous days."

Based on its findings, the FCC concluded that the $12,000 fine was justified. The FCC ordered Sauer to pay the fine within 30 days or file a written statement seeking a reduction or cancellation of the proposed forfeiture.

==>FCC PROPOSES ADDITIONAL 5-GHZ SPECTRUM FOR UNLICENSED USE

The FCC has proposed making another 255 MHz of 5-GHz spectrum available for unlicensed use at 5.470 to 5.725 GHz. Amateur Radio has a secondary allocation at 5.650 to 5.925 GHz, which it shares with government and nongovernment radars and--in part of the band--nongovernment fixed satellite uplinks. In a Notice of Proposed Rulemaking (NPRM) in ET Docket 03-122--approved May 15 but not yet released--the FCC suggested that the additional spectrum be made available for use by unlicensed National Information Infrastructure (U-NII) devices, including Radio Local Area Networks (RLANs), operating under Part 15 of the FCC's rules.

"Our action today furthers twin goals of the Spectrum Policy Task Force: promoting spectrum access and furthering development of unlicensed technologies," said FCC Chairman Michael Powell in a separate statement. "Once the backwater of baby monitors and cordless telephones, the unlicensed sector has developed into a hotbed of growth and innovation." The other four commissioners echoed Powell's enthusiasm in their own statements.

The FCC's action comes in response to a petition for rule making from the Wi-Fi Alliance--an industry coalition formerly known as the Wireless Ethernet Compatibility Alliance (WECA). If the FCC goes through with the proposal--and it appears likely that it will--Amateur Radio will be left with a 25-MHz segment at 5 GHz--5.825 to 5.850 GHz--that's not already earmarked for unlicensed services.

The ARRL has opposed previous WECA petitions for additional 5-GHz spectrum. The League plans to comment on the latest NPRM once the full text has been released.

The Commission said its action advances the policies set forth in last fall's Spectrum Policy Task Force Report that specifically recommended making available additional spectrum for unlicensed use.

==>INCUMBENT SECTION MANAGERS RETURNED IN EIGHT ARRL SECTIONS

Incumbent section managers will keep their offices for another two years in eight ARRL sections. Three current SMs handily won re-election in contested races. Ballots were counted May 20 at ARRL Headquarters.

In the Maryland/District of Columbia Section, Tom Abernethy, W3TOM, turned away a challenge from Vic Curtis, WA3YUV, 826 to 266 votes. Abernethy has been MDC SM since July 2001.

In the San Joaquin Valley Section, Charles McConnell, W6DPD, topped challenger Thomas M. "Mike" Zane, N6ZW. The final vote tally was 304 to 251. McConnell became SJV SM in 2002 when he was appointed to succeed Don Costello, W7WN. McConnell previously served as SJV Section Communications Manager/SM from 1976 until 1989, when he became Pacific Division Vice Director. He served as Pacific Division Director from 1990 until 1993.

In New Hampshire, Al Shuman, N1FIK, defeated Russell J. Santos, K1TSV, 478 to 95. Shuman previously served as NH SM from 1992 until 1999. His current term began in 2001.

Sitting ARRL section managers in five other sections were unopposed for election or re-election and were declared elected. They are Dick Flanagan, W6OLD, Nevada; Bill Hudzik, W2UDT, Northern New Jersey; Bob Beaudet, W1YRC, Rhode Island; Mel Parkes, AC7CP, Utah, and John Dyer, AE5B, West Texas.

All new terms of office begin July 1.

==>QRP WARC-SPEED DX CHALLENGE ANNOUNCED

Danny Eskenazi, K7SS, Ward Silver, N0AX, and the Western Washington DX Club--with the assistance of Bruce Horn, WA7BNM--have announced the year-long QRP "WARC-Speed DX Challenge." The objective is to work as many DXCC entities as possible using low power (QRP) on the so-called "WARC bands," 30, 17 and 12 meters.

The Challenge starts at 0000 UTC June 1, 2003, and ends at 2359 UTC May 31, 2004. For the purposes of the Challenge, QRP is defined as 5 W or less output on digital modes or CW and 10 W PEP on SSB. (AM or FM operators also are welcome.)

Certificates will be awarded for the top three totals from each CQ Zone in each of several categories for working 100 entities on any single band. Results will be posted monthly in the following categories: 17-meter CW, 17-meter phone, 17-meter digital, 17-meter total, 12-meter CW, 12-meter phone, 12-meter digital, 12-meter total, 30-meter CW, 30-meter digital, total CW, total phone, total digital, total overall. Participants may enter as many or as few categories as they wish.

The Challenge involves no QSL cards or cumbersome paperwork. At the end of each month, WA7BNM will post a score submittal form on the 3830 Score Submittal Web page <http://www.hornucopia.com/3830score/>. Participants will enter their totals and updated totals will be posted to the 3830

contest score reflector and CQ-contest reflectors (and be forwarded to the DX and QRP reflectors, as well). At the end of the year, participants will be able to download a nice certificate! The honor system rules, Silver said, and he notes the Challenge is not a contest.

For more information, contact Ward Silver, N0AX, n0ax@....

==>SOLAR UPDATE

Heliophile Carl Luetzelschwab, K9LA, Fort Wayne, Indiana, substitutes this week for Tad Cook, K7RA: During the reporting period--Friday, May 16, through Thursday, May 22--solar activity was low. Geomagnetic field activity was generally quiet to unsettled during the first half of the period, then increased to active to minor storm at the end of the period due to increased solar wind from coronal hole activity that reached Earth on May 21.

Solar activity is forecast to be low for the next three days. Geomagnetic field activity for the next three days is forecast to have roughly a 40-percent probability of being active, with slightly quieter conditions as we move into the weekend.

Sunspot numbers for May 15 through 21 were 97, 97, 81, 79, 75, 77 and 79, with a mean of 83.6. The 10.7-cm flux was 99.2, 102.6, 102.4, 109, 114.7, 117.1 and 119.3, with a mean of 109.2. Estimated planetary A indices were 23, 9, 9, 10, 12, 12 and 20, with a mean of 13.6.

==>IN BRIEF:

* This weekend on the radio: The CQ Worldwide WPX Contest (CW), the VK-ZL Trans-Tasman Contest (SSB) and the QRP ARCI Hootowl Sprint are the weekend of May 24-25. The Michigan QRP Memorial Day CW Sprint is May 26-27. JUST AHEAD: The Six Club World Wide Contest and the Great Lakes QSO Party are the weekend of May 31-June 1. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the Radio Frequency Interference (EC-006) and Satellite Communications (EC-007) courses opens Monday, May 26, 12:01 AM EDT (0401 UTC). Registration will remain open through Sunday, June 1. Classes begin Tuesday afternoon, June 3. Registration for the ARRL HF Digital Communications (EC-005) and VHF/UHF--Life Beyond the Repeater (EC-008) courses remains open through Sunday, May 25. Those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future can sign up to be advised via e-mail in advance of registration opportunities. To take advantage, send an e-mail to prereg@.... On the subject line, indicate the course name or number (eg, EC-00#) and the month you want to start the course. In the message body, provide your name, call sign, and e-mail address. Please do not send inquiries to this

mailbox. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* National Hurricane Center's WX4NHC announces 2003 on-the-air test: The National Hurricane Center's Amateur Radio station, WX4NHC (formerly W4EHW), will conduct its 2003 hurricane season on-the-air station test Sunday, June 1, 1300-2200 UTC. The event will mark the first time the NHC uses its new WX4NHC call sign. WX4NHC Amateur Radio Coordinator John McHugh, KU4GY, says the purpose of the annual station test is to check out all of the WX4NHC radio, computer and antenna equipment using as many modes and frequencies as possible. Some RFI monitoring also will be done. "We will also be testing some new antennas and equipment that are being installed for this coming season," McHugh said. "A few new operators will receive hands-on training." WX4NHC will operate on HF, VHF and UHF. HF operation will use this schedule: 1300 UTC--3.911 and 7.268 SSB and VHF/UHF FM; 1400 UTC--14.325 MHz SSB, VHF 147.000 repeater/UHF 442.350 repeater; 1500 UTC--144.200 MHz SSB, 14.070 MHz PSK31; 1700 UTC--14.325 and 21.325 MHz SSB, VHF/UHF IRLP Node 9210; 1800 UTC--21.325 and 28.525 MHz SSB; 2000 UTC--14.325 and 144.200 MHz SSB. CW operation will be on 14.035, 21.035 and 28.035 MHz (times will vary). Stations working WX4NHC are asked to provide a signal report, location and brief weather report. Non-hams are invited to submit their actual weather using the On-Line Hurricane Report Form <http://www.fiu.edu/orgs/w4ehw/WX-form1.html>. QSL cards are available via W4VBQ. Include an SASE with all requests.

* California ham antenna bill clears Senate committee: California's pending Amateur Radio antenna bill, AB 1228, this week got a thumbs up from the California Senate Local Government Committee. The panel voted 7-0 in favor of moving the legislation to the Senate floor. The measure already has passed the California Assembly. ARRL staff member and antenna expert Dean Straw, N6BV, credited excellent preparation by the bill's sponsor, Assemblyman Bob Dutton, and his staff. "Several of the senators made special mention about how they appreciated the efforts of radio amateurs over the years, and how valuable the Amateur Radio Service was, particularly in these dangerous times," said Straw, who testified on behalf of the measure. The effort now will shift to Senate passage and ensuring that Gov Gray Davis signs the legislation. Davis vetoed an earlier measure in 2000 citing its cost to taxpayers for conducting required studies and preparing a model ordinance for localities. Straw says AB 1228 mirrors the wording of PRB-1 and does not carry any additional costs to the taxpayers this time around.

* Distracted driver legislation raising ham hackles in New Jersey: An effort by some New Jersey lawmakers to amend that state's current laws regarding distracted driving has some hams upset and worried that the revisions could affect Amateur Radio mobile operation. Assembly Bill 2798, introduced last September by Assemblyman John S. Wisniewski of Middlesex County, would clarify that a "distracted driver may be charged with reckless, careless or unsafe driving" for engaging in what many motorists

would consider routine activities, such as listening to the radio or a CD or cassette player. Wisniewski's bill would amend three laws already on the books and give police the authority "when so warranted" to charge a person for engaging in "distracting behavior." The list includes, but is not limited to, "the use of communications technology" as well as "locator devices, AM/FM radios, compact disc players, audio cassette players, video players, Citizens Band radios and dispatch radios." The list also includes engaging in personal grooming, eating or drinking, reading or "tending to unsecured pets." A statement with the bill declares that "a substantial number of drivers in our fast-paced, multi-tasking society are utilizing communications technology and engaging in non-technological distractions while operating motor vehicles." The statement says that "various studies" have concluded that engaging in these activities while driving "contributes to motor vehicle accidents." ARRL Hudson Division Director Frank Fallon, N2FF, whose territory includes Northern New Jersey, calls the measure "a very bad idea." Fallon says he's been encouraging ARRL members to write, telephone, fax or personally contact their New Jersey Assembly members to let them know how they feel. "The bottom line is that New Jersey ARRL members have to get involved," Fallon said. Contact information for New Jersey lawmakers is available on the New Jersey Legislature Web site <http://www.njleg.state.nj.us/members/legsearch.asp>.

* Hams wanted for new wildlife tracking projects: ARRL Amateur Radio Direction Finding Coordinator Joe Moell, K0OV, says ham radio assistance is needed for three new wildlife tracking projects. Moell says a biologist at the University of South Florida at Tampa (USF) is studying Florida burrowing owls, thought to range in Florida and the Florida Keys. Some Florida burrowing owl chicks are being radio-tagged, and USF wants volunteers throughout the Southeast to listen for the VHF radio tags in an attempt to determine the owls' routes and final destinations. The second project involves Mexican long-nosed bats. For about a month beginning in mid-June, Bat Conservation International wants volunteers to join a team that will track the bats' movements in and around Big Bend National Park in Texas. Project three involves a study of orphaned great horned owls conducted by the Heard Natural Science Museum and Wildlife Sanctuary and the University of North Texas. After being raised at the sanctuary, up to two dozen of these owls will be released into the wild this summer with radio tags attached. Volunteers are needed to monitor for the radio tags, especially in the Denton and Collin county areas. Moell's Homing In Web site <http://www.homingin.com> has details and contact information on all three projects.

* Ed Bissell, W3AU, SK: Well-known contester Ed Bissell, W3AU (ex-W3MSK), of Brooksville, Florida, died May 10. He was 83. The Daily DX <http://www.dailydx.com> reports that in his heyday Bissell, an ARRL Charter Life Member, ran the world's top multi-multi contest station on the shore of the Potomac River just south of Washington, DC. Many of the top contesters in the US got their start in serious contesting at W3MSK/W3AU. Photos of the station are available on the Potomac Valley Radio Club Web site <http://pvrc.org/W3AU/w3au.htm>.

* John H. Joseph, K3ISR, SK: John H. Joseph, K3ISR, died May 10 of an apparent heart attack. He was 60. Since 2000, Joseph served as president of the University of Maine at Machias (UMM) <http://www.umm.maine.edu/>. He was stricken just as graduation exercises were getting under way at the branch campus in down east Maine, although students were not informed of his death until after the ceremony. Prior to his arrival at UMM, Joseph, a Pennsylvania native, served in top administrative positions at Penn State--his alma mater--and at Roosevelt University. Joseph is credited with helping to raise the enrollment at UMM during his relatively short tenure. A memorial scholarship is being established at UMM. Contributions may be sent to the Advancement Office, UMM, 9 O'Brien Ave, Machias, ME 04654.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE:

HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Untitled Document
MUMBAI AMATEUR RADIO SOCIETY

MUMBAI AMATEUR RADIO SOCIETY will conduct a live demonstration and give a power point presentation on Ham Radio on Sunday 1st June 2003 at Wood Land hotel, L.B.S Marg, Opp. Johnson Tiles, Near Mulund Check Naka, Thane at 10 am.

The demo will include actual communications on HF with National and International stations, contacts on VHF with local stations and a brief demo on digital communications via Ham Radio.The Power Point presentation will cover introduction to Ham Radio, Ham Radio & disaster communications and Ham Radio & Digital communications.

MARS will also start its ham radio classes at Thane and at Churchgate commencing on 15th June 2003. It will be a Sunday batch from 9am to 1pm for 10 Sundays only.

All members are requested to kindly enrol your family members and friends for the ham radio classes. Please also note that MARS will conduct only these 2 batches this year, hence the admission will be on first come basis due to limitation of seats in both our classes (Thane & Churchgate). So enrol now or you will have to wait till next year batch.

For further details please contact on Prashant - 20510070 - Micky - 9820063882. - Huzefa - 9892039969.

==>ARRL RELEASES UPDATED "LOGBOOK OF THE WORLD" BETA SOFTWARE

"Logbook of the World" (LoTW) beta testers for the most part have reacted
positively to the latest version of ARRL's secure electronic
contact-confirmation system, but some users have run into difficulties.
Responding to problems encountered by some early beta testers, the League
has released an updated beta version of LoTW that should resolve these
issues. Beta testers are encouraged to download the new version of the
software, 1.02beta, from the LoTW page <http://www.arrl.org/lotw/>.

"While most installations and subsequent e-mailing and uploading of log
data have gone flawlessly, as expected there have been problems," said
ARRL's Dave Patton, NT1N, who's been a part of the LoTW project from the
start. He says the LoTW server software failed to recognize many of the
```

new digital mode designations, such as MFSK-16 and JT6M. This caused fatal errors while digitally signing logs.

Patton says the beta update allows users to "map" any mode designation to one of the four main Amateur Data Interchange Format (ADIF) mode categories--CW, phone, image, and digital--without changing the actual log data. He said the beta upgrade also will correct other log data problems that caused fatal errors in signing a log, including allowing the signing process to complete the "good" parts of a log without crashing.

Beta testing got under way May 15. So far, the 1300 or so beta testers have uploaded upward of five million contacts to the LoTW database. Once it's ready later this year, LoTW will provide a way for amateurs worldwide to qualify for awards such as DXCC or WAS without having to first collect and submit hard-copy QSL cards.

One beta tester from Brazil lavished praised on the LoTW project. "I applaud the creators of LoTW," he wrote. "This will be, for sure, the salvation of DXing and award collecting. Please keep up this essential work!" For now, log data are limited to contacts made no more than five years ago (on or after January 1, 1998) to get a representative sampling, Patton explained.

Patton promised "many more bells and whistles" over the weeks ahead. One of those will meld LoTW with DXCC. He noted that a major DXCC software revision, now under way, will need to be completed first.

Logging software developers now can get documentation and a Windows DLL library--as well as complete source code for the TQSL software--at the SourceForge Web site <http://sourceforge.net/projects/trustedqsl/>.

To join the beta testing program, visit the Logbook of the World--Getting Started site <http://www.arrl.org/lotw/getstart.html>. The beta testing period wraps up in mid-July.

All QSO data submitted to LoTW will be deleted when the beta test period ends, and users will have to obtain new digital certificates to submit log data to LoTW once it 'goes live.' As part of the security process for the live system, passwords will be mailed to US licensees at the address that appears in the FCC database. Users should make sure the FCC has their current mailing address.

Amateurs can modify their address online or via US mail by using instructions available on the FCC Web site <http://wireless.fcc.gov/services/amateur/licensing/changingaddress.html>. ARRL members may submit license modifications or renewals through the ARRL VEC <http://www.arrl.org/fcc/forms.html>.

==>ASTRONAUT THRILLS HOMETOWN YOUNGSTERS VIA AMATEUR RADIO

NASA ISS Science Officer Ed Lu, KC5WKJ, told youngsters at his hometown alma mater via ham radio this week that zero gravity (G) feels a bit like going over the top on a roller coaster. The May 27 Amateur Radio on the

International Space Station (ARISS) contact with Klem Road South School in Webster, New York, was the first for a member of the two-ham ISS Expedition 7 crew and for Lu, who had attended the kindergarten through grade 5 school some three decades ago.

"If you've ever been on a roller coaster and you go over the top of the roller coaster you feel that feeling like you're kinda light--you're floating up on your feet," Lu explained. "It's almost exactly like that but a lot stronger." Weightlessness "feels great." After some time in zero gravity, however, "it feels like your legs weigh a ton," he added, describing his own post-space shuttle experience.

Lu told the youngsters that while he was speaking to them from NA1SS, he was floating--and relaxing--about a foot above the floor and about to have a lunch of lamb, a chicken omelet and cookies for dessert. "I like the food up here a lot," he remarked later. Most of the current cuisine is Russian, he said, but he anticipated some Chinese and Hawaiian fare to arrive aboard the next Progress supply rocket. The ISS crew typically eats three meals a day, he said.

The lack of gravity does make it necessary to secure everything, including eating utensils, so they don't float off. Another downside of zero G is that the astronauts aboard the ISS must exercise regularly. "If you don't exercise, all of your muscles get smaller, and that includes your heart," he explained in response to one boy's question.

In all, Lu answered about a dozen questions, although apparent signal dropout and noise plagued the last minute or two of the QSO, rendering his replies barely intelligible. Lu advised the youngsters that, while expertise in science and math was most important to becoming an astronaut, skills and specialties vary among those in the Astronaut Corps. "The common thing among all of them is that all of them did pretty well at whatever it was they chose to do," he said.

With the ISS was over Hawaii at the time, radio contact with NA1SS was established via Nancy Rocheleau, WH6PN, in Honolulu, who arose before 3 AM to serve as control operator for the QSO. An MCI teleconferencing circuit linked the school with WH6PN. ARISS is an international program with participation by ARRL, AMSAT and NASA.

==>ARRL RECOGNIZES MAJOR DONORS

The second-annual ARRL Donors' Recognition Reception afforded those assembled the opportunity to meet an architect of US naval policy--and a fellow ham. The event was held May 15, just prior to the start of Hamvention 2003, at the Wright-Patterson Air Force Base officers' club in Dayton, Ohio.

After a welcome and Maxim Society presentation by League President Jim Haynie, W5JBP, ARRL CEO David Sumner, K1ZZ, introduced the keynote speaker, retired US Navy Vice Adm John Scott Redd, K0DQ. In 36 years of active duty, Redd commanded eight organizations, led the recommissioned

Fifth Fleet and held several senior policy positions at the Pentagon.

"We were very lucky to have Vice Admiral Redd as our speaker," said ARRL Chief Development Officer Mary Hobart, K1MMH. "Scott captivated the guests with amazing stories of his service to our country." Redd also discussed the importance of the ARRL Education and Technology Program-"The Big Project"--to the future of Amateur Radio.

Also honored for their generosity were ARRL Vice President Kay Craigie, N3KN, and her husband Carter, N3AO. The Craigies were recognized for their lifetime support of ARRL with membership in the Maxim Society. The Maxim Society is made up of those who have made more than $10,000 in lifetime contributions to ARRL programs. "Their extraordinary generosity is reflected in all areas of ARRL fund raising," Hobart said. "ARRL is pleased to have the opportunity to thank all of our major donors who have supported all of our efforts to support Amateur Radio so generously."

==>HAMS ON THE "HOT SEAT" AT ARRL HAMVENTION PR FORUM

Attendees at the ARRL public relations forum at Hamvention 2003 enhanced their knowledge of Amateur Radio public relations and had a lot of fun in the process. The forum May 18 was organized by members of the League's Public Relations Committee. Several members of that panel also were on hand to participate.

For the "fun" part, the group developed its own version of "Who Wants to be a Millionaire?" Audience members volunteered to sit on the hot seat to answer a variety of PR-related questions and compete for prizes. Contestants collected "Hiram Bucks" for continuing to come up with correct answers.

Three lucky forum attendees walked away with hand-held radios generously donated by ICOM and Yaesu. Several ARRL products were awarded as door prizes.

PR Committee members also set up a question-and-answer panel discussion. Among other pieces of useful information, attendees learned which photo formats media outlets prefer, how to get local coverage during a major disaster and how to encourage media reporters to cover Amateur Radio events.

In opening remarks, ARRL Media Relations Manager Jennifer Hagy, N1TDY, talked briefly about the League's public relations program and her duties at ARRL Headquarters. PR Committee Chairman Jeff Reinhardt, AA6JR, moderated the forum. Participating committee members included David Greer, N4KZ, Gary Pearce, KN4AQ, Gary Johnston, KI4LA, Rich Moseson, W2VU, Sherri Brower, W4STB, and Jim McDonald, KB9LEI.

==>MAINE GOVERNOR GETS A TASTE OF HAM RADIO

Maine Gov John Baldacci praised the dedication and value of Maine's Amateur Radio operators as he met April 24 with members of the Ellsworth Amateur Wireless Association and other amateurs. He also checked into a

75-meter traffic net during his visit and promised to renew efforts--begun a couple of years ago--to get his ham ticket.

The governor assured the group that the Maine Emergency Management Agency (MEMA) relies on Amateur Radio operators to support the statewide communications system. Baldacci pointed out that communication will be the most difficult and expensive part of the state's homeland security strategy. While some federal money has been provided for basic protective equipment needs, the governor said Maine would rely on Amateur Radio volunteers if primary telecommunication systems go down.

Baldacci also pledged to squelch any legislation banning cell telephone use by motorists that also prohibited hams from talking on microphones. Such a bill was soundly defeated in the Maine Legislature two years ago, but there's a similar bill in the current legislative session. On the other hand, Baldacci was not very receptive to the idea of free or discounted amateur call sign vanity plates, which now cost $35. Like many states, Maine is dealing with severe budget problems, he explained.

The Ellsworth Amateur Wireless Association presented Baldacci with a Certificate of Appreciation for his support of Amateur Radio during his tenure as US Congressman. ARRL Section Manager Bill Woodhead, N1KAT, also gave the governor a Certificate of Merit from the ARRL for his support.

Woodhead also provided Baldacci with the latest edition of the ARRL Technician study guide, Now You're Talking. Baldacci said he'd add the goal of getting his ticket to his to-do list and would rely on the encouragement and help of Maine's hams to achieve it.--Phil Duggan, N1EP

==>HAM-PIANIST CLOSING IN ON HALFWAY POINT IN RUN

Concert pianist Martin Berkofsky, KC3RE, is closing in on the halfway point in his CelebrateLifeRun <http://www.celebrateliferun.com> from Tulsa to Chicago. A cancer survivor and an ARRL member from Northern Virginia, Berkofsky set out April 9--his 60th birthday--on an 860-mile jog to celebrate his recovery from cancer and to raise money for research into the disease. Berkofsky--who has ham gear, including APRS, along with him--was 380 miles into his journey and some 20 miles south of Hermann, Missouri, as of mid-week.

Berkofsky reports he's made many new ham radio friends in his travels, and he's hoping for an invitation to operate Field Day with an Illinois ham club group. "So far he has found local folks--sometimes Amateur radio enthusiasts, sometimes cancer survivors--to put him up for the evening or drive him to his next base camp," said Joni Shulman, assistant research director of the Cancer Treatment Research Foundation in Tulsa. "Thanks to the generosity of total strangers, Martin has spent only two or three nights in motels." The CTRF will benefit from money raised during Berkofsky's run.

Berkofsky has scheduled some benefit concerts along his route, including Rolla, Missouri, May 30; June 2 in Hermann, Missouri; and June 12 in St

Louis (at Webster University). "St Louis will mark halfway through the run with my target arrival in Chicago 11 August," Berkofsky told ARRL. "I have managed to always keep a few days ahead and to run a few extra miles most days, weather allowing." Follow his progress via the Internet <http://www.celebrateliferun.com/route.cfm>.

==>ARRL SEEKS COMPUTER-BASED MULTIMEDIA PRESENTATIONS, VIDEOS

ARRL Field and Educational Services (F&ES) is seeking Amateur Radio presentation programs or slide shows that utilize Microsoft PowerPoint or similar computer-based slide-viewing software. F&ES also is interested in VHS and digital video programs to add to materials F&ES offers hams through the ARRL Video Series <http://www.arrl.org/FandES/ead/materials/videos.html>.

Topic choice can be any Amateur Radio topic of interest to hams or targeted for a non-ham community, including demonstrations and tutorials on various topics. The ARRL Web site's Multimedia Frequently Asked Questions page <http://www.arrl.org/FandES/ead/materials/visuals.html> has further information. The League's video library needs media in forms that are easily portable, easily presented and up-to-the-minute. As file size and download speed may be an issue for downloading submissions from the ARRL Web site, F&ES wants to offer the best submissions by topic collection in CD-ROM format.

Presentations and slide shows submitted should be placed on disc or CD-ROM (file zipping is acceptable). Videos should be in VHS or DVD format and not exceed 20 minutes in length. Submissions must contain original material and should not use music, video clips or copyrighted materials owned by others without appropriate permissions.

Submissions should include a cover sheet describing the program, system requirements and file sizes and noting any use of materials used with the permission of others. Submissions accepted for use and distribution by ARRL will require the signing of a release form provided by ARRL. CDs selected for distribution would be made available to clubs and interested individuals for the cost of duplicating, shipping and handling.

Send presentations or slide shows on disc, CD-ROM, VHS tape or DVD to Multimedia Project, c/o Mary Lau, N1VH, ARRL Field and Educational Services, 225 Main St, Newington, CT 06111. For further information on this project, contact Mary Lau, N1VH, mlau@....

==>SOLAR UPDATE

Sun watcher Tad "I See the Light" Cook, K7RA, Seattle, Washington, reports: While this bulletin is being written Friday, May 30 at around 0600 UTC, a severe geomagnetic storm rages. For the past three reporting periods (three hours each), the planetary K index has been 8, indicating extremely active conditions.

A late forecast at 0359 UTC on May 30 shows the projected planetary A index for May 30 through June 2 as 60, 40, 25 and 20, followed by an A of 30 for June 3-5, 35 for June 6, and 30 again on June 7.

On May 29 Earth was hit by coronal mass ejections at 1215 UTC and 1900 UTC. A third coronal mass ejection may hit Earth May 30. Rather than working HF, now seems a good time for 6-meter operations and observing aurora. Solar flux over the next few days (May 30 through June 2) is predicted at 145, 140, 135 and 125.

Sunspot numbers for May 22 through 28 were 110, 87, 84, 51, 65, 116 and 116, with a mean of 89.9. The 10.7-cm flux was 118.4, 117.9, 116.8, 121.1, 125.1, 128.8 and 130.2, with a mean of 122.6. Estimated planetary A indices were 25, 21, 22, 22, 18, 26 and 36, with a mean of 24.3.

==>IN BRIEF:

* This weekend on the radio: The Six Club World Wide Contest and the Great Lakes QSO Party are the weekend of May 31-June 1. JUST AHEAD: The VK-ZL Trans-Tasman Contest (CW), the IARU Region 1 Field Day (CW) and the QRP TAC Sprint are the weekend of June 7-8. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration opens Monday, June 2, 12:01 AM EDT (0401 UTC), for the on-line Level I Emergency Communications course (EC-001). Registration remains open through the June 7-8 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, June 17. Thanks to a United Technologies Corporation grant, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the course. During this registration period, approximately 200 seats are being offered to ARRL members on a first-come, first-served basis. A new service now allows those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future to receive advance word of registration opportunities via e-mail. To take advantage, send an e-mail to prereg@arrl.org. On the subject line, include the course name or number (eg, EC-00#). In the message body, include your name, call sign, e-mail address, and the month you want to start the course. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce/> and the C-CE Links found there. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@...; 860-594-0340.

* ARRL to sponsor emergency communications course seminar in Texas: The ARRL will offer a free Amateur Radio Emergency Communications course (ARECC) seminar Friday, June 20, in conjunction with the ARRL National Convention at HamCom in Arlington, Texas. The seminar will not include the Level I course itself. This program is designed to explain in greater detail the duties of volunteer certification mentors, instructors and examiners of the Amateur Radio Emergency Communications courses and provide additional information for those considering these volunteer

positions. The seminar will be Friday, June 20, 1-5 PM, Room M5. Seating may be limited. If you plan to attend, contact ARRL Emergency Communications Course Manager Dan Miller, K3UFG, k3ufg@arrl.org; 860-594-0340; fax 860-594-0259. For registered CMs, CIs and CEs who attend, mileage may be reimbursable up to $35. Seminar attendance does not include admission to the convention, June 20-22. For more information on the 2003 ARRL National Convention, visit the HamCom Web site <http://www.hamcom.org>.

* Gerald G. Schmitt, KK5YY, SK: Jerry Schmitt, KK5YY (ex-KC5EGG), of Los Alamos, New Mexico, died unexpectedly May 23 after an apparent heart attack. He was 60. Schmitt was especially well-known within the AMSAT and APRS communities and was the designer and primary promoter of the portable Arrow antenna used for satellite work; he also had a hand in developing antennas for AO-40. "Jerry was a very good friend of AMSAT's," said AMSAT President Robin Haighton, VE3FRH. At Hamvention 2003 Schmitt assisted at the AMSAT booth and did a live ham satellite demonstration. "He was just a great guy all around and full of humor," Haighton said. "We're all going to miss him." An ARRL member, Schmitt served as a net control operator for the New Mexico Swapnet and took part in providing ham radio communication during the Cerro Grande fires in New Mexico. In 2001, Schmitt managed Earth-station duties during an Amateur Radio on the International Space Station (ARISS) school group contact from the New Mexico Museum of Natural History and Science in Albuquerque. He was nearing retirement from Los Alamos National Laboratories and planning to move with his wife, Barbara, KD5CGU, to Alaska. Arrangements are pending.--Brian Mileshosky, N5ZGT, provided some information for this report

* Digital Communications Conference issues call for papers: Technical papers are solicited for presentation at the 22nd annual ARRL-TAPR Digital Communications Conference set for September 19-21, 2003, in Hartford, Connecticut. Papers also are needed for publication in the conference Proceedings, published by the ARRL. Presentation at the conference is not required for publication. The deadline to submit papers is August 5. Submissions go to Maty Weinberg, KB1EIB, ARRL, 225 Main St, Newington, CT 06111, or to maty@.... Paper submission guidelines are available on the TAPR Web site <http://www.tapr.org/dcc/>.

* Echo satellite a no-go for 2003 launch: AMSAT-NA President Robin Haighton, VE3FRH, says launch of the ECHO Amateur Radio satellite now under construction will be delayed about six months, so the satellite will not be launched this year as previously hoped. "This is not an AMSAT delay, but we have learned that the launch organization does not have a primary payload for their fall launch," Haighton said in this month's "President's Letter" via AMSAT News Service. "On the positive side, it gives us a few more months to complete the work on ECHO, complete the software and complete the tests. It may also slightly reduce our overall launch costs."--AMSAT News Service

* Ham radio exempted from Texas tower legislation: Hams in Texas are breathing a sigh of relief after lawmakers exempted Amateur Radio

licensees from Senate Bill 1261, also known as the LeClair-Jennings Act. The measure relates to proposed construction, marking and location of wireless communication towers. The Texas House of Representatives this week passed SB 1261--it earlier had gained Senate approval--and it now goes to Gov Rick Perry <http://www.governor.state.tx.us/> for his signature. The text of the legislation is available on the Texas Legislature Web site <http://www.capitol.state.tx.us/>.

* Two-man ISS crew easing into operational routine: Now a month into their Expedition 7 mission, the crew of the International Space Station has moved beyond an orientation and familiarization schedule and into an agenda of operations that reflects the range of activities they'll pursue during the remaining five months of their flight. Expedition 7 Commander Yuri Malenchenko, RK3DUP, and NASA ISS Science Officer Ed Lu, KC5WKJ, last week completed various maintenance tasks. This week, Malenchenko and Lu--the first two-person crew to stay aboard the ISS--will replace a storage battery in the Zvezda Service Module. As training for a contingency space walk, Malenchenko and Lu will practice getting into--and out of--their American spacesuits, a task they typically had help with during training on the ground. No spacewalks are planned for this increment, however. On May 21 Malenchenko and Lu discussed mission progress and scientific research with the BBC World Service and with WHEC-TV in Rochester, New York, near Lu's hometown of Webster. The following day, they answered questions from students gathered at the Adler Planetarium in Chicago. On May 27, Lu spoke via Amateur Radio with students at the Klem Road South School, his home town alma mater (see "Astronaut Thrills Hometown Youngsters via Amateur Radio" elsewhere in this issue). More information on the Expedition 7 crew's activities is available on NASA's Human Spaceflight Web site <http://spaceflight.nasa.gov/>.--NASA

* Ham-meteorologists win NOAA Administrator's Award: Scott Mentzer, N0QE, who's the meteorologist in charge at the National Weather Service's Goodland, Kansas, office, is a recipient of this year's NOAA (National Oceanic and Atmospheric Administration) Administrator's Award. The award cites "major achievements in strengthening the relationship between the National Weather Service and volunteer Amateur Radio (ham) operators involved in hazardous weather communications throughout the United States." Former Goodland NWS Office meteorologist Dennis Hull, KB0NYC, now of Pendelton, Oregon, is another award recipient. While at Goodland, he was warning coordination meteorologist and worked closely with ham weather spotters. Mentzer called the ARRL "a great supporter and cosponsor of the national SKYWARN Recognition Day each December," which Mentzer has helped organize and develop. Mentzer and Hull will be treated to an expenses-paid trip to Washington, DC, to pick up their awards.

* Newfoundland club promoting interest in LF work: The Marconi Radio Club of Newfoundland is promoting interest in low-frequency (LF) work on 136 kHz The club reports it's breaking new ground on the long waves by conducting experiments aimed at assisting Radio Amateurs of Canada (RAC) <http://www.rac.ca> to acquire a 136-kHz amateur allocation and promoting

interest in LF work. The RAC has endorsed and Industry Canada has approved an experimental license proposal drafted by club member Joe Craig, VO1NA. Since then, an LF transmitting station--the first in the Newfoundland-Labrador Section--has been on the air at 135.830 kHz as MRCN members conduct various experiments including crossband contacts. Signals from the station have been copied by W1TAG near Boston and by G3NYK in England. The FCC recently decided against granting the 136-kHz allocation for US amateurs that ARRL had requested and the FCC had proposed granting in 2002. Visit the MRCN Web site <http://www.ucs.mun.ca/~jcraig/mrcn.html> for further information.

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRL Web site <http://www.arrl.org/> offers access to news, informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled from The ARRL Letter.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do

this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

1208. Protective Packaging for free

Yahoo group: m_a_r_s
Date: 2003-06-04 06:44:10 UTC
From: Nirav Sanghavi
Topic: 1208 Message: 1208

Dear YL/OM,

I have access to some good quality protective packaging foams of various thicknesses. I would like to give away the same (obviously) for free to the club and its members.

It is used during transporting and safely storing ham radio equipment.

I will carry the same on this Sunday meeting (Nilesh announced that second sunday meeting is on unless otherwised specified) OR give it to someone who can carry it if I can't make it.

Please take what you like irrespective.

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The Monthly meeting of May 2003 will be held on 8th June 2003 at 10:00 hours at B.S.Bengelle Girls High School.

The Agenda for the meeting is as follows:-
1. Ham Radio Classes Next batch at Churchgate & Thane.

2.Applications for choice of callsign and Licences of our last batch. (Churchgate & Thane).

Please attend the meeting on time.

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

MUMBAI AMATEUR RADIO SOCIETY will conduct a live demonstration and give a power point presentation on Ham Radio at 4pm on Sunday 8th June 2003. at B.S Bengelle Girls School, Opp. USIS Library, Churchgate .

The demo will include actual communications on HF with National and International stations, contacts on VHF with local stations and a brief demo on digital communications via Ham Radio.

The Power Point presentation will cover introduction to Ham Radio, Ham Radio & disaster communications and Ham Radio & Digital communications.

MARS will also start its ham radio classes at Thane and at Churchgate commencing on 15th June 2003. It will be a Sunday batch from 9am to 1pm for 10 Sundays only.

For further details please contact on Prashant - 20510070 or Huzefa - 9892039969

E-Mail : info@...

All members are requested to follow up with your friends and relatives interested in joining the batch.

==>NEW 60-METER BAND TO BECOME AVAILABLE JULY 3!

The new five-channel 60-meter amateur allocation becomes available to US
Amateur Radio operators at midnight (12:00 AM) local time on July 3. The
local time designation means that amateurs in the US territory of Guam
likely will be the first to get a crack at the new band.

The new band will be a secondary allocation--federal government users are
primary--and the first on which the only permitted mode will be
upper-sideband (USB) phone (emission type 2K8J3E). The FCC last month
announced it would grant hams access to five discrete 2.8-kHz-wide
channels instead of the 150 kHz-wide band ARRL had requested and the FCC
initially proposed. The League remains optimistic, however, that Amateur
Radio eventually may be able to enjoy a band segment with multiple mode
privileges at 60 meters. ARRL CEO David Sumner, K1ZZ, has said that in the
meantime hams will have to be on their best behavior when taking advantage
```

of the limited channelized allocation, open to General and higher class licensees.

The FCC has granted amateurs center-channel frequencies of 5332, 5348, 5368, 5373 and 5405 kHz--the last channel common to the amateur experimental operation under way in the United Kingdom <http://www.rsgb-hfc.org.uk/5mhz.htm>. To be "on channel," users of 60 meters should set their transmitted carrier frequency 1.5 kHz lower than the channel-center frequency. In terms of day-to-day operation, the new band is expected to resemble the sort of channel sharing typical on local repeaters.

ARRL Laboratory Manager Ed Hare, W1RFI, says hams need to be very careful if they're considering modifying their current transceiver or transmitter for 5 MHz. The ARRL advises that members check with the appropriate equipment manufacturers regarding specific modification information. Some modifications not only may void the warranty but could affect or alter a transmitter's operation in unpredictable ways.

"Hams need to be sure that any modifications put them right on the desired channel," Hare said. "Most hams are used to just having to think about band edges, so on other bands, if a mod were a bit 'off,' all operators would need to ensure is that they are not transmitting outside the band."

Hare recommended that on 5 MHz amateurs remain within "a few tens of Hertz" of suppressed-carrier accuracy. He also pointed out that hams have a mandate not to have any of their signal occupy spectrum outside the assigned 2.8 kHz channels.

Noting that high-frequency audio response can vary considerably from radio to radio, Hare has suggested restricting occupied channel audio bandwidth to 2600 Hz, rolling off below 200 Hz on the low end and above 2800 Hz on the high end.

Last-minute opposition to the granting of a band segment at 5 MHz came last year from the National Telecommunications and Information Administration (NTIA), which cited the ongoing spectrum requirements of federal government licensees having homeland security responsibilities. The NTIA administers spectrum allocated to the federal government. A compromise between the FCC and the NTIA resulted in the limited, channelized allocation.

The NTIA selected the channels the FCC authorized to minimize the possibility of interference to federal government users, and it dictated the use of USB so that federal government users--who also use only USB--could readily identify amateur stations if necessary.

The FCC has set maximum power at 50 W ERP and said it would consider a typical half-wave dipole to exhibit no gain.

==>PRESIDENT HAYNIE TO TESTIFY FOR AMATEUR RADIO SPECTRUM PROTECTION ACT

ARRL President Jim Haynie, W5JBP, will testify June 11 before the House Subcommittee on Telecommunications and the Internet. Haynie will speak on behalf of the Spectrum Protection Act 2003, HR 713, at the request of the bill's sponsor, Rep Michael Bilirakis (R-FL). The measure would require the FCC to provide "equivalent replacement spectrum" to Amateur Radio in the event the Commission reallocates amateur spectrum.

"Amateur Radio has been in the forefront of technological innovation since the advent of wireless," Haynie said this week. "It's in the best interests of our nation that ham radio has spectrum to operate. At some point in time, if we continue to lose spectrum, where is the spectrum going to come from to enable continued experimentation and innovation? Or for emergency communications?"

Haynie this week received his formal invitation to appear before the subcommittee. He'll get about 10 minutes to address the lawmakers. The 11 AM hearing at which Haynie will testify--"The Spectrum Needs of Our Nation's First Responders"--will convene to address public safety spectrum needs. Subcommittee Chairman Fred Upton (R-MI) agreed earlier this year with a request from Bilirakis to include an opportunity for a member of the Amateur Radio community to testify. Upton also told Bilirakis that he shares his interest in protecting Amateur Radio. The panel is a subcommittee of the House Energy and Commerce Committee chaired by Rep Billy Tauzin (R-LA).

Haynie says he's looking forward to the opportunity to state the League's case. Upton's willingness to hear testimony on the bill is considered critical to enhancing the measure's credibility, and it marks a major step toward getting HR 713 through Congress this year.

The Senate version of the Amateur Radio Spectrum Protection Act, S 537--introduced by Michael Crapo (R-ID)--got a boost earlier this year when Senate Communications Subcommittee Chairman Conrad Burns (R-MT)--the expected architect of the Senate's spectrum management legislation--signed on as a cosponsor. Burns' support suggests that the measure now has his attention and could convince others to follow suit, although that hasn't happened yet.

The Spectrum Protection Act would amend the Communications Act to require the FCC to provide "equivalent replacement spectrum" to Amateur Radio and the Amateur-Satellite Service in the event of a reallocation of primary amateur allocations, any reduction in secondary amateur allocations, or "additional allocations within such bands" that would substantially reduce their utility to amateurs. The bills point out Amateur Radio's volunteer role in providing emergency communication during disasters and emergencies.

HR 713 has attracted 31 cosponsors while S 537 has three so far. Haynie continues to encourage ARRL members to urge their senators and representatives and to sign on as cosponsors. Cosponsorhip lends support to legislation while it's in committee. "Letters and e-mails are the key to getting legislation passed," Haynie says. A sample letter is available on the ARRL Web site <http://www.arrl.org/govrelations/arspa.html>. Those

writing their lawmakers are asked to copy their correspondence to the League via e-mail <specbill03@...>.

The text of HR 713 and S 537 is available via the Thomas Web site <http://thomas.loc.gov/>.

==>ARRL, DEPARTMENT OF HOMELAND SECURITY TO INK STATEMENT OF AFFILIATION

ARRL and the Department of Homeland Security (DHS) <http://www.dhs.gov/dhspublic/> will sign a Statement of Affiliation (SoA) at the League's 2003 National Convention later this month in Texas. The convention will be held June 20-22 at the Arlington Convention Center in conjunction with Ham-Com <http://www.hamcom.org>. Since both ARRL and DHS view community disaster preparedness and response as top priorities, they will pledge mutual support for Citizen Corps--a community-based training and outreach initiative that brings together volunteers and first responders.

"This is all part of the bigger picture of getting emergency communications, aligned with what our government needs," said ARRL President Jim Haynie, W5JBP, who will sign the SoA on the League's behalf. "Amateur Radio stands ready to serve the country as needed in times of emergency."

Chief Operating Officer of the Emergency Preparedness and Response Directorate Ron Castleman will represent the DHS at the signing and serve as the lead speaker during the ARRL Forum, Saturday, June 21, at 10 AM. The forum will take place in an unnumbered room that's to the right of the Ham-Com registration area, not in Room M5 as originally scheduled.

Programs under the Citizen Corps umbrella are aimed at helping communities prevent, prepare for and respond to terrorism, public health issues and disasters.

The Statement of Affiliation will call on ARRL and DHS to collaborate in several areas, including raising public awareness of Amateur Radio as a public safety resource and providing training and accreditation for Amateur Radio emergency communications. The DHS and the League also will work together to promote formation and assist Citizen Corps councils in education, training and volunteer service opportunities that support first responders, disaster relief organizations and community safety efforts.

A schedule of Ham-Com/2003 ARRL National Convention programs is available on the Ham-Com Web site <http://www.hamcom.org/programs/Programs.pdf>.

==>40-METER "REALIGNMENT" TOPS WRC-2003 AMATEUR RADIO ISSUES

When delegates gather June 9 in Geneva, Switzerland, for World Radiocommunication Conference 2003 (WRC-03), Amateur Radio will enjoy robust representation. The International Amateur Radio Union (IARU) is looking to WRC-03 to resolve the longstanding issue of a harmonized worldwide 40-meter amateur allocation. In addition, the IARU has taken positions on several other issues of importance to hams.

"Forty meters is the biggie," says ARRL CEO David Sumner, K1ZZ, who will attend the month-long international assembly in the role of administrative officer of the IARU observer delegation headed by President Larry Price, W4RA. "It's complicated, controversial and involves multiple radio services, and there's simply no way of predicting what the outcome will be."

Citing its desire to "meet the needs of communications for humanitarian assistance," the IARU has expressed strong support for a realignment of the band to make available to hams globally 300 kHz of spectrum in the vicinity of 7 MHz.

While Region 2 amateurs--including US hams--now enjoy 7.000 to 7.300 MHz, hams in most of the rest of the world--Regions 1 and 3--may use only 7.000 to 7.100 MHz. Methods to get the issue off the dime must address the incompatibility arising from how, where and on what timetable the broadcasters in Regions 1 and 3 should be shifted to higher frequencies while continuing to meet the needs of fixed and mobile services in the band.

Other Amateur Radio-related agenda items include proposed revisions to Article 25 of the Radio Regulations. Article 25 details the requirements for Amateur Radio and includes the obligation to demonstrate Morse code proficiency to operate below 30 MHz. Sumner said he expects the WRC-03 delegates to delete the international requirement, although administrations could continue to require Morse proficiency if they wished to do so.

The IARU favors a revision to Paragraph 25.6 to incorporate an ITU Recommendation (ITU-R M.1544) by reference to establish a minimum international standard for Amateur Radio licensing. The IARU also supports adding new provisions urging administrations to take steps to allow amateur stations to prepare for and meet communication needs to support disaster relief and to permit individuals licensed in another country to operate temporarily while in their territory. The IARU also supports giving greater flexibility to administrations in the formation of Amateur Radio call signs.

Expressing concern over interference potential, the IARU opposes allocating any spectrum to the Earth Exploration Satellite Service (Active) to deploy spaceborne synthetic aperture radars (SARs) in the 430 to 440 MHz band. Amateur Radio is co-primary at 430 to 440 MHz in Region 1 and in several countries in Region 2.

As an observer at the conference, the IARU can only request that ITU member-states take its views into consideration when deciding on WRC-03 agenda items. ARRL has launched a special WRC-03 campaign <http://www.arrl.org/defense> to help generate the funds needed to continue the defense of Amateur Radio spectrum. Sumner said "unquantifiable thousands of hours by volunteers and staff members" have gone into WRC-03 preparations.

ARRL Technical Relations Manager Paul Rinaldo, W4RI, and ARRL Technical Relations Specialist Jon Siverling, WB3ERA, will serve on the US delegation. More than a dozen other Amateur Radio licensees are expected to be in Geneva to help represent Amateur Radio. WRC-03 concludes July 4. More information on WRC-03 is available on the ITU WRC-03 Web page <http://www.itu.int/ITU-R/conferences/wrc/wrc-03/index.asp> and on the FCC Web site <http://www.fcc.gov/ib/wrc-03/>.

==>HAMVENTION REPORTS ATTENDANCE DOWN IN 2003

Hamvention reported June 4 that attendance for this year's 52nd show was 22,168, down a bit more than 10 percent from last year's crowd. "This is based on the number of admission tickets issued and exhibitor and staff badges issued," said a statement from the office of Hamvention Production Manager Garry Matthews, KB8GOL. Matthews told ARRL that weather played a big factor in attendance this year.

"Our biggest contributing factor to the drop was the near-constant rain on Saturday," he said. "We had a whole day washed out."

On the plus side, Matthews said, Hamvention 2003 came close to selling out vendor spaces, and many vendors reported that they had a good year, despite the smaller crowd.

The 2003 number marks the third year in a row that Hamvention's attendance had dipped. Attendance at last year's 50th anniversary event was 24,832, down about 5 percent from 2001's crowd of 26,151. The crowd size climbed to 28,804 in 2000, the year of the ARRL National Convention at Hamvention.

Matthews said Hamvention expects to wrap up negotiations within the next three weeks on a new, two-year contract with Hara Arena, Hamvention's home since the 1960s. The anticipated contract, in conjunction with support from local hotels and motels and area municipalities, "would allow Hamvention to stay in the Dayton area for the foreseeable future," Matthews' office said.

Hamvention 2004 will be held May 14-16. For more information, visit the Hamvention Web site <http://www.hamvention.org>.

==>KID'S DAY II IS JUNE 21!

The second Kid's Day of 2003 will be June 21, from 1800-2400 UTC. There's no limit on operating time. The twice-annual event, held in January and June, offers a chance for amateurs to invest in the future of Amateur Radio by participating in a simple, but rewarding, on-the-air event. Now in its ninth year, each running of Kid's Day typically attracts more than 1000 participants.

Kid's Day is intended as an opportunity to share Amateur Radio with young people--licensed or not--in the hope that they'll enjoy the experience and possibly pursue their own license in the future.

Activity for Kid's Day <http://www.arrl.org/FandES/ead/kd-rules.html> takes place on 20, 15 and 10 meters and can include local 2-meter

repeaters. It's an opportunity to introduce your own youngsters, neighborhood kids and nieces and nephews to participate to the magic of ham radio and perhaps spark a lifelong love for the hobby.

Kid's Day is not a contest, and patience is a must. The role of the licensee and control operator is to help with the basics, keep an eye on the technical aspects of the operation, observe third-party traffic agreements and be sure to ID at the proper intervals. In this event, it's quality of the contacts that counts, not quantity.

The suggested exchange for Kid's Day is first name, age, location and favorite color. It's okay to work the same station again if the operator has changed. Call "CQ Kid's Day." Suggested frequencies are 14,270 to 14,300, 21,380 to 21,400 and 28,350 to 28,400 kHz, and 2-meter repeater frequencies with permission from your area repeater sponsor.

All participants are eligible to receive a colorful certificate. Visit the ARRL Kid's Day Survey page <http://www.arrl.org/FandES/ead/kids-day-survey.html> to complete a short survey and post your comments. You will then have access to download the certificate page or send a 9x12 SASE to Boring Amateur Radio Club, PO Box 1357, Boring, OR 97009.

Originated by the Boring Amateur Radio Club <http://jzap.com/k7rat/>, the event now is sponsored and administered by the ARRL with the cooperation and assistance of the BARC.

==>"MR HAMVENTION" FRANK SCHWAB, W8OK, SK

Well-known top-flight contester and CW operator Frank Schwab, W8OK, of Dayton, Ohio, died May 30 after a lengthy illness. He was 77. In 1952 and then president of the Dayton Amateur Radio Association, Schwab was among the organizers of the first Hamvention. Schwab subsequently became known around Dayton as the "father of Hamvention" or "Mr Hamvention."

Schwab had attended every Hamvention but the most recent one in May, during which he was hospitalized. An ARRL Life Member, he also belonged to the Society of Wireless Pioneers and the Quarter Century Wireless Association. As a founder and member of the Southwestern Ohio DX Association, he was involved in planning the annual DX banquet held in conjunction with Hamvention. Schwab was Hamvention's Amateur of the Year in 1978.

A World War II Navy veteran radioman, Schwab was first licensed in 1946 as W8YCP and, owing in part to his considerable CW skill (he could copy 55 WPM), he soon rose to the top of the DXCC ranks (376 DXCC entities confirmed) and eventual membership in the CQ DX Hall of Fame.

Survivors include his wife, Carolyn, 12 children, 30 grandchildren and 3 great grandchildren. Four of his survivors are hams. They include his daughter Joanne Hubbard, N8QMP, grandchildren Bobbie Anderson, KC7RWX, and Sarah Anderson, KC7MRO, and son-in-law Jack Hubbard, NI8N.--information

provided by Jack Hubbard, NI8N

==>SOLAR UPDATE

Propagation prognosticator Tad "Don't Let the Sun Go Down on Me" Cook, K7RA, Seattle, Washington, reports: More crazy space weather this week. Average daily sunspot numbers and solar flux both were down, and the average daily A index was up. Some have expressed a lot of angst about the solar wind, solar flares, stormy conditions and resulting absorption, but VHF operators are loving it.

Average daily planetary A index compared to the previous week was up over 50 percent to 37.1. The stormiest day was Thursday, May 29, with a planetary A index of 89. Late in the day the planetary K index was 8--which is exceptional.

We should enter a new solar wind stream over this weekend, June 7 and 8. Predicted planetary A index for June 6-12 is 15, 20, 30, 30, 25, 20 and 15. Solar flux forecast for the same days is 115, 118, 120, 120, 122 and 124. As we move toward summer, expect daytime MUF to continue to decline. While 15 meters should decline during the daytime, 20 meters should be good from North America toward the Pacific late into the evening.

Sunspot numbers for May 29 through June 4 were 98, 62, 57, 66, 61, 54 and 74, with a mean of 67.4. The 10.7 cm flux was 137.8, 117.2, 113.1, 112.3, 121.4, 114.5 and 105.6, with a mean of 117.4. Estimated planetary A indices were 89, 49, 17, 19, 39, 26 and 21, with a mean of 37.1.

==>IN BRIEF:

* This weekend on the radio: The VK-ZL Trans-Tasman Contest (CW), the IARU Region 1 Field Day (CW) and the QRP TAC Sprint are the weekend of June 7-8. JUST AHEAD: The ARRL June VHF QSO Party, the ANARTS World Wide RTTY Contest, the Portugal Day Contest, the World Wide South America CW Contest, the Asia-Pacific Sprint (SSB) and the West Virginia QSO Party are the weekend of June 14-15. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the ARRL Antenna Modeling (EC-004) course opens Monday, June 9, 12:01 AM Eastern Daylight Time (0401 UTC) and will remain open through Sunday, June 15. Class begins Tuesday, June 17. Those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future can sign up to be advised via e-mail in advance of registration opportunities. Send an e-mail to prereg@.... On the subject line, indicate the course name or number (eg, EC-00#) and the month you want to start the course. In the message body, provide your name, call sign, and e-mail address. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE links found

there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* ARRL Emergency Communications course registration: Registration is closed for the Level I ARRL Amateur Radio Emergency Communications on-line course (EC-001) that begins June 17 and is sponsored by the United Technologies Corporation. Registration opens Monday, June 9, 12:01 AM Eastern Daylight Time (0400 UTC), for the Level II Emergency Communications on-line course (EC-002). Registration remains open through the June 14-15 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, June 24. Thanks to United Technologies Corporation, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the Level II course. Approximately 75 seats are being offered to ARRL members on a first-come, first-served basis. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce/> and the C-CE Links found there. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@...; 860-594-0340.

* ARRL to sponsor emergency communications course seminar in Oregon: The ARRL will offer a free Amateur Radio Emergency Communications course (ARECC) seminar Friday, June 13, in conjunction with the ARRL Northwest Division Convention, SeaPac, in Seaside, Oregon. The seminar will not include the Level I course itself. This program is designed to explain in greater detail the duties of volunteer certification mentors, instructors and examiners of the Amateur Radio Emergency Communications courses and provide additional information for those considering these volunteer positions. The seminar will be held June 13, 1-5 PM. Seating may be limited. Contact ARRL Emergency Communications Course Manager Dan Miller, K3UFG, k3ufg@..., 860-594-0340; fax 860-594-0259, if you plan to attend. For registered CMs, CIs and CEs who attend, mileage may be reimbursable up to a total of $35. Seminar attendance does not include admission to the convention, which is June 13 through June 15. For more information on SeaPac, visit the convention Web site <http://www.seapac.org>.

* FCC corrects comment, reply comment dates in BPL proceeding: The FCC says comment and reply comment deadlines in its Broadband over Power Line (BPL) Notice of Inquiry (ET Docket 03-104) published May 23 in the Federal Register were incorrect. In a correction issued June 3, the FCC announced that comments from the public in this proceeding are due on or before July 7, 2003. Reply comments are due on or before August 6, 2003.

* NorCal, NJQRP merge to form American QRP Club: The NorCal QRP Club and the New Jersey QRP Club have joined forces, effective June 4, to form The American QRP Club. A larger, more comprehensive single journal, The Homebrewer, will replace QRPp and QRP Homebrewer. The new club already has begun to consolidate kitting operations as well, and a new Web site <http://www.a-qrp.org> is in the offing. Continuing will be the two QRP forums, Atlanticon and Pacificon, and the NJQRP and NorCal will continue

to plan and execute their respective forums, funded via the American QRP Club. Detailed information is available on the American QRP Club's temporary Web site <http://www.njqrp.org/a-qrp/index.html>.

* Vote on QST Cover Plaque award: The winner of the QST Cover Plaque Award for May was Allen Baker, KG4JJH, for his article "The Black Widow--A Portable 15 Meter Beam." Congratulations, Allen! The winner of the QST Cover Plaque award--given to the author--or authors--of the best article in each issue--is determined by a vote of ARRL members. Voting takes place each month on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/qstvote.html>. Cast a ballot for your favorite articles in the June issue of QST. Voting ends June 30.

* Corrections: The story "ARRL Releases Updated 'Logbook of the World' Beta Software" that appeared in The ARRL Letter, Vol 22, No 22 (May 30, 2003), incorrectly indicated an approximate beta testing termination date. Beta testing will wrap up later this year, but no specific date has been determined. Also, the story should have said, "Patton says the beta update will allow users to 'map' any mode designation to one of the valid Amateur Data Interchange Format (ADIF) modes or to one of the LoTW mode categories--CW, phone, image, and digital--without changing the actual log data." Another story in the same edition, "Hams On The 'Hot Seat' at ARRL Hamvention PR Forum," incorrectly named one of the manufacturers that donated hand-held radios as prizes for the public relations forum. The manufacturers were Icom and Alinco.

* Clarification: The article "Washington Ham Wins Inaugural Goldfarb Memorial Scholarship" that appeared in The ARRL Letter, Vol 22, No 19 (May 9, 2003) failed to accurately describe the nature of this scholarship award and how the actual award is determined. The Goldfarb Memorial Scholarship award is calculated by taking into account the college's cost (tuition, room, board and books) less the expected family contribution <http://www.fafsa.ed.gov/>http://www.fafsa.ed.gov/> and any other scholarship awards. The Goldfarb Memorial Scholarship award normally will be at least $10,000. The award in any given year is capped by the money available through investment income. Among other requirements, the student recipient also must maintain a minimum GPA, stay with a major that matches the Goldfarb Memorial Scholarhip terms of reference and supply an updated Student Aid Report. The award is paid to the school on a semester/quarter basis. Applications for the 2004 award will be accepted starting October 1, 2003. See the ARRL Foundation Web site <http://www.arrl.org/arrlf/> for further information.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely,

accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRL Web site <http://www.arrl.org/> offers access to news, informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled from The ARRL Letter.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

==>PRESIDENT HAYNIE TESTIFIES BEFORE CONGRESSIONAL SUBCOMMITTEE

ARRL President Jim Haynie, W5JBP, testified June 11 on Capitol Hill on
behalf of the Spectrum Protection Act of 2003, HR 713. The ARRL initiative
would require the FCC to provide "equivalent replacement spectrum" to
Amateur Radio if the FCC reallocates primary amateur frequencies, reduces
any secondary amateur allocations, or makes additional allocations within
such bands that would substantially reduce their utility to amateurs.
Haynie was the last of 11 scheduled witnesses to speak during the
Subcommittee on Telecommunications and the Internet hearing, "The Spectrum
Needs of Our Nation's First Responders."

"We are indeed a first responder," Haynie said on behalf of the nation's
some 680,000 Amateur Radio operators. Ham radio is more than "just having
fun playing on the radio," he told the panel, a subcommittee of the House
Energy and Commerce Committee chaired by Rep Billy Tauzin (R-LA). "It also
```

produces capable, trained volunteer communicators in systems of emergency telecommunications that are impervious to disasters of all sorts," Haynie said. "These volunteers are ready to respond--and do respond immediately--when all other systems of communications fail, including public safety communications whey they're overloaded, destroyed or lack interoperability."

Among other examples, Haynie pointed out how Amateur Radio operators answered the call on September 11, 2001, in New York City, at the Pentagon and at the Western Pennsylvania crash site of the fourth hijacked airliner. Hams also assisted federal authorities in the debris search following the February 1 shuttle Columbia disaster, Haynie pointed out, and aided in the response to tornadoes in the Midwest and South earlier this year.

Haynie told the subcommittee that hams have lost more than 100 MHz of VHF and UHF spectrum over the past 15 years and that another nearly 360 MHz of VHF and UHF spectrum "has been substantially compromised." Haynie said hams have shared spectrum successfully with government users on VHF and UHF and have been able to "make do with less," but "that concept has reached a breaking point with our service," he added. The 2.4 GHz area, once left largely to amateurs, in recent years has become "polluted" with wireless activity, Haynie told the panel.

"Interoperability" was the watchword of the day at the subcommittee hearing, which got under way at 11 AM EDT and continued well into the afternoon. Several witnesses testified that a lack of interoperability among public safety responders at disaster scenes--including the World Trade Center--prevented warning those in danger and resulted in a tragic loss of life.

Haynie was not alone in offering supportive words about Amateur Radio. HR 713 sponsor Michael Bilirakis (R-FL), quoted a paragraph from the submitted testimony of Norman Jacknis of the Westchester County, New York, Department of Information Technology. "In the first hours following the attack of September 11, 2001, the only way we could coordinate the sharing of firefighting, medical examiner, health, and information technology resources with New York City officials was through the highly trained, volunteer Amateur Radio (ham) operators," Jacknis said. "This irreplaceable resource must be protected from incursion by other interests."

One of the two amateur licensees in Congress, Rep Greg Walden, WB7OCE (R-OR)--a subcommittee member called for a halt to the "astonishing" erosion of amateur spectrum. "Time and again, if you find an emergency, you find a ham radio operator," Walden said.

FCC Office of Engineering and Technology Chief Edmond Thomas also cited the contribution of Amateur Radio operators to public safety. "The ham radio community has offered invaluable service to first responders during emergency situations," the OET chief said.

A Senate version of the Amateur Radio Spectrum Protection Act, S 537, was introduced earlier this year by Sen Michael Crapo (R-ID). The Senate bill is being considered by the Commerce, Science and Transportation Committee, but no hearing on the measure has been set. The text of HR 713 and S 537 is available via the Thomas Web site <http://thomas.loc.gov/>.

==>WRC-03 UNDER WAY IN GENEVA

The International Telecommunication Union's (ITU) World Radiocommunication Conference 2003 got under way June 9 in Geneva, Switzerland. More than 2600 delegates and other participants are expected to attend the four-week conference, chaired by Dr Veena Rawat of Canada.

"Several items on the conference agenda are of great importance to radio amateurs, so the International Amateur Radio Union has fielded its largest team of observers at an ITU conference in more than a decade," noted IARU Secretary (and ARRL CEO) David Sumner, K1ZZ, who's part of the IARU delegation in Geneva. In addition to Sumner, the core IARU team consists of IARU President Larry Price, W4RA, Wojciech Nietyksza, SP5FM, Michael Owen, VK3KI, and Ken Pulfer, VE3PU. Past ITU Radiocommunication Bureau Director Robert W. Jones, VE7RWJ, is serving as a consultant to the IARU.

Approximately a dozen other radio amateurs representing their national IARU member-societies are participating on national delegations, along with members of IARU regional executive committees who are serving on delegations and in other capacities. Dozens of other radio amateurs are present at WRC-03 in a wide range of professional capacities.

Amateur Radio is but a small part of the conference, which is trying to complete work on more than 40 agenda items. Three are especially important to Amateur Radio: Realignment of 7 MHz allocations, revision of the regulations governing the amateur and amateur-satellite services--including the Morse code requirement for HF operation, and consideration of an allocation for satellite-borne synthetic aperture radars (SARs) in the 70-cm band.

Two other agenda items with potentially great impact are the drafting of an agenda for the next WRC, scheduled for 2007 and the revision of footnotes to the Table of Frequency Allocations. A member of the IARU core team has been assigned to follow each of these five items, but the greatest focus is on 7 MHz, Sumner said.

Committee 4, chaired by Germany's Eberhard George, DL7IH, is handling the critical agenda items for Amateur Radio except for the SARs request.

Sumner said that, while there's been plenty of informal discussion about the issues, no final decisions have been made yet. "It is important to remember that nothing is final until the second reading of a document in the Plenary, which--in the case of controversial issues--will not take place until the final week of the conference, June 30-July 4," he said.--IARU news release

==>ON THE ROAD FOR ARISS

Three new hams based at NASA's Johnson Space Center (JSC) have been spending more than two-thirds of their workdays on the road highlighting Amateur Radio on the International Space Station (ARISS) and other NASA-supported educational programs. Aerospace education specialists for the NASA Aerospace Education Services Program (AESP) headquartered at JSC, the ham trio's combined territory includes Texas, Oklahoma, Kansas, Nebraska, North Dakota, South Dakota, New Mexico and Colorado. Forty education specialists work out of NASA regional centers nationwide, serving kindergarten through college-level educators.

"NASA personnel are involved in amazing research and engineering programs truly unique to the agency," said Ota Lutz, KD5UQZ <lutz@....edu>, whose territory includes Kansas and Nebraska. "The opportunity to share a glimpse inside those programs with education audiences and observe the excitement it generates provides my greatest source of satisfaction."

Lutz, Joan Sanders, KD5UQW <jsanders@ aesp.nasa.okstate>, and Angelo Casaburri, KD5UQS <casaburri@ aesp.nasa.okstate.edu>--and Linus Guillory <linus@ aesp.nasa.okstate>--travel to schools and museums as AESP representatives. Casaburri's area is North and South Dakota, while Guillory's is Colorado and Oklahoma.

AESP specializes in providing free professional development workshops for teachers of science, mathematics, geography and technology. Workshops introduce participants to hands-on activities and NASA curriculum support materials.

Lutz, Sanders and Casaburri studied for and passed their licensing exams in December, not only because they have a lot of respect for Amateur Radio but because they believe in the benefits of the ARISS program. "ARISS offers lots of opportunities, has a fairly simple application procedure and an in-place support network--local ham clubs--and is available to nearly anyone, regardless of geographic location," Lutz said.

Fellow aerospace education specialist Sanders agreed. "Without exception, the men and women of the Astronaut Corps are heroes to school children," said Sanders, who travels in Texas and New Mexico. "Amateur Radio makes contact possible with our astronauts on orbit for audiences around the world, and it provides a method of direct access that otherwise may be impossible."

They've found that teachers respond very positively to the their presentations. As Lutz explained, "Our focus is on providing inquiry-based hands-on activities that are aligned with state educational standards and utilize inexpensive materials. NASA Enterprise topics are the driving theme, so our material is current and of high interest to students, teachers and the general public."

NASA's Aerospace Education Services Program began in 1961. Oklahoma State University, the current contract administrator, recently approved the three new hams for a portable ham station to take on the road. The aerospace education specialists want to give teachers an idea of how easy

it is to operate a ham station, and they're hoping local radio club members will partner with schools.

Amateurs may check the NASA AESP Web site <http://aesp.nasa.okstate.edu/jsc/aesp> and the OSU AESP Web site <http://www.okstate.edu/aesp/AESP.html> to learn what the specialists have to offer and where they expect to be during the summer.--Rosalie White, K1STO

==>WA8SME IS NEW COORDINATOR OF ARRL'S "THE BIG PROJECT"

Mark Spencer, WA8SME, has joined the ARRL Headquarters staff as the new coordinator of the ARRL Amateur Radio Education and Technology program--also known as "The Big Project." He succeeds Jerry Hill, KH6HU, who has returned to Hawaii.

Spencer, whose first day on the job was June 5, said he's happy to have the chance to continue to work with both young people and Amateur Radio. "This office has the great opportunity to be a facilitator in integrating wireless technologies into the schools," he said. "Ham radio is a facet that can open doors in that area, and I think that ham radio can help make the curriculum relevant for kids."

A ham for 38 years, Spencer has taught math, science, computers and social science at the middle school, high school and community college levels, often integrating Amateur Radio into his lessons.

ARRL Field and Educational Services Manager Rosalie White, K1STO, said she's thrilled to have someone of Spencer's caliber to guide the Education and Technology Program. "The sky's the limit, dependent only on the program's funding by generous ARRL members and corporations," White said.

White pointed out that Hill--The Big Project's first coordinator--was instrumental in guiding 50 pilot schools into the program and oversaw its development beyond the initial plans into a viable program that already has touched the lives of nearly 1400 young people.

Prior to starting his teaching career in 1993, Spencer served 21 years in the US Air Force, retiring with the rank of Lt Colonel after a career that included work in reconnaissance and intelligence.

The goal of the Education and Technology Program is to use Amateur Radio as a vehicle to improve the quality of education by providing a curriculum focused on wireless communications. The project emphasizes integration of technology, math, science, geography, language skills and social responsibility within a global society. It also provides a complete Amateur Radio station for schools accepted into the program.

The continued success of the ARRL Amateur Radio Education and Technology Program depends on individual and corporate contributions. To learn more, visit the ARRL Development Office secure Education and Technology Program donor Web site <https://www.arrl.org/forms/development/donations/education/index.html>.

For more information on The Big Project, visit the ARRL Amateur Radio Education and Technology Program Web site <www.arrl.org/FandES/tbp> or e-mail Spencer <mspencer@...>.

==>FCC WRITES PART 15 DEVICE USERS ABOUT ALLEGED INTERFERENCE TO AMATEUR

Hold the phone! The FCC has written two Northern Virginia residents to follow up on complaints from a local amateur who's alleging that he's on the receiving end of harmful interference from telephone devices with the capability to support multiple cordless remotes. Both are unlicensed Part 15 consumer electronics devices made by a well-known manufacturer. The complaints from Bernie Keiser, W4SW--an ARRL member in Vienna, Virginia, near Washington, DC--represented a bit of a turnabout from the typical interference scenario, where ham operation occasionally generates complaints of interference to cordless consumer equipment.

"Harmful interference to a licensed radio service from a Part 15 device is a violation of FCC rules," warned Sharon Bowers, deputy chief of the Consumer Inquiries and Complaint Division of the FCC's Consumer and Governmental Affairs Bureau. Bowers explained that the equipment was classified as an "intentional radiator"--a device that generates an RF signal as part of its normal operation. In separate letters June 2 to the two Part 15 users--both also Vienna residents--she pointed out that if their cordless telephone devices cause harmful interference to licensed spectrum users, "the operator of the device is responsible for correcting the interference, ceasing operation, if necessary, whenever such interference occurs."

Keiser told ARRL that the interference--in the form of broadband noise from 2400 to 2450 MHz--impairs his ability to hear the AO-40 downlink and beacon on the band. "I have a 2.4-GHz cordless telephone that does not cause problems," he said. According to Keiser, the devices in question electronically poll various remote stations, and it's the polling function that apparently causes the noise. He was able to track down the noise sources on his own and has discussed the issue with his neighbors, with whom, he says, he remains on friendly terms. He said the owner of the device that's causing the worst interference is a communications attorney who understands the problem and hopes to deal with it through the manufacturer.

In her letters, Bowers cited the applicable sections of Part 15 and advised that the alleged harmful interference must be corrected before they may use the devices legally. She suggested the consumers contact the manufacturer or retailer of the devices to see if they'd either allow them to return them or exchange them for devices that don't cause interference.

==>HAM-PIANIST MARATHONER GETS BOOST FROM MISSOURI CLUB

Concert pianist Martin Berkofsky, KC3RE, got some help from members of the Zero Beaters Amateur Radio Club (WA0FYA) when his CelebrateLifeRun <http://www.celebrateliferun.com> from Tulsa to Chicago took him through Washington, Missouri, on June 4. A cancer survivor and an ARRL member from

Northern Virginia, Berkofsky set out April 9--his 60th birthday--on an 860-mile jog to celebrate his recovery from cancer and to raise money for research into the disease. He's now just beyond the halfway point in his journey.

"I've been feeling fine," Berkofsky told ARRL, "and have managed to keep out of the really bad weather, only ducking for cover once, and once running with an umbrella."

As Berkofsky got closer to the metropolitan area, he found that road noise drowned out his hand-held amateur transceiver and his cell phone. Craig Brune, N0MFD, modified a headset--with a cushion around the earpiece--to cancel road noise and enable Berkofsky to keep talking with fellow hams while on the move. During the June 4 ZBARC club meeting, Berkofsky recapped the first half of his cross-country trek. Berkofsky was set to resume running June 14 following a June 12 benefit concert at Webster University in St Louis. He says Brune also loaned him an extendable antenna for 2 meters, "so I should be able to have some contacts even from the Illinois corn fields."

==>SOLAR UPDATE

Propagation prophet Tad "The Sun Will Come Out Tomorrow" Cook, K7RA, Seattle, Washington, reports: Geomagnetic disturbances continued this week, but at a lower level than the previous seven days. Average daily planetary A index for the week dropped to 21 from 37.1 the previous week. The average daily sunspot number rose from 67.4 to 149.4, reaching a peak of 207 on Tuesday, June 10. Solar flux also was up. Weekly average solar flux rose from 117.4 to 150.5. Solar flux peaked at 192.9 on Wednesday, June 11. Solar flux over the weekend is expected to be 150, 140, 130 and 120 for Friday through Monday.

With all of the recent geomagnetic disturbances, there is hope for HF operators with the predicted planetary A index of 12 for June 13 and June 16. This is only slightly unsettled--much better than the A indices of 20 to 30 we've seen recently. However, be aware that flares can pop up and conditions can change. A coronal mass ejection earlier this week could hit Earth June 13, causing a rise in geomagnetic indices.

Sunspot numbers for June 5 through 11 were 95, 98, 125, 167, 176, 207 and 178, with a mean of 149.4. The 10.7-cm flux was 113.6, 125.6, 133.2, 153.4, 158.3, 176.5 and 192.9, with a mean of 150.5. Estimated planetary A indices were 13, 13, 24, 27, 28, 27 and 15, with a mean of 21.

==>IN BRIEF:

* This weekend on the radio: The ARRL June VHF QSO Party, the ANARTS World Wide RTTY Contest, the Portugal Day Contest, the World Wide South America CW Contest, the Asia-Pacific Sprint (SSB) and the West Virginia QSO Party are the weekend of June 14-15. JUST AHEAD: Kid's Day, the All Asian DX

Contest (CW), the SMIRK Contest, the AGCW VHF/UHF Contest and the DIE Contest are the weekend of June 21-22. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Emergency Communications course registration: Registration is closed for the Level II ARRL Amateur Radio Emergency Communications on-line course (EC-002) that begins June 24 and is sponsored by United Technologies Corporation. Registration opens Monday, June 16, 12:01 AM Eastern Daylight Time (0401 UTC), for the Level III Emergency Communications on-line course (EC-003). Registration remains open through the June 21-22 weekend or until all available seats have been filled--whichever comes first. Class begins Tuesday, July 1. Thanks to a grant from United Technologies Corp, the $45 registration fee paid upon enrollment will be reimbursed after successful completion of the Level III course. During this registration period, approximately 50 seats are being offered to ARRL members on a first-come, first-served basis. For more information, contact Emergency Communications Course Manager Dan Miller, K3UFG, dmiller@arrl.org; 860-594-0340.

* ARRL Certification and Continuing Education course registration: Registration for the new ARRL VHF/UHF--Life Beyond the Repeater (EC-008) <http://www.arrl.org/cce/courses.html#ec008> and the High Frequency Digital Communications (EC-005) <http://www.arrl.org/cce/courses.html#ec005> courses opens Monday, June 16, 12:01 AM EDT (0401 UTC). Registration remains open through Sunday, June 22. Classes begin Tuesday afternoon, June 24. Registration for the ARRL Antenna Modeling (EC-004) <http://www.arrl.org/cce/courses.html#ec004> course remains open through Sunday, June 15. Those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future can sign up to be advised via e-mail in advance of registration opportunities. To take advantage, send an e-mail to prereg@arrl.org. On the subject line, indicate the course name or number (eg, EC-00#) and the month you want to start the course. In the message body, provide your name, call sign, and e-mail address. Please do not send inquiries to this mailbox. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@.... [C-CE logo]

* AO-40 expected to be visible to North America by Field Day: The AO-40 satellite is expected to return to a favorable alignment (ALON/ALAT = 0/0) on or about June 20, ground controller Stacey Mills, W4SM, reports. A typical passband schedule for ALON/ALAT = 0/0 is MA 40 to 210, which Mills said should hold for the start of Field Day, June 28, when AO-40 will be visible to all of North America, assuming it makes it back to 0/0 by June 20. "We should at least be close to that value by then," Mills said, "although the perigee eclipses are making it slow going to advance ALON." Mills said another cycle of attitude changes will have to start in the fall.--Stacey Mills, W4SM, via AMSAT News Service

* Problems reported with Fuji-OSCAR 20, 29 satellites: AMSAT reports apparent troubles with the two remaining linear transponder satellites outside of AO-40. Fuji-OSCAR 20 (FO-20)--uplink 145.90 to 146.00 MHz (CW/LSB); downlink 435.80 to 435.90 MHz (CW/USB); beacon 435.795 MHz--has been reported silent by numerous operators. Launched February 7, 1990, FO-20 is in mode JA continuously. FO-20 control station operators are said to believe that the under-voltage controller now is regulating the transponder. The controller monitors battery voltage and tries to protect the batteries from overdischarge. Meanwhile, AMSAT reports that the Japan Amateur Radio League (JARL) FO-29 command station is carefully considering options to turn on the satellite's transmitter because it is not clear why FO-29 recently went silent. When the satellite has been on, reports have indicated it has a distorted signal. The command team seeks reception reports, so if you hear FO-29, report the time (UTC), location, signal strength to Masa, JN1GKZ, <jn1gkz@...> or to the AMSAT-BB. FO-29 was launched August 17, 1996. Mode JA uplink 145.90 to 146.00 MHz (CW/LSB); downlink 435.80 to 435.90 MHz (CW/USB); beacon 435.795 MHz. Digital Mode JD uplink 145.850, 145.870 and 145.910 MHz (FM); downlink 435.910 MHz (1200-baud BPSK or 9600-baud FSK). FO-29 also has a digitalker at 435.910 MHz.--AMSAT News Service

* Declining QSL volume reflects decaying conditions: ARRL Outgoing QSL Service <http://www.arrl.org/qsl/qslout.html> Manager Martin Cook, N1FOC, can't be certain, but he's ready to blame the downswing in the solar cycle for a marked decline in the number of QSL cards his bureau has handled so far this year. "I hope it's not going to be a trend of this cycle," said Cook, whose operation last year mailed out 1,963,165 cards from ARRL members to DX stations--an approximately 1.6 percent jump over 2001. So far this year, the trend is going the other way, with just 681,400 cards shipped compared with 951,000 by the same time one year ago. "This is a significant decrease in cards coming in from members for processing," said Cook, who manages the Outgoing QSL Service with assistance from Heather Dzamba.

* Hudson, Atlantic Directors pulling out all stops on New York antenna bill: ARRL Hudson Division Director Frank Fallon, N2FF, and Atlantic Division Director Bernie Fuller, N3EFN, are calling on New York ARRL members to help get the state's Amateur Radio antenna bills enacted this legislative session. "The final session of the New York State Assembly for the year 2003 will be Thursday, June 19," Fallon and Fuller said in a joint statement. "We have only days left to get our antenna bills passed. We need to pull out all the stops and press for passage of our bill now." In the Senate, Fallon and Fuller say, the bill, S63, needs to be "put on the active list" on the Senate calendar and brought out for a vote. They're calling on New York hams to ask three senators to put the bill on the active list: Senate Majority Leader Joe Bruno <bruno@...>, 909 Legislative Office Bldg, Albany, NY 12247; 518-445-3191, fax 518-455-2448; Sen Dale Volker, 427 Capitol Bldg, Albany, NY 12247 518-455-3471, fax 518-455-6949; and Sen Hugh Farley, 412 Legislative Office Bldg, Albany, NY 12247, 518-455-2181, fax 518-455-2271. The Assembly bill, A2662, has cleared the Local Governments and Ways and Means committees and now needs to be reported out of the Rules Committee

headed by Assembly Speaker Sheldon Silver, <speaker@...>
Legislative Office Bldg 932, Albany, NY 12247, 518-455-3791, fax
518-455-5467. The New York bills go beyond simply incorporating PRB-1 into
state law. They would prohibit municipalities from passing laws or
ordinances to "restrict antenna support structure height to less than 95
feet above ground level or restrict the number of antenna support
structures." For more information and sample letters for lawmakers, visit
the Hudson Division Web site <http://www.hudson.arrl.org>.

* K1D to be on the air for Kid's Day: Special event station K1D will be on
the air June 21 for ARRL Kid's Day
<http://www.arrl.org/FandES/ead/kd-rules.html>. Peter Schipelliti, W1DAD,
and his wife Jeanne, K1MOM, will be on the air as K1D prior to Kid's Day
to promote the event. Their youngsters Geena, 8, and Luciano, 6, will be
on the air on Kid's Day. "Any noises in the background will be Francesca
Rose--22 months," Peter Schipelliti said.

* Nevada club donates to The Big Project: In recognition of the ARRL and
President Haynie's commitment to bring Amateur Radio to the youth of
America, the Nellis Radio Amateur Club (NRAC) of Nevada voted to begin
financial support of the ARRL Education and Technology Program-- "The Big
Project." The club recently announced an initial donation of $150.
President John Bigley, N7UR, said NRAC graduates a new class of Technician
operators each year. The club also offers an annual General-class course.
Nets also conduct twice-weekly interactive code practice sessions on the
club's KC7TMC 147.06 and 449.875 repeaters, Bigley said. NRAC is
affiliated with Nellis Air Force Base. For more information, visit the
NRAC Web site <http://nellisrac.org/>.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

==>ARRL URGES INFORMED COMMENTS IN FCC BPL INQUIRY

The ARRL is urging amateurs to file well-thought-out, informed comments
when responding to the FCC's Broadband Over Power Line (BPL) Notice of
Inquiry (ET Docket 03-104). The FCC published its NOI on May 23. The NOI
asks how the FCC should regulate the delivery of broadband services to
homes and businesses using electrical wiring to conduct high-speed digital
signals. While the FCC has dubbed this technology Broadband over Power
Line, it's more commonly known as Power Line Carrier or PLC.

BPL would use building and/or overhead power lines to conduct HF and
low-VHF digital signals to network computers. The FCC has expressed its
unabashed enthusiasm for BPL, which it views as a competitive Internet
access point. Utilities consider BPL as another means to use existing
infrastructure to generate additional revenue.
```

The NOI is not asking if BPL technology should be permitted. Under existing FCC rules, BPL systems may be built and used in the US right now. The FCC is asking how the rules might be changed "to promote and encourage new BPL technology," in the words of the NOI.

Present FCC Part 15 rules say that carrier-current systems--including BPL/PLC--need to meet the general radiated emission limits for unlicensed "intentional emitters." While the rules permit BPL at significant power levels, utilities would prefer that the FCC authorize even higher power levels. BPL systems under development and in field trials use spectrum between 1.7 and 80 MHz, but the NOI also asks whether BPL should operate on other parts of the spectrum as well.

As of mid-June, nearly 1000 comments already had been filed in the proceeding. The ARRL has urged amateurs who comment to outline the important uses they make of Amateur Radio and the impact strong interference from BPL could have at HF and low-VHF amateur frequencies.

Electric utility companies will operate many, if not most, BPL systems. ARRL members who have had experience dealing with power line interference and utilities' responses to complaints also may want to describe those experiences in their comments to the Commission.

Amateurs filing comments to the FCC NOI might want to consider these topics and points:

* Amateur Radio is a valuable resource that must be protected.

* Describe the uses you make of Amateur Radio, especially those with a public service or emergency communication aspect.

* The present FCC Part 15 limits for this technology already can result in substantial interference potential to amateur frequencies.

* BPL systems that radiate on wide swaths of spectrum and occupy entire neighborhoods have greater interference potential than localized systems, such as switching power supplies or electric motors.

* The FCC has promised to protect licensed users of the spectrum. We must hold them to that promise.

For more information, see "Understanding the FCC's Broadband Over Power Line (BPL) Notice of Inquiry" <http://www.arrl.org/news/features/2003/06/19/2/>. An ARRL white paper, "Calculated Impact of PLC on Stations Operating in the Amateur Radio Service" <http://www.arrl.org/tis/info/HTML/plc/files/C63NovPLC.pdf> provides technical details. The ARRL's Broadband Over Power Line resource page contains links to worldwide studies and other resources.

The ARRL has initiated an important Spectrum Defense Fund campaign to support activities to educate government officials on the potential threat that BPL poses to Amateur Radio. To find out more, or to support ARRL's efforts in this area, visit the ARRL's secure BPL Web site <https://www.arrl.org/forms/development/donations/bpl/>

The complete NOI is available on the FCC Web site <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-100A1.doc>.

Comments are due on or before July 7, 2003. Reply comments are due on or before August 6, 2003. Interested parties may submit electronically filed comments via the FCC's Electronic Comment Filing System (ECFS) <http://www.fcc.gov/cgb/ecfs/>. Under ECFS Main Links, click on "Submit a Filing." In the "Proceeding" field, enter "03-104" and complete the required field. Comments may be typed into a form or you may attach a file containing your comments. Comments also may be submitted via e-mail, per instructions on the ECFS page.

==>60-METER RULES ADD NEW RECORD-KEEPING REQUIREMENT

When the five new 60-meter channels become available to US Amateur Radio operators at midnight (12 AM) local time on July 3, the rules will impose a new record-keeping requirement for hams. The requirement applies only to those using something other than a simple half-wave dipole for an antenna on the 5-MHz allocation.

According to §97.303(s), a half-wave dipole on the 5 MHz allocation will be presumed to have a gain of 0 dBd. "Licensees using other antennas must maintain in their station records either manufacturer data on the antenna gain or calculations of the antenna gain," the newest addition to the FCC's Amateur Service rules says.

Because the new rules also require hams to run no more than 50 W effective radiated power (ERP) on the new channels, the choice of antenna becomes an important compliance factor. The FCC rules stipulate, "For the purpose of computing ERP, the transmitter PEP will be multiplied with [sic] the antenna gain relative to a dipole or the equivalent calculation in decibels."

If you use a half-wave dipole--about 87 feet 3 inches for the "middle" channel according to the formula--setting your transmitter's power output power at up to 50 W peak envelope power (PEP) should ensure compliance.

Under no circumstances may amateurs on 5 MHz radiate more than 50 W ERP in any direction, so those choosing to employ gain antennas will have to "do the math" and calculate their ERP. They also will have to keep a record of such antenna gain calculations on file. This might include documentation such as output from a computer modeling program for a homebrew antenna design. For example, an amateur using an array for 5 MHz exhibiting a calculated or modeled gain of 3 dB would have to cut power to 25 W PEP to comply with the new rules.

Operating on 60 meters is the subject of the July 2003 QST "It Seems to Us . . ." editorial <http://www.arrl.org/news/features/2003/07/01/1/> by ARRL CEO David Sumner, K1ZZ. "If we demonstrate that we can use [the 60-meter channels] responsibly, cooperatively and in the public interest, there is no reason we cannot seek expanded access at an appropriate time," Sumner wrote. "If your personal operating practices are inconsistent with that, please do yourself and everyone else a favor and confine your operating to

the traditional bands."

The FCC Report and Order in ET Docket 02-98 is available on the FCC's Web site <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-105A1.doc>. The ARRL has posted a list of frequently asked questions concerning 5 MHz operation on the ARRL Web site <http://www.arrl.org/FandES/field/regulations/faq.html#sixty>

==>AMATEUR RADIO ON THE INTERNATIONAL SPACE STATION LOGS 100TH SCHOOL CONTACT

The Amateur Radio on the International Space Station (ARISS) program reached a milestone June 12 with its 100th school group contact. Doing the honors was Expedition 7 NASA Science Officer and Flight Engineer Ed Lu, KC5WKJ. Lu took the controls of NA1SS aboard the space outpost to answer a dozen questions from students gathered at Lively District Secondary School in Sudbury, Ontario, Canada.

"I would choose to go on a mission to Mars," Lu told the students, answering a question about what mission he would pick if he had the choice. "Because I think that's the place in our solar system that has the best chance of having life besides our Earth, and I would love to go there to try and find that." Lu said that while a human spaceflight mission to Mars is not yet on NASA's schedule, he hopes to one day have the opportunity to journey there. "Maybe one of you kids down there will get a chance to do it if I don't get to go."

Lu says he sees a lot of things that are "incredibly interesting" from his vantage point in space, including looking down at Earth and viewing the northern and southern lights. But he said he hasn't been inspired to want to live in space indefinitely.

Aboard the ISS since late April, Lu is part of the first two-person crew headed by Expedition 7 commander Yuri Malenchenko, RK3DUP. They arrived aboard a Russian Soyuz vehicle, which also serves as the escape vehicle for ISS crew members. The Expedition 7 crew is scheduled to return to Earth in October.

Asked whom he would like to have accompany him into space if he could pick one person, Lu replied, "If I could bring one person with me, it would be my fiancee, and if I said anything else, boy would I be in trouble."

On Earth, Steve Gorecki, VE3CWJ, served as control operator. He had assistance from members of the Sudbury Amateur Radio Club, who helped to install antennas on the roof of the school's gymnasium and equipment inside. Students participating in the contact came from several area schools.

"It definitely had an impact on the kids," Gorecki told ARRL after the contact, "but it only dawned on them later what they'd actually done." Students involved were in grades 7 through 12.

On June 14, pupils at another Canadian school--École primaire de l'Apprenti-Sage in Québec--enjoyed a successful ARISS contact. Among other topics, the primary schoolers wanted to know how long Lu would be in space, if it hurt during liftoff on the Soyuz, his favorite activities in space and how the crew "drives" the ISS. Youngsters at the school had been studying space and space-related topics leading up to their scheduled contact. Members of the Club Radio Amateur de Québec (VE2CQ) <http://www.craq.qc.ca/> set up and managed the Earth station for the direct contact.

Gaëtan Trépanier, VE2GHO, handled control op duties as some 500 students and visitors looked on. A dozen students each got to ask a question before the ISS zipped over the horizon. "It was a resounding success," said Daniel Lamoreaux, VE2KA, the Radio Amateurs of Canada Quebec director who was on hand for the event. Lamoreaux is a member of the ARISS Educational Outreach/School Selection Committee.

On June 18, students at Kuise Elementary School in Amagasaki, Japan, chatted with Lu during a direct contact between NA1SS and 8N3ISS. Among other topics, youngsters wanted to know what country's time the crew followed aboard the ISS, whether zero gravity was "convenient" and if zero gravity changed the intensity of odors.

ARISS is an international project with participation by ARRL, NASA and AMSAT.

==>WELL-KNOWN CONTESTER, DXer DIES IN FALL FROM TOWER

Well-known contester and DXer Steve Miller, N8SM (ex-WD8IXE), of Prosper, Texas, died June 15 as a result of a fall while working on his Amateur Radio tower. He was 38. An ARRL member, Miller had extensive experience in tower work and antenna installation. With the assistance of several other hams, Miller had erected a 136-foot tower on his property and installed several antennas as part of his overall effort to build a competitive contesting station.

Details of the mishap that claimed Miller's life are not available. According to unofficial accounts, Miller had been working on his tower the morning of June 15, and, after a lunch break, told his wife, Radhicar, that he had another hour's work left. Later, she heard a noise from the yard and found her husband lying on the ground. Miller's wife called 911, but the rescue squad was unable to revive him.

ARRL antenna guru Dean Straw, N6BV--who had corresponded with Miller on several topics--was among those expressing shock and sadness at his death. "Steve was always most responsive, and he always had the most intelligent comments and questions concerning whatever technical topic we were discussing," said Straw. "I will miss his innate, contagious enthusiasm."

First licensed as WD8IXE in 1977 at the age of 12, Miller--an Ohio native--enjoyed contesting and DXing. He was routinely active during the CW weekends of the CQ World Wide, ARRL International DX and ARRL November Sweepstakes events. He also operated as J68AG from St Lucia in the

Caribbean and participated in a few DXpeditions, including several stints as a member of the J6DX team in the 1980s and 1990s. He was an ARRL DXCC Honor Roll member, with 332 entities confirmed (mixed).

In addition to ARRL, Miller belonged to the North Texas Contest Club <http://www.qsl.net/ntcc/> and 10-10 International <http://www.ten-ten.org/. Besides ham radio, he enjoyed playing jazz saxophone.

An Ohio State graduate, Miller worked for Texas Instruments as part of its broadband wireless access group in Dallas. Survivors include his wife and their young daughter. A memorial service was held June 19.

==>HAM'S TICKET SET ASIDE AS FCC INVESTIGATES ALLEGATIONS OF FALSE DISTRESS CALLS

The FCC's Wireless Telecommunications Bureau (WTB) has set aside the nearly month-old Technician-class license of a California man while it looks into allegations that the now-former licensee may have made false marine distress calls. In a June 3 letter, FCC Special Counsel Riley Hollingsworth notified Michael V. Swift of San Ramon of the WTB's action--taken on the bureau's own motion. The FCC granted Swift the call sign KG6QOB on May 1 and canceled his ticket May 29.

In his letter, Hollingsworth said the cancellation was "based upon evidence that you made numerous false distress calls on Channels 16 and 22A Marine frequencies." Hollingsworth warned Swift that in view of the WTB's action, he had no authority to operate Amateur Radio transmitting equipment.

Hollingsworth told ARRL that agents in the FCC's San Francisco office--in cooperation with the US Coast Guard--reportedly tracked transmissions on the marine channels to Swift's residence, where they interviewed him.

The FCC also sent a Warning Notice May 30 to Ronald E. Shapiro, N2CQT, of Kerhonkson, New York, citing information alleging that the licensee "deliberately interfered with and harassed operators on 3.906 MHz" on May 24.

"It appears that you were operating under some type of impairment," Hollingsworth wrote, "and during the transmissions played music, made transmissions to no one in particular and deliberately transmitted on top of ongoing communications." The FCC alleges the transmissions, which began at about 1 AM, continued for almost an hour.

Hollingsworth gave Shapiro 20 days to explain the circumstances of the operation detailed in the Warning Notice.

==>MARS OPERATIONS BEGIN IN IRAQ; MORE OPERATORS SOUGHT

The Military Affiliate Radio System (MARS) is poised to start the flow of messages between troops in Iraq and Kuwait and their families and friends back home. The first MARS licenses have been issued to soldier stations in

Iraq and Kuwait, and a broad range of frequencies has been assigned for MARS use. MARS also is operational in Afghanistan.

Daniel Wolff, assistant affiliate MARS coordinator for Europe, Africa and Southwest Asia, reports that four soldier licenses had been issued as of June 1 but he hopes there will be many more as active hostilities continue to wind down. These new operations will open up MARSgram and phone patch communications for troops stationed beyond the reach of e-mail and cell phones. Just about every company-size unit overseas has high frequency radio equipment in house--or, more likely, "in tent."

While preparedness to provide emergency or contingency communications backup now occupies first place, handling "morale and welfare traffic" is another role MARS members still can play. The only drawback is the shortage of stations to receive it. MARSgrams are being handled at least one-way. Those addressed to Iraq or Kuwait are transmitted by radio to the nearest MARS gateway station, then refiled into the Military Postal System for delivery. This shaves days or weeks off the time it takes a message going by mail.

Information on sending MARSgrams is available on the Army MARS Web site <http://www.netcom.army.mil/MARS>. Now that most hostile action has ceased, Wolff says, MARS should be among the organizations assuming a humanitarian and support role--if only there were more stations in the region.

FCC-licensed amateurs may apply for an overseas MARS license much as they would in the US, except that some additional information is required. Commanding officers may also apply for a MARS station license for their units and are exempt from the FCC Amateur Radio license requirement, he explained. Full information and application forms are available to overseas applicants by e-mailing Wolff <aem1wf@...> or for US amateurs by visiting the US Army MARS Web site <http://www.netcom.army.mil/MARS/>.--Bill Sexton, N11N/AAA9PC

==>SOLAR UPDATE

Heliophile Tad "That Lucky Ol' Sun" Cook, K7RA, Seattle, Washington, reports:

Low sunspot numbers and geomagnetic disturbances in the over-the-hill portion of the solar cycle continue. There are enough sunspots for some good HF propagation, but we are about three years past the cycle peak and about three and a half years ahead of the next sunspot minimum. Complicating the situation is continued high solar wind and flares, causing constant disturbance to geomagnetic conditions. HF operators generally want stable geomagnetic indices, such as a K index at three or below and daily A index of ten or less.

Average sunspot numbers dropped nearly 37 points from last week to 112.7 this week. Solar flux was also down. Not surprisingly given the conditions and all the reports, average planetary A index increased from

21 to 30. Space weather was remarkably mild on Thursday, June 19 with mid latitude and planetary K indices down to two or three. However, the forecast shows more of the same enhanced activity over the next few days, with a planetary A index of 25, 25, 20 and 20 for June 20-23. Solar flux should remain around 125 on those days. On June 20 we should enter a solar wind stream flowing from a coronal hole, which should cause those high A indices.

Sunspot numbers for June 12 through 18 were 168, 149, 91, 111, 91, 80, and 99, with a mean of 112.7. 10.7 cm flux was 163.5, 151, 133.5, 128.7, 122.6, 121.9, and 120.4, with a mean of 134.5. Estimated planetary A indices were 11, 11, 32, 20, 32, 50, and 54, with a mean of 30.

==>IN BRIEF:

* This weekend on the radio: Kid's Day, the All Asian DX Contest (CW), the SMIRK Contest, the AGCW VHF/UHF Contest and the DIE Contest are the weekend of June 21-22. JUST AHEAD: ARRL Field Day <http://www.arrl.org/contests/rules/2003/rules-fd-2003.html>, the Marconi Memorial HF Contest, the QRP ARCI Milliwatt Field Day and the His Majesty the King of Spain Contest (SSB) are the weekend of June 28-29. The RAC Canada Day Contest is July 1. The Michigan QRP July 4th CW Sprint is July 4-5. See the ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

* ARRL Certification and Continuing Education course registration: Registration for the Radio Frequency Interference (EC-006) and Satellite Communications (EC-007) courses opens Monday, June 23, 12:01 AM EDT (0401 UTC). Registration will remain open through Sunday, June 29. Classes begin Tuesday afternoon, July 1. Registration for the ARRL HF Digital Communications (EC-005) and VHF/UHF--Life Beyond the Repeater (EC-008) courses remains open through Sunday, June 22. Those interested in taking an ARRL Certification and Continuing Education (C-CE) course in the future can sign up to be advised via e-mail in advance of registration opportunities. To take advantage, send an e-mail to prereg@.... On the subject line, indicate the course name or number (eg, EC-00#) and the month you want to start the course. In the message body, provide your name, call sign, and e-mail address. Please do not send inquiries to this mailbox. To learn more, visit the ARRL Certification and Continuing Education Web page <http://www.arrl.org/cce> and the C-CE Links found there. For more information, contact Certification and Continuing Education Program Coordinator Howard Robins, W1HSR, hrobins@....

* Correction: In the item "Hudson, Atlantic Directors pulling out all stops on New York antenna bill," the telephone number for Senate Majority Leader Joe Bruno was incorrect. The correct number is 518-455-3191.

* Michigan gets new Section Manager: The ARRL Michigan Section has a new Section Manager. Former SM Dale Williams, WA8EFK, of Dundee, will pick up the reins from Debbie Kirkbride, KA8YKK, who has stepped down. Williams' appointment was effective June 17. "Debbie is resigning for health

reasons, and hopes to stay as active as the health issues allow her to be," said ARRL Field and Educational Services Manager Rosalie White, K1STO, in announcing Williams' appointment. "She regrets having to give up the position for now." Kirkbride was named Michigan SM last July after former SM Dick Mondro, W8FQT, became the Great Lakes Vice Director. Williams' appointment came with the recommendation of ARRL Great Lakes Director Jim Weaver, K8JE, Vice Director Mondro and Kirkbride. Williams had served previously as Michigan's SM from 1992 until 1996. He's now an Assistant Great Lakes Division Director and heavily involved in emergency communications. Michigan ARRL members may contact Williams via e-mail <dalew@...> or telephone, 734-528-3232.

* Space Station may be on the air during Field Day 2003: The Expedition 7 crew may be on the air from NA1SS during ARRL Field Day <http://www.arrl.org/contests/rules/2003/rules-fd-2003.html> the weekend of June 28-29. "We don't know if the crew will be active or not, but give it a try," said ARISS Mentor Charlie Sufana, AJ9N. Sufana advises "good operating sense" and recommends that FD operators wait for the crew to finish a previous contact before calling. "You may be only hearing a station or two," he pointed out, "but they are hearing hundreds." Look for the ISS during Field Day during these time slots: Northern and Southeastern US, June 28, 1821-1842 UTC; Southern and Northeastern US, June 29, 1059-1117 UTC; Western US, June 29, 1233-1253 UTC; Northeastern US, June 29, 1723-1744 UTC; and Northwestern and Southern US, June 29, 1859-1920 UTC. ARRL Contest Branch Manager Dan Henderson, N1ND, notes that Field Day contacts with the ISS crew do not count for satellite QSO bonus points, just contact credit. "Valid satellite contacts must be Earth-satellite-Earth contacts through a satellite transponder or repeater," he explained. (See Field Day rule 7.3.7.)

* ARRL's 2002 Annual Report is hot off the press! The League's 2002 Annual Report is currently available to members free of charge upon request. The report offers an overview of League activities for the year, messages from ARRL President Jim Haynie, W5JBP, and Chief Executive Officer David Sumner, K1ZZ, along with ARRL's complete audited financial statements for 2002. Send requests--including your name, call sign and mailing address--to Media Relations Manager Jennifer Hagy, N1TDY, jhagy@.... The report also is available on-line as a PDF document <http://www.arrl.org/announce/annualreport/02ar.pdf>.

* FO-20 back in the land of the living: The Japan Amateur Radio League (JARL) FO-29 satellite command team has succeeded in recovering the satellite, which had been experiencing problems. The FO-29 command team staff succeeded June 16 in commanding the satellite's transmitter back on. FO-29 was reported sending a strong CW beacon, and the transponder is also available. The command team said the problem was likely caused by recent major solar flares. The command team continues to analyze data and is seeking FO-29 reception reports. Send telemetry reports to the command team, <lab2@....jp>. The analog transponder (Mode JA) uplink is 145.900 to 146.000 MHz; the downlink is 435.800 to 435.900 MHz. CW telemetry is at 435.795 MHz. FO-29 was launched on in 1996. For more

information, visit the JARL Web site <http://www.jarl.or.jp>.

* FCC announces improvements to the Electronic Document Management System:
The FCC has announced that its Electronic Document Management System (EDOCS) query page has been reorganized and redesigned to make it easier to search for FCC documents. A new feature linking errata to original documents also has been put into place. EDOCS now permits either "quick" or "advanced" searches. The quick search has a limited number of fields and displays the results in a short form. The quick search is best if you already know a docket number, delegated authority (DA) number or FCC number, or if you know specific words that appear in the document's title or description. The quick search also lets you search on a range of dates. The advanced search is much like the current EDOCS query, allowing users to search on a detailed list of data elements--individually or in combination. Adding fields to the search makes it more precise, and fewer documents are retrieved. Results for the advanced search can be displayed in three formats: condensed, full, and citation. The citation format contains citations to the FCC Record Index, FCC Reports 2nd Series, and the Federal Register. Links to EDOCS are available via the "search" link in the menu bar at the top of the FCC home page <http://www.fcc.gov> and on the resources page <http://www.fcc.gov/resources.html>. EDOCS is also listed on the Search Tools page at http://www.fcc.gov/searchtools.html. For assistance with EDOCS, or to report problems, send an e-mail to EDOCS Help, edocshelp@... or call (202) 418-0265.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League--The National Association For Amateur Radio--225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Jim Haynie, W5JBP, President.

The ARRL Letter offers a weekly e-mail digest of essential news of interest to active amateurs. The ARRL Letter strives to be timely, accurate, concise, and readable. Visit ARRLWeb <http://www.arrl.org> for the latest news, updated as it happens. The ARRL Web site <http://www.arrl.org/> offers access to news, informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled from The ARRL Letter.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter and The American Radio Relay League.

==>How to Get The ARRL Letter
The ARRL Letter is available to ARRL members free of charge directly from

ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@... <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

BRAND NEW RIGS SOON TO BE RELEASED!

NEW KENWOOD
HF RIG 160-6m
Similar concept to the TS-B2000, but much smaller.

AVAILABLE AUTUMN

NEW YAESU FT-8800M
Dual Band Mobile 50/35W

AVAILABLE AUTUMN

NEW YAESU VX-2R
Dual Band Handie with up to 3W output and wideband Rx.

COMING SOON!

NEW HEIL QUIET PHONES
Active Noise Cancelling Headphones. Ambient noise drops away as you switch NR unit on.

AVAILABLE SOON!

Are you a geek? Are you a techno freak? Welcome home!

1224. QST June'2003

Yahoo group: m_a_r_s
Date: 2003-06-24 11:28:45 UTC
From: VU2UGO
Topic: 1224 Message: 1224

Now in available in MARS Library!!

QST - JUNE'2003 Contents :-
a.. An Affordable Az-El Positioner for Small Antenna
Build yourself an az-el antenna positioner for one third the cost of a commercial unit and make it easy to point that antenna. This article address the mechanical mounting of the antennas in an az-el configuration and the addition of a position feedback potentiometer and a simple control box with a digital readout. Although limited in performance, the whole system can be built for $250 if all new parts are purchased. If flea market parts are used, the whole thing can be built for under $100.... This az-el positioner will handle any small satellite array and the cost is reasonable.

b.. The FARA (one of the larger and more active radio clubs in the Cape Cod, Massachusetts area is the Flamouth Amateur Radio Association) HF Project
Would you like an economical and relatively easy to build 30W HF amplifier? For about $130 worth of parts you can give that QRP rig an extra 12dB of muscle!

c.. The Transverter - An Introduction to a useful device
Ever wonder how a transverter works? Building one could get you on that new VHF, UHF or microwave band. You'll be better informed, too, about some of the basic building blocks and circuits used in your present transceiver.

d.. Albania Revisited
Ten years after the first ZA1A operation, a group of Finnish operators returned to assess the state of Amateur Radio in Albania.

e.. Field Day's New Addition - Class 'F'
A significant change happens with Field Day'2003 as the new Class F station becomes active. Class F is designed to encourage ARES, RACES or local club groups to develop or test existing emergency plans with their Emergency Operations Centers (EOC).... To participate as Class F, the operation must be actively planned and coordinated with respresentatives of the ECO being activated. Class F is not intended to be for everyone. It is designed for those groups who wish to test their existing emergency plans during the Field Day event.

f.. Rocky Mountain Field Day
Radio-camping in the rarified air above 14,000 feet in the Colorado Rockies is fun, but as we discovered last year, it requires planning, physical effort - and luck with the weather - by John Nogatch, AC6SL

g.. The Protector
Have you ever connected power backward, had a power supply regulator fail or intermittently lose the DC input line to a rig? If so, you learned an expensive lesson. The protector is a small circuit that can be installed between any 12V radio and its 12V dc power source. The power source can be anything from an ac line-operated supply to a battery. It will protect the radio against overvoltage and from reverse polarity. It will also provide a delayed start, just in case you forgot to turn the radio off before you connected it to the power source.

h.. Public Service
- Public Service Honor Roll in Action

i.. Product Review -
a.. Yaesu FT-2800M 2-Meter FM Transceiver ($159.95)
The FT-2800M offers an impressive receiver and 65W of 2-meter transmit power in a hefty but simple package.

b.. NCS-3240 Multi-Switcher ($279.95)
The NCS-3240 may be of interest to amateurs with complex stations, particularly SO2R contesters.

c.. MFJ-461 Pocket CW Reader ($79.95)
The MFJ-461 is a handy accessory for deciphering well formed Morse Code, but users should have realistic expectations and carry a screwdriver.

j.. Software -
a.. WinCAP Wizard 3
While the software is "friendly" to some extent, you need to have a firm technical grasp to get the most out of WinCAP Wizard 3. Amateurs who are knowledgeable about HF propagation will find WinCAP to be an outstanding too, as will those who need highly accurate predictions for specific purposes (DXpeditioners and contesters come to mind). Casual users may find the WinCAP Wizard 3 learning curve a bit steep - perhaps too steep to justify the cost ($65).
http://www.taborsoft.com/

k.. New Advertisements
a.. Yaesu VX-2R World's Smallest Dual-Band HT with wide-band RX
The world's smallest Dual-Band HT with 1.5 watts of output is your high-tech gateway to the world, via VHF, UHF, shortwave broadcast, marine and aircraft bands, or WIRES Internet linking!

Measuring just 1.9" x 3.2" x 0.9" and weighing less than 3/10ths of pound, the VX-2R is supplied with 1A-hr (3.7V) FNB-82LI Lithium-Ion Battery Pack, providing upto 1.5W of output power on the 144MHz band and 1 Watt on 430MHz. If you supply 6 volts of DC power from the optional E-DC-21 DC Adpater, the VX-2R puts out 3 watts on VHF and 2 watts on UHF!

l.. Regular Features -
a.. Hands-on Radio (Experiment #5 - The Integrated Timer),
b.. Hints & Kinks (A Yaesu VX-5R to Kenwood VC-H1 interface, X-raying a PCB with your scanner..),
c.. Technical Correspondence (More than the Ribbon J-Pole Antenna, Accurate Frequency Measurements)
d.. The World above 50MHz (Back to basics),
e.. How's DX? (Ham and Curry - A Short Visit to South India),
f.. Microwavelengths (Give me power)
g.. QRP Power (QRP Field Day)
h.. Old Radio (Radio Books),
i.. Digital Dimension (Finding Conventional Wisdom)
j.. Amateur Satellites (Satellites and Field Day)
k.. Happenings, Correspondence, Workbench, Feedback, Hamfest Calendar, Strays, 75-50 & 25 Years Ago, Contest Corral, Hamfest Calendar, Coming Conventions, Special Events, Ham Ads

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

On Sunday Evening a group of people picnicking at Yeyour near Thane got trapped due to heavy down pour. The river water raised to a critical level and the picnicker were trapped on the other side of the bank.

The Balkum Fire Station received a distress call in the evening, upon hearing the call, The station contacted the Chief Fire Officer Mr. Vaidya (Grade - I, awaiting his ticket). He in return gave a Distress call, which was heard by Mr. Milind Korde (Grade - I, awaiting his ticket), Mr. Sanjay Kadam, (Grade - I, awaiting his ticket) who also is the wireless officer for Balkum Fire Station and by Mr. Sailesh Pradhan (Grade - I, awaiting his ticket).

The foursome reached the location and started the rescue operations. Mr. Milind Korde's experience in Trekking and Mountaineering proved to be of great help and they managed to rescue 32 souls in 6 painstaking hours.

When these four heros were interviewed by the media (AJTAK, STARNEWS, SAMNA etc) informed that they are part of MUMBAI AMATER RADIO SOCIETY's Disaster Management Team.

Incidently about 2 months ago, few of the relatives of our Mr. Rajen Kavadia - VU2RIG - Chairman, had gone for trekking to Karnala Fort, they managed to climb the pinnicle but got stuck and could not come down. VU2RIG contacted Milind Korde and a rescue operation was arranged and the victims were brought down safely.

MARS congratulates our heros for doing a wonderful job by serving the Mankind.

1228. Digimit 2002 Transmitter by IV3NWV

Yahoo group: m_a_r_s
Date: 2003-07-01 10:08:31 UTC
From: VU2UGO
Topic: 1228 Message: 1228
Attachments: 2 described; binary payloads are missing from this source WARC

Digimit 2002 Transmitter - Information

The DIGIMIT 2002 HF SSB/CW Transmitter

All digital QRP SSB/CW operations over all the HF bands.

Digimit 2002 is a QRP transmitter for SSB/CW radio amateur communications in all the amateur H.F. bands. Controlled by a programmable logic integrated circuit and equipped with a rugged, fan-cooled 10 Wpep (100% duty cycle) power amplifier, the Digimit 2002 features full direct digital synthesis from microphone up to R.F.

Ever dreamed signal quality in a "Transmitter on a Chip"
Digimit 2002's programmable logic chip integrates the most demanding digital signal processing circuits required to synthesize a spectrally pure, SSB modulated RF signal, and two 8-bit microprocessor units which control the transmitter functionality, making Digimit 2002 the first "Transmitter on a chip" available to radio amateurs.
Synthesis of the transmit signal is performed at 90 Msps, with a digital Weaver modulator designed explicitely for SSB/CW operations. The unwanted sideband rejection filter of the modulator exhibits impressive sideband and carrier suppression (75 dB typ.) while mantaining a very flat and phase linear response (-0.5 dB at 300 Hz and 2700 Hz). The digital tuner features high precision interpolators which keep alias images lower than 70 dBc, a 32 bit phase accumulator with a tuning resolution in the range of millihertz, and a CORDIC-based frequency converter whose spectral performance exceeds that of today's best monolithic transmit DACs.

Bright VFT display

Digital readout of the operating frequency, the operating mode, the power output level and the transmitter status is provided by an high quality, bright vacuum tubes fluorescent display which allows easy monitoring of the transmitter under any observation angle and light condition.

No whistles and bells, sorry.

The front panel of Digimit 2002 is equipped with a rotary knob for frequency tuning, a seven pole microphone connector which features a PTT switch, UP/DOWN tuning controls and power supply output, and five buttons which select the operating band, the modulation, the tuning step, the CW keyer speed and the output power level.

Built-in Tx/Rx antenna switch and remote control interface

Digimit 2002 features an internal Tx/Rx switch which allows the connection of an external receiver to the antenna via a BNC connector available on the rear panel.
and a bi-directional remote interface by means of which the transmitter can either control or be controlled by other communication equipments.

MIC automatic gain control

The mic amplifier gain is digitally controlled. Digimit 2002 audio quality is excellent under a wide dynamic and its modulation depth always at maximum level.

Built-in CW keyer

Digimit 2002 comes equipped with a simple "slap mode" built-in keyer with a speed range of 10 to 50 WPM and operates in semi break-in mode. Straight key or external keyers are also supported.

From: vijay motwane
Topic: 1230 Message: 1230

Dear Friends,

Recently I have observed behavior of our few Hams that is highly disgusting and deplorable. While most of us Hams are mild and gentlemanly, a few hams behave in a rude and highhanded manner.

During my few visits to Mars classes in Thane, some Hams were found criticizing the operating style of a few senior Hams in front of SWLs. Nafisa, Vispi and Prashant were criticized for their style of conducting the Net. I know very well that lot backbiting has been done about me too. While the classes are being carried out, a few Hams sit in other rooms and indulge in small talk and back stabbing. I would like to know who is perfect! Some of us think that we are Gods!

Some Hams whose licenses have expired and have checked into the Net are threatened with dire consequences. These bloody `havaldars? should know that, policing is the job of WPC. Has WPC given a letter to them to do the policing on their behalf?

Well, if something is wrong, it is wrong. But there certainly is a way of conveying it. 2 mts or ham radio in general, is nobody?s father?s property.

If this is the way some megalomaniacs from MARS are going to conduct themselves, I regret having become a member of such organization. I surely would dissuade others from joining MARS.

Discipline is great, but it should not be carried to an extreme. Let us all know that Ham radio is a hobby and NOT an extension of our office. Hobby is having fun and having a great time with friends, not criticizing and cribbing all the time.

Vijay, VU2VVP

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

I am pleased to inform you that MARS has successfully launched its 2 batches of Ham Radio Classes. One at Churchgate and Other at Thane.

This year we have 43 students at Thane and 28 students at churchgate adding to 71 Students, which I feel is a good number. Both the batches are running quite smoothly, thanks to our active members and new SWLs of the last batch who are putting in a lot of time and efforts for the success of these batches.

The SWLs of our last batches at Thane & Churchgate are likely to get their tickets, probably by end of this month. I sincerely hope that these 61 SWLs upon getting their tickets will become active, especially on VHF and make of our wonderful city , a super active Ham Radio City MUMBAI of India.

The other good news is that the repeater funds sanctioned by Shri Satish Chandra Pradhan - VU2PDT are almost cleared, the necessary papers have be sent to the collecter for releasing the funds. In a very short time we hope to have these repeaters going (Andheri & Matheran).

MARS is also looking into importing the VHF handies at a very affordable prices (about Rs.3000/-) . I am sure most of our Hams and SWLs (Upon getting their tickets) will opt of these sets, which will allow them to work our repeaters.

The activity on VHF has recently gone down, there are a very few check in on the EARLY BIRDS NET and the NIGHT OWLS NET. I sincerely hope that the above good news will motivate the old timers to warm up their rigs and get on the air.

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

MARS has successfully completed 3 years today. Congratulations to all the members.

Let me take this opportunity to thank all the founder members for starting and all the other members for being part of our active Amateur Radio Society.

MARS was started by 25 founder members on 7th July 2000. Today it has almost 250 members, it has grown 10 times in past 3 years. I sincerely hope all the members will try to be active in our hobby in some way or the other and very soon MARS will become THE Active society in India.

Lets hope the a great future for MARS in coming years.

Hello all,
I think Prashant, Nafisa and Vispi are doing a great job,and as Vijay says nobody is perfect!!!So the Ham who thinks otherwise can go take a walk(I am being very mild)!!!!! And the best way to stop the business of backbiting is by not giving the backbiter an audience!!
Its painful that a MARS member is policing the band. Leave it to the WPC, they are paid for it and its their job not ours. Megalomaniacs are a pain in the butt and Megalomania is bad for the society. Its painful, when one person does all the talking and still worse when the person is running down other people. Yes, Amateur Radio is a hobby and not a job. It has to be viewed with the aspect of having fun and not with the aspect of "running" things.
So can we just not prepare for disasters, get on the radio and chat with the world and derive pleasure from it??
So Vijay, now you know why I retired from MARS!!!!!!

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

This is in reference to the mail posted by Vijay and then replied by sarla and madhu . I intended to ignore the mail, but it seems people are commenting and putting allegations without knowing any facts .

Firstly let me clarify that there is no backbiting, I go Thane of TEACHING and BITCHING, it so happened during one of sessions of thane batch, The SWLs of the last batch awaiting for their tickets have borrowed some VHF sets and are keenly monitoring the VHF activity. One of the SWLs asked as to why the NIGHT OWLS NET gets over in 5 to 10 minutes. Many hams come in by 9:40 / 45 and find that the net is over.

In reply I informed them that as far as vispy is concerned, he once told me that he takes some medicine which make him feel sleepy and since their are not many checkin he shuts down the net. As far as nafisa is concerned she checks in all the people on the air at one go (as it is there are hardly any hams check in) and therefore the net gets over very fast. As far as prashant is concern his case is just the opposite, he goes on and on.

All the points are my personal observations and they have been discussed with all the 3 net controllers, so there is no question of back biting. here we try to improvise and to increase the VHF activity.

I personally believe that all the 3 are doing a great job with full dedications, it is not everybody's cup of tea to do it day in and day out. Although there is definitely room for improvement. But you can't blame them ? how many of us are checkin in on these nets ? , I have myself having been taking the Early Birds Net. I later stopped it as I found that inspite of my best efforts there were not many checkin, I ofcourse don't have the patience like these net controllers, therefore I have utmost respect for all these guys. I have just suggested my point of view for improvisation if I have offended any of them then I offer my deepest and sincere apologies.

As far as policing is concerned, we all know how effective our govt authorities are, We have to guard ourselves and maintain discipline, You people don't even know why I asked VU2JPN not to transmit, his license has expired long long ago (more than a year) , In fact I myself had forwarded his renewal to the WPC, since JPN's draft was not of the correct amount his application was sent back, I have repeated reminded JPN to renew his licence, but he has been lazy and it got delayed, JPN is also part of our MARS Disaster management team, and a active member of our society. every time we have a simulated exercise, Ganesh Visarjan, JOTA, I cannot send his application for these occasions. It becomes a big problem if his licence is not renewed.

As a last resort I therefore told him not to operate without a valid licence, I have myself forward his application to WPC and it should be renewed very shortly.

MARS offers it services for getting new licences and renewal of licences to all the Hams in Mumbai, weather they are members or not, it does not matter, it is therefore ironic that inspite of having the facility, members operate without a valid licence, which is legally and morally wrong thing to do.

What if tomorrow people who are not hams start coming on our band and starts talking ? do we wait for the govt authorities to solve the problem ? I don't think so, I feel we have to guard our own band, remember the Chinese QRM ? what did the govt authorities do about it ? in fact it was JPN and others who went and pulled down their antennas.

In order to maintain the law and order, we must first start with ourselves, JPN is a very close friend of mine, if I am being cruel only to be kind, if I asked him not to transmit, I also help him to renew his licence. He is right now not on the air because he agrees with me. If he felt otherwise, then he can go ahead, who is NLF to stop him??

Lastly I have never claimed to be GOD, good heavens, I would be happy if I can be a good human being and good friend to my fellow hams .

It is true that I take our society very very seriously, because once you have started a society, you can't keep things pending saying Oh! it our hobby, I am sure the income tax and the govt authorities agree with me, I can't tell them OH ! its our hobby and therefore it is ok to file our returns after couple of years. nor can I tell the police during ganesh visarjan, sorry we goofed up, but hey its our hobby, or during a disaster time to the collector , hey it our hobby sorry we are operating without valid licences !.

It is very easy for people to comment as say hey ! its our hobby, when they have so responsibilities what so ever, when they have no commitment. I am afraid I as a secretary of our society I have many responsibilities and therefore I have to take up thing seriously. I don't have that luxury.!!!

It is quite obvious that some people don't share my views and I can't please everybody (although I try to), I would therefore sincerely request you all if you have any problems with me, please approach me, I am always open for discussions, but please do not start all this QRM on our MARS group.

I hope this thing ends with my mail and nobody replies, if anyone is offended, my sincere apologies.!!!

Now in available in MARS Library!!

QST - JULY'2003 Contents :-
a.. Put a Big Dish on AO-40 - "The EZ BUD" - By Clair E. Cessna, K6LG
Are you getting marginal signal levels from the OSCAR 40 satellite? Convert a surplus TVRO (TeleVision Receive Only) antenna - and relax with armchair copy!

b.. Self-supporting Tower and Antenna Installation - By Bart Pulverman, WB6WUW
Installing a self-supporting tower can be challenging and intimidating. Bart - WB6WUW, who has been through the process twice, shares his experiences to help you over the rough spots.

c.. Delayed Turnoff Fan Control - By Glen Thome, N8AKS
Keep your equipment cool... but not at your power supply's expense!

d.. Radio Camp - By Reed Nightingale, KD7MNN
Who would think that a bunch of kids, most total strangers, would all share a common interest, and care about it enough to spend a whole week out of their summer vacation to learn about it?

e.. An African Adventure to the Congo - By Nuria Font, EA3WL and Josep Gilbert, EA3BT
Two Spanish hams who mounted a DXpedition last year to TN, a much-needed DXCC entity, found that traveling to a troubled Third World nation can present its share of challenges.

f.. Observing the official observers - By Dave Hassler, K7CCC
Although not exactly the stuff of spy novels, the ARRL Official Observer Program maintains a vigilant, behind-the-scenes watch as part of Amateur Radio's long tradition of self-policing.

g.. An Automatic COR Circuit - Which Radio was That? - By Klaus Spies, WB9YBM
This useful COR (carrier operated relay) circuit can make all the difference in getting emergency traffic channeled correctly and quickly.

h.. Public Service
What's in Your Call-Out Bag?

i.. Product Review -
a.. ICOM IC-703 HF Transceiver (www.icomamerica.com, $679.95)
The IC-703 looks a lot like the IC-706MKIIG, but trades a capable internal antenna tuner for some bands and 90W of power. The result is a radio that will turn the heads of low-power and portable operators who yearn for features galore in a lightweight box.

b.. Alinco DR-620T VHF/UHF FM Transceiver (www.alinco.com, $339.95)
The newest dual-band mobile offering from Alinco maintains the brand's ease of use while incorporating digital voice capability.

c.. Buddipole Portable Antenna (www.buddipole.com, $195.00)

j.. New Products
a.. TGM Communications introduces new hybrid quad antennas
(www3.sympatico.ca/tgmc/index.html)

b.. Internal Antenna Tuner for the Ten-Tec Pegasus (www.ldgelectronics.com)

c.. Watts Unlimited High Voltage Switching Power Supply (www.wattsunlimited.com)

k.. New Advertisements
a.. OptiBeam (www.arraysolutions.com/qst)
Next Generation, Multi-band and Mono-band Yagis! One Feedline! - No Issues! - Outstanding!

b.. Maha (www.mahaenergy.com)
MH-PB-42LI - 1800mAh, 7.4V, compatible with TH-F6A
MH-FNB-58LI - 1200mAh, 7.4V, compatible with VX-5R & VX-7R
AA NiMH 2200mAh

c.. TEN-TEC (www.tentec.com)
ORION - Ultra High-End HF Transceiver ($3300, $3599 with autotuner)

d.. IC-208H - 2M/44 MOBILE 55W VHF/50 UHF W WIDE RX + 500 MEMS (HRO, $329.95)

e.. FT-8800R - 144 - 50W/430 MHz -35W FM DUAL BAND + 800+ MEMs, V/V, U/U, V/U, Cross band repeater capability (UNIVERSAL, http://www.universal-radio.com/catalog/fm_txvrs/0080.html, $379.95)

l.. Regular Features -
a.. Help Desk (US Amateur Bands)
b.. The Doctor is IN
c.. Short Takes (Electronic Snap Circuits)
d.. Hands-on Radio (Experiment #6 - Rectifiers and Zener References),
e.. Hints & Kinks (Hang wires from trees flexibly, Aviation headsets with AR equipment, A mighty duck for emergencies, You may already have a 6-meter mobile antenna),
f.. Technical Correspondence (More than the Ribbon J-Pole Antenna, Accurate Frequency Measurements)
g.. The World above 50MHz (Profiles of VHFers),
h.. How's DX? (Timor-Leste Goes QRT),
i.. Microwavelengths (DC to Daylight - Part 1)
j.. QRP Power (Hot Rodding the NorCal NC-40A)
k.. Old Radio (A Spy Radio),
l.. At the Foundation, Happenings, Correspondence, Workbench, Feedback, Hamfest Calendar, Strays, 75-50 & 25 Years Ago, Contest Corral, Hamfest Calendar, Coming Conventions, Special Events, Ham Ads

Observing the Official Observers
- By Dave Hassler, K7000 [QST-July'2003]

Although not exactly the stuff of spy novels, the ARRL Official Observer Program maintains a vigilant, behind-the-scenes watch as a part of Amateur Radio's long tradition of self-policing.

Listen, rather than transmit, is the prime directive of an ARRL Official Observer.

It's the 00's job to monitor the amateur bands for operating that either falls outside of good amateur practice or demonstrates exemplary operating. The upshot? A simple, friendly postcard from the 00 to the operator in question.

They perform their function by the simplest of dictates: listen, rather than transmit. Their mission: help a fellow ham. And after a job is done, the only artifact left to speak of their presence is a small postcard. They are ARRL Official Observers, working behind the scenes to help maintain the traditional high standards of Amateur Radio.

In a spirit of friendliness and cooperation, the 00 monitors the amateur bands, keeping an ear and eye out for transmissions that do not fall within good engineering or operating practice.

The 00 just sends out a helpful postcard-an Official Observer Advisory Notice-outlining the observed problem. Maybe it's a key click or chirp, or perhaps an overly broad or over modulated signal. Maybe it's something more serious, like frequency instability. Hopefully, it's not something worse, such as a case of malicious interference.

Consistent with the friendly and helpful spirit on which the whole program is base, the 00 Advisory Notice cites the appropriate element of Part 97 rules and asks that the recipient "please take a few minutes to determine what equipment factors or operating practice" might have caused the problem. There's a "thank you" and room at the bottom for the 00 to sign and add a personal 73. No reply is necessary; although some recipients do choose to respond.

Helping hams help themselves is what it's all about. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth. K4ZDH, said that as the main element and backbone of the Amateur Auxiliary to the FCC Enforcement Bureau, the ARRL Official Observer program has proven invaluable and is greatly appreciated. "It's one of the methods by which Amateur Radio is self-policing. Amateur Radio is a lot better off for them as they help other Amateur Radio licensee, not take their operating privileges for granted;' he said.

A Friendly Reminder

"I once sent a card to a station who keeps a regular schedule with his father in Africa," recalled Georgia Official Observer Coordinator Mike Swiderski, K4HBI "He had some splatter and a wide signal that was interfering with others. He sent back a very apologetic e-mail

that thanked me and explained how he was late for the sked and didn't tune up properly. He said he attached the [advisory] card to the front of his amp as a reminder to always tune up, no matter how late he gets to the radio."

Eastern Massachusetts OOC Mike Goldberg, KILJN, passed along this example of a typical incident that might get him, or one of his OOs, to send out an advisory card: "In the excitement of a contest you hear a call front a place you've been trying to work for a long time. You spot right on it, call and make a contact. Sometime later, a little card comes in the mail with a reminder that the other station was legally transmitting in his country, but you were out of band. A check of the log confirms it. It's not the kind of problem that changes the world, but a goof. "Well, I won't do that again soon!' you think."

And that's the end of it. It's a minor matter that's a one-time occurrence, a simple accident, Goldberg said. The types of problems that get an 00's major attention and many hours of his tune are those that are repeated and show a willful disregard for the rules.

ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG, said that once a problem is identified as persistent, malicious and/or intentional, Official Observers collect evidence of the problem-typically in the form of audio recordings, but with other methods of documentation, as well and send it in to him at ARRL Headquarters. Skolaut verifies the data and circumstances of the problem and then forwards it on to the FCC for enforcement. He added that OOs themselves never embark on any kind of enforcement activity.

"This program is supposed to be a friendly way to bring a technical problem or a poor operating practice to a ham's attention,' Skolaut said. "You really have to be doing something intentionally bad before it gets to my office. It's not isolated things that get this far-it's those who repeatedly violate the rules, the habitual offenders."

Tools of the Trade

The equipment an 00 uses varies from station to station, but in addition to a solid transceiver at home, many Official Observers employ mobile transceivers, scanners, time-difference-of-arrival (TDOA) DF gear, GPS units, portable monitoring recording equipment, audio signal intercept and analysis units, various attenuators and filters and APRS. There are other vital tools a successful Official Observer must carry, Skolaut said, "To be a good 00 you need to have the desire to help fellow amateurs in a friendly manner, use common sense, be able to accept criticism and know your reward comes from helping others;' he said.

All that equipment definitely comes in handy. Michigan section OOC Donald Sefcik. N8NJE, said that the 00's documenting process can include a little field work at times. That's when the direction finding equipment comes into play. "In one situation up here, we had a problem with a kerchunker keying up a repeater and sometimes making transmissions without IDing," Sefcik said. "We had a local 00 listen and then DF him. Once he was pinpointed, the 00 sent word that essentially said, `We suspect you are the one doing this, it's not cool and please stop.' That was it and it was apparently enough, because we never heard that problem again. The ham in question realized the situation and it ended there."

The Goofy and the Good

Sometimes, however, the problems an 00 observes are truly off the 'scope. Swiderski shared this nugget from the Peach State:

"Recently, I was alerted to a questionable call sign and. using the info provided by the alerting station and research by myself and Chuck [Skolaut] at ARRL Headquarters. I had to agree that something was amiss geographically," he said. "I got in touch with the operator of the station in question and it turns out he had been using an inactive relative's call sign for over 15 years. But it has a good ending, as he is now a legally licensed Amateur Radio operator."

00s also observe a lot of good operating on the amateur bands. When an operator's signals and manner are exemplary, the 00 can send out a special "Good Operator Report." The card makes note of the time, frequency and mode of the transmission. and thanks the ham for the "excellent example of good amateur practice for others in the Amateur Radio Service.

Duane Traver, WV2B, the OOC for the Western New York Section, said a surprised and very pleased recipient of a Good Operator Report e-mailed him back some interesting comments. The operator said he'd lived in fear for 28 years of getting an FCC pink slip or a card from an 00. "Imagine my surprise when noticing toy card from an 00 was a good thing;" wrote "Murph" Murphy, WA1VKO "[It] will be in the forefront of my mind while operating that people are listening, and we're making an impression on them. It's up to us whether it is a positive or negative one. Thanks for taking the time to do this important work for our hobby."

Origins of a Tradition

The Official Observer program maintains the same philosophy today as it did from its beginnings in the 1920s. "Newcomers have entered our ranks. Reports have it that they are operating off wavelength using long, drawn-out calls and signing at infrequent intervals;' states an article in the October 1925 issue of QST "One of the most powerful agents in improving individual operating is individual, friendly, and constructive criticism.... A form postal card has been devised with instructions that the [SMsj appoint Official Observers.... Observers are instructed to use the postal, conscientiously and make observations carefully."

Official Observers had to pass a frequency measuring test to prove the accuracy of their own measuring equipment. The September 1934 issue of QST lists the 142 00 stations one could call upon "when you need to ask QRG'?" or who might send a card to a hair about "a.c. notes, ripple, broad spacing, violations of good practice," or other malady. The program grew to have separate Morse and phone observers and eventually had five different classes. The 1980s saw a streamlining of the program and the number of observer classes reduced to one.

ARRL and the FCC Field Operations Bureau (now the Enforcement Bureau) entered into a formal Memorandum of Understanding in a joint effort to improve compliance of the Amateur Service with FCC rules, that MOU created the Amateur Auxiliary to the FOB under the regulations of the Communications Amendments Act of 1982. Hollingsworth noted that the scope of the Official Observer program has been slowly broadening over the years. He said a two-way street has now developed to the point that the FCC sometimes calls upon Official Observers, through ARRL HQ, to perform specific monitoring duties, collect information and document over-the-air violations in their capacity as the Amateur Auxiliary.

Getting Involved as an 00

The qualifications of an Official Observer are relatively straightforward. An 00 candidate must have held a Technician or higher class amateur license for at least four years and he

recommended by the Section Manager. In addition, to be a part of the Amateur Auxiliary. a course of study must be completed, along with successful completion of an examination.

San Joaquin Valley OOC Victor Magana, N1VM, points out that the Official Observer program is not for every ham. "If a person's motivational interest is to wear a police officer's badge of authority, or to engage in confrontations on the air, they should just save themselves the embarrassment of their participation," he stated. "The program does not have a place for amateurs who want to be band cops' Magana added that the 00's job is to monitor without prejudice and courteously advise a fellow amateur through the post cards at his disposal. And the job ends there enforcement is solely the job of the FCC.

For those with a genuine love for Amateur Radio and a true desire to help others, the 00 program is a perfect place to be of service to the amateur community. Skolaut said the place to start is by contacting one's Section Manager and asking for information. Also, he noted that the application is available on-line at the ARRI. Web site. Point your browser to ww w.arrl.org/FandES/field/forms/fsd187/form.html to start the application process. Once it has been submitted, ARRL HQ staff will review the application and send it to the appropriate Section Manager for a recommendation. Additional information on the program can be found on the ARRL Web site at www.arrl.org/FandES/field/org/oo.html.

Dine Hassler, K7000, is the Assistant News Editor for QST and the ARRL Web site. He can be reached by e-mail at k7ccc@... or by telephone at 860-594-0240.

Dear Friends,
A big Happy Bday to MARS and congratulations to all those involved in saving the lives of trapped people near Thane. All just goes on to prove that Ham Radio is much more than a hobby and it is the spirit and dedication that plays a major role rather than the technology.
Even though not a member but I must confess that while on my last visit to Mumbai during Jan I greatly enjoyed the 2 meter activity and QSOs eyeball as well as on air with so many friend specially the late night ones, fondly remember one of my friend switching his PC and checking one site on internet I suggested in middle of the night Hi Hi!
Small things do crop up at times but best sorted out in true Ham spirit.
Keep up the good work it is really inspiring for small group here to see a real active organisation in MARS.

Hi All,

I could read all the mails today only. What I can say is that one has to prioritize evrywhere.I will be foolish I do not know what's my priorities are....so I am taking everything cool.... but not forgetting what I have committed to the society.....so once that commitments are over....well, I would like to keep it at my heart.....

BTW, regular members at Early Birds Net like to have a longer net....and we can't have a longer net without keeping the frequency busy....and if somebody feels that I do the talking myself, then it's,to the best my my knowledge, is incorrect.I infact ask the other members to talk...anything.....so that we keep ourself engaged. Again, I may be wrong.But anyway I am taking evrything cool!!!

>
>
>Dear Members,
>
>This is in reference to the mail posted by Vijay and then replied by sarla and madhu . I intended to ignore the mail, but it seems people are commenting and putting allegations without knowing any facts .
>
>Firstly let me clarify that there is no backbiting, I go Thane of TEACHING and BITCHING, it so happened during one of sessions of thane batch, The SWLs of the last batch awaiting for their tickets have borrowed some VHF sets and are keenly monitoring the VHF activity. One of the SWLs asked as to why the NIGHT OWLS NET gets over in 5 to 10 minutes. Many hams come in by 9:40 / 45 and find that the net is over.
>
>In reply I informed them that as far as vispy is concerned, he once told me that he takes some medicine which make him feel sleepy and since their are not many checkin he shuts down the net. As far as nafisa is concerned she checks in all the people on the air at one go (as it is there are hardly any hams check in) and therefore the net gets over very fast. As far as prashant is concern his case is just the opposite, he goes on and on.
>
>All the points are my personal observations and they have been discussed with all the 3 net controllers, so there is no question of back biting. here we try to improvise and to

increase the VHF activity.
>
>I personally believe that all the 3 are doing a great job with full dedications, it is not everybody's cup of tea to do it day in and day out. Although there is definitely room for improvement. But you can't blame them ? how many of us are checkin in on these nets ? , I have myself having been taking the Early Birds Net. I later stopped it as I found that inspite of my best efforts there were not many checkin, I ofcourse don't have the patience like these net controllers, therefore I have utmost respect for all these guys. I have just suggested my point of view for improvisation if I have offended any of them then I offer my deepest and sincere apologies.
>
>As far as policing is concerned, we all know how effective our govt authorities are, We have to guard ourselves and maintain discipline, You people don't even know why I asked VU2JPN not to transmit, his license has expired long long ago (more than a year) , In fact I myself had forwarded his renewal to the WPC, since JPN's draft was not of the correct amount his application was sent back, I have repeated reminded JPN to renew his licence, but he has been lazy and it got delayed, JPN is also part of our MARS Disaster management team, and a active member of our society. every time we have a simulated exercise, Ganesh Visarjan, JOTA, I cannot send his application for these occasions. It becomes a big problem if his licence is not renewed.
>
>As a last resort I therefore told him not to operate without a valid licence, I have myself forward his application to WPC and it should be renewed very shortly.
>
>MARS offers it services for getting new licences and renewal of licences to all the Hams in Mumbai, weather they are members or not, it does not matter, it is therefore ironic that inspite of having the facility, members operate without a valid licence, which is legally and morally wrong thing to do.
>
>What if tomorrow people who are not hams start coming on our band and starts talking ? do we wait for the govt authorities to solve the problem ? I don't think so, I feel we have to guard our own band, remember the Chinese QRM ? what did the govt authorities do about it ? in fact it was JPN and others who went and pulled down their antennas.
>
>In order to maintain the law and order, we must first start with ourselves, JPN is a very close friend of mine, if I am being cruel only to be kind, if I asked him not to transmit, I also help him to renew his licence. He is right now not on the air because he agrees with me. If he felt otherwise, then he can go ahead, who is NLF to stop him??
>
>Lastly I have never claimed to be GOD, good heavens, I would be happy if I can be a good human being and good friend to my fellow hams .
>
>It is true that I take our society very very seriously, because once you have started a society, you can't keep things pending saying Oh! it our hobby, I am sure the income tax and the govt authorities agree with me, I can't tell them OH ! its our hobby and therefore it is ok to file our returns after couple of years. nor can I tell the police during ganesh visarjan, sorry we goofed up, but hey its our hobby, or during a disaster time to the collector , hey it our hobby sorry we are operating without valid licences !.
>
>It is very easy for people to comment as say hey ! its our hobby, when they have so responsibilities what so ever, when they have no commitment. I am afraid I as a secretary

of our society I have many responsibilities and therefore I have to take up thing seriously. I don't have that luxury.!!!
>
>It is quite obvious that some people don't share my views and I can't please everybody (although I try to), I would therefore sincerely request you all if you have any problems with me, please approach me, I am always open for discussions, but please do not start all this QRM on our MARS group.
>
>I hope this thing ends with my mail and nobody replies, if anyone is offended, my sincere apologies.!!!

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

We are conducting 2 VHF nets in Mumbai, the "EARLY BIRDS NET" and the "NIGHT OWLS NET", Unfortunately not many people are checking in for these nets. I really wonder why ??? many of us are having VHF capability yet not many check in. You can check in on both the nets or atleast one ? if not everyday alteast once a week ? is it too much to ask ??
5 minutes of your time for our hobby once a week ? come on guys, do some justice to your callsign, many are dying to get one and you have it but don't use it.

If you are reading this mail, that means you are interested in our hobby, so please take a little initiative and get on air. if any help required to get on air, then do let us know and we are there to assist you, say for your antenna, power supply or RIG problem.

Many of us are trying to make the VHF nets interesting, for example, VU2ZRS few days ago, gave is the recipe for making Apple pie, VU2VAH, XYL of VU2HIT is going to give us recipe for Biryani on coming Wednesday and so on, You can also contribute, starting with joining us on 2 meters.

VHF activity is likely to go up in a big way in coming few months, Our proposed VHF repeaters will be up shortly, The funds for the same are expected very soon.

Once the repeaters are up, we will hams checking in our nets probably from Pune, Nasik and Gujarat, I am sure we have a great VHF future.

Looking forward to hearing you on 2 meters,

73

I really wonder why ??? many of us are having VHF capability yet not many check in. You can check in on both the nets or atleast one ? if not everyday alteast once a week ? is it too much to ask ??
5 minutes of your time for our hobby once a week ? come on guys, do some justice to your callsign, many are dying to get one and you have it but don't use it.

If you are reading this mail, that means you are interested in our hobby, so please take a little initiative and get on air. if any help required to get on air, then do let us know and we are there to assist you, say for your antenna, power supply or RIG problem.

Many of us are trying to make the VHF nets interesting, for example, VU2ZRS few days ago, gave is the recipe for making Apple pie, VU2VAH, XYL of VU2HIT is going to give us recipe for Biryani on coming Wednesday and so on, You can also contribute, starting with joining us on 2 meters.

VHF activity is likely to go up in a big way in coming few months, Our proposed VHF repeaters will be up shortly, The funds for the same are expected very soon.

Once the repeaters are up, we will hams checking in our nets probably from Pune, Nasik and Gujarat, I am sure we have a great VHF future.

Looking forward to hearing you on 2 meters,

73

1253. Night Owls' Net

Yahoo group: m_a_r_s
Date: 2003-07-19 14:57:43 UTC
From: nafisa shikari
Topic: 466 Message: 1253

Dear Friends,
In the Moonsoons, it has been noticed that many stations do not copy each other on 145.000 MHZ very well. A few of us did some frequency hopping one of these days and found that 145.400 MHZ worked out the best for most of us. Hence, on a trial basis, we plan to shift the Night Owls' Net to 145.400 MHZ from Mon. the 21st of July. If it works out the best for majority of us then we will keep that as the Net frequency or else come back to 145.000 MHZ. Hope u will join us in big numbers on the Net and help us make it more interesting. We have everyday the regular 10-12 check-ins which makes us wonder where is the Mumbai Hams and more especially the MARS population. Do join us on the Night Owls' Net in big numbers on 145.400 MHZ at 9:30 p.m. and increase the VHF activity and make it more lively. Looking forward to seeing u all on the Night Owls' Net every day.
With warm regards
VU2 WLL Vispi Mirza

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

I am very pleased to inform you that today we have received 6 new tickets of the last years batch as under :-

MILIND KORDE - VU2IZO
ANISH KORDE - VU2OZO
VIJAY VIDYA - VU2CFO (Chief Fire Officer - Thane)
SANJAY KADAM -VU2KDM
SAILESH PRADHAN - VU2SFN
SAILESH DESHMUKH - VU2LOC

Congratulations to all the above hams on getting their tickets, I sincerely hope that all of you will become active ham radio operators.

All the other SWLs from the last years batch (churchgate & Thane) will be receiving their tickets very soon as they will be coming in batches in the next few days.

Looking forward to a very heavy ham radio activity in our Mumbai.

Hi All,

We are at the end of first half of our club year and club record shows that there are many members who have yet to pay their fees.

Collecting / sending fees, that too Rs.250/-, is definitely cumbersome; why not become a life member instead! You can call me on 25675226 or 35675226 if you want your fees to be collected.

Attached is the list of members who have forgotten to pay fees for 2003-04.All are requested to pay the fees at the earliest.

1263. Frequency on HBO Channel

Yahoo group: m_a_r_s
Date: 2003-08-21 18:49:39 UTC
From: Sandip Adiwarekar
Topic: 1263 Message: 1263

Anybody Know the Frequency?

A new movie involving amateur radio has made its appearance. According to the ARRL Web Extra movie editor, “Frequency is an imaginitive fantasy based on the complex relationship between fathers and sons.” The movie stars Dennis Quaid, who plays the dead firefighter father from the ‘60s.

The basic premise of this sci-fi thriller is apparently communication between the son, played by Jim Caviezel, and his dearly departed father on the ham bands during the peak of the sunspot cycle. It seems you have to stretch things a bit to include propagation through the time warp.

Never one to miss an opportunity, the ARRL believes that this movie will provide a public relations chance for local ham clubs. “Any ham club which can get it together to give demonstrations of ham radio in action in front of theaters playing Frequency should geet a lot of inter-action from the crowds leaving the movie. Since a number of equipment manufacturers are offereing prizes for the best ham demo, and since it’s a very entertaining film, any club with the ability should make arrangements ASAP for a ‘movie field day’. There is a terrific PR opportunity here.”

If you get a chance to see the movie, let me know what you think. One ham who saw it is quoted as saying that of all the “ham” movies he has seen (e.g., Contact), Frequency provides the best example of what the thrill of ham radio really is all about. It is a must-see film for all amateurs.
- CQ Chatter - Volume B2•Issue #12

Frequency on HBO Channel (Duration - 1:53 hr)

Frank Sullivan (Quaid, Traffic, Any Given Sunday), is a New York City firefighter who communicates with his son John Sullivan (Caviezel, Pay It Forward, The Count Of Monte Cristo, High Crimes) via short-wave radio. The only thing is, Frank died trying to fight a fire 30 years ago.

Their communication is a result of a freak of nature, and John uses it to warn his father of his impending death and thus saves his life. This, however, changes the pattern of time, and sets off a new sequence of unfortunate events, including the gruesome murder of John's mother.
Father and Son then work together from their respective time zones to make amends and to restore the pattern of time.

Brilliant performances by Quaid and Caviezel make this one a must see.

Hi there Sandip,

I saw 'Frequency' long back...may be an year ago...when I read abt
this movie on QRZ.com.Ofcourse I saw it on VCD.Also , I had asked
Amazon.com to inform me when DVD version is launched which they did
promptly on release of DVD.Needless to say I didn't order it.

Sent: Tuesday, August 26, 2003 3:21 PM
Subject: 19715 Fq. 14:00 - 14:25 GMT

As per advice one of my friend from Bangladesh (S2), last Sunday the 24th August, 2003 I was monitoring the 19715 Frequency. Time was 14:00 to 14:25 GMT. My friend monitor this since 2000. We both confused why this transmission going on ? The mode of the receiver was AM as well as USB and my antenna was inverted "V". And I was getting QSO in Amateur term 59+ and DXing term 555. My friend informed me that this transmission is going-on everyday using same frequency and time.

Gist of the message is - One YL announcing phonetic codes of English alphabets. I am not sure but she was repeating 2-3 times all codes. She starts like this message Echo Juliet India, message Echo Juliet India, message Echo Juliet India.

So I request if you send me some positive inputs regarding this, that will helpful for us.

Thanks in advance,

Happy DXing and Hamming.

i woulD like to know the name of the HAMS , SWLS , who
woulD be willing to participate in the event , latest
by 4th of septemeber , so that we can have a breifing
meeting on SUNDAY THE 7TH SEPT .

Freinds please contact me directly on my cell no 98200
34431 , also those who have any equipments , like
hanDys or base stations Do let me know abt the same ,
which woulD help me in planning the teams for
Different locations.

Most important point to be noteD in this is that this
event is open to only those memebers of the society
who have all their dues cleared in all respect , any
person whose Dues are pending , will not be allowed to
participate and be an unneceessary QRM , in the event.

so please do the needful at earliest

Topic: 1269 Message: 1269

Hi OMs/YLs!!

VUSAT (also known as HAMSAT) - The first Indian Amateur Satellite Heading Towards space.

40Kg micro-satellite to be launched onboard PSLV(Polar Satellite Launch Vehicle) from Sriharikota launch range. It will be a co-passenger alongwith another remote sensing satellite (most likely IRS-P6) to be launched on the same vehicle

Likely launch date: 10,October 03 is announed yesterday by VU2NUD (AMSAT-INDIA Co-ordinator)

The proposed configuration for the Ham payload part only:
http://www.amsat-india.org/official/vusat.htm

HAMSAT CONFIGURATION::
http://www.amsat-india.org/official/vusat-beacon.htm

To know more about VUSAT - visit http://www.amsat-india.org/

I've attached few messages posted recently on the VUSAT egroup at the end of this message.

73s de VU2UGO

Date: Thu, 24 Jul 2003 08:30:34 -0000
From: "Nagesh Upadhyaya" <ham@...>
Subject: vusat frequencies

This is only pre-launch information:

After launch, vusat will have the following frquencies :

1> Main transponder -- 2>Dutch transponder
--- ---
* uplink -- 435.250MHz -- 435.250MHz;
*downlink -- 145.900MHz -- 145.900MHz;
*bandwidth-- 60KHz -- 60KHz;
*beacon -- 145.936MHz -- 145.860MHz;
*beacon type-- unmodulated carrier -- modulated with cw info

vusat will have uhf uplink and vhf downlink - mode B (U-V)

Only one of the transponders will be on at a time and has to be
identified by the beacon.

From: "Nagesh Upadhyaya" <ham@...>
Subject: satnet

Remember the old days of satchat on 7.070MHz !
I will try to be available on the above frequecy on Sunday mornings
between 0745hrs to ....for any informal discussions on vusat.
Please join me and shoot questions.

-nagesh, vu2nud

Date: Fri, 22 Aug 2003 16:05:46 -0000
From: "Nagesh Upadhyaya" <ham@...>
Subject: vusat status

Hi all,
With the successful testing of Indian and Dutch
transponders, things are in good shape. Final integration of the
satellite started.
Have a look at the updated website www.amsatindia.org
Likely launch during October 2003
Look for great signals from vusat.

Subject: On Air Testing

Hi All,
With great pleasure,I wish to inform Amsat-India C0-0rninator OM.Air
Cmde
V.Subramanian (SUBBI VU2UV) and all others that on Thursday,21.8.2003 @
16.00
Hrs IST the flight model of the Indian Transponder was sucessfully tested on
Air
by the Amsat-Technical Committee and Upagrah Amateur Radio Club VU2URC(ISRO
Club
Station). Congrats to VU2POP, as he was the first person to get through the
transponder.The down-link signal level reported by VU2POP was

satisfactory.Sucessful two way link was established on FM,CW and
Sidebands.The
beacon signal level reported by POP was also satisfactory.
My sincere thanks to all other Bangalore Hams who stood by on the
frequency during the testing.After few more planned tests, the transponder
will
be switched on again in the comming days.The exact timings will be intimated
in
advance.

Secretary, Upagrah Amateur Radio Club,VU2URC

Date: Wed, 27 Aug 2003 07:32:06 -0000
From: "Nagesh Upadhyaya" <ham@...>
Subject: vusat testing

Dear all,
Flight version of The Dutch(by Williams, PE1RAH)and Indian
transponders were tested "on-the-air" today at about 1100hrs (IST).
This is probably the last test prior to mounting them on vusat deck.
Both of them worked satisfactorily in CW/SSB/FM modes.
Hams VU2LX, VU2POP, VU2IR, VU2WMY/URC and others
participated in this important test and gave reports.
With the power packages also delivered for integration, now
the satellite will go for power-on tests.

Date: Thu, 28 Aug 2003 19:50:58 +0530
From: wmy@...
Subject: Vusat Testing

Hi All,
The Vusat flight Transponder(Dutch)by Williams was tested
sucessfully
"On the Air" on 27.8.2003 at 09:30 Hrs.The test was co-ordinated and
conducted
by Amsat technical Commitee and Upagrah Amateur Radio Club(VU2URC ISRO Club
Stn).Sucessful two way communication was established with VU2POP(Amsat-India
technical committee) on FM,CW and Sideband modes.Two way link between VU2LX
Lakshman(Amsat-India Member)was also established on FM mode. The signal
levels
about the beacon and the down link reported by both POP and Lakshman was
satisfatory. I once again thank POP for all his continued help and support
provided during the various stages of testing.Thanks to Lakshman for being
on
the Air to provide the signal report.

HELLO GUYS

Am trying to experiment one thing specially for SWLS
who dont have handys or vhf sets , but if they want to
listen to qsos ,

here try Doing this

log on to yahoo chat , look for listing of HOBBIES ,
then go to user room list , you will find a room ,HAM
RADIO ,

now my rig will be on , as am able to receive all
sations on vhf , Deal is ,i get all qsos and my comp
mic is connected to it the rig speaker , sound thru
this comes into the yahoo room , now if u r connected
to this room , anD u use ur heaD phones or speakers u
might be able to listen the qso of hams going arounD
this is am just trying whether it works , hey if i
Dont answer ur mssgs , may be am away but my comp is
on
for the above reason

lets see whether it works
happy listening

1274. QSP from VU2OZO!!

Yahoo group: m_a_r_s
Date: 2003-09-04 08:51:36 UTC
From: VU2UGO
Topic: 1274 Message: 1274

Hello Friends !!!

Myself Anish Korde VU 2 OZO. I am going for a Trek to Lohagad Fort, situated at Lonavala. This would be my 4 th trek this year. Me & my core team go for treks all year long. I have been in this hobby for the past 20 years & will remain to do so as long as all the beautiful people who want to enjoy nature, marvel at our country 's grandeur have no guidance as on how to go about on treks. So for all u people this is the right time I guess. My team is well equipped & well organized, so leave ur worries to us and come along for a breathtaking experience.

So for those of u who don't know me & are interested in the trek, I have given details below & a brief info on the majestic fort.

Trek Destination : Lohagad fort. (Lonavala, Malavli)
Duration : 1 day (nights travelling)
Date : 13th to 14th of September 2003.
Contribution : Rs. 150 /- only. Your contri includes travelling fares, 2 breakfasts & snacks & one lunch.
Assembly : Thane Station (W) - Ticket Counter, Platform No. 1. At 21:00 hrs.

We'll be leaving from Thane by the last passenger train to Poona. There will be no reservations 'cause treks are bound to be fun & not picnics. We would get down at Malavli & reach the base by 4 in the morning, have a short nap & proceed to climb the Fort at 6 in the morning after snacks. The Climb is very very easy & is graded for beginners. So we would reach the fort by max 10 o'clock. The Team will cook Maggi for Lunch, & after sight -seeing + snacks, we'll be heading back for home by 3 in the noon from the fort.

This is for all the HAM's :- there will be a exercise from atop the fort. I will be putting up a station on the fort, & will have QSO's with all stations from Mumbai, Pune, Nashik & Gujarat. QSO will start at 11:00 hrs & last for 2 hours.
We come back to lonavala & then proceed back to Mumbai, after shopping for the famous Chikki's. I have given a list of equipment to be carried along for the trek.

List of Equipment. :-
Sack - backpack or rucksack.
Extra Clothes in case of Rains.
Rubber or PVC soled shoes.
Rain-cheater or Wind-cheaters.
Plates, spoon, fork & mug.
Water bottles.
Camera if needed.

Little bit of snacks.

As for the further details, those could be discussed at the Meeting on the 7th of September 2003 at Bai Bengali Girls School at 10 : 00 hrs. Be sure to register before 4 th of Sep 2003, for the Ganpati Visarjan event conducted by M. A. R. S.
For trek Contact :-
Anish : 2534 63 22.
Saurabh : 20520945 / 55971373(after 9 p.m.)

1276. Quick PSK63 Contest

Yahoo group: m_a_r_s
Date: 2003-09-05 10:30:41 UTC
From: VU2UGO
Topic: 1276 Message: 1276

DATE : Start 0000 UTC September 6 and end 2359 UTC September 6 2003

Bands: 80, 40, 20, 15, and 10 m.

Example : The suggested area for PSK63 operation on 20 meters is just above the PSK31 activity, or starting at 14072.5 and extending to the beginning of the
RTTY activity area at 14080. To do this, just set your transceiver to UPPER sideband, and the dial frequency to 14072.0. Use the same concept for the other bands .

Classes:
A: Single Operator / All Band
B: Single Operator / Single Band
C: SWL / All Band

For More Info visit :

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

You are aware that MARS provides vital communication support to the Traffic Police,Life Guards, First Aids, Ambulances etc.. during Ganesh Visarjan every year. It is one of our events where there is huge number of participations by our members.

This year once again we would be providing our communication network. VU2UGJ - Mukesh Jaitley has flaged off few mails regarding this event. few of our members have responded to the mail and given their confirmation of their participation. The list of the them is as under :-

VU2NLF, VU2UGJ, VU2HIT, VU2ZRS, VU2ICQ, VU2JPN, VU2NHR, VU3MWH, VU2LIB, VU23AUA VU2PIC, VU2IZO, VU2OZO, VU2SFN, VU2LOC, VU2KDM, VU2SXF, VU3PAN, VU2RIO

Supriya Tupe, Sachin Tupe, Deepak Pathak, Shantanu, Hufraid, Ulhas Parlikar, Mohmad, Mustafa, Anish Pancholi, Rahul More, Kapil, Pratnya Agarkar.

The Briefing meeting will be conducted on 7th Sept 2003 Sunday at 10:00 am at B.S.Bengelle Girls School, Churchgate. All the above participants are required to attend the meeting without fail, You participation in the event will be subject to your attending the briefing meeting. Anyone not attending the meeting will not be allowed to participate in the event and their will be no exceptions please note.

If you are interested to participate for the event and you name does not reflect in the above list, then please contact me immediately on 98205-47074. there will be no last minute entries.

http://cities.expressindia.com/mumbai.html

Look who'll be bay-watching

Hubert Vaz
Mumbai, September 7: Thirty young men and women will spend Tuesday keeping a watchful eye on the millions who descend on Girgaum Chowpatty to bid adieu to Ganesha.
Baywatch, Mumbai-ishtyle?
Well, almost. Only, the 30 are not ace swimmers. They're members of Mumbai Amateur Radio Society (MARS) who've been offering their help to police and civic authorities for the past 10 years, in rescue operations during visarjan.

Says Zyros Zend, chief coordinator of the arrangements made by the HAM radio operators, ''We have been given special permission to set up a machan-an elevated platform for a bird's eye view-at Chowpatty, for coordinating messages.''

Zend and his team of HAM radio operators will be perched at specified locations all over the beach as well as in boats deployed by the civic body.

If anybody is noticed drowning or in distress, messages will be flashed to all operators and help from the nearest booth will be rushed to the spot in minutes.

They'll also be helping kids separated from their groups or families.
''Since people who come walking and dancing for four or five hours are exhausted, there are many emergencies," Zend explains.

Their job is to receive information and coordinate with the lifeguards, ambulances and civic hospitals so that there's no delay in saving lives, he adds.

Secretary of the society Nilesh Rathod informs that HAM radio operators would also be positioned at C P Tank, Opera House, Prarthana Samaj, Lamington Road and Nana Chowk.

The team will get to work at noon on Tuesday and stay at their positions till 6 am the next day.

They had helped out following the recent stampede at Nashik and before that in remote Gujarat after the earthquake. Now, they're excited and ready for another hard day's work.

1286. Import your Gear

Yahoo group: m_a_r_s
Date: 2003-09-08 16:24:14 UTC
From: Mehul Chovatia
Topic: 1286 Message: 1286

Hi All,

We are working on importing equipment in bulk so that each one of us get a better rate and latest stuff.

We would be primarily looking at importing the following models. The tentative price of each one is mentioned. This price is inclusive of the Duty concession available to amateurs.

IC 718 (More info at http://www.icomamerica.com/amateur/hf/ic718main.html) - Rs.28000/-

IC 706 Mark IIG (More info at http://www.icomamerica.com/amateur/hf/ic706mkiigmain.html) - Rs.53000/-

IC T90 Handy (More info at http://www.icomamerica.com/amateur/dualhand/ict90main.html) - Rs.16000/-

We would be trying to arrange for Bank Loan so that we can pay off the amount is easy EMIs. Interested HAMs may revert so that we can arrive at the total quantity of import.

73s,

Mehul Chovatia.

From: VU2NLF
Topic: 1288 Message: 1288

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

We have received 16 more tickets for the batch of 2002.

FEROKH IRANI - VU2 WET - Station up in Pune. (Licence delivered)

SANTOSH VADANTE VU2 IES - Operational on Handy (To be Delivered)

MANDA PAWAR. - VU2 ??? (Licence freezed)

DR. ANUKANTH MITTAL - VU2 ??? (Licence freezed)

DR. PARESH KARIA - VU2 ??? (Licence freezed)

VILAS MORE VU2 ??? (Licence freezed)

KAPIL CHANDNI VU2 ??? (Licence freezed)

HARSHA KULLAR VU2 ??? (Licence freezed)

HARDEEP SINGH KHALSA VU2 ??? (Licence freezed)

FEROZE PATEL VU2 ??? (Licence freezed)

BRIJESH RAGHVAN VU2 ??? (Licence freezed)

P.V.HARIDAS VU2 ??? (Licence freezed)

MUKUND GUBBI VU2 ??? (Licence freezed)

MILIND PARLIKAR VU2 ??? (Licence freezed)

ASHOK PARAB VU2 ??? (Licence freezed)

SANJAY SHINDE VU2 ??? (Licence freezed)

Congratulations to all the above for getting the ticket, Nevertheless all the licences will remain with society till your station is up and operational (atleast on VHF). Once your station is up you may get in touch with us and your licence will be handed over to you.

You can avail all the help from the society for putting up your station, for example installations of your antennae and getting the radio equipment.

VU2ICQ has already posted a mail regarding import of equipment, you may contact VU2ICQ directly to book your set.

All the SWL from the batch of 2002 (Churchgate & Thane) are ADVISED to start your installations of your antennae and order your sets with VU2ICQ to avoid any delay after getting your tickets.. (Your ticket will be arriving shortly).

You guys have no idea how difficult it is to get the tickets, We got 22 tickets which were pending from last 3 years. The tickets were handed over to the swls on 1st Feb 2003, unfortunately not a single station from the 22 calls is on air. (reasons best known to them) All the efforts taken by the society has gone to waste.

Hence the society has decided not to hand over any further licences till their individual stations are up and ready for operations..!!

hello martians!

I got so many requests for the modification to be done in the FM receiver for 145.00 Mhz after the visarjan program, so finally i decided to post it on e-groups so that everyone can follow the modification.

I have attached a word file along with this mail which explains in a systematic manner the modification to be made.,....also i have inserted a few pictures to make it a lil more easier.

I hope you will be satisfied with this. If at all you have any doubts,please feel free to mail me or call me.

regards,

Ankur Puranik

1295. Power Failure in Mumbai ???

Yahoo group: m_a_r_s
Date: 2003-09-13 08:48:59 UTC
From: VU2NLF
Topic: 1295 Message: 1295

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

You may be aware about the recent major power failure in USA. Hams were the only ones who could communicate and rightly so they did their bit..

Imagine a major power failure in Mumbai ??? how many of us are equipped to deal with it ?? I can guarantee my station and maybe VU2UGO & VU2UGJ, but what about you guys ?? do you have the capability to operate without the electrical power source ?? I know for a fact that most of you are not..!!!

MARS is on the panel of Disaster Management Plan of BMC... the million dollar question is what can we offer in case of emergency.. for disaster in Maharastra or Gujarat, we do have our core team which can mobilize in few hours notice and can provide communication on HF. But what about Mumbai itself ? are we geared to handle the situation?? In the recent Bomb Blasts we were so helpless thanks to no repeater in Mumbai. I was in Thane and I could not do anything to help. had there been a repeater maybe we would have done something..

Well the good news is our VHF repeaters will be up in the next couple of months for sure.. But what in case of a power failure ? The repeaters will have a battery back up system, but the question is do you have a backup ??

A couple of years ago, one of our SWL working for a networking company donated us with 20 batteries of 12V 65amp worth about Rs.1,50,000/-. we gave away those batteries free of cost to many of our members as a backup system for Shack. Unfortunately most of the batteries have packed up because our members have failed to maintain these batteries (periodically charging and discharging them). maybe because they are lazy, maybe because they don't know how or maybe simply because they were given for free and they just don't care..

The good news is that once again we have been offered 12V - 42amp sparingly used batteries but in excellent condition for Rs.600/- each. (Panasonic , Japan maintenance free). These are very good batteries ideally suited as a backup supply for your shack, also it is good for field operation (specially for scramble team members).

All members interested in them may get in touch with me ASAP, limited stock available. Please go for these batteries only IF you plan to MAINTAIN them, DO NOT waste our resources.. It is not every day you get this kind of offer, if you were to buy a brand new one, it would cost you about Rs.4000/-.

If you do not know how to maintain these batteries, please feel free to ask me and I will provide you with necessary instructions.. do not delay time is running out, you never know when the next emergency will occur..!!

1296. Fees for 2003-04

Yahoo group: m_a_r_s
Date: 2003-09-14 07:52:33 UTC
From: Prashant Koli
Topic: 1296 Message: 1296

Dear friends,

As you are aware that your society is doing yeoman's work to sustain interest
of hams from Mumbai and around by conducting many activities throughout the year. In order that our society should keep on doing such activities it is imperative that we pay our fees on time.
As per the society's records the following members have yet to pay their dues for 2003-04.

Minoo Contractor
Jyotika Dalal
Sudhir Kalkar
Rohit Arora
Kirti Doshi
Sandhya Koli
Anusuya Pullakudy
ASHOK R PARAB
CHANDER H BHATIA
DINESH CHAUDHARY
G M ZALKE
HARSHAD SURVE
J T D'SOUZA
KAUSHIK JAIMALANI
MILIND PARALIKAR
MRITYUNJAY HIREMATH
P V HARIDAS
R K BHATIA
RAHUL S MORE
S S INAMDAR
SACHIN JHUNJUNWALA
SAMSON RAMRAJKAR
SANJAY G KADAM
SANJEEVKUMAR KADAM
SURESH PUNYARTHI
VARGHESE WILSON
AJIT V.VORA
AMIT GUPTA
ANAND TRIVEDI
BALRAM WARRIER
BHARAT C.SHAH
CHARLES BARBOZA
DESHRAJ BHARMORIA
DILEEP PRABHAKARAN
GAUTAM KEDIA

HARDEEP SINGH KHALSA
JESAL DOSHI
RISHI LAL
SACHIN SURENDRAN
SAJIV KURUP
SAJJAD JIVANI
SHYAM KAPADIA
SUBRATA CHAKRABORTY
ZARTHUN ZEND
ZORBEN ZEND

It should also be noted that participation in society's events and also help to individual members will be restricted to only those who continue to be members i.e. those who have paid fees for the current year.

All the above members are earnestly requested to pay fees at the earliest.

1297. Hamfest India 2003 - Gandhinagar, Gujarat.

Yahoo group: m_a_r_s
Date: 2003-09-14 10:48:59 UTC
From: VU2NLF
Topic: 1297 Message: 1297

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

The Hamfest India 2003 will be held on 8th & 9th November 2003 (Saturday & Sunday) at Gandhinagar, Gujarat. It is organised by Institute of Amateur Radio Gujarat.

For people who do not know about Hamfest, let me explain, Hamfest is a annual festival (once a year), where Hams from all over India get together for an eyeball. You may be talking to your fellow hams, but this a good opportunity to meet them in person. Usually the programme is for 2 days, where many topic related to our hobby are discussed and presentation are given on many subject. Usually there are many stalls for buying and selling equipment, awareness of new technologies etc..

The programme for his Hamfest 2003 is as under :-

PROGRAMME DAY - 1

09:30 Registration.

10:30 Inauguration.

11:15 Tea.

11:45 Session - I

01:30 Lunch

02:30 Session - II

04:00 Tea

04:30 Session - III

07:30 Dinner

08:30 Entertainment Programme.

PROGRAMME - DAY - 2

08:00 Breakfast

09:00 Session - I

10:30 Session - II

11.15 Tea

12:00 Session - III

01:30 Lunch

02:00 Valedictory function

03:00 High Tea.

The details of the sessions - I,II,II on first & second day are not yet declared, but some topics of discussions are Emergency Communication during disaster, Data Communication through HF and VHF, New evolution in the field of amateur radio & common issues pending with WPC.

MARS plans to participate in the HamFest in a big number, since we have a good 230 + members now. I am sure it would be a wonderful experience for all the licnenced hams and SWLs. I have already got 26 confirmations in today's Ganesh Visarjan De-briefing meeting. I am sure we would have anywhere from 50 to 75 members joining in and more hopefully.

The registration fee is RS.100/- only. MARS will be arranging transport and accommodation for all our members at cost. (we are planning to hire couple of Luxury Buses).

I therefore request all our members (Hams & SWLs) to join us for this Annual Festival. I assure you it will be great fun and a wonderful experience for all of us to be together and to have eyeball with many of our friends from all over India.

For registration kindly contact me directly on 98205-47074 or mailto:vu2nlf@bol.net.in

Lets us all go as a MARS Parivar..!!

1299. LEAD ACID BATTERY CARE

Yahoo group: m_a_r_s
Date: 2003-09-16 06:45:58 UTC
From: Ankur Puranik
Topic: 1299 Message: 1299

NOTE : This article is taken from http://www.emrg.ca

LEAD ACID BATTERY CARE

INTRODUCTION

Whether for remote operation, backpacking, special events or emergency use, there is a size and capacity of battery to fit all applications. What you do once you buy a battery will determine its useful life. Besides physical abuse, the two things that shorten battery life are over charging and under charging.

Gel Cell batteries are often used as a portable power source in ham radio. There are many sources for gel cell batteries, from flea markets to alarm supply stores to electronics specialty outlets. The price, size and condition will vary greatly.

The "gel cell" is a sealed lead acid battery. The electrolyte (acid) is stabilized by combining it with a gelling agent or by using an absorbent plate separator. This type of battery can usually be stored, used, charged and discharged in any position.

Some lead acid batteries are designed with a plate size imbalance or a catalyst, to help control gas generation and to aid in deep cycle recharging. These are known as "deep cycle" batteries. This type of battery is often associated with Marine use, where some batteries offer boat engine starting capacity and deep cycle capacity.

DOES AND DON?TS

Do Not charge batteries in a sealed container. ALL lead acid batteries, including gel cells, can produce hydrogen gasses.
Do Not use an automotive type battery charger for gel cells. The output voltage is too high and will overcharge the battery. Overcharging shortens battery life.
Do Not store a battery in a car in hot weather, under direct sunlight, in front of a stove or near a fire.
Do Not carry the battery by the terminal connections.
Do Not charge a battery beyond the time specified (if using the cycle method). If the battery is not fully charged even after being charged for a time longer than specified, discontinue charging and remove the battery from the charger.
Do Not discharge A 12 volt battery below about 10.5 to 10.7 volts (1.75 volts per cell x 6 cells). Sealed lead acid batteries will generally not tolerate repeated deep discharges.

Always charge a new battery before use
Always Install insulation covers on terminals to prevent shorts.
Always install a fuse in the cable connecting to the battery, to protect the battery and cable from shorts. Install the fuse on the battery end of the cable.
Always keep the battery clean.
Always charge a battery that has not been used for a long time. The battery gradually loses its capacity due to self discharge during storage. Periods over which the battery can be stored without charging are given below in relation to storage temperatures:

Below 20oC 9 months
20oC to 30oC 6 months
30oC to 40oC 3 months CHARGING

There are two considerations for charging a battery; how to charge it quickly and how to keep it charged. Before building or buying any battery charger, get a volt meter first. The only way to know what is really happening with the battery, is to measure the voltage levels. This is important over time, to ensure that the charger is operating properly and to detect battery deterioration.

Rapid charging of a battery requires a lot of user care or a charger designed for rapid charging. Batteries can be damaged if they are charged to fast or too long. Rapid chargers monitor the charging rate and voltage, and adjust the charging current during the charge cycle. Some chargers are designed to go into maintenace mode once the battery is fully charged which ensures that the battery is not overcharged, but is always ready when required.

Keeping a battery charged, ready for use, can be accomplished in several ways. This same charger can typcally be used to charge the battery as well, it just does it slowly, so it may take a day or more to reach a fully charged state. It is critical to understand the limits of your battery to ensure that the battery is not overcharged.

There are two options described in this document; build/buy a charger or use a regulated power supply with an adapter. Examples and details are provided

chargers available for
Chargers which
Lead acid batteries used for ham radio applications spend most of their time sitting on a shelf. The

The sections below describe the types of charging available, but this section jumps in with some solutions for mainting the battery.

TERMS

Battery Cycle

One cycle for a battery, is a discharge plus a charge

Amp-Hour Rating

Battery capacity based on the amp-hour rating, where the current in amperes is multiplied by the time in hours that current can be drawn.
For example a battery which delivers 2 amps for 20 hours, would have a 40 amp-hour rating. There are limits on the discharge current, so that a the example of a 40 amp hour battery does not mean 40 amps for 1 hour.

Deep Cycle Battery

This is a specially designed battery, which has thicker plates and a high density active material. The thick plates allow for reserve energy to be discharged, while not leaving the battery in a condition where it cannot be charged.
Typically the discharge is at a slow rate, such as for a trolling motor.

Float Voltage

A constant voltage applied to a battery to maintain its capacity. This is slightly lower than the batteries full capacity.

CHARGERS

There are three types of chargers for gel cell batteries:

Constant Current

A small constant current is maintained through the battery for a long period of time.
This type of charger is designed for a 12 to 16 hour charge time.
This is the most common and least expensive charger.

Constant Voltage

A constant voltage is maintained across the battery terminals.
When connected to the battery, there is a high initial charge current, which tapers off as the battery charges.
This type of charger usually completes its cycle in 2 to 4 hours and is terminated by a timer to prevent overcharging.

Constant Voltage & Current

The charge current and voltage vary as the battery is charged.
When the battery is connected, a moderately high charge current is supplied to the battery. The voltage rises as the battery is charged and the current is reduced. The state of charging will continue until the battery is removed. The maintenance current is required to make up for the batteries self discharge.
Charging time takes from 6 to 12 hours depending on the batteries original condition.

More elaborate chargers will also include temperature compensation. This is required because the batteries charging characteristics vary over a temperature range.CHARGING

There are two main charging methods for gel cell batteries:

Cycle Use
Float Use or Trickle Charge

Cycle Use

With the cycle use charging method, the battery is charged to its maximum capacity and is then removed from the charger. The battery is connected to a load when required, which will discharge the battery. The discharged voltage of the battery should not go below 10.5 to 10.7 volts (1.75 volts per cell x 6 cells).

When the battery is discharged, it is connected to the charger and is charged once again. The maximum charging voltage is 14.5 to 14.9 volts, depending on temperature (See table below). The typical value to use is 14.7 volts, which is the charge voltage at 25oC. Charging time is 6 to 12 hours, depending on the batteries state of discharge.

Charging Voltage-Temperature Table

0o C (320 F)

25o C (770 F)

40o C (1040 F)

15.4

14.7

14.2

The maximum charging current is equal to CA, where C is the batteries rated capacity and A is the initial current rating from the battery manufacturer. The recommended maximum charging currents are:

4 Ah = 0.3 x 4 = 0.12A (120mA)

7 Ah = 0.3 x 7 = 0.21A (210mA)WARNING: Do not exceed the maximum voltage or current and do not leave the battery on the charger beyond the typical 12 hour limit. This will cause the battery to overcharge, leading to permanent reduction of its capacity and premature failure.

Float Use

The float use method is often mixed with the trickle charge method, because both types use the same charging style. Float use means that the battery is permanently installed in the circuit with the load and the power supply/charger. When the power supply/charger fails, the batteries supply the power. This method is used by the telephone company to ensure that the phone system is always working.

Trickle charging is associated with a battery that is not connected to a load, but has a charger attached. The battery must be connected to the load when required. The charger is just that, a charger and is not capable of supplying power to the load. When the battery is attached to the load, the charger is removed.

The important difference of the float use method over the cycle use method, is that in the float use method, the battery is charged to a voltage that is below the maximum volts per cell for the battery. The typical float voltage is 13.4 to 14.1 volts, depending on temperature (See table below). The typical value to use is 13.7 volts, which is the charge voltage at 25oC.

Charging Voltage-Temperature Table

0o C (320 F)

25o C (770 F)

40o C (1040 F)

13.7

13.4

The battery has less capacity when charged under the float method, but it is possible to leave the charger attached without damaging the battery. This is the type of charger used in alarm systems. The charger is not sophisticated, it simply is designed not to exceed the

float voltage.NOTE : The above article is taken from http://www.emrg.ca

>Check this out! It's really strange....

> Aoccdrnig to a rscheearch at an Elingsh uinervti sy, it deosn't mttaer in

waht oredr the ltteers in a wrod are, the olny iprmoetnt tihng is taht frist

and lsat ltteer is at the rghit pclae. The rset can be a toatl mses and

you can sitll raed it wouthit porbelm. Tihs is bcuseae we do not raed ervey

lteter by it slef but the wrod as a wlohe.

Initsereg!!

This is really funny and true, I noticed the mess towards the end, my eye was adjusting it automatically

1305. q codes at a glance

Yahoo group: m_a_r_s
Date: 2003-09-17 04:15:43 UTC
From: Ankur Puranik
Topic: 1305 Message: 1305

Amateur Radio Q-Codes
International Q Code is an abbreviated way to exchange a great deal of information with a simple code. The Q Code consists of three-letter groups with each group having a specific meaning. Each group begins with the letter Q. Auxiliary letter groups or numbers are also used to help define the information that is need or passed with certain Q Code three-letter groups.
The International Q Code can be arranged in three types of code groups according to the second letter in the three-letter Q Code.
The Q Code comprises :
A. General Codes, second letter of which is R, S, T or U. (Some used by Hams).
B. Maritime Service Codes, second letter of which is O, P or Q.
C. Aeronautical Codes, second letter of which is A, B, C, D, E, F, G, H, I, J, K, L, M or N.
Some common Q-Codes used by Amateur Radio Operators are:

Signal
Question
Answer, Advice or Order

QRG
Will you indicate my exact frequency in kilocycles?
Your frequency is ... kc.

QRH
Does my frequency vary?
Your frequency varies.

QRI
How is the tone of my transmission?
The tone of your transmission is ...
1. Good.
2. Variable.
3. Bad.

QRJ
Are you receiving me badly? Are my signals weak?
I cannot receive you. Your signals are too weak.

QRK
What is the legibility of my signals (1 to 5)?
The legibility of your signals is ... (1 to 5).

QRL
Are you busy?
I am busy (or busy with....). Please do not interfere.

QRM
Are you being interfered with?
I am being interfered with.

QRN
Are you troubled by static?
I am troubled by static.

QRO
Must I increase power?
Increase power.

QRP
Must I decrease power?
Decrease power.

QRQ
Must I send faster?
Send faster ... (words per min.).

QRS
Must I send more slowly?
Transmit more slowly ... (w.p.m.).

QRT
Must I stop transmission?
Stop transmission.

QRU
Have you anything for me?
I have nothing for you.

QRV
Are you ready?
I am ready.

QRW
Must I advise ... that you are calling him on ... kc?
Please advise ... that I am calling him on ... kc.

QRX
When will you call again?
I will call you again at ... hours (on ... kc.).

QRZ
By whom am I being called?
You are being called by ...

QSA
What is the strength of my signals (1 to 5)?
The strength of your signals is ... (1 to 5).

QSB
Does the strength of my signals vary?

The strength of your signals varies.

QSD
Is my keying correct? Are my signals distinct?
Your keying is incorrect; your signals are bad.

QSG
Must I transmit ... telegrams (or one telegram) at a time?
Transmit ... telegrams (or one telegram) at a time.

QSK
Shall I continue the transmission of all my traffic?
I can hear you between my signals. Continue: I shall interrupt you if necessary.

QSL
Can you acknowledge receipt?
I am acknowledging receipt.

QSM
Shall I repeat the last telegram I sent you?
Repeat the last telegram you sent me.

QSO
Can you communicate with ... directly (or through...)?
I can communicate with ... direct (or through...).

QSP
Will you relay to ...?
I will relay to ... free of charge.

QSV
Shall I send a series of VVV....?
Send a series of VVV.

QSX
Will you listen for ... (call sign) on ... kcs?
I am listening for ... on ... kcs.

QSY
Shall I change to ... kilocycles without changing the type of wave?
Change to ... kc. without changing type of wave.

QSZ
Shall I send each word or group twice?
Send each word or group twice.

QTA
Shall I cancel nr ... as if it had not been sent?
Cancel nr ... as if it had not been sent.

QTB
Do you agree with my word count?
I do not agree with your word count; I shall repeat the first letter of each word and the

first figure of each number.

QTC
How many telegrams have you to send?
I have ... telegrams for you or for ....

QTH
What is your position (location)?
My position (location) is ....

QTR
What is the exact time?
The exact time is ....

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

All members of the above groups are requested to refrain from putting mails which are not related to our hobby of Ham Radio, This E Groups are exclusively for topic and infomation for Amateur Radio.

In past we have faced a lot of QRM because of the same, Although I understand that your intension may be very good to pass on good info to rest of your friends, but please avoid on this group.

We have received many complaint about the so called Junk mails (not related to ham radio), members not following the protocol will be removed from the group, please note.

VU2NLF, Moderator.

1313. Simple 12volts , 30 Amps powersupply for your radio

Yahoo group: m_a_r_s
Date: 2003-09-18 07:04:38 UTC
From: Ankur Puranik
Topic: 1313 Message: 1313
Attachments: 1 described; binary payloads are missing from this source WARC

taken from http://www.mitedu.freeserve.co.uk/Circuits/Power/1230psu.htm

12 volts , 30 AMPS!!!

Using a single 7812 IC voltage regulator and multiple outboard pass transistors, this power supply can deliver output load currents of up to 30 amps. The design is shown below:
Notes:
The input transformer is likely to be the most expensive part of the entire project. As an alternative, a couple of 12 Volt car batteries could be used. The input voltage to the regulator must be at least several volts higher than the output voltage (12V) so that the regulator can maintain its output. If a transformer is used, then the rectifier diodes must be capable of passing a very high peak forward current, typically 100amps or more. The 7812 IC will only pass 1 amp or less of the output current, the remainder being supplied by the outboard pass transistors. As the circuit is designed to handle loads of up to 30 amps, then six TIP2955 are wired in parallel to meet this demand. The dissipation in each power transistor is one sixth of the total load, but adequate heat sinking is still required. Maximum load current will generate maximum dissipation, so a very large heat sink is required. In considering a heat sink, it may be a good idea to look for either a fan or water coo!
led heat sink. In the event that the power transistors should fail, then the regulator would have to supply full load current and would fail with catastrophic results. A 1 amp fuse in the regulators output prevents a safeguard. The 400mohm load is for test purposes only and should not be included in the final circuit.

refer circuit diagram attached

Note : To all MARTIANS please do the wiring very carefully and cross check all the components if properly installed, also use thick multi-stranded wires(wires that r used for mains) for wiring. Use diodes capable of carrying 100 Amps current. ordinary diodes will not do.Capacitors max voltage be 25 volts or more. Do not forget the fuse. 30 AMPS is very large current more than enough to cause a fire hazard. Also take care and see to it that both the supply terminals dont creat a short circuit.Use large Heat sinks for all six transistors and for the IC 7812 . Use a metal box only , which is well ventilated, as the power transistors inside need cooling , I recommend you to install a small fan inside(the ones used in the computer power supply SMPS). The fan will help better ventilation and help radiating heat out of the powersupply cabinet.

If u need any assistance pls feel free to mail me .. or call me

regards,

Ankur Puranik.

1314. Hamless is no less of a ham

Yahoo group: m_a_r_s
Date: 2003-09-18 11:28:57 UTC
From: Nirav Sanghavi
Topic: 1314 Message: 1314

> We have received many complaint about the so called Junk mails (not related to ham radio), members not following the protocol will be removed from the group, please note.
>
> VU2NLF, Moderator.

Dear NLF,

It was discussed (and subsequently decided) at a MARS meeting that info other than ham radio may be allowed when the google tips and tricks matter had come up. This is public knowledge and we all know that.

Does your email above unilaterally change things or do members of this group have a say?

It is important that ham radio is a social activity too. We could use some kind of majority vote here to decide whether the so-called "junk mails" (note plural) were really that junky and that our policy should change or otherwise. Then depending on whether the group membership is against it or not, we can implement.

It would help if the person/s (I assume there was no such large contingent) complaining should post the objection to the group or to the person/s who sent the "junk mail" off-list.

I don't think we can get worked up on the matter at this stage. Use of the delete button by the disturbed party/ies should suffice.

Another solution however is to have a spinoff group of hams (like say MARS-Hamless@yahoogroups.com) where people who are hams can share non-ham related stuff that we do on the air. This way all the chaps who do not wish to can keep away (and even miss out on possibly interesting traffic - what say ICQ?!).

Another suggestion: Please do tell us who complaied. This way we can give them severe punishment - talking only about ham radio on a non-ham subject group comprising of radio hams. ;-)

Ha(r)mlessly yours,
VU2 NHR

1317. Re: [m_a_r_s] Hamless is no less of a ham

Yahoo group: m_a_r_s
Date: 2003-09-19 05:09:28 UTC
From: Ankur Puranik
Topic: 1314 Message: 1317

Hello martians,

My personal openion regarding the non ham mails being circulated is....its better if we make another group for non-ham mails, and the m_a_r_s@yahoogroups be maintained strictly for exchange of ham material only.

If at all anyone wishes to circulate a non-ham related material he/she will be free to do so on the non ham mailing group.

Also another important thing is a person who is strictly against receiving non-ham material has the freedom of NOT SUBSCRIBING to the non ham group , so that he/she will be automatically disconnected from spam or non ham mails.

I have only given my openion, the decision is upto the authorities.

regards,

Ankur Puranik.

Subject: Re: [m_a_r_s] Hamless is no less of a ham

Hi All,
I guess, non Ham messages should have the prefix"Non Ham" in them, so that the delete click can be made use of by those who dont want to read it. Maybe the moderator can introduce this rule.!!!
Sarla

Nirav Sanghavi wrote:

We have received many complaint about the so called Junk mails (not

related to ham radio), members not following the protocol will be removed
from the group, please note.

VU2NLF, Moderator.

Dear NLF,

It was discussed (and subsequently decided) at a MARS meeting that info
other than ham radio may be allowed when the google tips and tricks matter
had come up. This is public knowledge and we all know that.

Does your email above unilaterally change things or do members of this group
have a say?

It is important that ham radio is a social activity too. We could use some
kind of majority vote here to decide whether the so-called "junk mails"
(note plural) were really that junky and that our policy should change or
otherwise. Then depending on whether the group membership is against it or
not, we can implement.

It would help if the person/s (I assume there was no such large contingent)
complaining should post the objection to the group or to the person/s who
sent the "junk mail" off-list.

I don't think we can get worked up on the matter at this stage. Use of the
delete button by the disturbed party/ies should suffice.

Another solution however is to have a spinoff group of hams (like say
MARS-Hamless@yahoogroups.com) where people who are hams can share non-ham
related stuff that we do on the air. This way all the chaps who do not wish
to can keep away (and even miss out on possibly interesting traffic - what

say ICQ?!).

Another suggestion: Please do tell us who complaied. This way we can give them severe punishment - talking only about ham radio on a non-ham subject group comprising of radio hams. ;-)

Ha(r)mlessly yours,
VU2 NHR

These goodies are from Clinton Herbert AB7RG

"If at first you don't succeed, try calling CQ again."

"Hams never go senile, they just QSY a little with age."

"You know it's bad when... you start hearing CW all the time, and there really isn't any..."

"You're an addict when... You start carrying your HT with you everywhere, even into the bathroom..."

"There's no effective DSP or Notch Filter for a parrot!"

"There shortest distance between two paths depends upon propagation."

"The shortest distance between two paths is often a repeater or node."

"Elmer or complain, you choose. Which is more fun for you?"

"It's pretty bad when your baby's first words are; "CQ"!"

"It's pretty bad when your parrot starts calling CQ in CW. It's worse when your parrot starts imitating dead carriers and heterodynes. But the very worst thing is when your parrot racks up a higher score during a contest than you!"

"If you have a squawking bird in the background during a QSO, is this considered having a "chirp" on your signal?"

""Surprise" one of your friends twist both the Load and Plate controls fully clockwise while he's transmitting!"

Life's too short call CQ!"

"When in doubt, call CQ!"

"When in doubt, QRO."

"Communication is the key to happiness."

"Life getting boring? Post yourself to the local DX Cluster and see what happens!"

"You might be a ham if... You have more wire up and coax cable run than the electric company and the cable company combined."

"You know it's bad when you pick up the phone and say "QRZ?" instead of hello."

"I chase DX, therefore I am."

"You know it's bad when you tell a joke in person and end it with "HI HI"!"

"The more noise you make, the more contacts you rake!"

"There had better be Amateur Radio in Heaven when I become a SK or I'm coming back!"

"It's pretty bad when you sign your callsign instead of your name."

"When the band is seemingly "dead", try this: "QRZ? The P5 again please..."

"User: The confused operator reading bulletins on a BBS"
"Sysop: The operator sitting back and laughing at all the user typos on the BBS"

"If an antenna falls in the forest, and no one is there to see or hear it, does it's SWR change?"

"Think that nobody cares about you? Start tossing a dead carrier on your local repeater for an hour and see how many people suddenly take an interest in you..."

"DX IS!" or "Was", if you were too busy tuning up your amp and missed it."

"Yes Alex, I'll take "Things only an Amateur Radio Operator would know" for $1,000.00."

"Good Day: When you are DX'ing from a remote tropical island.
Bad Day: When the remote tropical island turns out to be Jurassic Park and a T-Rex comes after you."

"Good Day: When you avoid getting eaten by a T-Rex while DX'ing from Jurassic Park (TE0JP?)
Bad Day: When you realize a day later that you left your log book behind, with the T-Rex..."

"Good Day: When you and several of your DX'er buddies go off for an island DXpedition.
Bad Day: When your DX'er buddies form an alliance and vote you off the island."

"Good Day: When you get help from the friendly island natives when setting up your DXpedition.
Bad Day: When the friendly island natives turn out to be cannibals..."

"Good Day: When you are raking in DX stations and a P5 calls you.
Bad Day: When lightning strikes your antenna just as the P5 is calling you."

"You know it's bad when you start giving out RST reports when you are on the telephone."
"ESPQRP: Extra Sensory Perception QRP The TRUE QRP!"

"There's nothing to fear but fear itself. Well, that and poor propagation and a high K Index."

INTERNATIONAL ACCIDENT REDUCTION DAY

The Ministry of National Integration, by The National Secretary of Civil Defense, along with the Brazilian Amateur Radio League-LABRE, coordinators of the National Amateur Radio Emergency Network-RENER, will promote on October 4 and 5 an international amateur radio event celebrating the International Accident Reduction day.

Many Brazilian amateur radio operators will be operating the special call sign ZY2A between 00:00 hours of October 4 until 24:00 hours of October 5, on all HF bands SSB, CW and Digital Modes.
Natural disasters like earthquakes, floods, tornadoes, landslides, shipwrecks and others, cause huge financial expenses and the loss of many precious human lives. The consciousness of society is fundamental to prevent and minimize its effects. On these situations it is important that organized groups are prepared to immediately help control these events and solve such unexpected problems. The Amateur Radio Community, always willing to help on these circumstances, make themselves present, spreading the news about this event.
All Amateur Radio coleagues that contact ZY2A station and submit their QSL cards will receive special commemorative QSL cards by reply, celebrating the International Accident Reduction Day.

1327. with ref. to the 145 Mhz receiver

Yahoo group: m_a_r_s
Date: 2003-09-24 16:26:43 UTC
From: Ankur Puranik
Topic: 1327 Message: 1327

hello to all @ mars

I intend to inform all people who have taken interest in the 145 MHz FM receiver, that the receiver is only ment to catch signals from near-by hams. It will not perform like a professional receiver. Being a commercial use receiver it is designed for wideband reception. Our transmissions in the VHF band are of narrowband in nature, so the receiver will be able to catch-up signals from close vicinity.(1 to 2 km maximum as tested on visarjan day at chowpatty) It also depends on the amount of power that the transmitter is throwing. Also some hams are using directional antenne for VHF. SO all these factors are going to affect the receivers performance.

I am working on to convert the receiver for narrowband reception, after which it will be able to perform more efficiently.

thankyou

Ankur Puranik

Dear Ankur,
Hi!
Read about your FM RX project. Though I have not seen your mods but here are few tips you may find useful.
1. Simplest one i feel is conversion of low cost Scan type Chinese receivers. Abt Rs50-60 in Market.
2.These recievers used TDA7088 which is a souped up version of famous TDA7000 FM chip with scan feature thrown in.
3.IF of these sets is about 70 Khz selectivity is determined by RC elements.
4.It is possible to detect NBFM but IF needs to be converted to 5Khz.
5. Data for both chips is available over the net.
6.This link has data as well as NBFM detection application note.
http://www.semiconductors.philips.com/pip/TDA7000_V3.html
TDA7088 application notes here
www.smdicjmf.com/utc/icpdf11/TDA7088.pdf
7. If you intend to use other WBFM chip NBFM can be done by using a crytal of 10.7Mhz in place of quadrature detection element ie coil or resonator. More detected audio due to higher Q of crystal.
8.You can also make one from scratch using vhf frontend chips like TA7358, AN7213 with MC3361 as 2nd if and detector.

Fee free to discuss more on subject.
Best of luck

1333. Re: [m_a_r_s] 2 mt nbfm Rx

Yahoo group: m_a_r_s
Date: 2003-09-28 09:48:36 UTC
From: Ankur Puranik
Topic: 1329 Message: 1333

Dear Rahul

I really appreciate your suggestion for the VHF receiver, but at the same time I would like to stress on the following points.

1) I have suggested a digital display receiver because it uses a frequency counter to show at what frequency is the rx tuned to. So whatever may be the frequency the digital display shows the accurate freq at which the rx is tuned. This is of importance especially in case of narrow band reception .

2) The cheaply available chinese radios have a frequency scale which displays only 88-108 or 76- 108 in some cases....so even if your receiver is tuned to 145 Mhz there is no way you can know at what freq is the rx tuned at.

3)The scan type receiver (available for Rs. 50-60) use SCAN and RESET functions for tuning. The MAJOR DISADVANTAGE of such receivers is that in scan mode if a particular station is not strong enough to trigger to "stop scan" the station is skipped and the next station is tuned. So we cannot tune into a desired frequency, the scanner will continously keep on hunting for a station from its min to max freq unless it finds a strongly radiating station. Also when it reaches max we have to again press reset to restart the process so they dont sound very convinent and reliable.

4) The TDA 7000 is a narrowband IC but, the max freq it can go to is 110Mhz as shown in the data sheet. i havent tried out TDA 7000 so i really have no idea if it can go to 145.00 Mhz. If you can, please tell me if this ic is capable of tuning too 145.00Mhz so that i can experiment on it. Being a narrowband IC, it will help a lot.

thankyou

Ankur Puranik

1334. Re: 2 mt nbfm Rx

Yahoo group: m_a_r_s
Date: 2003-09-29 11:04:54 UTC
From: Rahul Srivastava
Topic: 1329 Message: 1334

Dear Ankur,
Hi!
Now I get an idea of what you plan to make. Off late we have seen many chinese digital pocket trasistors available in market. The display unit is frequency counter type.
In order to convert it for NBFM operation we need to change the detector coil or resonator in detector stage by a quartz crystal. A 10.7mhz xtal I am not sure is available..Frequency counter will operate over this much extra frequency. Only drawback is that resolution is only 100khz, too much way off than 5khz steps required.
Long time ago I had made a receiver that had IF of 35mhz 2mhz wide. This was given to a TV IF amp + Detec. The afc out was connected to audio amp. Any signal appearing within the passband ie 2mt band was automatically locked on to by the AFC and audio could be heard.
While on the subject here is design for a 2Mt multimode rig I hope you would like it.
http://www.qsl.net/va3iul/2m_allmode.html
Experimentation is what the hobby is all about.
Best of luck.

Also when it reaches max we have to again press reset to restart the process so they dont sound very convinent and reliable.

4) The TDA 7000 is a narrowband IC but, the max freq it can go to is 110Mhz as shown in the data sheet. i havent tried out TDA 7000 so i really have no idea if it can go to 145.00 Mhz. If you can, please tell me if this ic is capable of tuning too 145.00Mhz so that i can experiment on it. Being a narrowband IC, it will help a lot.

thankyou

Ankur Puranik

1337. LIGHTNING PROTECTION

Yahoo group: m_a_r_s
Date: 2003-10-05 08:50:08 UTC
From: Ankur Puranik
Topic: 1337 Message: 1337

LIGHTNING PROTECTION

First of all there is nothing as complete lighting protection. All a Ham can do is provide the highest level of protection as possible. Depending on your location, lightning may be a very common occurrence a very infrequent occurrence. But all areas have thunder storm now and then. Not all thunder storms have rainfall but that is not what we are interested in anyway. We are concerned with the damage potential of either an indirect or a direct lighting strike.

An indirect strike is simply a strike, for example, that hits a nearby power line and then feeds into your equipment. A direct strike, for example, might directly hit your antenna, come down the coax and destroy the equipment. Fires can start from both indirect and direct strikes. The chance of major damage and/or a fire is a little less with indirect strikes. But none-the-less, we all have to be vigilant about lighting. Even if there is no fire there is a high risk of the equipment getting damaged in some way or the other.

In Mumbai the lightning and thunderstorms is not very frequent, but they do occur. The first and foremost method of reducing the risk of lightning damage is proper grounding. A good ground should be as short as possible between the equipment and ground. Also your antenna/ tower should be properly grounded. These days most of the buildings have lightning protection system. This is nothing but a pointed rod errected at the top of the building which is connected to a thick metal strip which runs all the way down into the earth, where its connected to a huge copper plate. All you have to do is connect the errected pipe of your antenna to this thick metal strip which runs into the ground. Now do not connect the active elements of the antenna (i.e. do not connect the dipoles to ground coz ur antenna aint gonna work then, n you are gonna come and catch my neck . So connect the errecting pipe/support pipe of your antenna to the ground through a THICK COPPER WIRE. This wire should be a!
tleast 0.5cm in diameter...else you can use a multi stranded wire (each strand should be atleast 1mm in diameter). File the area of contact on both the metal pipe and the strip with a sand paper till you see the shine. See to it that both ends on the wire are properly screw fitted into your antenna support pipe and the grounding metal strip to avoid loose contact.

Once you are done with this then you stand much on the safer side. The best thing to do in case of intense lightening is to disconnect your rig from the antenna, coz u cant afford to take any chances. And you never know how good your grounding system will work incase of a strike. So its best to disconnect your equipment from the antenna, so the only discharge path to ground is through your antenna and the grounding strip, it will not enter your coaxial cable.

Lightning arresters are available in the market, but its not worth investing in that coz, in mumbai lightning & thunderstorms occurs only once or may be twice in a year. That too there is a rare possiblity that you will be unlucky and the lightning will chooze to strike your antenna. But its always better to be safe than sorry. So an effective grounding arrangement is enough protection against lightning. Its an easy task and non time

consuming.

Get GrOuNdEd!

Save ur rig!

1338. The high-school geography side of lightning

Yahoo group: m_a_r_s
Date: 2003-10-06 09:48:50 UTC
From: Nirav Sanghavi
Topic: 1338 Message: 1338

Dear All,

Further to Ankur's (one more excellent) write-up on lightning, I would mention that lightning is caused MORE during that time of the year and in those regions where the static electricity build-up is higher.

This happens more in

1. regions away from water bodies (like the sea etc.)
2. during the onsetting and receding monsoons.

Therefore Bombay is less prone to lightning strikes compared to interior parts of the country AND we should be most careful in Bombay just before and during the onset of the monsoon AND during and just after the monsoon season is to end.

These are lightning prone times and places and the probability of a strike is higher then and there.

An easy precaution is to disconnect the rig from the antenna when not in use as Ankur mentioned.

After doing all this, follow the maxim we have heard before, NEVER ASSUME.

After that - PRAY.

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

I have informed you earlier about the hamfest 2003 which is to be held on 8th & 9th Nov 2003 at Gandhinagar, Gujarat.

MARS plans to participate in a huge number, hence I once again request you to join us and be a part of a wonderful experience.

So far I have received 46 registerations, the last day for registering is on 12th OCT 2003, we have to plan for transportation and acommodation at the location.

All hams from thane region may contact Anish Korde - VU2OZO - 25346322 for registrations. Rest can contact me directly on 98205-47074.

Topic: 1340 Message: 1340

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The Monthly meeting of October 2003 will be held on 12th October 2003 at 10:00 hours at B.S.Bengelle Girls High School.

The Agenda for the meeting is as follows:-
1. Hamfest 2003.

2. J.O.T.A.

3. Import of Ham Radio Equipment.

4. New Tickets.

Please attend the meeting on time.

73

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

We have received 8more tickets for the batch of 2002.

GAUTAM KEDIA VU2 ??? (Licence freezed)

RAJESH SHETHIA VU2 ??? (Licence freezed)

MUSTAFA BHANVADWALA - VU2 ??? (Licence freezed)

JIGAR MEHTA VU2 ??? (Licence freezed)

DEEPAK PATHAK VU2 ??? (Licence freezed)

PRABODH DOSHI VU2 ??? (Licence freezed)

RAHUL SANKAR ROY VU2 ??? (Licence freezed)

UDAY SANKAR ROY VU2 ??? (Licence freezed)

Congratulations to all the above for getting the ticket, Nevertheless all the licences will remain with society till your station is up and operational (atleast on VHF). Once your station is up you may get in touch with us and your licence will be handed over to you.

You can avail all the help from the society for putting up your station, for example installations of your antennae and getting the radio equipment.

VU2ICQ has already posted a mail regarding import of equipment, you may contact VU2ICQ directly to book your set.

All the SWL from the batch of 2002 (Churchgate & Thane) are ADVISED to start your installations of your antennae and order your sets with VU2ICQ to avoid any delay after getting your tickets.. (Your ticket will be arriving shortly).

You guys have no idea how difficult it is to get the tickets, We got 22 tickets which were pending from last 3 years. The tickets were handed over to the swls on 1st Feb 2003, unfortunately not a single station from the 22 calls is on air. (reasons best known to them) All the efforts taken by the society has gone to waste.

Hence the society has decided not to hand over any further licences till their individual stations are up and ready for operations..!!

Topic: 1346 Message: 1346

```
Design Your Own 5/8 Wave Vertical Antenna

0)
{
form.hw.value = num_freq;
}
else
{
form.hw.value = 0;
}
}

function sw2meters(form)
{
var num_freq;

form.numerator.value="178.308";
form.Measurement.value="Meters";

num_freq = eval(form.frequency.value);
num_freq = Math.round((form.numerator.value / num_freq) * 100) * .01;

if (num_freq 0)
{
form.hw.value = num_freq;
}
else
{
form.hw.value = 0;
}
}

function calclen(form)
{
var num_freq;
num_freq = eval(form.frequency.value);
num_freq = Math.round((form.numerator.value / num_freq) * 100) * .01;

if (num_freq 0)
{
form.hw.value = num_freq;
}
else
{
form.hw.value = 0;
}
}
```

// ---

The 5/8 wave antenna consists of a vertical radiator which is fed at the base of the antenna. A matching device of some sort must be added between the antenna and the feedline if you wish to feed it with coax. Adding a coil in series with the antenna at the base is one such method of matching.

So why would anyone use a 5/8 wave antenna if they have to go through all that extra work? After all, a ground plane antenna provides a nicer match. There are a couple of answers. The first is GAIN. The computer shows that the antenna (mounted 1 foot above ground) has a gain of about 1.5 dBd higher than a dipole's gain (also mounted 1 foot above ground.)

The second reason you may want to use the 5/8 wave vertical is to obtain a lower angle of radiation. A half wave antenna's radiation peak angle is 20 degrees. You'll find that the 5/8 wave antenna's angle of radiation is just 16 degrees making it an even better dx antenna.

You may have noticed a pattern developing here. A quarter wave ground plane antenna has a radiation pattern that produces maximum gain at about 25 degrees and a half wave antenna drops that angle to 20 degrees, and the 5/8 wave antenna further drops that angle to 16 degrees. So why not just keep extending the antenna out to one full wave? Well it would be nice if it worked but unfortunately the wave pattern begins to create very high angles of radiation beyond 5/8 wave. So we've reached the maximum gain at this point and extending the antenna any further just reduces the gain where we want it (low angles). Of course if you are interested in very short skip, extending the antenna will produce nice gains over a dipole.

All antenna lengths depend on various factors. Some of these factors are:the height above ground, the diameter of the wire, nearby structures, the effects of other antennas in the area and even the conductivity of the soil.

This page allows you to calculate the length for a 5/8 wave antenna. It uses the standard formula, 585/f (178.308/f for metric) MHz to calculate the element lengths. If you've experimented with 5/8 wave antennas before and know of a better formula for your QTH, feel free to change the formula to suit. This formula is for a wire antenna. Of course if you construct your antenna out of tubing, the total length of the antenna will be shorter, for example I've found that 21.5 feet seems to give the maximum gain for a frequency of 28.5 MHz when using 1" tubing. And 22.5 feet seems to be the best length for wire at the same frequency. Since the formula calculates the antenna to be about 2 foot shorter, be sure to experiment and perhaps add a little to your final length.

Enter the formula for the antenna calculation

Switch to:

Divided by Freq MHz

Your 5/8 wave antenna's vertical length is

regards,

Ankur Puranik

From: vijay motwane
Topic: 1348 Message: 1348

Hi friends,

While the conditions were good on 15mt a few days back, I had a opportunity to work W1ZY from Boston. I later realised thru his website that he is the producer of `The Human Race" TV documentary. He did not mention about it on the air !!

He has put up the audio file of my QSO with him on his website:

www.etecslo.com/humanrace/index.html (http://www.etecslo.com/humanrace/index.html).

Click on 10 oct 2003 and 15 mts. Thats when and where I had a qso with him. The new hams can judge it by hearing that file, that when the conditions are good. one can have a lot of fun on HF.

Since I do not have the urls of othe mars student groups, I request the concerned hams to forward this message to those groups too

73,

> ==>HAYNIE: LETTERS=VOTERS=SUPPORT ON AMATEUR RADIO LEGISLATION
>
> ARRL President Jim Haynie, W5JBP, says the good news is that the number of
> House cosponsors for the Amateur Radio Spectrum Protection Act, HR 713,
> has topped 50. The Senate version of the legislation, S 537, now has eight
> cosponsors. The downside, Haynie says, is that the Spectrum Protection
> Bill as well as the Amateur Radio Emergency Communications Consistency
> Act, HR 1478, will need many more cosponsors if either is to succeed.
>
> "I'm frustrated," Haynie said this week. "Neither one of these bills is
```

> ever going to see the light of day unless we get more cosponsors." While
> thanking those who already have done so, Haynie again encouraged ARRL
> members to not only urge their senators and representatives to cosponsor
> the bills but to write and ask them to actively support them.
>
> "It's going to take 10,000 letters, it's going to take 50,000 letters or
> contacts," Haynie said. "To me, this is a no-brainer. This is something
> that's important to the future of Amateur Radio."
>
> Sponsored in the House by Rep Michael Bilirakis (R-FL) and in the Senate
> by Sen Michael Crapo (R-ID), the Spectrum Protection Act would require the
> FCC to provide "equivalent replacement spectrum" to Amateur Radio if the
> FCC reallocates primary amateur frequencies, reduces any secondary amateur
> allocations, or makes additional allocations within such bands that would
> substantially reduce their utility to amateurs.
>
> The latest House members to sign aboard HR 713 include representatives Jo
> Bonner (R-AL); John Peterson (R-PA); Albert Wynn (D-MD); George Nethercutt
> (R-WA); Jim Ramstad (R-MN); Barney Frank (D-MA); Todd Tiahrt (R-KS); and
> Fortney "Pete" Stark (D-CA). The latest Senate members to sign aboard S
> 537 are Carl Levin (D-MI) and Christopher Dodd (D-CT).
>
> HR 713 has been referred to the Subcommittee on Telecommunications and the
> Internet. In June, Haynie testified before that panel, telling lawmakers
> that that hams have lost more than 100 MHz of VHF and UHF spectrum over
> the past 15 years and that another nearly 360 MHz of VHF and UHF spectrum
> "has been substantially compromised." S 537 has been referred to the
> Committee on Commerce, Science, and Transportation.
>
> The Amateur Radio Emergency Communications Consistency Act, HR 1478--known
> informally as "the CC&R bill"--would require private land-use regulators
> such as homeowners' associations to "reasonably accommodate" Amateur Radio
> antennas consistent with the PRB-1 limited federal preemption. PRB-1 now
> applies only to states and municipalities. Introduced by Rep Steve Israel
> (D-NY), the bill has been referred to the House Commerce Subcommittee on
> Telecommunications and the Internet and now has 29 cosponsors.
>
> Among the latest to get onboard HR 1478 are JD Hayworth (R-AZ); David
> Price (D-NC); Rep Mike McIntyre (NC); Anna G. Eshoo (CA-14); and Mark
> Udall (D-CO). No equivalent bill yet exists in the Senate.
>
> Haynie says that if ARRL members value Amateur Radio and want these
> proposals to succeed, they'll make the time to write letters or send
> e-mails pushing for support of the three measures. "Peoples' own words and
> their own expressions are what's going to count, not some canned letter
> from Newington," Haynie said, while conceding that a form letter "is
> better than nothing." Haynie said a personally crafted letter or e-mail
> "adds a lot of weight."
>
> Sample letters on the ARRL Web site for the Amateur Radio Spectrum

> Protection Act of 2003
> <http://www.arrl.org/govrelations/arspa.html#sample> and for the Amateur
> Radio Emergency Communications Consistency Act
> <http://www.arrl.org/govrelations/hr1478/sample-letter.html> cite Amateur
> Radio's role in public safety and emergency communication.
>
> "We'll do our part to get more organizations to support these bills,"
> Haynie said. The League has been contacting other organizations involved
> in public safety that have firsthand knowledge of the value of ham radio
> to the public and advocating their support. But, Haynie said, letters from
> individual voters get the most attention.
>
> Cosponsorship is important while a bill is in committee, and Haynie
> suggests that a representative or senator who gets 40 or 50 letters from
> on a topic is going want to sign on to that bill.
>
> "I can't emphasize enough the importance of that contact to the member of
> Congress from the constituents out there in the district," Haynie
> concluded, "because that's the ticket."
>
> For guidance on the best methods of contacting your members of Congress,
> see "Communicating with Congress," by Derek Riker, KB3JLF, on the ARRL Web
> site <http://www.arrl.org/news/bandthreat/0304046.pdf> or in the April
> 2003 issue of QST (p 46).
>
> Additional information--including the bills' texts and information on how
> to write your congressperson or senators--is on the ARRL's "The Amateur
> Radio Spectrum Protection Act of 2003" Web page
> <http://www.arrl.org/govrelations/arspa.html> and on the "HR 1478, The
> Amateur Radio Emergency Communications Consistency Act of 2003" Web page
> <http://www.arrl.org/govrelations/hr1478/>.
>
> Those writing their lawmakers on behalf of either bill are asked to copy
> their correspondence to the League via e-mail: Spectrum Protection Act, HR
> 713/S 637 <specbill03@...> or Amateur Radio Emergency Communications
> Consistency Act, HR 1478 <ccr-bill@...>.
>
> ==>AMATEUR TO TURN IN TICKET IN POLICE RADIO INTERFERENCE CASE
>
> The FCC says an Indiana amateur has agreed to relinquish his Amateur Radio
> operator license for two years as a result of allegations that he
> interfered with local police department radio transmissions. FCC Special
> Counsel Riley Hollingsworth outlined the terms of the agreement in a
> September 23 letter to Technician licensee Justin L. Whaley, KC9DCP, of
> Columbia City. According to the letter, the FCC notified Whaley last March
> that close-proximity direction finding evidence indicated that the
> licensee had interfered with the operation of the Columbia City Police
> Department radio system early this year.
>
> The agreement--which Whaley had not yet signed as of this week--calls on

> him to resolve the enforcement issues he faces by relinquishing his
> Amateur Radio operator license for two years. Whaley also must agree not
> to maintain an amateur station nor to use anyone else's station.
> Hollingsworth said that since Whaley shut down his station last March 28,
> the agreement would remain in effect until March 28, 2005. Hollingsworth
> requested that Whaley sign the letter and return it to the FCC along with
> his Amateur Radio license.
>
> The FCC meanwhile is seeking additional information from three other
> licensees who allegedly used ham gear to transmit on police or emergency
> frequencies.
>
> Hollingsworth wrote General-class licensee Tom L. Christman, KB2NAV, of
> Albany, New York, on September 22 regarding a complaint from the Albany
> County Sheriff's Department's Office of Professional Standards. The FCC
> asked Christman, a sheriff's department maintenance worker, to respond to
> allegations that he used his ham radio transceiver to make transmissions
> on sheriff's department frequencies last December "without a legitimate
> purpose." The sheriff's department has requested that the FCC suspend or
> revoke Christman's amateur license.
>
> Hollingsworth also wrote two North Carolina Technician-class
> amateurs--Daniel E. Buchanan, KF4LNE, of Montreat, and Joseph S. "Shannon"
> Hutchins, KG4SXD, of Swannanoa--concerning complaints from the Black
> Mountain Police Department alleging that both had transmitted on police
> frequencies last February. The transmissions apparently were made using a
> handheld transceiver while Buchanan and Hutchins were in the same vehicle.
>
> Documents from the Asheville/Buncombe County District Attorney's Office
> assert that the Black Mountain police channel had experienced "numerous
> transmissions" earlier this year on a police frequency (156.01 MHz)
> "including verbal profanity and racial slurs." A police officer who
> questioned Buchanan and Hutchins said they admitted transmitting on police
> frequencies. They later voluntarily signed statements to that effect in
> which each blamed the other for making the racial slur.
>
> The District Attorney's Office statement said that one transmission last
> February 8, while police were attempting to respond to an auto accident
> involving multiple injuries, "prevented officers from communication with
> dispatch or each other."
> Hollingsworth this month also heard from amateurs in the Los Angeles area
> that some repeater owners are shutting down their machines due to alleged
> ongoing interference from Jack Gerritsen, formerly KG6IRO. The FCC
> Wireless Telecommunications Bureau set aside Gerritsen's license in 2001 a
> few days after granting it after learning that he'd been convicted the
> previous year on state charges of interfering with Los Angeles Police
> Department radio transmissions.
>
> Imprisoned, paroled and imprisoned again after breaking parole for
> allegedly having and operating radio equipment without a license,

> Gerritsen was released early due to jail overcrowding.
>
> Hollingsworth said the FCC continues to work the case, but he expressed
> frustration that Gerritsen was let out of prison again with no conditions
> or restrictions "even regarding radio, which is what he was in there for
> in the first place."
>
> ==>NEW TWO-HAM ISS CREW SET TO HEAD INTO SPACE
>
> The International Space Station (ISS) crew is getting ready to have
> company and to head back to Earth. Aboard the ISS since April, Expedition
> 7 Commander Yuri Malenchenko, RK3DUP, and NASA ISS Science Officer Ed Lu,
> KC5WKJ, this week have been preparing for the arrival of their
> replacements--the Expedition 8 team of Mike Foale, KB5UAC, and Alexander
> Kaleri, U8MIR. This week, the Expedition 7 crew also took time to extend
> wishes for good fortune to China's first astronaut, Yang Liwei.
>
> "That is very good news. It's nice to see this happen," said Lu, during a
> conversation with ground controllers in which he also expressed wishes in
> Chinese that Yang Liwei "have a safe journey" in space. "From one
> spacefaring nation to another, we wish them congratulations." After
> sharing space with the ISS for 14 orbits, Yang's Shenzhou V space capsule
> landed safely in Mongolia October 16.
>
> Foale, Kaleri and European Space Agency Astronaut Pedro Duque, KC5RGG, are
> set to head into space themselves Saturday, October 18, at 0538 UTC aboard
> a Russian Soyuz transporter. They'll launch from Baikonur Cosmodrome in
> Kazakhstan. After docking with the ISS on October 20 and a week of
> crew-change activity, Malenchenko, Lu and Duque will return to Earth
> aboard the Soyuz vehicle that's now attached to the ISS.
>
> While Duque is onboard the ISS, he will attempt Amateur Radio on the
> International Space Station (ARISS) <http://www.rac.ca/ariss/> school
> group contacts October 23 with Ceip Seixalbo School and October 26 with
> the Casa de las Palabrabas museum, both in his native Spain. Duque will
> use the special event ED4ISS call sign issued to him by his native
> country.
>
> The English-born Foale, 46, will serve as the Expedition 8 commander and
> NASA ISS science officer. Kaleri, 47, will be the Soyuz commander and ISS
> flight engineer. Both are Mir veterans with long-term spaceflight
> experience.
>
> With the NASA shuttle fleet still grounded for another year, two-person
> crews will be the rule. The Soyuz, which carries three passengers, will
> remain the prime crew transport system. Russian Progress rockets will
> transport needed supplies. Foale and Kaleri will spend approximately six
> months aboard the ISS.
>
> ARISS Russian delegate Sergej Samburov, RV3DR, completed final Amateur

> Radio training with the Expedition 8 crew on September 29 in Russia.
> Several US amateurs recently enjoyed casual contacts with NA1SS, as
> confirmed by Lu. They included KF4LGA, WB8OTH, N8DZM, and KG4IIE.
>
> ==>BRAZIL TO HOST NEXT WORLD RADIOSPORT TEAM CHAMPIONSHIP
>
> The next World Radiosport Team Championship (WRTC) will be held in 2006 in
> Brazil. That announcement came October 11 from the World Radiosport Team
> Championship Sanctioning Committee, the Liga de Amadores de Radio Emiss?o
> (LABRE) <http://www.labre.org/> and the Araucaria DX Group (GADX)
> <http://www.inepar.com.br/araucaria/radio.htm>. Steve Morris, K7LXC,
> chairs the WRTC Sanctioning Committee.
>
> Last held in Finland in July 2002, the WRTC is a competition among
> two-person teams drawn from among the world's top Amateur Radio contest
> operators. This event brings competitors together in a single geographical
> area.
>
> The on-the-air portion of the event is held in conjunction with the
> International Amateur Radio Union (IARU) HF World Championship
> <http://www.arrl.org/contests/announcements/rules-iaru.html>, although
> WRTC rules differ in some respects from those of the IARU event, and
> scoring is done separately.
>
> WRTC stations run 100 W and have comparably modest antenna
> systems--typically a dipole for the low bands and a triband Yagi for the
> higher bands. The idea is to minimize the variables associated with radio
> contesting, thereby emphasizing each team's operating skills.
>
> The WRTC 2006 competition will take place in the vicinity of
> Florianopolis, capital of the state of Santa Catarina in southern Brazil.
> "This event is open to everyone--competitor and spectator alike," said Oms
> Atilano, PY5EG of GDAX. "Everyone is invited to attend WRTC 2006." Atilano
> said a WRTC 2006 Web site is in the offing.
>
> The contesting duo of Jeff Steinman, N5TJ, and Dan Street, K1TO, took home
> the WRTC gold for the third time in the 2002 event in Finland. Steinman
> and Street also topped the field of some 50 teams in WRTC 2000 in Slovenia
> as well as at WRTC 96 in the San Francisco Bay area of California. There's
> no word yet on whether they plan to compete in WRTC 2006.
>
> ==>3C0V TEAM WAS GIVEN JUST HOURS TO LEAVE
>
> The Daily DX <http://www.dailydx.com> reports this week that the Annob?n
> Island 3C0V DXpedition <http://personal.telefonica.terra.es/web/ea5yn/>
> team was given just a few hours to leave October 4 after the island's
> military commander reportedly objected to the Amateur Radio operators'
> presence. The 3C0V operation commenced September 26, and--until its abrupt
> and unceremonious termination--intended to continue until October 11.
> Before the shutdown, the four-member group managed to log numerous

> contacts on 20, 17, 15, 12 and 10 meters. The Daily DX Editor Bernie
> McClenny, W3UR, spoke October 12 with team member Franz Langner, DJ9ZB,
> now safely home in Germany.
>
> "Franz says the 3C0V crew first met with the governor of the island and
> the head of the military on their arrival there," McClenny reports. "At
> that time they had the approval to operate from both of these officials.
> Gifts were even presented." McClenny says the group had a "proper license"
> and a landing permit good for two years.
>
> "On Saturday [October 4] at 10 AM local they were told they had two to
> three hours to take everything down and be ready to leave," McClenny said,
> adding that the demand came from the military commander of the island. A
> news update on the 3C0V Web site said military authorities frequently had
> interrupted the DXpedition.
>
> After dismantling the equipment and antennas and leaving nothing behind,
> all four operators boarded a plane to Malabo, the capital of Equatorial
> Guinea. A part of Equatorial Guinea, Annob?n, is located in the Gulf of
> Guinea off Africa's west coast. The other 3C0V operators also have since
> returned home and are reported to be okay.
>
> The 3C0V logs reportedly are safe and expected to eventually be loaded
> onto the 3C0V Web page. The DXCC Desk has not yet approved the 3C0V
> DXpedition for DXCC. EA5BYP kept open the possibility of a future attempt
> to activate Annob?n Island.
>
> ==>HUGE POWER OUTAGE IS SCENARIO FOR FIRST STATEWIDE FLORIDA SET
>
> For the first time, Amateur Radio Emergency Service (ARES) members in all
> three Florida ARRL sections participated in a Simulated Emergency Test
> (SET) October 2-4. Appropriately enough--given the August 14 power outage
> in the Northeast--the scenario was a three-day statewide electrical power
> outage. A QNC ("All net stations copy!") went out to all Florida amateurs
> October 2 to advise of the SET. Also sent was a request from the Florida
> State Warning Point--which monitors for major incidents and
> emergencies--for status information from all Red Cross chapters in
> Florida.
>
> "With no advance warning as to the nature of the emergency, amateurs
> across the state quickly responded to the requests," reported ARRL West
> Central Florida Section Manager Dave Armbrust, AE4MR. "Special nets were
> called and scheduled with checkins from stations operating on emergency
> power."
>
> Armbrust said he was impressed by the number of stations that had
> emergency power capability. "A large number had generators and large
> quantities of fuel on hand," he said. "There is no question in my mind
> that if we had a statewide power outage, it would not mean that Amateur
> Radio would be off the air."

>
> Armbrust said the SET clearly established that many Florida amateurs
> consider it essential to continue to be able to communicate when
> conventional power fails. "They have, at great expense to themselves, set
> up stations that will remain on the air in all but the most extreme
> circumstances," he said. "They will be there when we need them the most."
>
> Armbrust reported "exceptional cooperation" among the three
> sections--Northern Florida, Southern Florida and West Central Florida. "We
> clearly proved that all ARES and National Traffic System (NTS) members in
> the state can work together as a single large team if a statewide disaster
> would require us to do so," he concluded.
>
> ==>SOLAR UPDATE
>
> Sun watcher Tad "Who can make the sun shine, on a cloudy day?" Cook, K7RA,
> Seattle, Washington, reports: Solar flux and sunspot numbers were lower
> this week, but the planetary A index was higher. In general, we like to
> see the reverse for favorable HF propagation. The planetary A index was
> low for October 9-12, but on October 14 and 15 conditions were quite
> stormy. This is because a coronal hole on the sun was spewing a strong
> solar wind, and the interplanetary magnetic field pointed south, leaving
> Earth vulnerable. Planetary A index was 48 and 42 on October 14 and 15,
> and Alaska's high-latitude college A index was 65 and 71.
>
> When the sunspot count went to 24 on October 14, this was the lowest
> sunspot number since May 10 of this year, when it was 22. We should expect
> more days like this as the solar cycle declines.
>
> Over the next few days, sunspot numbers and solar flux should rise, with
> solar flux values peaking around October 25 at 130. Solar wind over the
> next few days should cause more geomagnetic upset, with the October 17-22
> planetary A index pegged at 25, 20, 15, 15, 30 and 25.
>
> Sunspot numbers for October 9 through 15 were 68, 79, 77, 35, 25, 24 and
> 29, with a mean of 48.1. The 10.7-cm flux was 110.8, 111.8, 105.8, 97.8,
> 94.4, 92.4 and 95.9, with a mean of 101.3. Estimated planetary A indices
> were 8, 5, 5, 6, 13, 48 and 42, with a mean of 18.2.
>
> ----------------------------------
>
> ==>IN BRIEF:
>
> * This weekend on the radio: Jamboree On the Air (JOTA--see below), the
> JARTS World Wide RTTY Contest, the ARCI Fall QSO Party, the Worked All
> Germany Contest, the W/VE Islands QSO Party, the Asia-Pacific Sprint (CW),
> the RSGB 21/28 MHz Contest (CW) and the Illinois QSO Party are the weekend
> of October 18-19. JUST AHEAD: The CQ Worldwide DX Contest (SSB) and the
> 10-10 International Fall Contest (CW) are the weekend of October 25-26.
> The ARRL November Sweepstakes (CW) is the weekend of November 1-2. See the

> ARRL Contest Branch page <http://www.arrl.org/contests/> and the WA7BNM
> Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for
> more info.
>
> * ARRL Emergency Communications course registration: Registration opens
> Monday, October 20, 12:01 AM Eastern Daylight Time (0401 UTC), for the
> Level III Emergency Communications on-line course (EC-003). Registration
> remains open through the October 25-26 weekend or until all available
> seats have been filled--whichever comes first. Class begins Tuesday,
> November 4. Thanks to our grant sponsors--the Corporation for National and
> Community Service and the United Technologies Corporation--the $45
> registration fee paid upon enrollment will be reimbursed after successful
> completion of the course. During this registration period, approximately
> 50 seats are being offered to ARRL members on a first-come, first-served
> basis. To learn more, visit the ARRL Certification and Continuing
> Education (C-CE) <http://www.arrl.org/cce/> Web page and the C-CE Links
> found there. For more information, contact Emergency Communications Course
> Manager Dan Miller, K3UFG, dmiller@..., 860-594-0340.
>
> * ARRL Certification and Continuing Education course registration:
> Registration for the HF Digital Communications (EC-005) and VHF/UHF--Life
> Beyond the Repeater (EC-008) courses opens Monday, October 20, 12:01 AM
> Eastern Daylight Time (0401 UTC). Registration remains open through
> Sunday, October 26. Classes begin Monday, October 27. Registration for the
> ARRL Antenna Modeling (EC-004) course remains open through Sunday, October
> 19. Those interested in taking an ARRL Certification and Continuing
> Education (C-CE) course in the future can sign up to receive advance
> notification of registration opportunities. To take advantage, send an
> e-mail to prereg@.... On the subject line, indicate the course name
> or number (eg, EC-00#) and the month you want to start the course. In the
> message body, provide your name, call sign, and e-mail address. Please do
> not send inquiries to this mailbox. To learn more, visit the ARRL
> Certification and Continuing Education Web page <http://www.arrl.org/cce>
> and the C-CE Links found there. For more information, contact
> Certification and Continuing Education Program Coordinator Howard Robins,
> W1HSR, hrobins@....
>
> * JOTA! JOTA! JOTA! The 2003 Jamboree On The Air (JOTA)
> <http://www.arrl.org/FandES/ead/jota.html> begins Saturday, October 18, at
> 0001 local time and ends Sunday, October 19, at 2359 local time. JOTA
> gives Amateur Radio operators and clubs a chance to let Boy Scouts and
> Girl Scouts (Cub Scouts, Brownies and Girl Guides are welcome) share
> experiences over the air with other scouts. It's also an opportunity to
> take part in a worldwide scouting tradition that's now in its 46th year.
> Maxim Memorial Station W1AW will be on the air for JOTA the afternoon of
> October 18. ARRL Educational Programs Coordinator Jean Wolfgang, WB3IOS,
> points out that ARRL has revamped the JOTA survey/log form
> <http://www.arrl.org/FandES/ead/jotalog/>. JOTA participants are
> encouraged to complete and submit the form on the Web. Last year, more
> than 10,000 Scouts from around the US took part in JOTA. Details are on

> page 46 of the September issue of QST. Also see "Jamboree On The Air 2003
> is October 18-19" <http://www.arrl.org/news/stories/2003/09/21/1/>. For
> additional information, contact Jean Wolfgang, WB3IOS, jwolfgang@....
>
> * Papua New Guinea latest to drop Morse requirement: Rick Warnett, P29KFS,
> reports that the Papua New Guinea Telecommunications Administration
> (PANGTEL) has deleted Morse code as a requirement for HF access. The
> decision came on October 6 and will be formally announced in the next few
> days, said Warnett--the International Amateur Radio Union representative
> for the Papua New Guinea Amateur Radio Society. "Some 30 to 40 new 'full
> calls' will now have access to HF radio and the international
> communication possible," Warnett said. In addition, Ireland, Switzerland,
> Belgium, the UK, Germany, Norway, the Netherlands, Austria, New Zealand,
> Australia, Luxembourg and Singapore have moved to drop their Amateur Radio
> Morse testing requirements. A recent Radio Amateurs of Canada survey
> <http://www.rac.ca/news/mresults.htm> indicated that two-thirds of the
> Canadian licensees responding to the survey want their country to drop the
> Morse requirement. In the US, the comment period on another seven separate
> Morse code-related petitions for rule making--some of which would
> altogether eliminate Element 1, the 5 WPM Morse test, from the Amateur
> Service rules (Part 97)--ends Friday, November 7. US amateurs may comment
> on the petitions--RM-10805 through RM-10811--using the FCC Electronic
> Comment Filing System (ECFS) <http://www.fcc.gov/cgb/ecfs/>. See "FCC
> Invites Comments on Additional Morse Code-Related Petitions"
> <http://www.arrl.org/news/stories/2003/10/08/1/> for more information.
>
> * Hams honored at Montana forest fire volunteers appreciation picnic:
> Amateur Radio's role in Montana's forest fires this past summer got
> official recognition this month when the US Forest Service and Helena-area
> businesses and organizations hosted an appreciation picnic. The event
> honored firefighters, law enforcement officers and community
> volunteers--including Amateur Radio operators--who assisted with
> firefighting efforts in Lewis and Clark, Powell, Jefferson, and Broadwater
> counties this summer. Individual hams recognized included Rollie Fisher,
> KC7WBP, and Jim Haslip, W7CK. Fisher set up at Lincoln's Hooper Park every
> day during the Lincoln Complex fires, providing current information to
> residents and visitors. He and his wife, Eenie KC7WBO, were among the many
> families forced to evacuate their homes because of the fire danger. Haslip
> has been an aerial fire spotter for 40 summers. Amateur Radio's support of
> Red Cross and other relief agencies during the fire emergency also
> received recognition. Lewis and Clark County Emergency Coordinator Bob
> Solomon, K7HLN, accepted a plaque on behalf of the Amateur Radio Emergency
> Service and the Capital City Amateur Radio Club. An estimated 300 people
> turned out for the event at the Lewis and Clark Fairgrounds. Dignitaries
> on hand included Montana Gov Judy Martz, Montana congressional staffers,
> county commissioners and others. Volunteer fire departments, county, state
> and federal fire and law enforcement agencies, and supporting agencies
> were recognized and awarded plaques that read, "United by Fire. The 2003
> Montana fire season was marked by volatile fire behavior and overwhelming
> response. We faced these challenges jointly as community members,

> volunteers, fire and law enforcement officials. With our collective and
> individual sense of pride, may we commemorate our efforts and remain
> united."
> * DCC Proceedings available from ARRL: So many amateurs contributed papers
> to the 2003 ARRL/TAPR Digital Communications Conference the
> Proceedings--at 248 pages--was among the largest in the history of the
> event. Copies of the Proceedings of the 22nd ARRL/TAPR Digital
> Communications Conference now are available for $20 plus shipping via the
> ARRL on-line catalog <http://www.arrl.org/catalog/?item=9086>.
>
> * Ham radio news is as close as your cell phone: With many major cellular
> telephone calling plans largely eliminating roaming charges and offering
> "free nights and weekends," ARRL Audio News dial-up Amateur Radio news
> service now is more available than ever. Using your cell phone, you can
> keep up with Amateur Radio news even if you're someplace where you don't
> have Internet or e-mail access. Amateur Radio news is as close as your
> cell phone! Have a few minutes while you're waiting for the train, bus car
> pool or connecting flight too? Just call 860-594-0384 to stay informed.
> ARRL Audio News remains available on the ARRL Web site
> <http://www.arrl.org/arrlletter/audio/>.
>
> ==========

1352. Import of kits, bank loans

Yahoo group: m_a_r_s
Date: 2003-10-19 12:22:16 UTC
From: ajay solanki
Topic: 1352 Message: 1352

Hi,
Some of the Bangalore hams are interested in buying
the HF rigs if bank loans are available.
Any update on the bank loans??
And how the bangalore hams can apply for bank loans
from the bangalor bank branch.

Regards,
Ajay...

----- Original Message -----
From: "Bob Bruninga" <bruninga@...>
To: <amsat-bb@...>
Sent: Monday, October 20, 2003 09:11 PM
Subject: [amsat-bb] Handheld Messaging via ECHO

Here is how we can use ECHO to support mobile and handheld global digital
communications:

MOBILE and HT Handheld DATA COMMUNICATIONS VIA ECHO 20 OCT
-------------------------------------------------------------------------
WB4APR

With the 8 Watt 9600 baud downlink from ECHO, the Amateur Satellite
Service will have handheld global message and data capability. Using the
Kenwood TH-D7 APRS HT or the TM-D700, mobile and handheld front panel
messaging, bulletins and brief email will be a reality using only the
stock rubber duck or typical mobile whip antenna. IE, Ham Radio's own
Satellite Phone!

Here are the digital 9600 baud capabilities of these radios in stand-
alone mode when used via ECHO:

FRONT PANEL DISPLAY OF SATELLITE INFO:
- Displays Satellite Status packet (20 characters)
- Displays Satellite Bulletins (up to 45 characters each)
- Displays distance and direction to ECHO (*)
- Displays direction of movement of ECHO (*)

FRONT PANEL DISPLAY OF OTHER USER STATION INFO:
- Displays 20 character station status
- Displays Bulletins or messages from other stations
- Displays distance and direction to other user
- Displays location and grid square of other station
- Displays type of station (MObile, HT, Fixed, Moving, etc)
- Displays station ICON (one of hundreds)
- Displays Direction and Speed of other mobiles
- Displays Antenna height, Gain, direction and power of other stations
- Displays Station location on GPS map (If GPS attached)
```

FRONT PANEL MESSAGING CAPABILITIES:
- Send and receive text messages up to 45 characters (on the HT)
- Send and receive text messages up to 64 characters (on the mobile)
- Receive DX spots or any other tabular data (10 lines max)
- Send Email for delivery via the global APRS system into the internet

Of course, these are all the normal APRS functions of these radios
used terrestrially on the continental wide APRS frequencies. But
to use these radios via satellite during an ECHO pass, there are only
a few front panel MENU items that must be changed:

To RECEIVE (monitor downlink):

1) Simply tune the radio to ECHO's downlink frequency.
2) and change the baudrate setting to 9600 baud.

To TRANSMIT VIA ECHO:

3) Tune TX band to ECHO's uplink frequency
4) Set TNC to operate crossband and to ignore DCD

SATELLITE CONFIGURATION DETAILS: The only considerations for the
configuration of ECHO to support this tremendous global handheld
digital satellite capability are to configure ECHO for UI packet
digipeating as follows:

- Enable UI digipeating at 9600 baud
- Enable UI digipeating aliases of RELAY and WIDE
- Optionally program for 20 character ECHO status packets
- Optionally program for 45 to 64 character BULLETIN formats

I can provide the detail formats for the STATUS and BULLETIN formats
to be compatible with the receipt and disply capabilities of the
radios and assist the ECHO software engineers to optimize details for this
great potential application.

de WB4APR, Bob

Hi OMs/YLs!

Here is a brief report of my Station:

Total Number of Scout & Guides participated : 351
(All from the same school)

Total Number of VU JOTA Stations Contacted : 8
VU2NRO/LIC-LFA - Hyderabad
VU2RDQ/VU3GBG - Mangalore
VU2PLE - Mumbai
VU2UGJ - Mumbai
VU2BGS/WLP-AAF (Delhi HQ)
VU2HIT - Mumbai
VU2VJT - Kerala
VU2PLL - Kannur
(I also heard VU2ESY from Bhopal but was unable to contact him because he
was working with DX JOTA station)
(Also had a contact with VU2SMN - Suhas - Kolhapur on Sunday, who operated
JOTA station on Saturday and he was able to work with 15 DX JOTA stations)
(Met with VU3TJU - Taj - Tirur, Kerala on 20M who is Rashtrapati Scout)

Total Number of DX JOTA Stations Contacted : 11
A47JOTA - Khamis - Oman
YF2ZJH - Ipul - Indonesia
HZ1SBS - Ibrahim - Riyadh
S50E/Jamboree - Joe - Klxmen
ZS5PMB - Ron - Pettersburgh
ZS1CT - Bud - Dcophtown, Lakeside
YB0S - Doni - Jakarta
S21SHQ/RC - Tutul - Bangladesh
OH2JAM - Branda - Kuopio
ST2KSS - Maga - Khartum, Sudan
9H1SVS - Josef - Malta

Souts & Guides at my location also simultaneously participated in other
activities like cooking, pioneering, book-binding etc.

Thank you very much Sarla,
In case you have Landlines of Hams from
Udupi/Manipal/Mangalore like PAI,SBJ, NAX, MTT, PTT
etc. Please mail them to me, I will invite them to the
ceremony. My Power supply is down so I am not on HF
now.

Best Regards
kiran

From: VU2NLF
Topic: 1368 Message: 1368

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

Our society is going great guns. It is wonderful to see so many people working for the better of Ham Radio in Mumbai.

One place where MARS is lacking behind very badly is in the field of HOMEBREWING, we desperately need a team of homebrewers. There is so much to be done, we can really really provide cheap and affordable solutions for not so affordable Ham Radio Equipment.

For example, we have got these 15 green birds waiting to be fixed, vu3wjm - rahul has already done the spade work for us, the pre-programmed boards are here and so the the final stage transistors. All which needs to be done is to just put them together as per the instructions provided by rahul from lucknow.

We also have these 9.6 K packet radio modems, unfortunately there is some bug either in the software or the hardware, a little bit of effort by some of you guys could SLINGSHOT MARS into a new dimension of digital world.

I was kind of hoping that these things would be fixed before we all go for hamfest, then we can proudly say that we are at par with the hams around the world.

I therefore request all of you technical guys to come forward and help the society by putting your two bits.

In the last monthly meeting it was decided to form a core team of homebrewers. about 4 -5 hams and swls have already volanteered for the team.

All the Hams and SWLs interested to do so may please contact Ankur Puranik on

ankurpuranik@...

Subject: It's a great time to visit ARRL!

GREETINGS FROM ARRL HEADQUARTERS IN NEWINGTON, CONNECTICUT!

ARRL Headquarters is a picture postcard framed in autumn leaves. It's fall again in New England!

This is a busy time of year for ham radio. We're wrapping up the December issue of QST (the holiday season is coming!). New editions of The ARRL Handbook and The ARRL Antenna Book are shipping. Many radio clubs and instructors are teaching licensing classes. And, hams are diving into antenna projects before the winter months arrive.

To celebrate the season, we've got a gift for you! Order $50 or more from the ARRLWeb Products Catalog and and receive a FREE ARRL REPEATER DIRECTORY*. This offer is valid now through midnight, Halloween.

Don't miss out on this special autumn offer.

73,

Lisa Tardette

ARRL Heaquarters

---

* Order $50 or more (excluding tax and shipping fees) from the ARRLWeb Products Catalog and and receive a FREE ARRL REPEATER DIRECTORY. This offer is valid now through midnight, Halloween (Friday, October 31).

The pocket-sized directory thousands of repeater listings from across the US and Canada. Limit 1 free Repeater Directory per customer. The free gift will not appear on your submitted order, but will be included with every qualifying order. 2003-2004 Edition. $9 value.

The ARRL Repeater Directory makes a great gift!

From: Sandip Adiwarekar
Topic: 1375 Message: 1375
Attachments: 6 described; binary payloads are missing from this source WARC

ARD9800

DIGITAL SSB WITH ANY HF RADIO!

Now available !!
List Price: $549.00

The AOR AR9800 could be the biggest revolution in HF radio since SSB replaced AM The ARD9800 is a modem unit that connects to the mic input of any transceiver. The user simply wires a connector for his particular transceiver, connects the speaker output of his transceiver to the modem and then connects the modem to a 12 VDC power source.

Main Features a.. NORMAL ANALOG OPERATION OF THE TRANSCEIVER REMAINS INTACT
b.. Digital voice HF is possible by selecting the Digital Mode
c.. Incoming digital voice signals are automatically decoded, no selection necessary.
d.. NO MODS TO THE TRANSCEIVER ARE NEEDED

WHY DIGITAL?
1. The ARD9800 provides NEAR FM QUALITY audio using SSB.
2. The digital signals require LESS SIGNAL than analog throughput making operations possible under adverse band conditions.

IS IT LEGAL?
The ARD9800 uses an open published digital protocol (G4GUO) per FCC rules.

DOES IT WORK IN OTHER MODES?
Yes! The ARD9800 can be used in AM or FM modes, however, FM mobile operation could be prone to "picket fencing" which could result in the loss of data.

IS THERE A MARKET FOR THIS?
The ARD9800 was demonstrated for audiences at Dayton and Friedrichshafen.
HAMS LOVED IT! Most asked question was, "When is it available?"

WHAT ELSE DOES IT DO?
With the optional memory board, images can be easily transferred, similar to SSTV but we believe the ARD9800 sends a higher quality image. You can also send file transfers.
Owner can use ARD9800 mic, or a mic of their choice (wired for ARD9800 input).

Package includes, modem, mic, cables, manual.

Specification Modulation method: OFDM
Band width: 300 Hz - 2500 Hz, 36 carriers
Symbol Rate: 20 mS (50 baud)

Guard interval: 4mS
Tone steps: 62.5 Hz
Modulation method: 36 carriers: DQPSK (3.6K)
AFC: +/- 125 Hz
Error correction: Voice: Golay + Hamming
Video/Data: Covolution + Reed-Solomon
Header: 1 Sec. 3 tones + BPSK training pattern for synchronization
Digital voice: AMBE2020 coder, decoder
Signal detection: Automatic Digital detect, Automatic switching
between analog mode and digital mode
Video Compression: AOR original adaptive JPEG
Video: NTSC Input/Output
Power requirements: 10 ~ 16 V DC, Approximately 200 mA Typ(@ 12 V DC)
6 V DC by internal jumper setting
Serial port: RS-232C, 9600 bps, Asynchronous
Dimensions (w, h, d): 100 x 32 x 158 (mm)
or 3.94 x 1.26 x 6.14 (inches) (Projections excluded.)
Connectors: Radio: Microphone output (level adjustable)
Speaker input (500 mV ~ 5 V p-p), PTT (Push To Talk)
Video IN/OUT: NTSC 1 V p-p (75 ohm)
MIC: Microphone input, Speaker output, PTT input
Others:: Signal Encryption for commercial applications
(where permitted; special commercial version required)
Analog/Digital mode selector
Video capture/transmit switch

Specification & price subject to change without notice due to continuous development of the receiver. E & OE.

1376. QST September'2003

Yahoo group: m_a_r_s
Date: 2003-10-25 19:06:16 UTC
From: Sandip Adiwarekar
Topic: 1376 Message: 1376

Now in available in MARS Library!!

QST - SEPTEMBER'2003 Contents :-
a.. An Easy to Build, Dual-Band Collinear Antenna - by Dan Friedrichs, K0IPG
Get some gain on 2M and 70cm, without a beam. Collinear verticals have been used for years in commercial and government services; K0IPG shows how to build one for the amateur bands.

b.. Understanding and Testing Capacitor ESR - by Jim McClanahan, W4JBM
High ESR is a common cause of failure with electrolytic capacitors. Enhance your troubleshooting skills, learn about ESR and build a simple adapter that will let you test for it.

c.. Amplifier Care and Maintenance - by H.Ward Silver, N0AX
With few moving parts, your amplifier can be easy to overlook. Here are some ideas for taking care of amplifiers.

d.. Solid-State those Pilot Lamps - by Phil Salas, AD5X
Tired of replacing pilot lamps in your radio gear. Use light-emitting diodes (LEDs) instead.

e.. WRC-03 from the Amateur Perspective - by David Summer, K1ZZ
Amateur Radio scores gains at its most important world telecommunication conference since 1979!

f.. Jamboree on the Air 2003 - by Jean Wolfgang, WB3IOS
A look at the FCC Rules governing JOTA, to be held this year October 18-19.

g.. 2003 Simulated Emergency Test - by Steve Ewald, WV1X
What role will you play this October 4-5.

h.. An Easier Way to Build PC Board Enclosures - by Bob Kopski, K3NHI
Can't find a chasis or cabinet for your latest project? K3NHI shows you how to build effective and attractive enclosures... easily, inexpensively and quickly.

i.. ARRL Board Requests Policy Recommendations to Implement WRC-03 Results
by Dave Patton NT1N and Rick Lindquist, N1RL

j.. ARRL Award Winners for 2002
The Knight Distinguished Service Award - Joe Knight (W5PDY)
Professional Educator of the Year Award - Bruce Watson (AA3LX)
The Lifetime Achievement Award - Dave Bell (W6AQ)
Excellence in Recruiting Award - Joseph Giraudo (N7JEH)
The Technical Excellence Award - Gerald Youngblood (AC5OG) (SDR1000, FlexRadio)
The Microwave Development Award - Barry Malowanchuk (VE4MA) (24GHz EME)
The Technical Servie Award - Danny Hampton Jr (K4ITL)
The Technical Innovation Award - Jonathan Taylor (K1RFD) (Echolink)
The Hiram Percy Maxim Award - Ben Schupack (NW7DX) (Exceptional ham under 21)

The Instructor of the Year Award - Edmund Weiss, (W1NXC) (License-in-a-weekend)

k.. Public Service
APRS and Search and Rescue - by Jeff Lehman, KD6DHB, San Bernardino County Sheriff's Cave Rescue Team.

l.. Product Review -
a.. Yaesu VXA-700 Spirit 2M Handheld Transceiver (www.vxstdusa.com, $420)
If you're ready to move up to a good 2M hand-held with one-of-a-kind extras such as AM and aviation capabilities, the VXA-700 Spirit is worth a close look.

b.. ICOM R-10, All mode MF/HF/VHF/UHF Receiver (www.icomamerica.com, $300)

c.. Yaesu VR-500, All mode MF/HF/VHF/UHF Receiver (www.vxstdusa.com, $300)

m.. New Products
a.. DSP Option available for the Elecraft K2 (KDSP2 - USD219)

Nilesh,

Happy Diwali to everybody in MARS.

Thanks. I have Kenwood TH-D7AG FM Dual Bander with
TNC. It has APRS capability. If somebody is having
APRS capability may be we can have QSO. Another way is
to have satellite communication. I am QRV. Tell me
when and waht frequency.

Kailash, VU2KIZ and KG6SQR

dear lokesh,

Well ! I have got the boards from vu3wjm and I have also got some transisters from vu2rnc, unfortunately here in mumbai, we don't have any good home brewer who could fix this stuff. maybe if rahul is coming to mumbai he can teach some of us to fix them, or if one of us is coming to delhi, you can do the needul.

As far as the repeater is concern, we have been sanctioned fund from one of our MP here, but some govt paper work is pending, in any case we are putting one repeater up from our society funds in a months time for sure.

do let me know if you are coming for hamfest at gandhinagar..

Dear Friends,
Hello!
Wish you all a very happy and prosperous Diwali.
Like previous year I would be spending my winter vacations at Mumbai. Possibly I would book the tickets for 30 Dec. Looking forward to spend New Year eve amongst all my Mumbai friends. I would keep few days spare to get the Birds going, would be also getting along the DigiVU souncard interface.
And yes the handy would be there too.
Dear Sandeep nice to see people interested in modern techniques evolving in communication. The Digital rig is bit expensive but a simple arrangement and software can enable newcomers to receive SSB thru PC.
http://www.detomasi.it/en/project.html
With DSP involved you can expect very good results from even those small pocket Chinese receivers and almost negligible investment.

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

Our society is going great guns. It is wonderful to see so many people working for the better of Ham Radio in Mumbai.

One place where MARS is lacking behind very badly is in the field of HOMEBREWING, we desperately need a team of homebrewers. There is so much to be done, we can really really provide cheap and affordable solutions for not so affordable Ham Radio Equipment.

For example, we have got these 15 green birds waiting to be fixed, vu3wjm - rahul has already done the spade work for us, the pre-programmed boards are here and so the the final stage transistors. All which needs to be done is to just put them together as per the instructions provided by rahul from lucknow.

We also have these 9.6 K packet radio modems, unfortunately there is some bug either in the software or the hardware, a little bit of effort by some of you guys could SLINGSHOT MARS into a new dimension of digital world.

I was kind of hoping that these things would be fixed before we all go for hamfest, then we can proudly say that we are at par with the hams around the world.

I therefore request all of you technical guys to come forward and help the society by putting your two bits.

In the last monthly meeting it was decided to form a core team of homebrewers. about 4 -5 hams and swls have already volanteered for the team.

All the Hams and SWLs interested to do so may please contact Ankur Puranik
on

ankurpuranik@...

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

We have received 8 more tickets for the batch of 2002.

ISAAC SAMUEL VU3 ??? (Licence freezed)

RAJENDRA PITALE. VU3 ??? (Licence freezed)

DILIP BHANDARI VU3 ??? (Licence freezed)

VAIBHAV PALANDE VU3 ??? (Licence freezed)

MURUGAN GOUNDER VU3 ??? (Licence freezed)

JESAL DOSHI VU3 ??? (Licence freezed)

A SHIVMANIKAM VU3 ??? (Licence freezed)

JOHAR ATTARI VU3 ??? (Licence freezed)

Congratulations to all the above for getting the ticket, Nevertheless all the licences will remain with society till your station is up and operational (atleast on VHF). Once your station is up you may get in touch with us and your licence will be handed over to you.

You can avail all the help from the society for putting up your station, for example installations of your antennae and getting the radio equipment.

VU2ICQ has already posted a mail regarding import of equipment, you may contact VU2ICQ directly to book your set.

1397. Freezing of Licence

Yahoo group: m_a_r_s
Date: 2003-10-31 20:51:33 UTC
From: Kailash Gupta
Topic: 1288 Message: 1397

Dear Nilesh,

I congratulate you and the MARS team for promotion of Ham radio. You and the 9 member team which was the first to travel after the Gujarat earthquake had done excellent work. You and the team were also very friendly and kind to accept me as part of the team when I joined Vadodara station on the night of 26th January, 2001. Though out my participation in Gujart earthquake emergency communication our team did excellent work.

I had participated in scramble teams coming from Baroda and Jaipur, enjoyed and learnet a lot. Our membership has grown and I am happy to know that over 70 member team is going to Hamfest 2003 at Gandhinagar. I would have definately joined the group. But I am at present in California, USA.

I am life member of MARS and proud of MARS. In fact, I promote MARS at every forum possible. My presentation at the International Seminar on Disaster Preparedness and Mitigation jointly organised by UNDP, GOI and CII highlights MARS. The presentaiton can be seen on the UNDP website http://www.undp.org.in/UNDMT/dpm/Day%20Three/Session%20VII/Kailashgupta.ppt. You had agreed to put up the presentation on the MARS website but I could never find it.

ARRL's Pacificon Division had annual hamfest called PACIFICON 2003. www.pacificon.org. I presented a paper on October 19, 2003 and highlighted MARS. I can transmit the file if you would like to put up on the MARS website. I had also made presentation at a Santa Clara County Amateur Radio Association. On 6th Nov, I am making presentation at Milpitas amateur Radio and Electronics Society.

From all this you and everybody should conclude that I love MARS and want it to grow and do well. Because of my love to MARS, I want to suggest you NOT, repeat NOT, to freeze the licences. MARS objective is to promote ham radio. But MARS cannot freeze anybody's license. We don't have that authority. Only the licencing body, WPC, has that authority. WPC had sent the licenses to MARS in good faith to be delivered to

licence. Frezzing would tantamount to an illegal act.
I donot want MARS to tangle itself in slow moving
courts. Kindly consider my request and deliver the
licences to the rightful owners.

Thanks for reading.

Kailash Gupta, VU2KIZ and KG6SQR
from California, USA

I did send the file to , the presentation is

This email has nothing to do with ham radio so all those who want to sneak up to NLF can do that and scream blue murder.

(grinning)

Ok - jokes apart -

1. NLF you can access yahoogroups through http://in.yahoogroups.com

2. If 1 above does not work try the following proxy servers given at the end after my name.

3. NLF, saar, would you allow Frozen for licences instead of Freezed? ;-)

LETS MAKE MARS SHINE IN THE UNIVERSE OF HAM RADIO.

_____-Ankur Puranik

_____

With Ref. to mail from VU2NLF Dated: Fri ,Oct24 2003 regarding formation of a core team for homebrewing,

A team has been formed for homebrewing.

The team will be performing the following tasks.

1) Repairs

2) Modifications

3) Testing

4) Assembly.

The homebrewing team presently have following members.

1) ANKUR PURANIK

2) HUAFRAID BHATENA

3) SANTOSH THOMAS

4) GAUTAM KEDIA

5) SHRIRAM N

6) ULHAS PARALKAR

If you have already sent a mail to ankurpuranik@... and your name is not listed above, please bring it to my notice by calling me on.. Phone: 22853504

We are still falling in short of people from the electronics and telecommunications field.

If you feel you can help in homebrewing & wish to join the team, you are most welcome. Just mail your particulars like area of interest, contact details etc.to Ankur Puranik at ankurpuranik@...

Entry into the team is open for all members of MARS, and can join the team anytime.

lets work together and make MARS shine in the universe of ham radio!

regards,

Ankur Puranik

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The list of all the members coming for Hamfest 2003 at Gandhi Nagar is Finalized. The participants are positioned into 6 groups of 10 + members each. All teams members are requested to follow the instructions of your team leader and coodinate with him for smooth & succesful trip to the Hamfest 2003.

All participants, please carry the following with you.

Your MARS Cap. (if not issued, the same will be given to you in the train)

Your I -D Card. (if not issued, please bring ID size photo, the card will be issued in the train)

Your personal clothes, toilet kits etc...

Your VHF Handy with charged batteries and spare batteries (Licenced Hams Only).

Your Amateur Radio Licence.

We will be leaving Mumbai on Friday (07/11/2003) at 21:20 hours from Bandra Terminus and coming back by Karnavati Express on Monday (10/11/2003) at 12:30 hours at Mumbai Central.

The Train Departure timings are as follows:-

Train Name : 915 - Poonam Special - 21:20 hours Bandra Terminus (All to reach station by 20:30 hours). The Train will reach Borivili at 22:02 hours - (all boarding from Borivili to reach station by 21:00 hours). We are all listed in Coach - S7.

Listed below are the names of all the participants, if you are coming and your name does not appear in the list, call me immediately on 98205-47074 before Thursday (06/11/2003) by 17:00 hours latest. After which all the extra tickets will be cancelled.

If your name is appearing BUT you are not coming, them contact me immediately on the above number before above time.

All Team Leaders are requested to be in touch with me.

NILESH RATHOD - VU2NLF - [GROUP LEADER] - 98205 - 47074.

New Scientist

Sun more active than for a millennium
09:00 02 November 03 Exclusive from New Scientist Print Edition. Subscribe and get 4 free issues.
The Sun is more active now than it has been for a millennium. The realisation, which comes from a reconstruction of sunspots stretching back 1150 years, comes just as the Sun has thrown a tantrum. Over the last week, giant plumes of have material burst out from our star's surface and streamed into space, causing geomagnetic storms on Earth.

The dark patches on the surface of the Sun that we call sunspots are a symptom of fierce magnetic activity inside. Ilya Usoskin, a geophysicist who worked with colleagues from the University of Oulu in Finland and the Max Planck Institute for Aeronomy in Katlenburg-Lindau, Germany, has found that there have been more sunspots since the 1940s than for the past 1150 years.
Sunspot activity
Sunspot observations stretch back to the early 17th century, when the telescope was invented. To extend the data farther back in time, Usoskin's team used a physical model to calculate past sunspot numbers from levels of a radioactive isotope preserved in ice cores taken from Greenland and Antarctica.

Global warming

Ice cores provide a record of the concentration of beryllium-10 in the atmosphere. This is produced when high-energy particles from space bombard the atmosphere, but when the Sun is active its magnetic field protects the Earth from these particles and levels of beryllium-10 are lower.

There was already tantalising evidence that beryllium-10 is scarcer now than for a very long time, says Mike Lockwood, from the UK's Rutherford Appleton Laboratory near Oxford.

But he told New Scientist that when he saw the data converted to sunspot numbers he thought, "why the hell didn't I do this?" It makes the conclusion very stark, he says. "We are living with a very unusual sun at the moment."

The findings may stoke the controversy over the contribution of the Sun to global warming. Usoskin and his team are reluctant to be dragged into the debate, but their work will probably be seized upon by those who claim that temperature rises over the past century are the result of changes in the Sun's output (New Scientist, print edition, 12 April 2003). The link between the Sun's magnetic activity and the Earth's climate is, however, unclear.

1414. Workshop Bulletin

Yahoo group: m_a_r_s
Date: 2003-11-10 05:38:14 UTC
From: Ankur Puranik
Topic: 1414 Message: 1414
Attachments: 1 described; binary payloads are missing from this source WARC

Current Happenings at the Radio Workshop

1) Digital Packet Radio Modem Problem Debugging

2) Working on the green birds.

3) Solution for HAM FRUSTRATION: - Cheap and Brand-new VHF base staions.

1) Digital Packet Radio Modems is under testing and debugging by our homebrewing team. Results should be out by a week or two depending on the nature of problem.
Hams are requested to kindly help the packet modem debugging team by lending the handys if required for testing.

2) The experimentation with the green bird is still on. Its not a single fault to be fixed there . Everyone is wondering as to so many months have passed and still the green birds are not on air. The reason being, not all green birds have a common fault which could be fixed easily. Every set has its own version of faults and problems which need to be analysed individually.
Every time we fix a fault in the radio set, we know this is not the end & there are many more to be fixed.
For eg: last week we got a green bird to transmit on the ham band, but no audio was herd, just a motor-boating sound could be heard. That got eleminated only by changing the complete microphone system from dymamic microphone to the condencer microphone. So a lot has to be done.
As said by VU2NLF Rahul has done the spade work for us without with it would be nearly impossible for us to even get the radio on HAM band. Thanks to Rahul.!

3) Possibly by this monthend, we will be able to find a soultion for our HAMs and SWL's and their frustration due to not so easily available and expensive VHF base station. And by December end we may be able to provide a brand new (ya i said BRAND-NEW) VHF base stn at a very affordable rate. So lets keep our fingers crossed and lets hope things workout well.

Thats all for & in the Workshop Bulletin.

Dear Ankur and friends,
Hello!
Ankur is right a fair amount of work needs to be done to get the Green Birds on air as they have had their share of abuse in junk. For benefit of all I once again give few common associated problems and procedure.
Ought to load this into files section but I love my India !!

1. Check the rig in its original condition and look for major repairs.
2. Do not try to change it to HAM band, initially get it going on original frequency.
3. RX section is sturdy I have not come across any set with defect in this part, though Squelch may need some working upon.
4. Trimmers are fragile even though they appear to rotate but top layer is only a deposit of film that often becomes loose with the connecting screw resulting in to tuning.
5. PLL board needs special care and few have been found defective. Symptom are no glow of LED or flashing LED.
6.Check the board with Orange wire supplying the PA board disconnected as there is no SWR protection.
7.Mic gain is low and preset needs to be run almost full open.
8.Front panel has no wired earth connection but a small tin shield over the Mic PTT connector if this becomes loose there is no audio in TX or intermittent TX.
9. PTT Mic has two pole switch one for PTT and other for Mic invariably one of the contact goes bad so either the rig only transmit carrier with no audio or no tx at all.
Shield plate again very important as it provides all ground connection. I recommend wire the mic permanently and parallel the switch and use it only for PTT.
10. Now connect a small 8-12pf capacitor from one end of VCO coil to ground replace original board with the new EPROM board.
11.Channel select wire as viewed from front from L-R is Voilet, brown,blue, green. Orange goes at top near 5V reg for Tx data change.
12. Set Ch10 and go into Tx adjust VCO coil for 3.7V on tune line from PLL white flexible wire underboard to PLL from VCO. Check the LED glows.
13 In RX adjust trimmer in VCO for 3.7V on Ch10 on tune V line.
14. Peak all trimmers in RX. Connect Qrange wire on PA and tune the finals. The mica trimmers will have their screws in almost full tight position.
Hope this all helps.
Meanwhile on topic of VHF rigs I have been told a Kenwood OEM supplier from China is providing the same rigs for abt $100 rather than its original cost of $250 . The Chinese cost is inclusive of accessories that Kenwood provides as optional.
http://www.kirisun.com/english/about.htm
I feel it would be good to get a quote from him too. A bulk purchase might even cost less.
Lets get things moving.

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

MARS participated in Hamfest 2003 in a big way, more than 67 members were present at the fest. It looked as if the fest was organised by MARS with Classy MARS members in their Red & White T- Shirts and Callsign caps. (hum red & white wallough ki baat hi kuch aur hai).

MARS also bagged the best presentation award. Unfortunately the Gujarat hams had only 1 catagory for award, that was of best presentation. Had there been more catagories such as (best club or maximum particapation award), I am sure we would have bagged all of them.

Congratulations to all our MARS participants for make the trip successful, We have set a precident for the rest of the ham club and societies in India. I am sure in the coming Hamfest 2004, many clubs and societies will try to replicate our performance.

During our presentation on "Prepardness for Disaster Management", a message to unite all the clubs and societies was clearly sent. The response was very good as many hams approched us and have agreed to the idea and are willing to work in tandem with us.

MARS also managed to bring Hamfest 2004 to Mumbai, We got the bid hands down, without any other bidder. (looking at our sheer strength in number of participants, I guess nobody dared to compete).

MARS was launched on the National Platform for the first time and it has received the much due recognisation.

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

Congratulations ..!!! , MARS have brought Hamfest 2004 to Mumbai, The last time Hamfest was organised in Mumbai was way back in 1995, much before MARS. After 9 years the Hamfest is back in Mumbai.

Gujarat Hamfest 2003 has 425 participants, We are aiming at 2000 + (2004 atleast). Hence it goes without saying a lot of efforts will have to be put in by most of us.

The "HAMFEST 2004 MANAGING COMMITEE" and the "HAMFEST 2004 TEAM" will be formed shortly, all members interested in WORKING are requested to kindly attend the meeting to be held on 16th November 2003 at 11:00 AM at B.S.Bengelle Girls School.

We will require atleast 50 member team in order to make this Hamfest 2004 a successful and memorable event.

We have rocked Gujarat in Hamfest 2003, Its time to Rock India in Hamfest 2004, so guys get ready for action..

Dear Ankur and friends,
Hello!
Ankur is right a fair amount of work needs to be done to get the Green Birds on air as they have had their share of abuse in junk. For benefit of all I once again give few common associated problems and procedure.
Ought to load this into files section but I love my India !!

1. Check the rig in its original condition and look for major repairs.
2. Do not try to change it to HAM band, initially get it going on original frequency.
3. RX section is sturdy I have not come across any set with defect in this part, though Squelch may need some working upon.
4. Trimmers are fragile even though they appear to rotate but top layer is only a deposit of film that often becomes loose with the connecting screw resulting in to tuning.
5. PLL board needs special care and few have been found defective. Symptom are no glow of LED or flashing LED.
6.Check the board with Orange wire supplying the PA board disconnected as there is no SWR protection.
7.Mic gain is low and preset needs to be run almost full open.
8.Front panel has no wired earth connection but a small tin shield over the Mic PTT connector if this becomes loose there is no audio in TX or intermittent TX.
9. PTT Mic has two pole switch one for PTT and other for Mic invariably one of the contact goes bad so either the rig only transmit carrier with no audio or no tx at all.
Shield plate again very important as it provides all ground connection. I recommend wire the mic permanently and parallel the switch and use it only for PTT.
10. Now connect a small 8-12pf capacitor from one end of VCO coil to ground replace original board with the new EPROM board.
11.Channel select wire as viewed from front from L-R is Voilet, brown,blue, green.
Orange goes at top near 5V reg for Tx data change.
12. Set Ch10 and go into Tx adjust VCO coil for 3.7V on tune line from PLL white flexible wire underboard to PLL from VCO. Check the LED glows.
13 In RX adjust trimmer in VCO for 3.7V on Ch10 on tune V line.
14. Peak all trimmers in RX. Connect Qrange wire on PA and tune the finals. The mica trimmers will have their screws in almost full tight position.
Hope this all helps.
Meanwhile on topic of VHF rigs I have been told a Kenwood OEM supplier from China is providing the same rigs for abt $100 rather than its original cost of $250 . The Chinese cost is inclusive of accessories that Kenwood provides as optional.
http://www.kirisun.com/english/about.htm
I feel it would be good to get a quote from him too. A bulk purchase might even cost less.
Lets get things moving.

From: "Ankur Puranik"
Subject: Workshop Bulletin

Current Happenings at the Radio Workshop

1) Digital Packet Radio Modem Problem Debugging

2) Working on the green birds.

3) Solution for HAM FRUSTRATION: - Cheap and Brand-new VHF base staions.

1) Digital Packet Radio Modems is under testing and debugging by our homebrewing team. Results should be out by a week or two depending on the nature of problem.
Hams are requested to kindly help the packet modem debugging team by lending the handys if required for testing.

2) The experimentation with the green bird is still on. Its not a single fault to be fixed there . Everyone is wondering as to so many months have passed and still the green birds are not on air. The reason being, not all green birds have a common fault which could be fixed easily. Every set has its own version of faults and problems which need to be analysed individually.
Every time we fix a fault in the radio set, we know this is not the end & there are many more to be fixed.
For eg: last week we got a green bird to transmit on the ham band, but no audio was herd, just a motor-boating sound could be heard. That got eleminated only by changing the complete microphone system from dymamic microphone to the condencer microphone. So a lot has to be done.
As said by VU2NLF Rahul has done the spade work for us without with it would be nearly impossible for us to even get the radio on HAM band. Thanks to Rahul.!

3) Possibly by this monthend, we will be able to find a soultion for our HAMs and SWL's and their frustration due to not so easily available and expensive VHF base station. And by December end we may be able to provide a brand new (ya i said BRAND-NEW) VHF base stn at a very affordable rate. So lets keep our fingers crossed and lets hope

things workout well.

Thats all for & in the Workshop Bulletin.

Subject: Hamfest 2003 at Gandhinagar Successful.

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

MARS participated in Hamfest 2003 in a big way, more than 67 members were present at the fest. It looked as if the fest was organised by MARS with Classy MARS members in their Red & White T- Shirts and Callsign caps. (hum red & white wallough ki baat hi kuch aur hai).

MARS also bagged the best presentation award. Unfortunately the Gujarat hams had only 1 catagory for award, that was of best presentation. Had there been more catagories such as (best club or maximum particapation award), I am sure we would have bagged all of them.

Congratulations to all our MARS participants for make the trip successful, We have set a precident for the rest of the ham club and societies in India. I am sure in the coming Hamfest 2004, many clubs and societies will try to replicate our performance.

During our presentation on "Prepardness for Disaster Management", a message to unite all the clubs and societies was clearly sent. The response was very good as many hams approched us and have agreed to the idea and are willing to work in tandem with us.

MARS also managed to bring Hamfest 2004 to Mumbai, We got the bid hands down, without any other bidder. (looking at our sheer strength in number of participants, I guess nobody dared to compete).

MARS was launched on the National Platform for the first time and it has received the much due recognisation.

Subject: Hamfest 2004 in Mumbai.

MUMBAI AMATEUR RADIO SOCIETY

Dear Members,

Congratulations ..!!! , MARS have brought Hamfest 2004 to Mumbai, The last time Hamfest was organised in Mumbai was way back in 1995, much before MARS. After 9 years the Hamfest is back in Mumbai.

Gujarat Hamfest 2003 has 425 participants, We are aiming at 2000 + (2004 atleast). Hence it goes without saying a lot of efforts will have to be put in by most of us.

The "HAMFEST 2004 MANAGING COMMITEE" and the "HAMFEST 2004 TEAM" will be formed shortly, all members interested in WORKING are requested to kindly attend the meeting to be held on 16th November 2003 at 11:00 AM at B.S.Bengelle Girls School.

We will require atleast 50 member team in order to make this Hamfest 2004 a successful and memorable event.

We have rocked Gujarat in Hamfest 2003, Its time to Rock India in Hamfest 2004, so guys get ready for action..

THE HOMEBREWING TEAM / THE RADIO WORKSHOP TEAM

So far the homebrewing team consists of the following members. (as on 14/11/2003)

1) ANKUR PURANIK

2) HUAFRAID BHATENA

3) SANTOSH THOMAS

4) *RAHUL SHRIVASTAV (VU3WJM)

5) SHRIRAM N

6) NILESH MALPEKAR

7) GAUTAM KEDIA

8) *PARIN GANGAR (VU2PIC)

9) ULHAS PARALKAR

10) ANURAG CHUGH

11) SACHIN SUNRENDRAN

12) KAUSHIK SANGHAVI.

13) MANI BATHIJA.

Incase your name should have appeared in the above list but does not appear .. pls bring it to my notice.

Yahoo group: m_a_r_s
Date: 2003-11-14 08:41:40 UTC
From: VU2UGO
Topic: 1428 Message: 1428

AMSAT NEWS SERVICE

ANS-313

This is an addition to the ANS Bulletin for Sunday 9th September 2003. It Contains a press release published today (9th, November, 2003) by AMSAT-UK

SB SAT @ AMSAT $ANS-313.07
AMSAT-UK TO DONATE FUNDS FOR AMSAT-NA AND AMSAT-DL PROJECTS

AMSAT News Service Bulletin 313.07 From AMSAT HQ
SILVER SPRING, MD. November 9, 2003
To All RADIO AMATEURS
BID: $ANS-313.07

Press Release:

AMSAT-UK is funding the development of two new amateur radio satellites by donating ?10,000 to each of two projects in the USA and Germany. In accordance with their constitution, at their meeting on Sat 25 Oct 2003, the committee of AMSAT-UK decided to make an immediate donation of ?10,000 to the AMSAT-NA Project Echo Launch Campaign Fund. Also at the meeting they decided to earmark ?10,000 for transfer to AMSAT-DL to support the Phase 3 Express project when a suitable component for funding can be identified.

In making these grants, the committee, on behalf of all members of AMSAT-UK,

wish AMSAT-NA and AMSAT-DL every success with their projects.

The Project Echo satellite is due to be launched on 31 Mar 2004 on a Depnr rocket into low earth orbit. As well as an FM transponder, it will have various data modes, using S and L bands. Further details of the satellite are available at http://www.amsat.org/amsat/sats/echo/article-02-11.html

It is understood that Phase 3 E Express is likely to be launched in 2005/2006. It will be launch from an Arriane rocket, and will carry its own rocket motor which will eventually place it in a highly elliptical orbit, allowing radio amateurs access to its analogue transponder operating on 2m and 70 cms for hours at a time. It will also have a variety of other transmitters and receivers on higher
frequency bands. Further details at http://www.amsat-dl.org/p3e/

More information from J D Heck, G3WGM, Hon Sec AMAST-UK, Tel (44) 1258 453959, g3wgm@..., or JD Heck, Badgers, Letton Close, Blandford, Dorset, DT11 7SS

[ANS thanks the AMSAT-UK Committee for the above information]

Hi Rahul,
Nice to see your mail on the group.We all were hoping to
see you at Gandhinagar.I am sure you will make it to Mumbai for
Hamfest 2004.
By the way, OM Mr.Ajoy, VU2JHM is the first ham to register
himself as delegate for Hamfest 2004.As a matter of fact we have yet
to decide about delegate fees etc. but VU2JHM offered token amount
fo his registration.
Also there are many outstation hams we wish to be
associated with MARS.

Green Birds on air as they have had their share of abuse in junk.
For benefit of all I once again give few common associated problems
and procedure.
> Ought to load this into files section but I love my India !!
>
> 1. Check the rig in its original condition and look for major
repairs.
> 2. Do not try to change it to HAM band, initially get it going on
original frequency.
> 3. RX section is sturdy I have not come across any set with defect
in this part, though Squelch may need some working upon.
> 4. Trimmers are fragile even though they appear to rotate but top
layer is only a deposit of film that often becomes loose with the
connecting screw resulting in to tuning.
> 5. PLL board needs special care and few have been found defective.
Symptom are no glow of LED or flashing LED.
> 6.Check the board with Orange wire supplying the PA board
disconnected as there is no SWR protection.
> 7.Mic gain is low and preset needs to be run almost full open.
> 8.Front panel has no wired earth connection but a small tin shield
over the Mic PTT connector if this becomes loose there is no audio
in TX or intermittent TX.
> 9. PTT Mic has two pole switch one for PTT and other for Mic
invariably one of the contact goes bad so either the rig only
transmit carrier with no audio or no tx at all.
> Shield plate again very important as it provides all ground
connection. I recommend wire the mic permanently and parallel the
switch and use it only for PTT.
> 10. Now connect a small 8-12pf capacitor from one end of VCO coil
to ground replace original board with the new EPROM board.
> 11.Channel select wire as viewed from front from L-R is Voilet,
brown,blue, green.
> Orange goes at top near 5V reg for Tx data change.
> 12. Set Ch10 and go into Tx adjust VCO coil for 3.7V on tune line
from PLL white flexible wire underboard to PLL from VCO. Check the
LED glows.
> 13 In RX adjust trimmer in VCO for 3.7V on Ch10 on tune V line.
> 14. Peak all trimmers in RX. Connect Qrange wire on PA and tune
the finals. The mica trimmers will have their screws in almost full
tight position.
> Hope this all helps.
> Meanwhile on topic of VHF rigs I have been told a Kenwood OEM
supplier from China is providing the same rigs for abt $100 rather
than its original cost of $250 . The Chinese cost is inclusive of
accessories that Kenwood provides as optional.

>
> MUMBAI AMATEUR RADIO SOCIETY
>
> Dear Members,
>
> MARS participated in Hamfest 2003 in a big way, more than 67
members were present at the fest. It looked as if the fest was
organised by MARS with Classy MARS members in their Red & White T-
Shirts and Callsign caps. (hum red & white wallough ki baat hi kuch
aur hai).

>
> MARS also bagged the best presentation award. Unfortunately the
Gujarat hams had only 1 catagory for award, that was of best
presentation. Had there been more catagories such as (best club or
maximum particapation award), I am sure we would have bagged all of
them.
>
> Congratulations to all our MARS participants for make the trip
successful, We have set a precident for the rest of the ham club and
societies in India. I am sure in the coming Hamfest 2004, many clubs
and societies will try to replicate our performance.
>
> During our presentation on "Prepardness for Disaster Management",
a message to unite all the clubs and societies was clearly sent. The
response was very good as many hams approched us and have agreed to
the idea and are willing to work in tandem with us.
>
> MARS also managed to bring Hamfest 2004 to Mumbai, We got the bid
hands down, without any other bidder. (looking at our sheer strength
in number of participants, I guess nobody dared to compete).
>
> MARS was launched on the National Platform for the first time and
it has received the much due recognisation.

> MUMBAI AMATEUR RADIO SOCIETY

>
> Dear Members,
>
> Congratulations ..!!! , MARS have brought Hamfest 2004 to Mumbai,
The last time Hamfest was organised in Mumbai was way back in 1995,
much before MARS. After 9 years the Hamfest is back in Mumbai.
>
> Gujarat Hamfest 2003 has 425 participants, We are aiming at 2000 +
(2004 atleast). Hence it goes without saying a lot of efforts will
have to be put in by most of us.
>
> The "HAMFEST 2004 MANAGING COMMITEE" and the "HAMFEST 2004 TEAM"
will be formed shortly, all members interested in WORKING are
requested to kindly attend the meeting to be held on 16th November
2003 at 11:00 AM at B.S.Bengelle Girls School.
>
> We will require atleast 50 member team in order to make this
Hamfest 2004 a successful and memorable event.
>
> We have rocked Gujarat in Hamfest 2003, Its time to Rock India in
Hamfest 2004, so guys get ready for action..

Subject: [m_a_r_s] updated list of the homebrew team

THE HOMEBREWING TEAM / THE RADIO WORKSHOP TEAM

So far the homebrewing team consists of the following members. (as on 14/11/2003)

1) ANKUR PURANIK

2) HUAFRAID BHATENA

3) SANTOSH THOMAS

4) *RAHUL SHRIVASTAV (VU3WJM)

5) SHRIRAM N

6) NILESH MALPEKAR

7) GAUTAM KEDIA

8) *PARIN GANGAR (VU2PIC)

9) ULHAS PARALKAR

10) ANURAG CHUGH

11) SACHIN SUNRENDRAN

12) KAUSHIK SANGHAVI.

13) MANI BATHIJA.

Incase your name should have appeared in the above list but does not appear .. pls bring it to my notice.

I have downloaded a copy 7.6 MB of F840 now from a site called
http://212.159.46.133 It looks like that is an anonymous treasure of all
Tranciever/like manuals incl. HP/ICOM/yaesu etc.

The link of 840 here is

http://212.159.46.133/Yaesu/Service%20Manuals/YAESU.%20FT840.%20TRANSCEI
VER.%20SERVICE%20MANUAL..pdf

Looks GOOD!!!!!!!!!!!!!!!!!!!!11

****

RDN,
sINCE YOU HAVE A BETTER BANDWIDTH, i SUGGEST
1. Download the above file and get a copy to Professor physically, since
he can't download so much easily (as per TXZ)
2. If possible, download the entire site volume by getright overnight
and make a CD for all of us!

Could you?
****

More......

This is a product brochure from Yaesu site. 1.8 MB PDF Format.

http://www.yaesu.com/downloadFile.cfm?FileID=619&FileCatID=154&FileName=
FT%2D840.pdf&FileContentType=application%2Fpdf

Read this for Band Correction/Modification procedure for FT-840
http://www.qsl.net/n3sme/ft840.txt

FT840 Manual by Mail order. But Must pay and wait.....!

http://www.btinternet.com/~geoffrey.brown3/manuals/yaesuam.html

Yet another one such...
http://www.mauritron.plus.com/html/yaesu.html

A treasury of Technical Manuals Collection. Can be downloaded. But one
FT840 user manual found was in Russian!

http://www.cqham.ru/sch_eng.html

>From the Yaesu site,
http://www.yaesu.com/indexVS.cfm?cmd=DisplayProducts&ProdCatID=102&encPr
odID=EAQjWfPbeOM%3D&DivisionID=65&isArchived=0&currTab=tab_Description&c
urrDiv=DescriptionDiv&ExpandID=0,Description

(please join the linklines above if brocken by a Linebreak!)

Does anybody know who is the Yaesu dealer in Kuwait? Prof. Jayaram
recently got a FT840 txcvr and needs a technical manual and also
some connectors for it. So if anybody knows where I can get hold of
the same, kindly let me know.

73s
Alex

1447. QST November'2003

Yahoo group: m_a_r_s
Date: 2003-11-26 07:11:43 UTC
From: VU2UGO
Topic: 1447 Message: 1447

Now available in MARS Library!!

QST - NOVEMBER'2003 Contents :-
a.. The Dangers of Cathode Keying - By Sam Karty, KD4VRS
Keying an older transmitter? Be Careful!
Most tube circuits are dangerous because of the high voltages they require does not imply that all transistors circuits are safe, since many transistor circuits do operate above 40V DC Many experienced hams might consider these precautions to be just plain old common sense, until they think about how often they could have been electrocuted while learning them. It is far better to discover these dangers by reading about them, rather than by experiencing them firsthand.
http://www.stanford.edu/~sshafer/LECTURES.DIR/Notes/Electrical%20Safety.Doc

b.. The Simple Superhet - By Ron D'Eau Claire, AC7AC
Is it possible to design an easy-to-build receiver that will demonstrate the basic concepts of the superheterodyne circuit and still give adequate performance?

c.. The Plumber's Half Square - By Douglas Stinson, KG6ADR
The half-square antenna has a bidirectional pattern with some gain and useful nulls. In crowded RF environments, this easy to construct antenna is an excellent choice.
www.cebik.com/hs.html

d.. My Big Homebrew Rig Project - By Robert B. Login, AA8A
Let's jump back to the 1950s when many an amateur - including this one - dreamed of a big rack-mounted kilowatt transmitter.

e.. Two Bands from One Dipole - By Marc C. Tarplee, N4UFP
A dual-band dipole design using no traps or coils.

f.. AO-40 for us Appliance Operators - By Bill Tynan, W3XO
Setting up a station for the OSCAR 40 satellite is easier than you think.
(W0LMD provides information on constructing patch feeds at
www.ultimatecharger.com/Dish_Feed_S.html)

g.. The QTH is Shanghai - By Ray Jacob, W2RJJ
Enjoying Amateur Radio from a different cultural point of view.

More information to obtain a visitors' operating permit from China is available at
www.crsa.org.cn

h.. Exercise and Ham Radio - Why Not? - By Paul Taenzer, VE6PY
It's no oxymoron. The author has been biking his way to fitness for 15 years... and he's still at it.

i.. Hams Redeem Old Transmitter at Fountain of Youth - By Paul Courson, WA3VJB
Historic radio station relocates and leaves behind a vintage Collins rig.
Related Web Sites : www.amfone.net www.amwindow.org www.radiohistory.org

j.. Two Anniversaries for Ham Radio in Space
This month marks the anniversaries of the first Amateur Radio communication aboard two space entities : a NASA space shuttle and the Mir space station.

k.. EmComm Classes Make the Grade - By Dave Hassler, K7CCC
ARRL emergency communications courses provide students with the right tools to begin participating effectively in emergency public service work.
www.arrl.org/cce

l.. The 2003 ARRL Frequency Measuring Test
www.arrl.org/w1aw/fmt/0210051.pdf

m.. An FT-817 Compact Fast Charger - By Phil Salas, AD5X
Don't wait 20 hours to recharge those FT-817 cells. Build your own versatile fast charger and have 16 more hours to operate!

n.. Changes to the 2003-2004 ARRL Contest Rules - By Dan Henderson, N1ND
A few new rules - and a strong emphasis on Good Operating Procedures.

o.. STRAYS

a.. Web Page for real time HF propagation - www.salsawaves.com/propagation

b.. New Books -
UP TWO - Adventures of a Dxpeditioner - www.idiompress.com
Arthur Collins, Radio Wizard - www.collinsbook.com
FCC Rule Book - www.arrl.org/shop
Independent Energy Guide - Electrical Power for Home, Boat & RV - www.arrl.org/shop

a.. Public Service
a.. ARRL SKYWARN Recognition Day
b.. Kentucky ARES assists in search for missing aircraft
c.. The 2002 Marine Corps Marathon
d.. A Temporary mobile groundplane for emergency response use

b.. Product Review -
a.. ICOM IC-703 PLUS HF Transceiver (www.icomamerica.com)
ICOM's new HF QRP transceiver adds 6 meters. This makes a great travel companion for CW and SSB operators (FM and AM too) at up to 10W out and with a competent general coverage receiver as well.

b.. QST Compares : 222MHz FM Transceivers from ADI, Alinco and Kenwood
Three commercially available 222MHz FM transceivers (ADI AR-247 / Alinco - DR-235 / Kenwood TM-331A) make it easy for amateurs to make better use of this quet VHF band. These radios offer function and peformance comparable to 146 MHz radios at a similar price. While each offers similar performance, they differ in features provided.

c.. New Products
a.. MultiNEC 2.0 Propagation Prediction Program with Antenna Modeling (www.qsl.net/ac6la/)

b.. Manual and Motor Driven Rotatable HF Dipoles from HI-Q (www.hiqantennas.com)

c.. HEIL Sound Proline Microphone Products (www.heilsound.com)

d.. QRP J-38 Telegraph Key (www.qrpj38.com)

e.. IC-706MKII-G Quick Reference Mini-Manual (www.niftyaccessories.com)

f.. AOR Digital HF Format Modem - (www.aorusa.com/comard9800.html)

g.. WA0JOW Transtenna Pro, Transmission Line Software (www.gbronline.com/transtenna)

h.. Ceramic Magnets from Metal & Cable Corp - (www.metal-cable.com)

i.. West Mountain Radio Rigrunner 4010S - (www.westmountainradio.com)

d.. Regular Features -
a.. Help Desk
b.. The Doctor is IN
c.. Short Takes (WXtoImg - www.weather.net.nz/wxtoimg, Amateur Contact Log - www.n3fjp.com)
d.. Hands-on Radio (Experiment #10 - Using SCRs - silicon controlled rectifier),
e.. Hints & Kinks (A Junk-box Mic Extension, PIC Programmer Corrections, More External Keying for the IC-706, Ten-Tec paragon Battery warning, A super glue solvent),

>
> ==>ON-LINE LICENSING COURSE, LOBBYING KIT PART OF ARRL'S 2004 PLAN
>
> An on-line Amateur Radio licensing course--possibly bundled with ARRL
> membership--plus additional Certification and Continuing Education courses
> <http://www.arrl.org/cce/> are among the strategic objectives of the
```

> League's 2004 Operational Plan. The League also plans to evaluate its
> existing ARRL on-line class offerings. The item was among several the ARRL
> Executive Committee (EC) designated to include in next year's plan when it
> met November 9 in Irving, Texas. Work on the licensing course already is
> under way, and the ARRL expects to announce its availability in the near
> future.
>
> At a mid-September strategic planning session, ARRL Board members agreed
> to let the EC pick the 2004 objectives to incorporate into the 2004
> Operational Plan. In the future, the full Board will handle the task.
> Other strategic objectives include development of a grassroots lobbying
> kit for ARRL members to use when approaching congressional representatives
> in their home districts on legislation affecting Amateur Radio and
> surveying served agencies such as relief organizations to identify their
> present and future emergency communications requirements and areas of
> Amateur Radio performance that may need improvement.
>
> The EC included some bottom-line related strategic objectives: That the
> League operate profitably to insure its future well being, and that it
> develop as ARRL Board policy a requirement that all new programs and
> services have a business plan and at least break even financially.
>
> In other matters, ARRL CEO David Sumner, K1ZZ, told the EC that the League
> is close to signing a contract calling for independent testing and
> measurement of Broadband over Power Line (BPL) interference
> characteristics. Earlier this year, the FCC issued a Notice of Inquiry, ET
> 03-104, that enthusiastically endorsed the prospect of BPL, which the ARRL
> and others feel poses the potential of possibly severe interference to
> licensed HF radio services. The contract would include certification by
> professional engineers.
>
> The EC discussed and developed draft proposals to implement changes in US
> Amateur Radio rules in the wake of World Radiocommunication Conference
> 2003 (WRC-03). Among other significant changes, WRC-03 left it up to
> individual countries whether to require a Morse code test for access to
> amateur high-frequency allocations. The ARRL Board of Directors will
> discuss the EC's recommendations in detail at its January 2004 meeting.
>
> The EC also voted not to go forward with an appeal of FCC actions to
> permit expanded unlicensed Part 15 operations in the 24.05-24.25 GHz band.
> The ARRL had filed a Petition for Review October 22 with the US Court of A
> ppeals for the District of Columbia Circuit of two FCC orders that would
> allow certification of unlicensed 24-GHz equipment at field strengths 10
> times the level Part 15 rules now permit. After discussing the pros and
> cons of the case and the minimal prospects for a positive outcome, the
> Executive Committee voted to withdraw the League's appeal.
>
> Minutes of the November EC meeting are available on the ARRL Web site
> <http://www.arrl.org/announce/ec_minutes_472.html>.
>

> ==>FCC REORGANIZES WIRELESS TELECOMMUNICATIONS BUREAU
>
> The FCC has announced a reorganization of its Wireless Telecommunications
> Bureau (WTB) <http://wireless.fcc.gov/> "to more effectively support the
> FCC's strategic goals--broadband, competition, spectrum, media, homeland
> security and modernizing the FCC." The WTB administers the Amateur Radio
> Service (Part 97) and amateur licensing, but the changes are expected to
> be transparent to the amateur community. The Amateur Service now will be
> administered by the newly named Public Safety and Critical Infrastructure
> Division. D'wana Terry, formerly chief of the Public Safety and Private
> Wireless Division, will head the new division.
>
> "The bureau's portfolios have been redistributed along the lines of
> strategic goals, consolidating similar functions to focus resources
> better," the FCC said in a November 24 public notice. As a result of the
> reorganization, which the FCC approved November 13, WTB expands from five
> to six divisions: Public Safety and Critical Infrastructure, Spectrum
> Management Resources and Technologies, Auctions and Spectrum Access,
> Spectrum and Competition Policy, Mobility, and Broadband.
>
> In addition to the Amateur Service, the Public Safety and Critical
> Infrastructure Division will oversee Part 95, Marine, Aviation,
> Intelligent Transportation Systems, Public Safety Fixed Microwave, Public
> Safety and Private Land Mobile services and E911, among other areas.
> Responsibilities moved elsewhere include Fixed Microwave (Part 101),
> Instructional Television Fixed Service, the Multipoint Distribution
> Service, and the Multichannel Video Distribution and Data Service.
>
> The action reduces the scope and size of WTB's larger divisions and
> eliminates separate branches below the division level, while retaining
> their current functions. One of those was the Licensing and Technical
> Analysis Branch, headquartered in the FCC's Gettysburg, Pennsylvania,
> office. Among other tasks, that branch has handled the granting and
> issuance of Amateur Radio licenses and the vanity call sign program.
> Another was the Policy and Rules Branch at FCC Headquarters, which has
> been the home of Bill Cross, W3TN, an FCC figure well-known within the
> amateur community. Among other tasks, that branch has handled Amateur
> Radio rule making petitions and Part 97 rules interpretations.
>
> A potential plus of the new arrangement is that Cross now will work under
> another amateur licensee, Mike Wilhelm, WS6BR, who will report to Terry.
>
> The FCC said eliminating branches would promote greater management
> flexibility in deploying resources and lead to a flatter, more flexible
> organization without altering the bureau's overall mission. The Commission
> said it was able to carry out the reorganization by redeploying existing
> positions.
>
> WTB Chief John Muleta said the reorganization will result in "a
> mission-driven team that will be innovative in its approach to regulatory

> policies and customer service."
>
> ==>ROY NEAL, K6DUE, ARISS COMMEMORATIVE EVENT STARTS NOVEMBER 29
>
> An Amateur Radio on the International Space Station (ARISS) NA1SS special
> event to commemorate Roy Neal, K6DUE (SK), gets under way Saturday,
> November 29, with an ISS pass over the US West Coast. ARISS International
> Chair Frank Bauer, KA3HDO, says ARISS has provided ISS Expedition 8
> Commander Mike Foale, KB5UAC, with a list of potential passes for the
> November 29-30 weekend. (See the ARRL Web site
> <http://www.arrl.org/news/stories/2003/11/26/3/> for frequencies and pass
> times.)
>
> "It is our expectation that Mike will probably concentrate on a couple of
> passes over North America and/or Europe this weekend, but we cannot be
> sure of this," Bauer said. "So our advice is to be listening wherever you
> live in the world." ARISS requests that special event participants keep
> all contacts short.
>
> Bauer said Foale hopes to be on the air from NA1SS for the special event
> for about two passes per weekend through December. "This, of course, is
> completely contingent upon his schedule and other duties or issues that
> might crop up on ISS," he cautioned. Those contacting the ISS by voice
> (NA1SS) or packet (RS0ISS) through the end of December will be eligible
> for a special anniversary event certificate.
>
> Born Roy N. Hinkel, Neal--a former NBC News correspondent and
> executive--chaired the Space Amateur Radio EXperiment (SAREX)/Amateur
> Radio on the International Space Station Working Group and moderated many
> of its meetings. Through his extensive NASA contacts, he was instrumental
> in the 1980s to convince NASA management to fly Amateur Radio onboard the
> space shuttle.
>
> November 28 marks the 20th anniversary of the first Amateur Radio
> operation from space by astronaut Owen Garriott, W5LFL, from the shuttle
> Columbia. Amateur Radio communication from the ISS began three years ago
> this month, when Expedition 1 crew members Sergei Krikalev, U5MIR, and
> Bill Shepherd, KD5GSL, spoke with R3K, the Energia amateur station in
> Russia, and with NN1SS, the ISS ground station at Goddard Space Flight
> Center in Maryland.
>
> Bauer advised those working NA1SS to not request a certificate until ARISS
> releases QSL instructions. Additional information may be available on the
> ARISS Web site <http://www.rac.ca/ariss/>.
>
> ==>EXPEDITION 8 COMMANDER ENJOYS FIRST SCHOOL GROUP QSO
>
> ISS Expedition 8 Commander Mike Foale, KB5UAC, took the controls of NA1SS
> aboard the International Space Station November 25 for his first school
> group contact. The QSO with youngsters at the Renmark Primary School in

> South Australia was arranged via the Amateur Radio on the International
> Space Station (ARISS) program. Foale predicted during his ham radio
> conversation with the Renmark pupils that humans would one day colonize
> the moon.
>
> "People should be living on the moon in another 10 years," Foale told the
> youngsters, and I hope some of them will be you." Foale and Russian
> cosmonaut Alex "Sasha" Kaleri, U8MIR, have been aboard the ISS for about
> one month. Foale said he's already a bit homesick, and he expects that to
> get worse after the Christmas holiday.
>
> The British-born Foale, who did a duty tour on the Russian Mir spacecraft
> in 1997, said he has wanted to be an astronaut since the age of six.
> "People laughed at me when I was a little boy, but I kept thinking about
> it and studied hard at school and eventually ended up getting to the ISS,"
> he said. Living aboard the space station, he explained, is "like living in
> a laboratory" and involves a lot of hard work.
>
> In response to one youngster who asked what it sounded like in space,
> Foale remarked that the sound of the air-circulating fans is pervasive.
> "We hear fans running all the time circulating air," he said. "One time,
> we turned off all the fans, and it was dead quiet." The fans are necessary
> because of a lack of convection currents in the spacecraft's microgravity
> environment. Foale pointed out to the students that the crew could not
> leave the fans off for very long without risking a dangerous buildup of
> carbon dioxide.
>
> The selection of food aboard the ISS is good, he said. "I went to boarding
> school in Britain," Foale quipped, "so I can eat most any food. The food
> here is better than boarding school."
>
> Foale also noted that he does not get bored in space and always has
> something to do in his off-time. In addition to e-mailing family and
> friends, he said he enjoys computer programming and also keeps a journal.
>
> Making the Renmark school group contact possible involved arrangements on
> two continents. Members of the Riverland Radio Club
> <http://www.rrc.org.au> in Australia assisted at the school, while
> operators at W6SRJ, the Santa Rosa Junior College Amateur Radio Club
> station, in California, handled the actual radio link with NA1SS. MCI
> provided two-way audio teleconferencing for the event. Will Marchant,
> KC6ROL, moderated the contact from Virginia.
>
> ARISS <http://www.rac.ca/ariss/> is an international project with
> participation and support from ARRL, NASA and AMSAT.
>
> ==>FCC THREATENS CONVICTED KILLER'S HAM TICKET ON "CHARACTER
> QUALIFICATIONS"
>
> The FCC has issued an Order to Show Cause to a Texas Amateur Radio

> licensee who's now serving a 32-year prison sentence for killing his wife
> in 1996. The FCC's show cause order released November 21 is the opening
> bell in a hearing process that could end with the revocation of the
> Advanced class license of Roger Thomas Scaggs, W5EBC. He must indicate
> within 30 days whether he plans to appear at a hearing on the matter to
> show cause why his license should not be revoked.
>
> "Mr Scaggs' murder conviction raises very serious questions as to whether
> he possesses the requisite character qualifications to be and to remain a
> Commission licensee and whether his license should be revoked," the FCC
> said. At one time reserved for assessing the fitness of broadcast
> applicants and licensees, the FCC's "character qualifications" standard to
> date has extended into the Amateur Radio arena only in a handful of cases.
> The Order asserts that the Commission has "consistently applied" character
> qualifications to Amateur Radio Service applicants. Three of the four
> examples it cites to support that claim involved
> telecommunications-related offenses, and one involved indecent assault
> upon and corruption of minors.
>
> The Order cites ?312(a)(2) of the Communications Act that says the FCC may
> revoke any license on the basis of "conditions coming to the attention of
> the Commission which would warrant it in refusing to grant a license or
> permit on the original application." Scaggs, 64, apparently was able to
> renew his ham ticket in the spring of 1998--the same year in which he was
> later convicted of murdering his wife, Penny. The FCC granted Scaggs'
> application for an administrative update--apparently a change of address
> from Austin to Gatesville, Texas. His license expires in 2008.
>
> The FCC reportedly only recently became aware of Scaggs' murder
> conviction, which could keep him behind bars at least until he's 75.
>
> Assuming that Scaggs or his attorney indicates that he will appear for or
> be represented at a formal hearing, the FCC will follow up with a Hearing
> Designation Order. Held before an administrative law judge, the hearing
> would consider evidence concerning the effect of Scaggs' felony conviction
> on his qualifications to remain an FCC licensee and, in light of the
> evidence, whether his license should be revoked.
>
> ==>SANTA BARBARA CLUB TO HOST USA ARDF CHAMPIONSHIPS
>
> The Santa Barbara Amateur Radio Club will host the 2004 USA Amateur Radio
> Direction Finding (ARDF) Championships, ARRL ARDF Coordinator Joe Moell,
> K0OV, announced this week. Moell said the fourth annual USA ARDF event
> will be held next June in California.
>
> "Radio-orienteers from all over the country plus visitors from abroad are
> expected to attend," Moell said. "The competitive courses are open to
> anyone of any age from any country, with or without an Amateur Radio
> license."
>

> Medals will be awarded in five age categories for male competitors and
> four for female competitors, in accordance with International Amateur
> Radio Union (IARU) rules. The competition, which will include both
> 80-meter and 2-meter events, gets under way June 16.
>
> After a day for practice and alignment sessions and opening ceremonies the
> full-length 2-meter competition will take place June 18. The 80-meter
> competition will take place the next day, followed by closing ceremonies.
>
> Moell says the USA Championships will occur just in time for final
> selection of ARDF Team USA 2004 members. Those chosen for Team USA will
> travel to the Czech Republic for the 12th ARDF World Championships,
> September 7-12. "Team positions will be filled based on performances in
> the 2004 events in California and the 2003 events in Ohio," he explained.
>
> One of North America's ARDF pioneers, Marvin Johnston, KE6HTS, will serve
> as general chair for the 2004 USA Championships. Johnston was a member of
> USA's first team to the 1998 ARDF World Championships held in Hungary and
> he won medals at the last two USA ARDF Championships.
>
> The hosting SBARC also "has an abundance of ARDF talent," Moell said. That
> includes club president Jay Hennigan, WB6RDV, who took gold in his age
> category on both 80 and 2 meters in this year's USA Championships in
> Cincinnati. Other SBARC medal winners include Scott Moore, KF6IKO, who won
> bronze on 80 and 2 meters in Cincinnati. SBARC will collaborate with the
> Los Angeles Orienteering Club (LAOC) to prepare maps and set up the
> start/finish areas for the competition.
>
> An official Web site for the 2004 Championships is under construction. It
> will contain complete rules and technical details, including competition
> frequencies, plus registration and lodging information. Information about
> transmitter hunting and US ARDF activities is available on Moell's Homing
> In Web site <http://www.homingin.com>.
>
> ==>FORMER NEW ENGLAND DIRECTOR ROBERT CHAPMAN, W1QV, SK
>
> Former ARRL New England Director Robert York Chapman, W1QV, of Groton,
> Connecticut, died November 21. He was 96. Chapman served as New England
> Division Director from 1965 until 1975, when the ARRL Board of Directors
> elected him an ARRL Honorary Vice President. Chapman also was president
> emeritus of the ARRL Foundation, which he helped to found in 1973.
>
> "He was the 'grand old man' of Amateur Radio in Southeastern Connecticut
> 40 years ago when I became a ham," recalled ARRL CEO David Sumner, K1ZZ.
> Sumner said that during his tenure on the ARRL Board, Chapman championed
> ARRL life membership (he was a Charter Life Member) and, at the Board's
> May 1968 meeting, proposed the ARRL Five-Band DXCC Award as the epitome of
> Amateur Radio DX achievement.
>
> An ARRL member since 1923 and a ham since 1924 (as 1QV), Chapman served in

> the US Naval Reserve during World War II after studying at Columbia
> University and Johns Hopkins University.
>
> He was the director of the Acoustical Research and Development Division
> at the US Navy Submarine Base in Groton, where he led the program to
> develop silencing mechanisms for ships and was a Navy consultant in the
> field of acoustics.
>
> Chapman was a member and past president of the Tri-City Radio Club and
> chaired 21 consecutive club hamfests. He also was member of the A1
> Operator Club, the Quarter Century Wireless Association, the Old Old
> Timers Club and IEEE.
>
> Survivors include three sons, a daughter and a sister. The family invites
> memorial donations to the Poquonnock Bridge Baptist Church, South Road,
> Groton, CT 06340.
>
> ==>SOLAR UPDATE
>
> Propagation guru Tad "When I Wanted Sunshine, I Got Rain" Cook, K7RA,
> Seattle, Washington, reports: This short propagation update is going out
> early, since ARRL headquarters will be closed Thursday and Friday for the
> Thanksgiving holiday. We'll report sunspot numbers, solar flux and A
> indices for November 20-26 in a subsequent bulletin during the week of
> December 1.
>
> Solar flux and sunspot numbers are expected to trend slightly lower than
> now. Solar flux for the past week has been running from 171 to 178, and
> for the CQ World Wide DX Contest CW the weekend of November 29-30, values
> should run 15 to 20 points lower.
>
> After settling down over the next two days, geomagnetic conditions are
> expected to be quiet, which should be great news for contesters.
>
> For a last-minute propagation assessment before the contest weekend, check
> the NW7US site <http://www.hfradio.org/propagation.html>. To see which way
> the interplanetary magnetic field is pointing, check SpaceWeather.com
> <http://spaceweather.com/>. This information appears under the heading
> "Interplanetary Mag. Field"--just below the sunspot number on the
> left-hand side of the page. If it is pointing north, which it was as of
> about 1630 UTC today, conditions should be fairly quiet and stable--even
> if there is a strong solar wind.
>
> ----------
>
> ==>IN BRIEF:
>
> * This weekend on the radio: The CQ World Wide DX Contest (CW) is the
> weekend of November 29-30. JUST AHEAD: The ARRL 160-Meter Contest, the QRP
> ARCI Topband Sprint, the PSK31 Death Match, the TARA RTTY Melee and the

> TOPS Activity 80-Meter Contest are the weekend of December 6-7. The ARRL
> 10-Meter Contest is the weekend of December 13-14. See the ARRL Contest
> Page <http://www.arrl.org/contests> and the WA7BNM Contest Calendar
> <http://www.hornucopia.com/contestcal/index.html> for more info.
>
> * ARRL Emergency Communications course registration: Registration opens
> Monday, December 1, 12:01 AM Eastern Time (0501 UTC), for the on-line
> Level I Emergency Communications course (EC-001). Registration remains
> open through the December 6-7 weekend or until all available seats have
> been filled--whichever comes first. Class begins Tuesday, December 16.
> Thanks to our grant sponsors--the Corporation for National and Community
> Service and United Technologies Corporation--the $45 registration fee paid
> upon enrollment will be reimbursed after successful completion of the
> course. During this registration period, approximately 175 seats are being
> offered to ARRL members on a first-come, first-served basis. Senior
> amateurs are strongly encouraged to take advantage of this opportunity.
> Those interested in taking an ARRL Certification and Continuing Education
> (C-CE) course in the future can sign up to receive advance notification of
> registration opportunities. To take advantage, send an e-mail to
> prereg@.... On the subject line, indicate the course name or number
> (eg, EC-00#) and the month you want to start the course. In the message
> body, provide your name, call sign, and e-mail address. Please do not send
> inquiries to this mailbox. To learn more, visit the ARRL Certification and
> Continuing Education Web page <http://www.arrl.org/cce/> and the C-CE
> Links found there. For more information, contact Emergency Communications
> Course Manager Dan Miller, K3UFG, <dmiller@...>; 860-594-0340.
>
> * FCC begins "interference temperature" proceeding: The FCC has begun an
> inquiry and proposed rule making proceeding focusing on the concept of
> "interference temperature" as a means to quantify and manage interference
> among different services. The interference temperature model "takes into
> account the actual cumulative radio frequency energy from transmissions"
> and would "set a maximum cap on the aggregate of these transmissions," the
> FCC said in a public notice. The Commission's current primary approach to
> manage interference is to specify and limit the power output of individual
> devices. The FCC said the interference temperature approach "may
> facilitate more intensive use of the radio spectrum, creating the
> opportunities for new services and improving the predictability of any
> interference to existing services. The FCC has not yet released the Notice
> of Inquiry and Notice of Proposed Rule Making, adopted November 13 as ET
> Docket 03-237. The Commission will seek comment on various technical rules
> that would establish procedures and use the interference temperature model
> on a limited basis in the 6525-6700 MHz band and portions of the
> 12.75-13.25 GHz band.--FCC
>
> * AO-40 transponders off for a month: AO-40 now is in "hibernation mode."
> The ALON/ALAT is 45/24. Magnetorquing has ceased, and the satellite will
> begin drifting toward ALON of approximately 315 degrees. This will take
> approximately four weeks. This is done twice a year to keep the satellite
> healthy due to poor sun angles. Although the satellite's passbands are

> off, its beacon remains on and FEC telemetry is active whenever possible.
> According to AO-40 ground controller Stacy Mills, W4SM, the passbands
> should be back on in time for the Christmas holiday. The AO-40 team would
> like telemetry files. Send zipped files via e-mail to
> ao40-archive@....--Bruce Paige, KK5DO/AMSAT
>
> * IARU-R1 and CEPT Electronic Communications Committee to cooperate:
> letter: International Amateur Radio Union Region 1 (IARU-R1) and the
> Electronic Communications Committee of the European Conference of Postal
> and Telecommunications Administrations (CEPT) this month signed a Letter
> of Understanding. The LoU sets out a number of areas for cooperation
> between Region 1 and CEPT whereby both entities "will work toward common
> European approaches on radio matters and will exchange information and
> hold meetings for this purpose," IARU-R1 said in a news release. The LoU,
> initially for a three year period, is renewable by mutual agreement. IARU
> Region 1 Chairman Ole Garpestad, LA2RR, said the Letter of Understanding
> "reinforces the already positive and constructive working relationship
> between IARU Region 1 and CEPT."--IARU

MUMBAI AMATEUR RADIO SOCIETY
Dear Friends,

You all are aware that MARS has brought Hamfest India 2004 to Mumbai. It is going to a huge responsibility for us to make sure that we do the Best ever Hamfest in India. We have great plans which will put as at par with the International Hamfest standards.

I have worked out the Hamfest India 2004 Team, (as per file attached). there may be changes at a later date, but for now this is how it will stand.

We would be conducting our 2nd Hamfest India 2004 Team Meeting on Sunday 30th November 2003 at 12:30 hours at Balkum Fire Station, Thane. All names appearing in the file are requested attend the meeting without fail.

Lunch will served on the house at 12:30 PM, the meeting will commence at 1:15 PM and will definitely end by 2:45 PM. Timings for all the future meetings shall be very strict and hence punctuality will be highly appreciated.

Anyone's name not appearing in the list and wishes to be a part of the Hamfest India 2004 Team, may please contact me directly on 98205-47074 ASAP.

1460. Fw: Don't ask me Why I Fired My Secretary

Yahoo group: m_a_r_s
Date: 2003-11-29 17:47:59 UTC
From: Huzefa Merchant VU2HIT
Topic: 1460 Message: 1460
Attachments: 1 described; binary payloads are missing from this source WARC

Cloudeight Funletters, Misty Morning
HOPE THIS SHOULD NOT HAPPEN TO OUR MARS MEMBERS AND NLF DOES WISH EVERYONE FIRST SO.....

DON'T ASK ME WHY I FIRED MY SECRETARY ??????????
Two weeks ago was my 35th birthday and I wasn't feeling too hot that morning anyway.
I went to breakfast knowing my wife would be pleasant and say "Happy Birthday" and probably a present for me.

Forget "Happy Birthday", She didn't even say "Good Morning".
I thought, "Well, that's wives for you, the children will remember."
Children came in to breakfast and didn't say a word.

I started to the office I was feeling pretty low.
As I walked into my office my secretary, Janet, said,
"Good morning, boss. Happy Birthday."
And I felt a little better; someone had remembered.

I worked until noon. Then, Janet knocked on my door and said,
"You know, it's such a beautiful day outside and it's your birthday,
let's go to lunch, just you and me."
I said, "By George, that's the greatest thing I've heard all day.
Let's go."

We went to lunch. We didn't go where we normally go;
we went out to the country to a little private place.
We had two martinis and enjoyed lunch tremendously.

On the way back to the office, she said, "You know, it's such a beautiful day.
We don't need to go back to the office, do we?"
I said, "No, I guess not."
She said, "Let's go to my apartment."
After arriving at her apartment she said, "Boss, if you don't mind,
I think I'll go change." "Sure," I excitedly replied.
She went into the bedroom and, in about six minutes, she came out carrying a big birthday cake, followed by my wife, children, and dozens of our friends, all singing Happy Birthday.

And there I sat... on the couch... NAKED !!!!!!!!

Regards,

Huzefa

1461. Start operating satellites with following info!!!!!!!

Yahoo group: m_a_r_s
Date: 2003-11-30 09:40:40 UTC
From: Parin Gangar
Topic: 1461 Message: 1461

Dear friends,

Just while surfing the net, I stumbled across this wonderful website.

http://www.heavens-above.com/

The beauty of this site is that it gives you the exact location, time, and day of each and every amateur satellite plus the ISS ofcourse, along with their UPLINK / DOWNLINK FREQ., beacon Freq., etc..

You simply have to register on the site, configure your location (i.e., enter your position in terms of LAT. and LONG. which the site does automatically upon selecting the location) and go on the main menu and click on the link RADIO AMATEUR SATELLITES and BINGO !!!!!! the complete list is in front of you.

I did the same and have downloaded the time - table for three days. No doubt I would be doing it every three days , but in case you wish to do it on your own, above is the procedure.

WHAT ARE YOU WAITING FOR OM? START GOING SATELLITE.

Observer's Location:

Mumbai (18.9670°N, 72.8330°E)
Local Time: Universal Coordinated Time -5:30 (GMT + 5:30)

Satellite Date Times Max. Altitude Downlink Frequencies (MHz)

1465. FW: [amsat_india] MARS EXPRESS

Yahoo group: m_a_r_s
Date: 2003-12-08 02:43:51 UTC
From: parin gangar
Topic: 1465 Message: 1465

Dear All,

The european MARS EXPRESS probe will arrive on Mars on Christmas Day and deploy the lander BEAGLE toward the Mars surface.

Joint preparations by the IUZ and the AMSAT-DL for this event have started months ago, because the 20 metre parabolic antenna is also deemed to be used as ground station for the AMSAT-DL future P5-A Mars Mission.

On Sunday, Nov. 16th, Germany saw a first ever event when a strong (40dB/Hz) 8.4 GHz signal of the MARS EXPRESS - at that moment 102 million kilometer distant - was directly received at Bochum over a number of hours.

It was the first time ever that a signal of an interplanetary deep space probe was received in Germany. It was probably also the first time ever that such a signal was received by amateur radio operators.

With this successful test the general functional and operational readiness of the 20 metre parabolic antenna in Bochum to serve as AMSAT-DL command station for the P5A Mars Mission has been proven. It will then be used to navigate the P5-A Satellite in 2007 safely towards Mars and to enter a Mars orbit.

Some more good news from our team in Bochum:

At Bochum some improvements were made to the receive

system, about +4 dB in fact. MARS EXPRESS was again

received at increased strength.

In addition MARS ODESSEY was heard on 8407 MHz; it is

in orbit about the red planet, so lots of doppler and

occultations.

A very good day indeed. It is early days, and there

are still aligments, calibrations and improvements to

come, but we basically have a high quality precision

instrument to be very proud of.

1466. 2M VHF BASE STN PROJECT STATUS

Yahoo group: m_a_r_s
Date: 2003-12-11 06:38:20 UTC
From: Ankur Puranik
Topic: 1466 Message: 1466
Attachments: 1 described; binary payloads are missing from this source WARC

RADIO WORKSHOP

So far the things have been working good for the 2-meter VHF base station project, which the radio workshop had promised to build. All the necessary parts have arrived at the workshop (not all parts are avaiable in bombay so we had to order a few) and the construction has begun. So by this month end, the system will be ready to fire on air. We are facing little difficulty in the linear amplifier section which is required to raise the base stn output to around 25W.

The system is a PLL based. So no frequency drifts. It will cover frequency range of 144Mhz to 146Mhz for transmission and reception both. Also care has been taken to enable setting of different frequency for transmission and reception which will be of great use when our repeater is up.

Also squelch circuit which is added will cut off the white noise / johnson noise (fm roar ..hisssss.....) when there is no transmission. Ofcourse volume control ..etc.. are the basics which are included.

Also a socket for AFSK input will be provided for packet radio modem compatibility.

So lets keep our fingers crossed and hope everything works out fine...

Once this system is thru and meets all the requirments.. we can undertake bulk production of the vhf base stn for all martians.!

regards,

Ankur Puranik

RADIO WORKSHOP.

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The Monthly meeting for December 2003 will be conducted on 21st Dec 2003 at 10:00 AM at B.S.Bengelle Girls School, Churchgate.

Congratulations to all the students who have cleared the ASOC Exams, those who did not , well not to worry better
luck next time. Kindly come to the meeting and collect your result sheets.

All the guys from the batches of 2002 whose tickets have come are requested to come for the meeting and collect your tickets. The list of the tickets was already announced earlier. Please come and take your licences lying with the society.

Please note that yahoo groups is not working very well, I myself being the moderator am not getting mails at time, hence pls call your friends and inform them about the meeting..

Note the meeting is at 10:00 AM.

dear nlf,

glad to hear that the vhf base stations
will b ready soon. if u recall, i had made the payment
of Rs. 2k to u for the green bird base station in
march 2003. i have been reading the group mails, but
since i am still based in pune,i am unable to attend
the monthly meetings, nor do i have a computer to
check mails regularly where i stay. i hope to be on
the air pretty soon once the base station is ready.

From: vu2nlf
Topic: 1477 Message: 1477

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The monthly meeting the new year shall be held on Sunday .. 4th January 2004 at 10:00 AM Sharp at B.S.Bengelle Girls School at Churchgate.. (The Doors of the class room will be closed at 10:00 AM Sharp, nobody will be allowed to enter after that.. please note)..

The Agenda for the meeting is as follows:-

Distributation of Licences pending with the society.
Distributation of result sheets pending with the society.
Briefing meeting for Fox Hunt to be held on 25th/26th January at Lonavala (further details to be provided by ZRS)
Finalizing the list of team members for Disaster Management Plan of Mumbai (VHF Network).

We have tried using to pressure the new callsign holders to get on air, but we have failed completely, as they have no shame as they have showed no inclination to get on air.

The following licences are with the society, all the licence holders are required to attend the meeting and collect their licences, The society shall not be further responsible for them or their licences..

GAUTAM KEDIA

JIGAR MEHTA

DEEPAK PATHAK
PRABODH DOSHI

RAHUL SANKAR ROY

UDAY SANKAR ROY

MANDA PAWAR. -

DR. ANUKANTH MITTAL -

DR. PARESH KARIA -

VILAS MORE

KAPIL CHANDNI

HARSHA KULLAR

FEROZE PATEL

BRIJESH RAGHVAN

P.V.HARIDAS

MUKUND GUBBI

MILIND PARLIKAR

ASHOK PARAB

SANJAY SHINDE

GAUTAM KEDIA

NILESH DILIP JOSHI

NEHA PAWASKAR

TRIPUTI NIAK

RAJENDRA PITALE.

VAIBHAV PALANDE

MURUGAN GOUNDER

JESAL DOSHI

A SHIVMANIKAM

JOHAR ATTARI

KUNAL MASHRU

If the above new callsign holder don't collect their licences on 4th January 2004, their licences will be sent back to W.P.C New Delhi with the letter from the society stating " NOT INTERESTED"..

Further the results of last batches of 2003 were announced by VU2UGJ and the students were asked to collect their results sheets during the monthly meeting.. I regret to inform that only 15 out of 65 bothered to come and collect their results. It clearly shows that even these guys are not interested.....

It is quite obvious that the students have no sense of appreciation about efforts put in by many senior members of our society, One really wonders if at the end of the day none of this guys are planning to become active hams, then what is the sense in running the classes and pushing the papers for their licences..

The above incidents have totally demoralized the whole Education Commitee and hence it decided NOT to conduct any more ham radio classes... further more it is decided not to push any more paper work for licences, they may come at their own sweet time in the next 2 or 3 years.... for all we care.....!!! Happy New Year....

1478. FOX HUNT 2004 details . open soon

Yahoo group: m_a_r_s
Date: 2003-12-27 14:58:32 UTC
From: fortunecookie@vsnl.net
Topic: 1478 Message: 1478

Dear MARS members (Life members and ordinary members),

Please read this mail carefully don't party too much on the 31st New Year eve party night, because we have an important meeting on the 4th of January 2004 (happy new year)

One of the topic on the agenda of the 4th Jan meeting is the FOX HUNT 2004

Please read on: -

This will be the 3rd foxhunt MARS will be conducting on the 25 th and 26 th of JAN 2004 at lonavla
The past 2 foxhunts have been a 100 % success

All those interested in participating in the fox hunt please come by 10 am sharp on the 4th of January

MARS has only 15 direction finding equipment, so we will be having only 15 FOX HUNT teams

Each team will consist of 4 fox hunters that means 60 only 60 participants.

We will be conducting 1 treasure hunt and 4 fox hunts during 25 th and 26 th of January in lonavla and khandala , so each and every participant will get a chance to hold the vhf handy and antenna and hunt this time

READ AGAIN

"We will be conducting 1 treasure hunt and 4 fox hunts during 25 th and 26 th of January in lonavla and khandala , so each and every participant will get a chance to hold the vhf handy and antenna and hunt this time "

Since we have only place for 60 participants out of the full 200 plus MARS members we happily inform you that we have to register the participants according what they are able to provide to the MARS FOX HUNT 2004 and not what MARS FOX HUNT always provide them .

e.g. working vhf handy with display bar , car (cost of the petrol will be divided by the 4 participants in the car) , home brewed direction finding equipment with vhf handies , and of course my favorite LIFE MEMEBRSHIP and lastly if place remain ordinary membership .

Participants will be registered on 4th jan 2004 and allotted their teams and cars and etc etc etc

15 cars will leave together from mumbai on the 25 jan together and participate in a treasure hunt on reaching lonavala

Any member who can build his own direction finding equipment will be given preference, technical support and guidance by MARS and have a car and a team can join the foxhunt 2004

We will be testing the MARS DFE antennas on the 4th jan
We will testing your handies with the MARS DFE on the same day so bring your VHF handies

along
We will be allotting you your teams on the same day
We will be finalizing the details of the fox hunt 2004
We will be registering the participants by receiving their entry fees for the event
Entry fee will include veg. food and lodging for 2 days and also the winning prizes only Rs 500 /- per participant

Since we have participation limit we will be making teams on first come first bases in registering .

All those who have any questions about the fox hunt 2004 before the 4th jan meeting email me or call me on 9821025289 "incoming free hai "

1480. NEW FOX HUNT DETAILS OPEN SOOOOON

Yahoo group: m_a_r_s
Date: 2003-12-30 08:21:41 UTC
From: ZYROS ZEND
Topic: 1480 Message: 1480

Dear MARS members (Life members and ordinary members),

Please read this mail carefully don?t party too much on the 31st New Year eve party night, because we have an important meeting on the 4th of January 2004 (happy new year)

One of the topic on the agenda of the 4th Jan meeting is the FOX HUNT 2004

Please read on: -

This will be the 3rd foxhunt MARS will be conducting on the 25 th and 26 th of JAN 2004 at lonavla
The past 2 foxhunts have been a 100 % success

All those interested in participating in the fox hunt please come by 10 am sharp on the 4th of January

MARS has only 15 direction finding equipment, so we will be having only 15 FOX HUNT teams

Each team will consist of 4 fox hunters that means 60 only 60 participants.

We will be conducting 1 treasure hunt and 4 fox hunts during 25 th and 26 th of January in lonavla and khandala , so each and every participant will get a chance to hold the vhf handy and antenna and hunt this time

Subject: [m_a_r_s] licences, results and monthly meeting january 2004
Date: Sat, 27 Dec 2003 17:43:45 -0800

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The monthly meeting the new year shall be held on Sunday .. 4th January 2004
at 10:00 AM Sharp at B.S.Bengelle Girls School at Churchgate.. (The Doors of
the class room will be closed at 10:00 AM Sharp, nobody will be allowed to
enter after that.. please note)..

The Agenda for the meeting is as follows:-

Distributation of Licences pending with the society.
Distributation of result sheets pending with the society.
Briefing meeting for Fox Hunt to be held on 25th/26th January at Lonavala
(further details to be provided by ZRS)
Finalizing the list of team members for Disaster Management Plan of Mumbai
(VHF Network).

We have tried using to pressure the new callsign holders to get on air, but
we have failed completely, as they have no shame as they have showed no
inclination to get on air.

The following licences are with the society, all the licence holders are
required to attend the meeting and collect their licences, The society shall
not be further responsible for them or their licences..

GAUTAM KEDIA

JIGAR MEHTA

DEEPAK PATHAK
PRABODH DOSHI

RAHUL SANKAR ROY

UDAY SANKAR ROY

MANDA PAWAR. -

DR. ANUKANTH MITTAL -

DR. PARESH KARIA -

NEHA PAWASKAR

TRIPUTI NIAK

RAJENDRA PITALE.

VAIBHAV PALANDE

MURUGAN GOUNDER

JESAL DOSHI

A SHIVMANIKAM

JOHAR ATTARI

KUNAL MASHRU

If the above new callsign holder don't collect their licences on 4th January 2004, their licences will be sent back to W.P.C New Delhi with the letter from the society stating " NOT INTERESTED"..

Further the results of last batches of 2003 were announced by VU2UGJ and the students were asked to collect their results sheets during the monthly meeting.. I regret to inform that only 15 out of 65 bothered to come and collect their results. It clearly shows that even these guys are not interested.....

It is quite obvious that the students have no sense of appreciation about efforts put in by many senior members of our society, One really wonders if at the end of the day none of this guys are planning to become active hams, then what is the sense in running the classes and pushing the papers for their licences..

The above incidents have totally demoralized the whole Education Commitee and hence it decided NOT to conduct any more ham radio classes... further more it is decided not to push any more paper work for licences, they may come at their own sweet time in the next 2 or 3 years.... for all we care.....!!! Happy New Year....

From: Ankur Puranik
Topic: 1493 Message: 1493

3 ELEMENT YAGI FOR FOX HUNT

This is a great antenna for a few reasons.
VERY LOW COST
EASY ASSEMBLY
DURABLE AND EFFECTIVE

The construction of the antenna is really simple as you can see from the sketch above. The elements can be made of brass brazing rods or aluminium rods of 1/8" size. The driven element should be spaced at about 1/4" apart. The solder point should be no more than 1/4" thru the other end of the boom. The director and the reflector should be mounted 1/4" from the end of the boom respectivly. The boom is made of schedule 40 PVC. 3/4" works well. When you drill for the elements on each 18" piece of boom, make sure you account for the space inside the T coupler. The picture above shows the antenna for vertical polarization. You can mount it horizontally if you like. Signal attenuation is tremendous when horizontally polarized if you are tracking a vertical signal. The driven element is tunable to whatever frequency you want to TX on.
A simple and effective antenna thats worth building even if you want to use it for something else. I have even used it for packet in a quick fix. A little tuning and you in. Try it!!!!!
THE FINISHED PRODUCT

Source: ..taken from some web site... i dont remember..

Regards,

Ankur Puranik.

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

Once again to remind you, The monthly meeting the new year shall be held on Sunday .. 4th January 2004 at 10:00 AM Sharp at B.S.Bengelle Girls School at Churchgate.. (The Doors of the class room will be closed at 10:00 AM Sharp, nobody will be allowed to enter after that.. please note)..

The Agenda for the meeting is as follows:-

Distributation of Licences pending with the society.
Distributation of result sheets pending with the society.
Briefing meeting for Fox Hunt to be held on 25th/26th January at Lonavala (further details to be provided by ZRS)
Finalizing the list of team members for Disaster Management Plan of Mumbai (VHF Network).

We all go for movies, do we after 15 or 30 minutes after the movie has started ? we don't do we ? we manage to reach on time in order not the miss the movie.... When we go out of station , do we reach the station after the train/ plane/ bus has left ? once again we make sure that we reach much before time so that we do not miss our journey..

So why is that we can't apply the same commitment for our meetings...!! think about it..!!!

==========
Radio Workshop Bulletin
==========

As comitted by Radio Workshop the 2-M VHF base station was ready on the 31 Dec 2003 by afternoon. A small demo was shown to our Resp. Sec. VU2NLF on the 31st itself, who has rated its performance as satisfactory.

Those who were present in the Sundays meeting got to see the rig on display. see this is one of the advantages of attening the meetings ;) ..also a few other professional models were on display...anyways..

All members who have got their results may start installing their antennae and laying the coaxial cable.

And to all those who have received their call signs please try and get on air soon.

all the best!

1497. Minutes of Monthly Meeting conducted on 4th January 2004

Yahoo group: m_a_r_s
Date: 2004-01-05 06:22:02 UTC
From: vu2nlf
Topic: 1497 Message: 1497

MUMBAI AMATEUR RADIO SOCIETY

Dear Friends,

The first monthly meeting of the year 2004 was conducted on 4th January 2004. 41 members arrived on time and the doors were shut at 10:00 AM as promised. 16 more members arrived late who patiently waited otuside till 11:30
and after the tea break they were allowed to attend for the second half of the monthly meeting. In all 57 members attended the meeting..

During the meeting, licences pending with the society were distributed. The result sheets of the last batches of churchgate and thane were also distributed..

Further the absentism of Managing Committee Members was discussed.. (As most of the MC members are not attending the monthly meeting). At least 3 MC members (NLF) & (CBU,AUA - Second half of the meeting) attended the meeting today, where as (RIG,UGJ,ICQ & SXF) choose to remain absent. The Monthly meeting of December 2003 was attended by only one MC member (NLF) , rest all were absent..

MARS has also not conducted it MC member meeting for last 4 months (which is to be conducted every month) and why so was also discussed..

It was unanimously decided that it is a good practice to close the doors for the monthly meeting at precisely 10:00 AM. so that the members who are attending the meeting on time don't waste the precious time for the late comers. All future monthly will be on 2nd Sunday of each month by default (any changes shall be informed with prior notice)..

A question was raised by our members (who are not on internet) that why the information of the meeting is not announced on VHF net.. it was explained there point was duly taken, and as both the net controller (VU2NFS & VU2WLL) are our members and are active on internet, they should make make it a point to make the necessary announcement for the benefit of the members who are not able to access our MARS E- Group..

Further it was decided that the meetings will start precisely at 10:00 AM, regardless of who are not present (including NLF without exceptions). The Secretary will conduct the meeting, but in case he is absent the Chairman will preside over the meeting, In case even the chairman is not present, then the tresurer will do the honours.. if even the treasurer is not available, the any of the remaining managing committee member will conduct the meeting. If none of the MC members are present, then the meeting will stand cancelled and a casual get together will be in order.

During todays meeting, the info about the new VHF sets available in local market offically with bill and warranty was given to all the members.. products like (Yaesu ft-110 vhf handy, Yeasu - ft2800 Vhf base, Yeasu - VX 5R, Motorola - 338 Vhf base, and lastly the latest MARS homebrew 25 watt VHF base by Ankur Puranik - SWL was also displayed).

VU2ZRS discussed the plans for the coming much awaited FOXHUNT (25th/26th January 2004). Alive demo was given of the FOXHUNT by displaying the FOX and the Directional Finding Equipment.. The priorities were also explained about the participation for the foxhunt (Limited seats only). Such as members bringing their own Homebrew DFE will be given top priority.. etc... many members have shown keen interest in making their own DFE.

In all it was a productive meeting... it was nice to see 57 members at the meeting.. let us hope we have atleast twice as many in the next meeting from our 230 + members...

Hello FreinDs

just a correction , MEETINGS ARE ALWAYS TO BE
CONDUCTED BY CHAIRMAN , IF NOT AVAILABLE THEN ONLY BY
SECRETARY , BUT WE HAVE ALWAYS THE CASE WHERE CHAIRMAN
OR CHAIR PERSON WERE MISSING SO ITS KINd OF PATTERN
SET THAT SECREATARY CONdUCTS IN OUR CASE.

AND CLOSING OF DOORS IS RIDICULOUS ITS A CLUB MEETING
NOT AN SCHOOL CLASS , ANd ALL dECISIONS TAKEN WILL
HAVE TO BE RATIFIEd AGAIN AS ONLY 3OF 7 MCS WERE
THERE.

nothing more to adD .

De vu2ugj

ps: all letters in caps inDicate am bit vocal abt it

1499. Amateur Radio Assists in Iran Earthquake Relief

Yahoo group: m_a_r_s
Date: 2004-01-05 04:31:29 UTC
From: Huzefa Merchant VU2HIT
Topic: 1499 Message: 1499

Amateur Radio Assists in Iran Earthquake Relief:
Turkey Amateur Radio Club President Aziz Sasa,TA1E, reports that three Amateur Radio operators joined the Turkish Relief Team that departed for the incident location--the city of Bam, some 600 miles south of Tehran--from Istanbul December 27 aboard a military aircraft. Local communications will be carried out on 2-meter simplex with HF operation on 14.270 MHz during the day and on 7092 kHz or 3777 kHz during hours of darkness. Soyhan Erim, TA2IJ, will handle HF operations at the Turkish Incident Command Post. He is part of the Ministry of Health team. Erdinç Sarimusaoglu, TA2RJ, is part of the AKUT Search and Rescue Team, while Mustafa Yuceturk, TA1CAN, is a member of the Istanbul Civil Defense Search-and-Rescue team. Also on site is Serdar Demirel, TA2NO, a member of the Ankara Civil Defense SAR team, who arrived earlier.

From: Shantanu Chand
Topic: 1501 Message: 1502

Dear MARS Members,

After Looking at the statistics below i have some suggestions.

I am a memeber of the ALL INDIA GLASS MANUFACTURERS'FEDERATION. This is a body of all glass manufacturers' in India.

We have a simple rule. There is an executive committee meeting held quarterly ie four meetings in a year. We faced a similar problem of non attendence. It was then decided that if any member who did not attend 50% of the meetings and if the Managing committee members did not attend 75% of the meeting then the following actions took place:
1. the managing committee member was stripped off his post unceremoniously.
2.The defaulters in the members section were thrown out of the Federation.

The above criteria did ensure that we had almost 80% attendance at all meetings even though they were at 4 different locations of the country ie. New Delhi, Mumbai, Bangalore and Calcutta.

This of course is a prestigious body with MDs, CEOs and other senior people who too have busy schedules.

In case a member is NOT able to make it, he/she has to send in a letter of absence and then and only then will they be exempt from the above rules.

I feel in the case of MARS which is more of a club than a Business Body members feel that it might not be so necessary to follow the discipline mentioned above. The reasons i believe are noted as follows. These are my views and after observing almost 5 such meetings
1. Meetings take up too much time.They should be over within 2 hours to maintain the interst of those attending.
2. If members turned up on time then repition of the same points in the agenda would not take place.
3. Similar points are discussed in great detail in meetings back to back because some members were not present for the previous one.
4. There are times when the agenda goes out the window

and non issues become center of discussion.

This my suggestions are:
1. Agenda of the meeting to be posted on the yahoo group and if possible a summary stated on the air at the time of the Night Owl's Net.

2. The date and the time for meetings should be fixed well in advance, say a week or ten days.

3. A request for punctuality should be repeated but late comers should be admitted to the meeting. The locking out of 16 members last week should have sent a clear signal to all. In my opinion 30 minutes should be the grace time given, after which whatever action the managing committee feels fits should be meted out.

4. A dias should be set up with name plates of the office bearers in front so as to enable the members to know exactly whose seat is vacant.

5. The meeting should start on time, if there is the required quorum and should try and finish before 1 pm so as to enable the members attending to get back home to their families for lunch as it is a Sunday(Family Day)!!

6. The agenda to be stuck to with a provision at the end of the meeting as "Any other matter with the permission of the chair".

7. Minutes should be maintained and circulated by means of electronic media or other.

8. Some minimum attendance criteria should be enforced for the office bearers.

If the above points are adhered to I am sure there would be a better turn out and more discipline. It will also make the meetings more enjoyable and interactive.

I hope this mail is viewed positively as it is with the intent of helping MARS grow both in volume as well as participation of the members.

All the best for the coming year!!
Regards
SC

Dear members (FOX HUNTERS)

Good news the climate in lonaval and khandala is extremely cold and the weather should and will hold till the 25 th 26 th of jan 2004

On the day of the meeting of 4th jan 2004 itself we had 48 participants who registered for the FOX HUNT by paying in full amount of Rs 500 /- and some have paid a advance of Rs 250 /- THANK YOU (remaining money will be collected before the event or the day of departure .)

Many participants have tested their handies with the direction finding antennas with the fox
Many participants have confirmed the availability of their cars and handies

Please keep opening your mail for further details on the FOX HUNT 2004 and feel free to call 9821025289 for and questions

Till then

Dear Members,
As mentioned by my dear friend that 30 mins grace should be
allowed I think that it instead of 30 mins only 10 mins grace should be
allowed.As people than tend to make it a habit of coming late and meeting
would start late.Regarding the timings of the meeting I think that it should
start at the time mentioned and ending time should not be fixed as we have
to reach conclusions to the agenda of meeting and take some important
decissions have to be taken.
I am in full agreement with my friend on the attendance of
commitee members if they don't attend more than 75% of meeting they should
be stripped of their posts and also on other suggestions.
I hope that this mail be taken in a very positive way for the
development of our club.

1506. QST December'2003

Yahoo group: m_a_r_s
Date: 2004-01-09 09:14:35 UTC
From: VU2UGO
Topic: 1506 Message: 1506

Now available in MARS Library!!

QST - DECEMBER'2003 Contents :-
a.. A Homebrew Condenser Microphone - By Sam F. Kennedy Jr, KT4QW
Build a condenser microphone that will perform like the costly commercial units..plus, you won't need an expensive equalizer. Sounds good!

b.. Your Uncle's Meters - By Miles B. Anderson, K2CBY
Mix Uncle Sam's red, white and blue with green, gray and yellow and put a great meter on the bench and in your emergency kit!

c.. The PicoKeyer - An Ultra Low Power CW Memory Keyer - By Dale Botkin, N0XAS
N0XAS redefines "low power" for us with a keyer that draws 4nA (that's 0.004 microamperes!) at idle.

d.. Emergency Power at W1ZR - By Joel R. Hallas, W1ZR
Remember the recent Northeast power failure? Operate your station from battery power all the time and be ready for similar emergencies without operator intervention.
For more info about auto & deep cycle batteries check www.uuhome.de/william.darden
www.douglasbattery.com/gproducts/pdf/dg12-80.pdf
www.guestco.com/chargepro/chargepro.html
www.ibexmfg.com
www.xantrex.com
www.westmountainradio.com

e.. Field Day 2003 from Cuba - By Chip Margelli, K7JA
The CO0US/T42FD story - a groundbreaking Field Day Experience

f.. A Voice from the Ether - B.H. "Tex" Burdick, W5BQU - By Steve Barreres, K2CX
Still active after 70 years of hamming, Tex is not your typical 103 year old.

g.. Kid's Day 2003 - The No Cost Investment in Amateur Radio - By Jean Wolfgang, WB3IOS
The future of Amateur Radio would be secure if we could all write checks for a few thousand dollars. Kid's Day is an investment we can all make... and you don't need to touch your checkbook!

h.. Front Panel Layout - Another Approach - By Bob Kavanagh, VE3OSZ
Here's one more way to make that homebrew project shine.

i.. The Ham in The Hat - ARRL Field Day 2003 - By Dan Henderson, N1ND, Contest Branch Manager

j.. Public Service
Incident Command System (ICS) and Amateur Radio Communication Teams
More info about ICS is available at training.fema.gov/EMIWeb/IS/is195.asp and
www.nysemo.state.ny.us/TRAINING/default.htm

k.. Product Review -
a.. Fluidmotion SteppIR SmallIR Vertical Antenna
With the SmallIR, SteppIR extends their successful, remotely tuned antenna line into a range suitable for small lots and other restrictions)
www.steppir.com

b.. Heil Pro-Set Plus Headset with Boom Microphone
Heil has added some useful features to a popular product. The Pro-Set Plus both "listens" and "talks" very well and now has additional flexibility in microphone response and headphone spatial distribution.
www.heilsound.com

l.. New Products
a.. New Radio Kits From Kenneke Communications (www.kenneke.com/radiokits.html)
b.. Diamond MX610 HF/6 Meter Duplexer (www.diamondantenna.net)
c.. DXTREME Station Log - Multimedia Edition (www.dxtreme.com)
d.. Piper Morse Decoding Software With Auto-Spacing (www.polar-electric.com/Morse/MRP40-EN/TextFormatting.html)
e.. Hy-Gain AV-18AVQII Multi-Band HF Vertical (www.hy-gain.com)
f.. DSWK Replacement PIC Chip for small wonder radios (jacksonharbor.home.att.net/dswk.htm)
g.. 2003 Christmas Key From Morse Express (www.MorseX.com)
h.. 20MHz Arbitrary Waveform Generator (www.agilent.com/find/33220A)
i.. Fully balanced antenna Tuner from MFJ (MFJ-974H www.mfjenterprises.com)
j.. Software Defined Transceiver from Flexradio System (SDR-1000 - www.flex-radio.com)
k.. Stackmatch II from Array Solutions (www.arraysolutions.com)

a.. New Advertisements
a.. Antenna Tuners - www.ldgelectronics.com
b.. Radio Amateur Callbook 2004 Winter Edition
c.. Kenwood TS-480HX 200w HF(100w 50-54MHz) & TS-480SAT (100w with built-in tuner) www.kenwood.net
d.. Yaesu FT-7800R 144/430MHz Dual Band www.vsstdusa.com

b.. Regular Features -
a.. Help Desk
b.. The Doctor is IN (Advantages of Iambic key over a vibrating type key and many more)
c.. Short Takes (Global Overlay Mapper, www.qsl.net/ei8ic/)
d.. Hands-on Radio (Experiment #11 - Comparators www.national.com/ds/LM/LM311.pdf, www.national.com/ds/LP/LP311.pdf, www.national.com/ds/LM/LM339.pdf),
e.. Hints & Kinks (More on Aviation Headsets, Mic gain on the radioshack HTX-100, ICOM IC-910H Amplifier Keying, Reseal Corrogated Boxes easily)
f.. Happenings (ARRL rebuts "Broadband Nirvana" while broadcasters join Anti-BPL Chorus
g.. The World above 50MHz (Records Galore : Tropo in September),
h.. How's DX? (3Y - Peter-I Island),
i.. Old Radio (Microphones),
j.. Digital Dimension (The Best DCC Ever!!)
k.. Amateur Satellites (Satellite Status : Staying Up-to-date, Why hasn't AO-40 deployed its Wings?)
l.. QRP Power (Homebrew QRP)
m.. At the Foundation, FCC News, Correspondence, Workbench, Feedback, Hamfest Calendar, Strays, Technical Correspondence, 75-50 & 25 Years Ago, Contest Corral, Hamfest Calendar,

Coming Conventions, Special Events, Ham Ads
